Amount of 1st instalment due February	501,665	18	4

The average price at which the Indian loan of 3,000,000*l* has been taken is exactly 98*l* 14s 5½d.

The mercantile advices by the last mail, from Australia, have rather improved public confidence. There seems no reason to doubt that the disposition to export has received an effectual check, though the returns of imports and exports on this side exhibit a very considerable excess of the former, even adding our export of debentures during the last two years. The markets are still supplied beyond our purchasing power. The account of imports and exports for the last two years stands thus:—

	1859. £	1860. £	Both Years. £
Imports	14,022,320	13,799,539	27,821,859
Exports	12,251,856	11,519,363	23,771,219
Excess	1,770,464	2,280,176	4,050,640

The production of gold during the last quarter shows symptoms of improvement as compared with the first three quarters, though it is less than the production of the corresponding quarter of 1859. The quantity received by escort during the last thirteen weeks is 500,434 ounces, against 520,580 ounces in 1859. Thus the deficiency is only 20,000 ounces. But the total deficiency of the first three quarters was 180,000 ounces, or an average of 60,000 ounces a quarter, as compared with 1859. The total quantity received by escort this year is 1,970,817, to which about 40,000 ounces will be to be added for the last week of the year. The quantity last year was 2,171,865. The shipments are 2,056,939 this year, against 2,211,864 last year. But there will be two vessels sailing with gold during the week, so that the year's deficieney, as compared with last year, will not much exceed 100,000 ounces. The gold ships afloat are the Hebe, 7,310 ounces; the Moravian, 2,418; the Lincolnshire, 13,070; the Thames, 11,739; the Ydale, 5,780; the Monarch, 22,497; and the Ocean Chief, 22,970.

The half-yearly meetings of the several joint stock banks in London being now completed, the subjoined tables have been made up, exhibiting their position. The first table shows the period at which each bank was founded, together with its subscribed and paid-up capital; the second shows the amount of liabilities and rates of distribution for the past half-year; the third the liabilities, including paid-up capital, the assets, and net profits; and the fourth, the progress of the several establishments during the past eleven years. The current accounts and deposits held by these eight establishments now amount to a total of 44,143,181*l*, or 4,288,103*l* more than the total at the corresponding period of last year. The London and Westminster shows an increase of 1,368,757*l*; the London Joint Stock, 1,005,861*l*; the Union of London, 1,034,312*l*; the London and County, 557,585*l*; the City, 245,584*l*; and the Bank of London, 98,249*l*. The Commercial and Unity both show a small decrease—the former, 17,690*l*; and the latter, 4,555*l*:—

* Including £75,000 in freehold premises.
† Including £24,416 investments in bank premises and Brighton freehold.
‡ £60,000 reserved to cover losses in the leather trade.
§ Absorbed by Pullinger's frauds.

The Mexican intelligence *viâ* New York is to the 23rd of January from Vera Cruz. The Constitutional Government was in full operation in the capital, and the American Legation had removed thither. A national Congress has been summoned for the 16th of April. Passports had been sent to the Spanish Minister, the Papal Nuncio, and the Ministers from Guatemala and Equador. The Spanish residents were much excited at the dismissal of their representative, but the measure is believed to have been essential, the Spanish Legation having long been the refuge of the most inveterate promoters of anarchy. The prospect of the establishment of a solid Government is evidently becoming more strong, and all friends of commerce and civilisation must greatly regret the neglect on the part of our own

Foreign Office of the steps that at this juncture might best have assisted that consummation.

The East India and London Shipping Company will despatch their first vessel to Calcutta, *viâ* the Cape of Good Hope, in the first week of May next, and as she will employ her steam power in calms and light airs, and on making port, she must make a much more rapid passage than any sailing vessel afloat. Her auxiliary screw power will be specially serviceable on making the sand heads of the Hooghly, and on ascending that river. In Garden Reach she will necessarily avoid the constant tacking and consequent delay to which sailing vessels are subjected to ere they can anchor at Calcutta. A statement that the vessels of the Company were likely to be sold to a foreign Government is without foundation. They will all be employed in the service for which they have been recently engaged.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 3 per mille premium, and the short exchange on London is 25.22½ per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 1-10th per cent. dearer in Paris than in London.

The course of exchange at New York on London for bills at 60 days' sight is 106½ to 107 per cent., which, when compared with the Mint par between the two countries, shows that the exchange is against England. The present rate however, leaves no profit on the transmission of gold to the United States.

Imports of the week ..... 268,221 qrs.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

There was a very poor show of English wheat at Mark lane today, which sold at Monday's currency. In the value of foreign wheat no change took place. Barley, malt, oats, beans, peas, and flour were tolerably firm in price. The imports from abroad are 3,960 quarters of wheat, 3,200 barley, 4,230 oats, and 10 sacks of flour.

At Liverpool, this morning, fine wheats were firm, but inferior parcels were 1d to 2d lower. Other produee ruled about stationary.

At the commencement of the present week the demand in the Liverpool cotton market was very limited, owing to the heavy arrivals having checked business, but since then, until yesterday, the market showed all symptoms of an improvement, when the sudden and unexpected rise in the Bank rate of discount acted once more as an impediment to the apparent improved tone of the market, and some sales were effected at a decline of ¼d per lb. The dear rate of the money market has been a hindrance of late to any speculative inquiry for the article; but, on the whole, the feeling for the future position of cotton is not unfavourable, the crop anticipated not being equal to the requirements. The sales of the past week in the Liverpool cotton market amount to 32,000 bales, and include 20,000 bales to spinners, 3,000 bales on speculation, and 9,000 bales for export. Quotations generally are ⅛d to ¼d per lb below last Friday's rates. Sales to-day, 3,000 bales; market very quiet.

In reference to the new crop of cotton, Messrs Neill and Co., of New York, write as follows per the last mail:—"The course of receipts is now attracting much attention. There is no longer any desire to hold back the crop, but, on the contrary, a strong desire to hasten it to market. Prices are remunerative, the fear of immediate hostilities has passed away; and in view of the large quantity held back, planters in the meantime are anxious to realise. Large receipts are, therefore, to be expected for some time. The deliveries at New Orleans this week almosts equal the largest on record—being 113,000 bales against 119,000 the largest previous week. Deliveries on this scale, should they continue, cannot fail to influence crop views, and we already find more disposition to rely upon the higher estimates."

The state of the cotton trade at Alexandria to the 2nd instant is thus reported by Messrs Briggs and Co.:—

A considerable business has been done in cotton during the past week, and prices have improved 14.100d to 28.100d per lb. The following are the sales since our last, with prices free on board:—3,684 bales ordinary to middling, 8d to 8.42d; 1,850 bales fair to good fair, 8.45d to 8.85d; 1,032 bales good to fine, 9.42d to 10.50d; total, 6556 bales. Freights—By steamers to Liverpool, ⅝ths; by sailing ships, ⅝ths to ⅝ths and 5 per cent.

SHIPMENTS of COTTON from ALEXANDRIA from 3rd Oct. to 1st Feb.

The public sales of tea have passed off steadily, at full prices; whilst, by private contract, the transactions have somewhat increased, at extreme rates.

The annexed commercial report is dated Hong Kong, Dec. 31:—Canton Silk.—No transactions have taken place, and quotations remain unchanged. Tea.—Settlements of congou during the fortnight amount to 45 chops, at an advance on last mail's quotations, and prices are likely to rule higher, owing to desirable parcels on offer being so limited. Some 30 chops more will close this season's supply, making a total of 400 chops. Supplies of country greens are shortly expected, and are likely to be taken at extreme rates. Foochow.—Advices are to the 22nd inst. Tea.—During the past fortnight a good amount of business has been done, transactions being for the United States, colonies, and the English market. Prices have been fully maintained. Stocks are decreasing, and supplies from the country are small. Oolongs have been taken for America. Souchongs, none remain on the market. Pekoes and scented teas, little done. On comparing prices with those ruling on the 7th inst., congou and Oolong are rather firmer. Other kinds unchanged. Shanghai.—Advices are to the 22nd inst. Silk.—Settlements are reported at 4,000 bales, making the total for the season 59,000 bales. Of these 4,000 bales, not more than 2,500 have been purchased at Shanghai, the remainder being received on contract, and Japan. Prices remain as last quoted, and very firm. Total export of silk from Chipa to Europe is 53,312 bales, against 39,375 bales to same time lost year, showing an increase of 14,437 bales for this season. Tea.—There is no alteration to notice since the 5th inst. Arrivals have been extremely small, which causes great firmness in holders. Settlements of black are as follows:—Congou, Ningchow, 2,100 chests, at 27½ taels; Hohow, 200 chests, at 24 taels; Shanghai packed, 800 chests, at 16 taels; pekoe, 300 chests, at 35.5 taels; total, 3,400 chests. In addition to the above, 3,300 chests contract tea. Stock, 5,000 chests, principally Hohow and Ningchow. Green Teas.—Little business has been done, owing to very trifling supplies. Settlements are reported at 3,800 half-chests China, and 2,300 half-chests Japan. Stock, 2,800 half-chests. Arrivals at Ningpo are put down at 5,000 packages, of which 1,500 are reported settled for the American market. Total export of tea from China to Great Britain is 53,257,800 lbs, against 49,374,200 lbs last year, or an increase for this season of 3,883,600 lbs. To the United States the export is 18,166,400 lbs, against 21,594,300 lbs, or a decrease of 3,427,900 lbs for this season.

IMPORT and DELIVERY of TEA in London, from Jan. 1 to Feb. 1, 1860 and 1861, with STOCK on hand on Feb. 1, 1860 and 1861.

On the whole, there was an improved sale for nearly all kinds of raw sugar in the early part of the week, and, in some instances, prices were the turn higher. The advance in the value of money at the Bank of England to 8 per cent. has since checked operations, but without leading to any change in value. Refined goods have continued heavy, on former terms.

The total receipts of foreign molasses into the United States for the year ending December 31, 1860, were 31,126,015 gallons, against total receipts in 1859 of 28,960,175 gallons, and the consumption of foreign descriptions was 28,724,305 gallons, against a consumption in 1859 of 28,293,210 gallons, while the total consumption of foreign and domestic in 1860 was 47,318,877 gallons, against a total consumption in 1859 of 54,260,970 gallons, showing an increase in the consumption of foreign of 430,995 gallons, or over 1½ per cent., but a decrease in the consumption of all kinds of 6,942,093 gallons, or nearly 13 per cent. The receipts

and consumption of foreign in 1860 were much larger than before in several years, owing to the crop of domestic of 1859-60 being considerably below the average yield. The crop of Louisiana, &c., now coming forward, it is estimated, will not be any larger than the previous season, and very probably will be considerably less. Of the receipts into the country the past year about 60,000 hogsheads have been taken by sugar refiners, 50,000 by distillers, and the remainder have been distributed among the trade, exporters, &c.

The transactions in native and plantation Ceylon coffee have somewhat increased, and the currencies have been firmly supported. Other descriptions have changed hands slowly at about previous rates.

The coffee market is thus reported by Messrs Volkart Brothers, of Ceylon, to the 16th ult.:—

The weather has been generally favourable for shipping operations, which have, however, not been quite so active as usual at this season. The exports of the season's crop to date are as follows:—

PLANTATION COFFEE.

To Great Britain .....cwts	88,621	against last year, cwts		91,928
Foreign Ports	3,926	—	—	6,265
Australia and India.....	5,934	—	—	4,418
	98,481			102,611

NATIVE COFFEE.

To Great Britain.....cwts	23,796	against last year, cwts		41,970
Foreign Ports.....	8,179	—	—	8,287
Australia and India.....	3,441	—	—	493
	35,416			50,750

Although the weather has been fine, the quantity of plantation coffee received from the interior has not been large. A few transactions in parchment have taken place, at previous rates. There is but little offering in native coffee, whilst former contracts are still incomplete. The value of this description has been nearly maintained, in spite of the general low quality of the article. Plantation coffee, low, per bhl, nominal; do. mountain, 11s 3d to 11s 6d: native coffee, unpicked, per cwt, 42s 6d to 43s; do., picked and dried, 45s 6d: cinnamon, plantation, per lb, 9d; do., inferior, 6d to 7d.

All kinds of rice have met a dull sale, and the transactions have continued wholly in retail at late quotations.

Mersrs Neibuhr and Co., of Rangoon, have favoured us with the annexed report of the rice trade for 1860:—

Our principal staple article, although we had a very good crop of it, shows only the comparatively small increase of 105,861 baskets in our exportation, of which 51,257 baskets fall in to the increase of exports to Europe, and 130,982 baskets to the Straits and China, whereas in that to the other ports of India, as Madras, Chittagong, Maulmain, Tavoy, and Mergui, there was a decrease of 76,378 baskets. Although not believed at the time, we have had a very large exportation to Burmah Proper; that by boats via the frontier consisted during 11 months in 1,747,084 baskets paddy, and 211,376 baskets rice until ultimo November. The prices the whole year round kept up above our expectation; the lower prices of 48 to 50 rs for paddy ruled only for a short period, and we may call 58 rs per 100 baskets equal to rs 111-8 per 100 baskets 6 part rice in the good or rs 119 in or after the rainy season about the average price: rs 111½ for 6 part rice would be equal to 6s 3d per cwt free on board. The prospects for the coming season are unsually good.

The silk market has been in a most inactive state. Prices, however, have ruled about stationary.

The indigo sales have commenced, and, up to the present time, they have gone off briskly. Middling Bengal qualities have advanced 4d, Oudes 3d to 6d, and Kurpah 4d to 7d per lb. Madras has sold at par. Up to this evening, 7,719 lots have passed, of which, 2,384 have sold, 2,415 been bought in, and 2,380 withdrawn.

Writing on the 8th ult., Messrs Moran and Co., of Calcutta, report the indigo market as under:—

The report of an improved demand at 4d to 8d per lb advance on the October sales' rates (the higher figure being on low qualities, on which there was a heavy decline in October,) has given support to our sales, which go off briskly at slightly improved rates. About 56,000 mds are now out of the market, and in that amount are included nearly every good mark of Lower Bengal indigo and about one-half of those of Tirhoot, so that the quantity of good indigo remaining is proportionately small. The quantity of the Tirhoot crop does not improve on acquaintance: some marks are fine, but many are certainly not up to last year's quality, and on the whole we are disappointed with the out-turn of that district. This falling off in certain localities is attributable, we believe, to a scarcity of fresh water for manufacturing purposes. We are glad to be able to notice with regard to the crop generally that it is better dried than usual. As regards the total out-turn of the season, the invoices which have arrived confirm our estimate. Exports of indigo from the 1st November, 1860, to the evening of the 7th current:—To Great Britain, 7,040; to Havre and Bordeaux, 3,625; to America, 103; to Gulf, &c, 239—total, 11,007 chests.

Spirits have mostly realised full quotations; but hemp has fallen 10s per ton, with a heavy market. In wool, so little is passing that prices are almost nominal.

The oil market has been very flat. Linseed oil, on the spot, has sold at 28*l* 5s.

Tallow ha moved ff slowly evertaele the quotations have continued steady. To-day, P Y.C., on the spot, has sold at 60s; February to March, 60s; April to June, 58s 6d; October to December, 56s 6d per cwt.

"The late feverish feeling in the money market," observes the New York *Shipping List* of the 30th ult., "has given place to a steadier and calmer tone, approaching to dulness. The demand for good endorsed notes is in excess of the supply, and the market is in favour of the borrower. Prime paper continues scarce, and in the absence of any special activity in mercantile circles, this scarcity will probably prevail until we make a nearer approach to spring, when, quite irrespectively of political agitation, many important branches of trade must experience a revival. The recent issue of Treasury notes has relieved the market of some of its surplus, while the continued heavy receipts of gold from Europe enables the Banks to keep up the specie reserves to high water mark. The business in discounts outside of Bank is extremely limited, owing to causes already stated. Call loans are in moderate demand. We repeat our quotations:—

	Per cent. per annum.	
Loans on call, stock securities	5	to 6
Do. other good securities	6	7
Prime endorsed bills, 60 to 90 days	7	8
Do. 4 to 6 months	8	10
First class single signatures	10	12
Other good bills	12	15
Names less known	18	24

The Bank statement for the week shows a large decrease in the loans and deposits, while there is a loss in specie much less than was looked for, seeing that the Sub-Treasury received upwards of three and a half millions during the week on account of the Government loan. We subjoin the usual summary, compared with the returns of the previous week:—

	Jan. 19. dols		Jan. 26. dols		dols
Loans	126,034,520	...	123,935,153	Dec.	2,099,367
Specie	29,598,783	...	28,968,941	Dec.	629,842
Circulation	8,067,570	...	7,929,293	Dec.	138,272
Deposits	89,688,696	...	87,386,046	Dec.	2,302,650

The foreign trade of the port continues to work satisfactorily. The imports are considerably ahead of those of last season, but much below the entries for 1859."

IMPORTS OF FOREIGN AND COLONIAL WOOL.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Jan. 30.—FLOUR AND MEAL.—The market for State and Western flour assumed a somewhat more animated appearance immediately subsequent to our last review, and, with a good demand for export, nearly all grades appreciated about 5 cents per bbl, at which a fair business was done. The market has been less buoyant during the present week, but prices are generally supported, though, in some cases, the advance noted above has been lost. The sales for the three days foot up 37,000 bbls. The demand for Southern flour has been moderate, and the market is scarcely so firm. Corn meal is also dull, and may be quoted a shade lower. Transactions during the three days are unimportant.

EXPORT, from 1st to 29th January.

	1861 barrels	1860 barrels
Wheat Flour	152,144	49,303

GRAIN.—With an increased demand for shipments, the market for wheat has been more lively, though prices have favoured purchasers throughout. The demand from the local millers has fallen off somewhat, and the bulk of the sales has been made for shipment. The continued firmness in the rates of freight, together with unfavourable weather, has restricted operations, but the aggregate transactions are nevertheless to a fair extent, comprising 217,000 bushels, including 18,600 Milwaukee Club and amber Iowa and Wisconsin, at 1.27 dol to 1.28 dol; 700 red State, 1.30 dol; 10,000 Canada Club, 1.26 dol; 16,000 white Indiana, 1.48 dol to 1.49 dol; 250 white Kentucky, 1.65 dol; 6,000 ditto Canada, 1.57 dol; 13,500 winter red Western, 1.31 dol to 1.35 dol; and 6,100 Chicago Spring, 1.18 dol, closing steady. Corn is steady, under a moderate demand for consumption and shipment, at slightly improved prices; the transactions comprise 152,000 bushels, at 70 to 72 cents for round yellow, 69 to 70 for Western mixed, and 68 for unsound.

EXPORT from 1st to 29th January.

	1861 bushels.	1860 bushels.
Wheat	746,192	50,196
Corn	526 089	4,149

NEW YORK, Feb, 1.—The flour trade is firm, and prices are well supported. Wheat, however, is a dull inquiry, at barely late rates. Maize commands a very limited sale, and the quotations have a drooping tendency.

EXPORT of BREADSTUFFS from the UNITED STATES to GREAT BRITAIN and IRELAND, since September 1, 1860.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Notwithstanding that very moderate supplies of home-grown wheat have been on offer in the leading markets of consumption held this week, the demand for all kinds, owing to the continuous influx of produce from abroad, has been very inactive. In prices, however, scarcely any change has taken place. Foreign wheat has commanded a fair amount of attention, on former terms. Fine barley has sold steadily—inferior parcels slowly, at about previous rates. We have no change to notice in the demand for, or value of, malt. The oat trade has continued steady; whilst both beans and peas have commanded full currencies. The flour trade has been tolerably firm, and some large parcels of American flour have changed hands, both here and at Liverpool.

Throughout the Continent, wheat has moved off slowly; nevertheless, holders have continued firm in their demands. All spring corn has commanded quite previous rates. In the United States, the supplies of breadstuffs on offer are very large for the time of year; yet the export trade has somewhat improved, and prices have shown a hardening tendency. The shipments of both wheat and flour continue somewhat extensive.

The demand for wheat in Scotland has been far from active; nevertheless, the quotations have ruled steady. Barley and oats have realised extreme rates; but other kinds of produce have met a dull inquiry.

In Ireland, scarcely any movement has taken place in the value of any kind of produce. Fine wheat, barley, and oats are selling steadily—other articles slowly, with only moderate shipments to England.

At Mark lane, to-day, the supply of wheat was limited. Good dry samples sold freely at fully previous rates, but damp parcels were very dull. In foreign scarcely any business was transacted, owing to the advance in the rate of discount, and holders appeared somewhat anxious to realise. Spring corn was steady as regards all descriptions, and no alteration can be reported in its value. The flour trade ruled firm, and prices were well supported.

Mr Ed. Rainford thus reports the state of the floating trade:—Since the 7th inst. there have been 29 arrivals off coast for orders, consisting principally of wheat and barley, viz.:—Wheat, 1 cargo from Marianople, 1 Berdianski, 3 Odessa, 2 Santander, 3 Ibraila, 1 Kertch, 1 Salonica, 2 Alexandria, 1 Eupatoria, 1 Galatz; maize, 1 New York, 1 Ibraila, 1 Constantinople; barley, 1 Ibraila and Galatz, 3 Odessa, 1 Nantes, 2 Sulina, 1 Berdianski, 1 Ibraila; beans, 1 Girgenti. Of the foregoing, 2 or 3 were sold previous to arrival. Although there has been a fair amount of business done since this day week in cargoes afloat, it has fallen off to some extent from the sales of last week. The following are the reported transactions up to the close of to-day's market:—Wheat, arrived, per 492 lbs, Marianople, 2 cargoes at 56s 6d; Berdianski, 1 at 56s 6d; hard Odessa, at 49s and 50s 3d; hard Taganrog, at 51s 9d; Venetian, 59s; new Mantua, 59s 9d; Mantua, about 58s; per 480 lbs, white Tuzella, at 68s; Polish Odessa at 55s, and an extraordinary fine small cargo at about 62s to 62s 6d; Galatz, 49s 1½d; Ibraila, 4 cargoes at 43s 9d to 45s 3d; Wallachian, 44s; Bourgas, 51s 9d; Roumelian, 42s 9d; Kalafat (some damage), 42s 6d; per imperial quarter, Saide, at 42s 6d and 42s 9d. Maize, arrived, per 492 lbs, Galatz about 41s 6d, and Odessa (heated and discoloured) at 40s; per 480 lbs, Ibraila (only 1 lay day) at 39s 9d, and American about 40s; on passage, Ibraila and Trieste, 39s 9d, condition guaranteed. Barley, arrived, per 400 lbs, Galatz, 2 cargoes at 28s (1 no lay day, 1 not perfect); Ibraila, 29s; Varna, 29s; Turkish (not perfect), 28s 3d. Locust beans, arrived, Cyprus, 6l per ton.

The London averages announced this week are:—

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS, SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The public sales have gone off with greater steadiness at the recent decline, but the market generally has been devoid of animation, and is now quiet again, owing to the sudden advance on the Bank rate. Transactions in West India to yesterday (Thursday) amounted to 1,678 casks, including the parcels offered by auction. Barbadoes, 40s to 43s 6d; grainy Demerara and Berbice, 38s 6d to 43s 6d; heavy brown, 36s to 38s

per cwt. The deliveries last week rather exceeded the landings, the former being 4,385 tons, leaving the stock at the close 48,950 tons, against 53,500 tons in 1860. There is a decrease of 3,900 tons perceptible in the deliveries since the beginning of the year.

Mauritius.—The sales have comprised 14,550 bags, of which the bulk sold at about the previous value: brown, 32s 6d to 36s; low grey to good greyish yellow, 36s 6d to 39s 6d; grainy dark brown and low grey, 35s to 37s; low to fine grainy yellow, 37s 6d to 43s; crystallised, 40s to 43s 6d. A floating cargo of Mauritius, No. 11¼, has sold at 26s 3d for the United Kingdom.

Bengal.—1,622 bags partly sold at the former value: grainy yellow, 40s 6d to 44s; middling to good Cossipore bought in at 42s 6d to 43s; middling to good white Benares, 45s 6d to 46s 6d per cwt.

Madras.—3,553 bags grocery found buyers, as follows: dry grainy white, 45s to 50s; yellow, 40s to 44s 6d; low to good soft yellow, 36s 6d to 39s 6d. 833 bags native brown Madras, 31s to 32s per cwt.

Foreign.—At auction, 546 boxes Havana partly sold at 38s to 41s for low to good yellow. 320 casks Cuba, of indirect import, went at 35s to 40s 6d for brown to good yellow. Privately, 4,000 bags brown Bahia have sold at 34s, and 5,000 bags Pernambuco at 34s. A floating cargo of Havana is reported for a near port, No. 11¼, at 25s 6d. On the spot, 3,200 boxes Havana have realised 36s to 40s 6d per cwt.

Penang.—3,600 bags, at public sale yesterday, went off well, and obtained full rates: brown, 32s 6d to 36s 6d; soft grey to fine bright yellow, 37s to 40s per cwt.

Refined.—There has not been any increase in the demand this week, but general quotations are unaltered, viz, 50s to 51s per cwt for low to middling dry goods, the supply of which remains very moderate.

Molasses.—A parcel of fine Barbadoes sold at 19s per cwt.

Rum.—There has been a good deal of business done, but at slightly lower rates: Demerara, 1s 10d to 1s 11d; Mauritius, 1s 8½d per proof gallon.

Cocoa.—120 bags Grenada, by auction, sold at rather lower prices; from 58s to 60s per cwt for ordinary to middling greyish red.

Tea.—The market has not experienced any improvement this week, and there has been only a moderate business done by private contract. At the sales which concluded on Tuesday prices exhibited no further change, and 6,779 packages met with purchasers.

Coffee.—The prices obtained for the parcels of plantation of the new crop brought forward at the sales have ruled rather irregular, and the market still presents a less steady appearance. 1,106 casks 1,456 barrels and bags principally sold from 65s to 72s 6d for fine ordinary to middling, and 73s to 79s for the better descriptions. 1,447 bags 16 casks native went about the same: ordinary to good, 62s 6d to 65s. 5 casks 216 barrels and bags Jamaica, 63s to 92s. 157 bags ordinary Singapore realised 57s 6d to 59s. 285 bags Manilla were bought in at 68s per cwt.

Rice.—A limited inquiry has prevailed during the week, and sales can now only be effected at lower prices. At auction, yesterday, 3,435 bags Bengal were taken in at 10s 6d to 11s for Ballam, and 13s 6d to 14s 6d for middling to very good bold white. Privately, fine white has sold at 14s 6d per cwt.

Imports and Deliveries of Rice to February 9, with Stocks on hand.

	1861.	1860.	1859.	1857.
	tons	tons	tons	tons

Stock	29350	67550	84700	73000

* The deliveries of duty-free goods for export are not given now, and the total will be shown under the head of home consumption.

Sago.—390 boxes good small grain were bought in at 18s, and 400 bags sago flour partly sold at 16s 6d per cwt.

Spices.—The sales have gone off without material change in prices. 1,015 bags pimento, by auction, about three-fourths sold at 2¾d to 3d. 2,137 bags common Penang pepper were chiefly disposed of at 3⅝d to 3¾d; about 300 bags being withdrawn above the market value. 310 bags heavy black Malabar were bought in at 5¼d. 97 bags good Singapore white sold from 6¼d to 6⅜d. 200 bags Zanzibar cloves, 3¾d to 4d per lb.

Saltpetre.—A few orders have been executed in Bengal at 6d to 1s decline: refraction 16 to 11, 36s to 36s 6d. By auction, 798 bags, refraction 9¾ to 8¼, were bought in at 37s 6d to 38s 6d per cwt.

Imports and Deliveries of Saltpetre to February 9, with Stocks on hand.

	1861.	1860.	1859.	1858.
	tons	tons	tons	tons
Imported	1600	2850	2150	1050
Delivered	1100	1750	2100	1800
Stock	4275	4975	2980	5660

Deliveries last week 200 tons.

Cochineal.—The market is firm, and again rather dearer. 173 bags, by auction, sold at 2s 8d to 3s 2d for Honduras silvers; 3s 6d to 3s 10d for black: Teneriffe silvers, 2s 8d to 3s; black, 3s to 3s 4d per cwt. The deliveries are steady. The stock comprises 8,950 serons, against 9,600 last year, 9,750 in 1859, and 8,540 serons in 1858, at the same period.

Shellac.—225 chests about two-thirds sold, and prices were again in some instances 10s to 15s lower. Native livery orange, blocky and out of condition to good, 6*l* 2s 6d to 7*l* 10s; fine button, 8*l* 10s; garnet, 8*l*; good orange sold at 9*l* 10s to 9*l* 12s 6d per cwt. The stock is now only 8,660 chests, against an average of 12,400 chests at the same date in the three previous years.

Other Dyestuffs.—Safflower is in rather better demand. Gambier firm at 17s to 17s 6d. Good Cutch sold at 25s in public sale, and 24s 6d for heated. Madras madder roots commanded 30s to 32s. Bengal turmeric partly sold at 13s per cwt.

Mother-o'-Pearl Shells.—300 cases Manilla were chiefly bought in at 5*l* 15s per cwt.

Nicaragua Wood.—Of 1,100 tons Altata, a portion only sold at 9*l* 10s to 10*l* per ton.

Metals.—The demand for most descriptions is still inactive, but prices have not suffered any further depreciation. Scotch pig iron has been firmer, touching 49s, but the last sales made were at rather less. Spelter is quoted at 18*l* 10s on the spot. No sales have, however, taken place. Foreign tin has been firmer: Straits, 122s to 123s; Banca, 127s per cwt. English copper neglected.

Jute.—The sales on Wednesday comprised 12,700 bales, about half of which sold at former rates: low to fine, 13*l* 10s to 21*l* 10s per ton. No business reported by private contract.

Manilla Hemp.—There were 3,850 bales brought to auction this week, which further unsettled the market, and prices gave way 10s to 20s for roping sorts, these partly selling at 22*l* 10s to 26*l*; white, 33*l* to 36*l* 10s per ton.

Russia Hemp.—A few lots Petersburg clean sold at 30*l* to 30*l* 10s by auction, being 2*l* per ton under the late nominal value.

Linseed.—Extensive sales have been made this week: Bombay, 53s 6d; Calcutta, 52s to 52s 6d. Several floating cargoes Black Sea have sold for the Continent at 51s 6d to 52s, and 52s to 53s per quarter paid for delivery in the United Kingdom. Holders now require 1s per quarter more.

Oils.—Southern is firm at the recent advance. Colonial sperm has declined to 104*l*. Floating cargoes of olive offer on reduced terms. Quotations on the spot range from 54*l* to 61*l* per tun. Linseed is steady at 28s 3d to 28s 6d, and export buyers have been in the market. Shipments from Hull are large. There has been a better demand for rape: foreign refined, 40s to 40s 6d; brown, 37s. Cocoa-nut is dull and lower: Cochin, 52s; Ceylon, 50s. Palm dull at 46s for fine Lagos.

Turpentine.—1,500 barrels rough have sold during the week at 9s 3d. Spirits are in better demand: American quoted 31s 6d to 32s, per cwt.

Tallow.—The market has shown greater steadiness this week, and quotations of foreign have recovered about 6d. To-day, there is less doing, and prices weaker. First sort Y. C. now rules at 59s 9d to 60s; for delivery this month and next, 59s 6d to 59s 9d; April to June 58s to 58s 6d; October to December, 56s to 56s 6d per cwt.

Particulars of Tallow.—Monday, February 11.

POSTSCRIPT. Friday Evening.

Sugar.—The public sales to-day went off with less spirit than of late and the quotations were barely maintained, excepting for good to fine grocery kinds, these selling readily. 5,000 bags Aska Madras sold, at about the rates previously current for other sorts. 800 bags native Madras were bought in. Of 8,068 bags Mauritius, a fair proportion sold at Tuesday's quotations. 200 bags white Benares realised 45s 6d to 46s per cwt. The week's business in West India is 2,022 casks.

Coffee.—239 casks 263 barrels and bags plantation, 886 bags native, and 100 bags Jamaica sold at about former quotations. 407 bags Madras realised 62s 6d to 66s 6d per cwt.

Cocoa.—178 bags Trinidad were bought in at 64s to 68s per cwt.

Rice.—838 bags (prompt 14 days) sold at 12s to 14s for middling to fine white.

Pimento.—1,720 bags were chiefly sold at 2⅝d to 3d. 67 cases brown nutmegs went at 11d to 1s 8d per lb.

Saltpetre.—Bengal, refraction 5¼ per cent., sold privately rather under 38s per cwt.

Cochineal.—250 bags sold at extreme rates.

Safflower.—50 bales Bengal, by auction, went rather dearer: low and common, 3*l* 10s to 4*l* 17s 6d per cwt.

Cutch.—800 bags went at 25s per cwt.

Sapan Wood.—240 ton Siam Sapan sold at 7*l* 10s to 9*l*.

Oils.—850 casks cocoa-nut sold: Sydney, 43s to 49s; Ceylon, 50s 50s to 51s. 167 casks palm part sold at 41s to 46s 6d per cwt. 45 tons colonial sperm part sold at 103*l* to 104*l* per tun.

Tallow quiet. Town unaltered. The various parcels offered by auction were chiefly taken in.

ADDITIONAL NOTICES.

Refined Sugar.—The home market for refined sugar continues very quiet for stoved goods, with a downward tendency. Pieces at 46s 6d are in good demand. Treacle scarce and firm. In Dutch crushed, nothing worth reporting; prices quite nominal.

Green Fruit.—Demand continues good; the stock of oranges is reducing, and in consequence of heavy gales at the Azores, which have wrecked several vessels, shipments have been stopped. Some cargoes from Valencia, Seville, and Palermo, sold by Keeling and Hunt at public sale, were taken freely by the trade. Lemons and Seville sours lower in price, owing to some parcels being forced on the market. Nuts of all kinds without alteration.

Dry Fruit.—In Smyrna raisins at the reduced quotations considerable quantities are selling both for home and export. Currants are quiet. Figs selling freely at low rates.

English Wool.—The trade continues very quiet. Prices nominally the same.

Colonial Wool.—The public sales will commence on the 28th inst. The quantities arrived to date are, viz.:—From Sydney, 3,651; Port Philip, 7,915; Van Diemen's Land, 459; South Australia, 2,752; Cape of Good Hope, 13,750; New Zealand, 1,129; total, 29,656 bales. The market is without change.

Flax unaltered.

Hemp very quiet, and but little business doing.

Cotton.—No sales have been reported this week.

SILK.—Business has been more quiet the last day or two, the advance in the Bank rate checking everything.

TOBACCO.—Business has been of a very limited character, and chiefly confined to retail lots; the only sale deserving notice was one of about 200 tierces of Virginia strips, on a liberal concession on previous limits.

LEATHER AND HIDES.—There has been rather a larger supply of fresh leather at Leadenhall this week. Prime English butts, of the heavier weights, continue in request, and there has been rather an increased demand for foreign butts of extra substance. Good common dressing hides and calf skins have also met a fair inquiry. No change can be quoted in prices.

METALS.—Our market had been long most inanimate, but was reduced to a blank by the further advance in the Bank minimum this week. Copper is neglected, and accounts come much lower from France, but copper ores are well maintained in price here. Iron is unchanged as regards manufactured descriptions, but Scotch pig is drooping, being down to 48s 4d cash. Tin is steady and fairly maintained in price. Spelter is a shade firmer. Tin plates in small demand still.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	50	3
Fat by ditto	3	1½
Yellow Russian	61	6
Melted stuff	40	6
Rough ditto	24	6
Greaves	18	0
Good dregs	7	0

PROVISIONS.

Bacon market very dull at last week's prices; cannot expect any improvement till next month. There is no prospect of a reduction in prices, shippers sustaining heavy losses now and for some time past. Stocks increasing. In Friesland butter we have a short supply—smallest shipment this season—consequently the high figure.

METROPOLITAN CATTLE MARKET.

MONDAY, Feb. 11.—The total imports of foreign stock into London, last week, amounted to 1,221 head. In the corresponding period in 1860, we received 1,207; in 1859, 2,479; in 1858, 358; in 1857, 1,016; in 1856, 621; and in 1855, 379 head.

There was only a moderate supply of foreign stock on offer in our market to-day. Sheep and calves moved off freely, at very full prices. Beasts were a slow inquiry. The general quality of the foreign stock was tolerably good. The arrivals of beasts fresh up from our own grazing districts were seasonably good, both as to number and quality. Although the weather was favourable for slaughtering, the demand for nearly all breeds was in a sluggish state, at prices barely equal to Monday last. The top quotations for beef was 4s 10d per 8 lbs. From Norfolk, Suffolk, Essex, and Cambridgeshire we received 1,600 Scots, crosses, and Shorthorns; from other parts of England, 1,100 various breeds; and from Scotland, 120 Scots and crosses. We were again very moderately supplied with sheep, which, for the most part, came to hand in very middling condition; hence, all good and prime sound sheep were in improved request, and, in some instances, the currencies had an upward tendency, the best old Downs having realised 6s 2d per 8 lbs. The supply of calves was only moderate, and the veal trade ruled steady, at quite last week's currency, viz., from 4s 8d to 5s 8d per 8 lbs.

SUPPLIES

	Feb. 13, 1860.	Feb. 11, 1861.
Beasts	3870	3620
Sheep	18320	17080
Calves	137	86
Pigs	390	410

THURSDAY, Feb. 14.—Our market to-day was but moderately supplied with beasts, nevertheless all breeds moved off slowly at Monday's currency. Prime Down sheep were very scarce, and in request at full prices. Long-woolled sheep moved off heavily, and in some instances the quotations gave way 2d per 8 lbs. Calves, the supply of which was limited, changed hands freely at full prices. Pigs were firm, but milch cows were very dull.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	2	3	4	Prime Southdown sheep	5	10	6	7
Second quality ditto	3	6	4	0	Large coarse calves	4	8	5	2
Prime large oxen	4	2	4	6	Prime small ditto	5	4	5	8
Prime Scots, &c.	4	8	4	10	Large hogs	4	0	4	6
Coarse and inferior sheep	3	10	4	2	Small porkers	4	8	5	0
Second quality ditto	4	2	4	8	Suckling calves, each	19	0	22	0
Prime coarse-woolled do.	5	0	5	8	Quarter old store pigs	23	0	30	0

Total supply—Beasts, 940; sheep and lambs, 3,960; calves, 90; pigs, 300.
Foreign supply—Beasts, 120; sheep, 700; calves, 69.

HOP MARKET.

BOROUGH, Monday, Feb. 11.—Our market remains in a very languid state, and the business effected is of the most limited character. The currency is nominally as follows:—Mid and East Kents, 80s, 140s, 200s; Weald of Kents, 60s, 120s, 180s; Sussex, 60s, 90s, 140s; Yearlings, 80s, 126s, 190s.

FRIDAY, Feb. 15.—The demand, although not extensive for hops, continues steady for consumption at late prices. Very little doing on speculation.

POTATO MARKET.

SOUTHWARK WATERSIDE, Monday, Feb. 11.—During the past week the arrivals both coastwise and by rail have been large. Prices have undergone very little change since our last. The following are this day's quotations:—Yorkshire Flukes, 150s to 160s; Lincolnhire Regents, 110s to 120s; Dunbar red soil ditto, 150s to 160s; North Berwick ditto, 120s to 125s; Perth, Forfar, and Fife ditto, 100s to 110s; ditto, ditto, ditto Reds and Rocks, 100s to 105s; American Reds, 90s; French whites, 60s to 90s; Belgian ditto, 60s to 80s; Dutch ditto, 60s to 80s per ton.

THURSDAY, Feb. 14.—The arrivals of home produce continue plentiful at this market coastwise and by rail, and the markets are consequently largely stocked, and trade very slow at the annexed rates:—York Flukes, 120s to 160s; Scotch Regents, 100s to 120s; ditto Cups, 100s to 110s; ditto Rocks, 95s to 105s; Dunbar Regents, 160s to 180s per ton.

HAY MARKETS.—THURSDAY,

SMITHFIELD.—Meadow hay, 2*l* 0s to 5*l* 5s; clover, 3*l* 0s to 5*l* 15s; and straw, 1*l* 10s to 1*l* 18s per load. A slow trade.

CUMBERLAND.—Meadow hay, 2*l* 10s to 5*l* 8s; clover 3*l* 0s to 5*l* 12s; and straw, 1*l* 10s to 2*l* 0s per load. Trade inactive.

WHITECHAPEL.—Meadow hay, 2*l* 0s to 5*l* 5s; clover, 3*l* 0s to 5*l* 16s; and straw, 1*l* 10s to 1*l* 18s per load. Trade dull.

COAL MARKET.

FRIDAY, Feb. 15.—Walls-end: Gosforth, 19s 6d; Trimdon Thornley, 18s 9d; Harton, 19s 6d; Tunstal, 19s 9d; Belmont, 10s 6d; Tanfield Moor Butes, 16s 3d; Strakers, 17s; Carr's Original, 17s; Bebside Hartley, 17s; Davidson's Hartley, 17s; Howard's Hartley, 17s. Ships at market, 26.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Feb. 15.—Our market has been very quiet this week, but there is no quotable variation in prices, as holders continue exceedingly firm, seeing that stocks are so very light.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Feb. 15.—Fair attendance at to-day's market. Fine qualities of wheat meet a fair consumptive demand at late rates; inferior kinds 1d to 2d lower. Flour firm, not much business doing. Indian corn, fair inquiry at 37s 6d to 37s 9d for mixed, and 39s 6d for Galatz. Beans firm at 41s for Egyptians. Oats and oatmeal moderate sale at late rates.

METALS.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Feb. 15.—The inactivity that has so long prevailed in the market for manufactured iron still continues, and prices, in consequence, have a downward tendency. Scotch pig iron has again receded in price, owing to the unexpected movement of the Bank of England, and quotations may be considered quite nominal. Copper is still quite neglected. Lead, and most other metals, very dull of sale.

The Gazette.

TUESDAY, Feb. 12.

BANKRUPTS.

J., W., and J. Denton, jun., Dartmouth park, Forest hill, builders.
F. Cogman, Norwich, tailor.
H. Bateman, Old Broad street, timber merchant, and Lloyd's, underwriter.

C. Prescott, Yarnton, Oxfordshire, corndealer.
H. Owen and G. Uglow, Wood street, City, and Tewkesbury, hosiers.
J. Genders, Darlaston, Staffordshire, bootmaker.
H. and E. Dutton, Kidderminster, builders.
C. R. Skinner, Worcester, tanner.
J. Chapman and G. Granger, Oldbury, ironmasters.
W. Rose, Birmingham, ropemaker.
W. Green and J. G. B. Sayce, Worcester and elsewhere, wine merchants.
A. Armstrong, York, flour dealer.
E. Haley, W. Hargreaves, J. Owen, and J. Perkin, Bradford, Yorkshire, wrought iron manufacturers.
W. Kilner, Ecclesfield, Yorkshire, licensed victualler.
D. Jones, Wrexham, ironmonger.
E. Flower, Liverpool, silversmith.
J. and J. Cowell and J. Riley, Blackburn, iron founders.

SCOTCH SEQUESTRATIONS.

T. M'Gregor, Glasgow, hat manufacturer.
J. Mackie and A. M'Phail, Johnstone, wrights.

GAZETTE OF LAST NIGHT.

BANKRUPTS.

G. Brook, boot and shoe manufacturer, Canterbury.
J. Nickoll and R. F. North, tallow brokers, 27 Bishopsgate street within, City.
A. Smith, engineer, Paragon buildings, New Kent road.
J. S. Boughey, wholesale tea dealer, Great Tower street.
G. Burrows, lace manufacturer, Nottingham.
W. H. Williams, apothecary, Plaistow, Essex.
E. J. Niemann, picture dealer, Newman street, Oxford street.
B. Robinson, cloth merchant, Huddersfield.
A. M'Millan and W. Blackburn, warehousemen, Star court, Cheapside, City.
W. Hogg, buyer and letter of machines, Lapford, Devonshire.
J. Carlyle, linen and woollen draper, Liverpool.
W. Daniel, innkeeper, Penydarren, near Merthyr Tydil.
J. Ferguson, draper, Stonehouse, Devonshire.
R. H. W. Drummond, manufacturer of manure, Old Ford, Bow.
T. Howarth and W. Cronshaw, calico manufacturers, Warrington, Lancashire.
J. S. Roberts, gun maker, Birmingham.

By advices from Hamburg the price of gold is 424½ per mark, and the short exchange on London is 13.5¼ per 1*l* sterling. Standard gold at the English Mint price is, therefore, rather more than 2-10ths per cent. dearer in London than in Hamburg.

On Tuesday the Lord Mayor received a deputation of the Council of the Society for the Encouragement of the Fine Arts, accompanied by Mr H. Ottley, the honorary secretary, to whom he kindly granted the use of the Egyptian Hall in the Mansion House for a conversazione and exhibition of works of art, to take place in May next. His Lordship also accepted the invitation of the Council to become one of the vice-presidents of the society.

DEATH.—On the 3d inst., at his residence, 22 Frederick street, Gray's inn road, Mr Joseph John Gibbins, in his 41st year of consumption, deeply lamented by all his friends.

COMMERCIAL TIMES

Weekly Price Current.

☞ the prices in the following list are carefully revised every Friday afternoon, by an eminent house in each department.

LONDON, FRIDAY EVENING.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic returns of railways in the United Kingdom for the week ending the 2d of February amounted to 489,220*l*, and for the corresponding week of last year to 455,895*l*, showing an increase of 33,325*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 212,776*l*, and for the corresponding week of 1860 to 203,948*l*, showing an increase of 8,828*l*.

LONDON AND BLACKWALL.—The directors of this company intend to propose a dividend, at the rate of 4 per cent. per annum, for the past half-year ending December 31.

CALEDONIAN.—The directors of this company intend to declare a dividend for the past half-year on the ordinary stock of this company, at the rate of 5½ per cent. per annum, carrying over a balance of 10,000*l*.

HULL AND SELBY.—The half-yearly meeting of this company was held at Hull on Monday. There was a balance of 33,558*l* in favour of the company, out of which the directors recommended the following dividend:—2*l* 10s per 50*l* or whole share, and in like proportions on the half and quarter shares.

RAILWAY AND MINING SHARE MARKET.

LONDON.

MONDAY, Feb. 11.—The railway market opened heavily this morning, but subsequently improved in consequence of the firmness in the funds. Foreign descriptions were inactive, and South Austrian and Lombardo-Venetian receded to 1 dis. American securities were in better demand, especially Illinois Central and New York and Erie shares, in which a rise of 1½ dol was established. Mines were steady, at an occasional improvement No change of importance occurred in joint stock banks, In miscellaneous descriptions there was an advance in Canada Land, and a reduction in South Australian.

TUESDAY, Feb. 12.—The railway market opened steadily this morning and improved in the afternoon, the preparations for the settlement now in progress showing a diminished supply of floating stock. London and North-Western closed flat. North British was lower, Caledonian improved on the dividend. Midland, Lancashire and Yorkshire, and Great Western were likewise firm, although the final prices were rather lower than at one period of the day. Indian guaranteed descriptions continued to improve, and East Indian was last quoted 98¾ to 99¼. Grand Trunk of Canada stock closed at 22 to ½, and Great Western shares 11⅛ to ¼. In the foreign market South Austrian and Lombardo-Venetian were dull at 1 to ½ dis. Great Luxembourg, on the other hand, showed increased firmness. Canada Government debentures were higher. In American railway securities the bonds and shares of the New York Central were heavy. Mines were quiet, and occasionally exhibited a decline. In joint stock banks, Egypt receded, while a rise took place in Bank of London. In miscellaneous descriptions a reduction occurred in Australian Agricultural and Red Sea Telegraph, and an improvement in Madras Irrigation;

WEDNESDAY, Feb. 13.—The railway market improved in the morning on an increased demand for several stocks for the settlement, the prices for money being in some cases higher than for the new account. A relapse took place in the afternoon, on the belief that, although the traffic returns were at present satisfactory, they will suffer later from a further check to trade by the prolongation of the American crisis. The principal decline to-day was in South-Eastern and Sheffield. North-Eastern and North British, on the other hand, showed an advance. In the colonial market Indian guaranteed again improved. Grand Trunk stock was also higher, at 22½ to ¾, while Great Western shares receded to 11½ to ½. French railways were firmer. South Austrian and Lombardo-Venetian closed flatly at 1 dis. In American securities a decline took place in the shares of the New York and Erie and Illinois Central, the final prices being respectively 29½ to 30½ and 29 to 28 dis. Mines were inactive, and occasionally lower. There was no change of importance in joint stock banks. In miscellaneous descriptions an improvement occurred in Canada Land, and a reduction in English and Australian Copper.

THURSDAY, Feb. 14.—The railway market this morning was steady until the announcement of the raising of the Bank rate, when a general decline immediately took place, from which there was scarcely any recovery. London and North-Western, Midland, Lancashire and Yorkshire, North-Eastern, Great Northern, Caledonian, and Sheffield showed a reduction of ½ to 1 per cent., and other stocks ¼ to ⅝. Colonial stocks were also flat, especially Indian guaranteed. Grand Trunk of Canada receded to 22 to ½, and Great Western 11⅛ to ⅝. In the foreign market, South Austrian and Lombardo-Venetian fell to 1¼ dis., but after official hours rallied to 1⅛ to 1 dis. Victor Emanuel Obligations were higher. American railway securities remained without material change. Mines were inactive, and occasionally lower.

FRIDAY, Feb. 15.—The transactions in the railway share market to-day were limited, but prices showed an upward tendency. Business in the foreign and colonial markets was very inactive.

EDUCATION.—International.—The Royal Continental Collegiate Institute (limited to 20 young gentlemen), on Bushey heath, three miles from Harrow station and two from Watford. Principal, Dr Vellère, late of the Harrow Preparatory School. This school is highly recommended for three reasons—first, for very excellent board, liberal supply, judicious treatment, great success in education, and, above all, as preferable to going abroad with regard to acquiring the French language perfectly; secondly, for very moderate and strictly inclusive terms, within the reach of nearly every one; and, thirdly, that no case of illness has ever occurred since the school has been established in 1857, a fact which has never been heard of in any other school, not even those excepted at the seaside. From the great attention incessantly paid by the principal to his pupils' comfort, happiness, and future welfare, he trusts that he will be patronised by a discriminating public. Travelling expenses beyond 25 miles are entirely paid by him. The quarter or half-quarter is dated from the day of the arrival of the pupil. Terms from 30 guineas upwards. Address, stating age and requirements, Dr Vellère, Bushey heath, Watford.

TRADE B/P MARK.

BROWN AND POLSON'S PATENT CORN FLOUR.

The LANCET states,

"This is superior to anything of the kind known."

FIRST OF THE KIND Manufactured and Patented in the United Kingdom and France, as explained with Engravings in THE ILLUSTRATED LONDON NEWS, of May 26th, 1860. Prepared without fermentation, it is warranted to keep sweet for years. It is respectfully suggested that the Trade Mark, and name in full should be observed on each Package, as similar articles are sometimes substituted or recommended as "the same" or "as good as Brown and Polson's." BROWN and POLSON, Manufacturers and Purveyors to Her Majesty: Paisley, Manchester, Dublin, and London.

DR KAHN ON MARRIAGE.—A new and entirely re-written edition (the forty-fifth of this celebrated treatise), with new steel plates, woodcuts, &c., is now ready.

The object of the work is not to maintain any particular hypothesis, but to enable every one to understand for himself the structure and functions of the organs concerned in the fulfilment of the physical obligations of the married state; to acquaint him with the consequences arising from excesses; to prevent unnecessary misapprehension from unfounded fears, and to indicate, when those fears are well founded, the means of speedy relief. The work is not crowded with the technicalities of ordinary professional books, nor does it present the crudeness which characterises the so-called "popular works" on the subject.

Price One Shilling, free by post for thirteen stamps, or in a sealed envelope, twenty-two stamps, either from the publisher, J. Allen, 20 Warwick-lane; or from the author's address, 17, Harley street, Cavendish-square, London.

Just published, 71st thousand, price 1s, post free for 13 stamps. Sold by Mann, 39 Cornhill, or direct from the Author.

DR LA'MERT ON THE CURE of Nervous and Physical Debility, resulting from pernicious habits or excess. With cases and engravings from life.

CONTENTS:—The Physiology of the Generative Organs—Puberty—Manhood—True and False Morality—Marriage, in its Moral and Physical Relations—Youthful Abuse—The Secret Cause of Nervous Debility, Impotence and Sterility—Spermatorrhœa, or Chronic Impotence: its History, Causes, and Moral Consequences.

Dr LA'MERT, M.D., L.S.A., &c, is the only legally qualified practitioner on the Medical Register who, for 20 years, has devoted his studies to the treatment of these disorders.

37 Bedford square, London.

DR ROBERT ROWE ON INDIGESTION.

This day is published, price 2s 6d, the fifteenth edition,

NERVOUS DISEASES, Liver and Stomach Complaints, Low Spirits, General Debility, and Diseases of Warm Climates; the Result of Thirty Years' Practice.

By G. ROBERT ROWE, M.D.

"Dr Rowe claims with justice a priority of authorship, while he yields to none in his treatment. The value of this work is enhanced by its practical nature."—LANCET.

"We have no hesitation in placing this work among the first ranks. We entertain a high opinion of its value."—MEDICAL TIMES.

"This is a clever and useful work; contains much that is worthy of attention, and should be read by all martyrs to indigestion and other ills"—TIMES.

Also by the same Author, 2nd edition, price 4s 6d, On some of the Important Diseases of Women and Children.

London: J. Churchill, and to be had of all booksellers.

DR CURTIS'S MEDICAL WORK, "MANHOOD." An Essay on Nervous and Generative Diseases. The 140th thousand, with numerous plates, in a sealed envelope, price 1s, or post paid, by the Author, for twelve stamps,

MANHOOD: THE CAUSE AND CURE of PREMATURE DECLINE in MAN, with Plain Directions for Perfect Restoration to Health and Vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, the result of twenty-five years' successful practice. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London. Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a parent, preceptor, or clergyman."—SUN, evening paper.

"Dr Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—DAILY TELEGRAPH, March 27, 1858.

N.B. The Author of the above Medical Treatise may be consulted as usual, either by letter or personally, at his residence. The efficacy and harmless nature of the remedies employed by Dr Curtis, having been demonstrated by the most complete success during a practice extending over a period of 20 years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

Published by Allen, 20 Warwick lane, Paternoster row; Mann, 39 Cornhill; and free from the Author for 12 stamps.

A BOON TO NERVOUS SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Burton cresent, Tavistock square, London, W.C.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price from 7s 6d to 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

VALUABLE INFORMATION.—GRATUITOUS EDITIONS of the following LECTURES, delivered at the Royal Institute of Anatomy, Science, and Medicine, 369 Oxford street, London, by W. B. MARSTON, the Principal, are being issued, with plain directions for SELF-TREATMENT and CURE in each of them.

No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.

No II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.

No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.

No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.

Each Lecture, neatly printed and bound, will be sent GRATIS, on receipt of two stamps to prepay postage, or THE WHOLE FOUR, BOUND TOGETHER, with numerous additions, and full directions for SELF-TREATMENT and CURE, 160 pages, 8vo, post free, for Six Stamps. Address, Treasurer, Royal Institute, 369 Oxford street, London.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

ADULTERATIONS.—Several Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Another White Zinc has been now introduced containing impurities from the mode of manufacture which retard the drying. Whether these are sold under the name of "Improved Zinc Paint," or as the Number Two or Three qualities, no workman can produce good work with such material. Workmen who have once used the Patent Zinc Paint will never willingly use any other Paint for their best work.

To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"Among other tests to which it has been subjected, has been that of painting the hold of a sugar vessel, which after a voyage to St Kitt's and back, was found, after washing, to be as white as the first day the paint was applied."—JOHN BULL, September 14, 1850.

FORD'S EUREKA SHIRTS are made with that rigid adherence to details in manufacturing, which alone can ensure a good and comfortable shirt. A box of six excellent shirts for 33s. Illustrated catalogues, mode of self-measurement, price list, &c., post free.
RICHARD FORD, 38 Poultry, London.

SALE OF LAMPS, CHANDELIERS AND GAS FITTINGS.

TUCKER and SON having purchased of Messrs Pearce and Son (of Ludgate hill) their entire stock of Lamps, Gas Chandeliers, &c., (on their relinquishing that branch of their business to devote exclusive attention to the China and Glass Trade) have distributed it among their three Show Rooms as under; and being goods of first-rate quality, and offered to the public at a reduction of one-third from their usual price, to insure their immediate realisation, they must command the attention of purchasers.

City Show Rooms, 36 King William street (4 doors from London Bridge); Central do., 190 Strand (opposite St Clement's church, and near Temple Bar).

TUCKER and SON—Established 43 years.
Manufactory, Essex Works, W.C.—November, 1860.

DUTY OFF MODERATOR LAMPS.—J. Schlossmacher's celebrated Manufacture. Burner of every Lamp stamped J. S. The duty being now off, and J. S. being enabled by machinery to reduce the prices of his Lamps to the charges of other makers for their commonest qualities, the full benefit of both reductions is given to the public through his London Agents, TUCKER and SON, at their Establishments, as under:—

Central Show Rooms, 190 Strand (near Temple Bar); City Show Rooms, 36 King William street (4 doors from London Bridge). Established 43 years.
Engravings free by Post.

VOLUNTEER PIPE.—RIFLE BORE.—The most delightful, economical, and permanent medium for the enjoyment of tobacco ever invented. This new pipe only to be had of the patentee. Sample pipe in case sent post free for 23 stamps.—EDWARD PILLINER, 53 Great Queen street, London, W.C.

---

66 Queen street, London, 23rd August, 1860.

MESSRS R. WOTHERSPOON and CO., 46 Dunlop street, Glasgow,

DEAR SIRS,—I have, as requested, to-day visited the Royal Laundry, with reference to the advertisement of the Nottingham firm, who state that their starch has been used for many years in the Royal Laundry, and have been assured by Mr Thompson, the superintendent, that none but yourselves have any right to state that they supply starch to Her Majesty's Laundry, as no other starch is there used, nor has been used for some years, but the Glenfield Patent Starch. I have been further assured that your starch continues to give complete satisfaction, and that though trial has been made of samples of various starches, none of these have been found nearly equal in quality to the Glenfield.—I am, dear Sirs, your obedient servant. WM. BLACK.

KEATING'S COD LIVER OIL. Just Imported. The Pale from Newfoundland, and the Light Brown from Norway. The supplies of the present season have never been surpassed, the fish being unusually fine, and the oil nearly tasteless. Professors Taylor and Thompson, of Guy's and St Thomas's Hospitals, have analysed, and pronounced the PALE NEWFOUNDLAND OIL the best and most desirable for invalids of very delicate constitution. The Light Brown being more economical in price, is brought within he reach of all classes. NO HIGHER PRICE NEED BE PAID than the following:—Light Brown, 1s 8d per pint, or 3s per quart. Pale, 1s 6d half-pints, 2s 6d pints, 4s 6d quarts, or in five-pint bottles, 10s 6d, imperial measure, at 79 St Paul's Churchyard.

HEALTH AND HAPPINESS for the NERVOUS and DEBILITATED.—The proprietors of the Birmingham Institute of Anatomy desire to make known an infallible means of self-cure for the nervous, debilitated, &c., and will forward the same gratuitously on receipt of a stamped directed envelope.—Address "To the Secretary, Institute of Anatomy, Birmingham."

Second Edition, price 2s 6d, post free for 30 stamps,

TOOTH-ACHE: ITS CAUSES, and a New Painless Method of Cure (with as much certainty as water quenches thirst). Teeth cured by this Method will never ache again, and thus prevent the necessity of the painful operation of extraction. By THOMAS HOWARD, Surgeon Dentist to His Grace the Archbishop of Canterbury, 17 George street, Hanover quare, London

---

IMPORTANT NOTICE.

GLENFIELD PATENT STARCH is the only STARCH used in HER MAJESTY'S LAUNDRY.

And as some unprincipal Parties are now making and offering for Sale an Imitation of the

GLENFIELD STARCH,

we hereby caution all our Customers to be careful, when purchasing, to see that the word GLENFIELD is on each Packet, to copy which is Felony.

WOTHERSPOON and CO., Glasgow and London.

DINNEFORD'S PURE FLUID MAGNESIA has been, during twenty-five years, emphatically sanctioned by the Medical Profession, and universally accepted by the Public, as the Best Remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a Mild Aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescing Draught, in which its aperient qualities are much increased. During hot seasons and in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD and CO., 172 New Bond street, London; and sold by all respectable chemists throughout the Empire.

NO MORE PILLS OR ANY other Physic.—For Constipation, Indigestion (Dyspepsia), Palpitation, Nervous, Bilious, and Liver Complaints, Debility, Dropsy, Epilepsy, Paralysis, Cough, Asthma, Consumption, Bronchitis, Sore Throat, Fevers.

DU BARRY'S delicious Health-restoring REVALENTA ARABICA FOOD, which, at a few pence per day, saves fifty times its cost in medicine, and cures without purging or any of the uncertainties, annoyances, and ruinous expenses incurred by medicine, cod liver oil, or visits to distant climates.

Certificate No. 36,418.—We find it the safest remedy Andrew Ure, M.D., F.R.S.; Dr Harvey; Dr Wurzer Dr Shorland; Dr Campbell.

We extract a few out of 56,000 cures:—

Fargate, Sheffield.

HOLLOWAY'S OINTMENT AND PILLS.—Visible or Invisible Ailments.—In all outward diseases this fine Ointment will be found soothing, cooling, and curative. It speedily allays all inflammation, and reduces to healthy condition all wounds, sores, ulcers, and sprains. It discharges all irritating matters, and stimulates the vessels to wholesome action. When this Ointment is rubbed on the skin over any organ afflicted by disease, it exercises a corresponding recuperative power, and, in conjunction with Holloway's Pills, rarely fails to banish any internal disorder, be its origin when or where it may. Whilst using these purifying preparations, the tongue cleans, the appetite improves, chills and flushes depart, and the complexion becomes clear, whilst the spirits attain an elevation consonant only with health.

RAPID CURE OF COUGH AND DIFFICULTY of BREATHING by Dr LOCOCK'S PULMONIC WAFERS.

From Th. Hargreaves, Esq., Park Hill. "Sir,—My wife having been troubled with a cough and shortness of breathing, and being recommended to try a box of your Wafers, I did so, and soon found relief from them. Two boxes at 2s 9d each, and one 11s box, completely restored her.—To Mr Evans, Chemist, Barrowford."

Dr LOCOCK'S WAFERS give instant relief, and a rapid cure of asthma, consumption, coughs, and all disorders of the breath and lungs. They have a most pleasant taste. Price 1s 1½d, 2s 9d, and 11s per box. Sold by all medicine vendors.

FINE TEA CHEAPER.

STRACHAN & CO.'S justly celebrated DRAWING ROOM TEA is now reduced to 4s per lb. Guaranteed the Finest and Cheapest Tea in the United Kingdom.
26 Cornhill, London, E.C.

DEANE'S TWO-HOLE BLACK PENS which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine article, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped
"G. and J. Deane, London bridge,"
and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed
"G. and J. DEANE's Two-Hole Black Pens, 46 King William street, London bridge."

ALLSOPP'S PALE OR BITTER ALE.—Messrs S. ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the October Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent; and at the undermentioned Branch Establishments:—

Messrs SAMUEL ALLSOPP & SONS.

LONDON	61 King William st., City.
LIVERPOOL	Cook street.
MANCHESTER	Ducie place.
BIRMINGHAM	Upper Temple street.
DERBY	London road.
WOLVERHAMPTON	Exchange street.
CHESTERFIELD	Low Pavement.
STOKE-UPON-TRENT	Wharf street.
DUDLEY	Burnt Tree.
WORCESTER	The Cross
SOUTH WALES	King street, Bristol.
DUBLIN	Crampton quay.
CORK	Cook street.
EDINBURGH	Union street lane.
GLASGOW	St Vincent street.
PARIS	279 Rue St Honoré.

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Bottles and Casks, and on Draught, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

When in bottle, the genuineness of the lable can be ascertained by its having "ALLSOPP and SONS" written across it upon red and white ground striped.

The Brewery, Burton-on-Trent, April 30, 1860.

JULLIEN FUND.
Committee Room—59 New Bond street.

The Committee of the *Jullien Fund*, fearing that the subscriptions have been materially checked by the unfortunate death of Mons. Jullien, desire to explain that a widow and others, members of his family, can be protected from want only by the kind aid of those who appreciate the great services rendered by the late lamented maestro to the cause of the musical education of the English people.

The Committee confidently appeal to that benevolence for which their countrymen are so distinguished, for such prompt and liberal additions to the subscription list as shall enable them to do some justice to the memory of M. Jullien, and at the same ime afford adequate relief to his bereaved family.

COMMITTEE for the DISTRIBUTION of the JULLIEN FUND.

Mr John Mitchel	Mr W. Duncan Davison
Mr W. R. Sams	Mr Jules Benedict
Mr Thomas Chappell	Mr A. Blumenthal

HONORARY TREASURERS.
Mr John Mitchell, 33 Old Bond street
Mr T. Chappell, 50 New Bond street
Mr W. R. Sams, 1 St James's street
BANKERS
Messrs Coutts and Co., Strand
Heywood, Kennards, and Co., Lombard street
London and County Bank, Havover square
Who, as well as the honorary treasurers, have kindly consented to receive subscriptions.
April, 25th, 1860.

KEATING'S COUGH LOZENGES.—Statistics show that 50,000 persons annually fall victims to Pulmonary Disorders, including Consumption, Diseases of the Chest, and the Respiratory Organs. Prevention is at all times better than cure; be, therefore, prepared, during the wet and wintry season, with a supply of KEATING'S COUGH LOZENGES, which possess the virtue of averting, as well as of curing, a Cough or Cold; they are good alike for the young or for the aged

RESTORATION OF VOICE BY KEATING'S COUGH LOZENGES. Glasgow.

SIR,—I have great pleasure in informing you of the great good your excellent COUGH LOZENGES have done me. In December, 1845, I caught a severe cold from riding two or three miles, one very wet night, which settled in my lungs, and quite took away my voice, so that I could not speak above a whisper from that time until December last. I tried all kinds of medicines, but they were of no avail. I was then advised to try your Lozenges, which I did only to please my friends, but before I had finished a 2s 9d tin, my voice, to my great joy, came back as strong as ever.—I am, Sir, yours respectfully, JAMES MARTIN.

THOMAS KEATING, Esq.

Prepared and Sold in Boxes, 1s 1½d; and *Tins, 2s 9d*, 4s 6d, and 10s 6d each, by Thomas Keating, chemist, &c., 76 St Paul's churchyard, London. Retail by all Druggists, &c.

NEW THEATRE ROYAL ADELPHI.
Sole Proprietor and Manager, Mr B. Webster.

Last 30 Nights of THE COLLEEN BAWN in consequence of Mr and Mrs *Dion* Bourcicault's provincial engagements.

On Monday, and during the week, AN UGLY CUSTOMER. Mr J. L. Toole, C. Selby, Miss K. Kelly, and E. Thorne. THE COLLEEN BAWN. Messrs D. Bourcicault, D. Fisher, Billington, Falconer, Stevenson, C. J. Smith, Remer; Miss Agnes Robertson, Woolgar, Mrs Billington, Chatterly. And BLUE BEARD FROM A NEW POINT OF HUE. Messrs J. L. Toole, P. Bedford, C. J. Smith; Miss Woolgar, K. Kelly, Laidlaw, and E. Thorne. Commence at 7. Stage Manager, Mr R. Phillips; Acting Manager, Mr W. Smith.

POLYTECHNIC INSTITUTION (Limited). Now open with Great Novelties. Mornings, 12 to 5. Evenings, 7 to 10.—Admission 1s. Schools and Children under Ten Years of Age, Half-price.

RIMMEL'S PERFUMED VALENTINE of the LANGUAGE of FLOWERS, beautifully illustrated, price 1s; by post for 14 stamps. Rimmel's new Perfume for the ball-room, the Magenta, price 2s 6d. Sold by all the trade—Rimmel, Perfumer to Her Majesty, 96 Strand, and Cornhill, London; and at 17 Boulevard des Italiens, Paris.

CHUBB'S PATENT SAFES—the most secure against Fire and Thieves.—*CHUBB'S FIRE-PROOF STRONG ROOM DOORS*, CHUBB'S PATENT DETECTOR and STREET-DOOR LATCHES. CHUBB'S CASH and DEED BOXES. Illustrated Price-list gratis, and post free.

CHUBB and SON, 57 St Paul's churchyard, London 28 Lord street, Liverpool; 16 Market street, Manchester and Wolverhampton.

SAUCES.—CONNOISEURS have Pronounced LEA and PERRINS' "WORCESTERSHIRE SAUCE" one of the best additions to Soup, Fish, Joints, and Game. The large and increasing demand has caused unprincipled traders to manufacture a spurious article; but the "GENUINE" all bear Lea and Perrins' name on Bottle, Label, and Stopper.

Sold by Crosse and Blackwell, London, and all respectable Oilmen and Grocers. Sole manufacturers—Lea and Perrins, Worcester.

SOYER'S SULTANA SAUCE, Relish, Succulante, Aromatic Mustard, &c.—These excellent preparations, of which the LANCET, in its sanitary analysation of Articles of Food, reported so favourably of their purity and wholesomeness, are to be obtained of all grocers and Italian warehousemen in the United Kingdom. They are indispensable with Fish, Meat, Game, Poultry, Hashes, Stews, and all made dishes, impart also to Chops, Steaks, and Cutlets a most delicious flavour. Wholesale, CROSSE and BLACKWELL, Purveyors to the Queen, 21 Soho square, London.

FREDERICK DENT, Chronometer, Watch, and Clock Maker to the Queen and Prince Consort, and maker of the Great Clock for the Houses of Parliament, 61 Strand, and 34 Royal Exchange.

ALLEN'S PATENT PORTMANTEAUS and TRAVELLING BAGS, with Square Opening; Ladies' Dress Trunks; Dressing Bags, with silver fittings; Despatch Boxes, Writing and Dressing Cases, and 500 other articles, for home or continental travelling. Illustrated Catalogues for 1860 by post for two stamps.—J. W. ALLEN, Manufacturer of Officers' Barrack Furniture and Military Outfitter (see separate catalogue), 18 and 22 Strand, London

---

DR DE JONGH'S
(Knight of the Order of Leopold of Belgium)
LIGHT-BROWN COD LIVER OIL, Prescribed by the most Eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for

CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,
Is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.

Dr JONATHAN PEREIRA, F.R.S.—"*It* was fitting that the author of the best analysis and investigations into the properties of this oil should himself be the purveyor of this important medicine. I am satisfied that for medicinal purposes no finer Oil can be procured."

Dr GRANVILLE, F.R.S.—"Dr Granville has found that Dr de Jongh's Light Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."

Dr BARLOW, Physician to Guy's Hospital.—"I have been well satisfied with the effects of Dr de Jongh's Oil, and believe it to be a very pure Oil, well fitted for those cases in which the use of that substance is indicated."

Dr BANKS, King's Professor of the Practice of Medicine at the University of Dublin.—"I have in the course of my practice extensively employed Dr de Jongh's Light Brown Cod Liver Oil, and I have no hesitation in stating that I consider it the best of all the specimens of Oil which have ever come under my notice."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists.

SOLE AGENTS,
ANSAR, HARFORD, and CO., 77, STRAND, London, W.C.

CAUTION.—Beware of Proposed Substitutions.

THE IMPORTANT FREEHOLD and COPYHOLD PREMISES known as the WHITECHAPEL DISTILLERY.

MESSRS FULLER AND HORSEY are instructed to SELL by AUCTION (unless previously disposed of by private contract), on MONDAY, March 18, at 11 for 12 precisely, on the Premises, in Two Lots, the highly important FREEHOLD and COPYHOLD PROPERTY well known as the WHITECHAPEL DISTILLERY, the property of Messrs Smith and Co. The site occupied is about three acres, covered with buildings of the most substantial character, arranged in the most perfect manner for the purposes of the distillery business, and capable of producing 1,500,000 gallons of spirit per annum. The premises are readily convertible to the purposes of a brewery, or any large manufacturing establishment. The property is situate in Buck's row, a wide thoroughfare in Whitechapel, within a few paces of the London Hospital. The buildings are entirely and securely enclosed by lofty walls. There is a most commodious residence for a principal, finished in the best taste. The manufacturing premises consist of a block of buildings of great extent, occupying the central portion of the yard, accessible by carts or waggons on all sides, and comprising—1. The Brewhouse: a substantial, lofty, ground-floor building, with basement, brewer's room, men's room, sitting room for revenue officers, and store rooms. 2. The Cooler-house: a lofty building of three floors, strongly timbered on iron columns, with lantern lights in the roof, and folding shutters. 3. The Back Rooms, two in number. 4. Yeast-house. 5. A deep Artesian Well, affording a nearly inexhaustible supply of pure liquor. 6. The *Mill*, substantially built of brick, of four floors. 7. The Old Mill, a brick building of three floors. 8. Steam-engine House, Boiler-house. 9. The Still-house. Surrounding the main building are various accessory erections, including the spirit store, of one lofty ground floor, with dry basement, loop-hole doors, offices for clerk, &c. A most substantial brick building of three floors, strongly timbered on iron columns, used as a joiners' shop and stores, a steam-engine house, boiler house, bricklayers' shed, piggeries, fire-engine house, and surface well steened; an extensive range of brick-built workshops for carpenter, blacksmith, millwright, and cooper, beer-cellar, small brew house or scalding house, and grain shed. The large and commodious yards are paved throughout with granite. Approached from a separate entrance are the duty-free spirit warehouse, a lofty ground-floor building, store for methylated spirit, a brick building adjoining, of two floors; a paved yard enclosed, containing warehouse of two floors, next Buck's row, and sundry other conveniences: also a very superior range of counting-houses, of two floors and basement, partly fitted as a dwelling-house. —*May be viewed, by cards only, which may be had of the Auctioneers.* Printed particulars are in course of preparation, and, with plans, may be obtained in due time of Messrs M'Leod, Stenning, and Watney, solicitors, London street, E.C.; of Messrs' Tennant and Darley, solicitors, 4 Raymond buildings, W.C.; of Messrs Bockett, Son, and Barton, solicitors, 60 Lincoln's inn fields; of S. Lowell Price, Esq., accountant, 5 Gresham street, E.C.; and of Messrs Fuller and Horsey, Billiter street, E.C.

THE FRENCH AND GERMAN PROTESTANT COLLEGE, Netherton House, Clapham, Surrey, combines the comforts of an English home with the advantages of a Continental Education. The French and German Languages, so indispensable to a good education, are taught by resident masters. They give lessons daily. The course of instruction adopted secures for young gentlemen a sound English, Classical, and Mathematical Education, combined with Drawing, History, Geography, and Modern Science. Pupils prepared for the military, naval, merchant, and civil service examinations. Terms, inclusive, from thirty to fifty guineas per annum, according to age and requirements. A difference will be made for two Pupils from the same family. For references and prospectuses apply to Monsieur A. de Chastelain, as above.

WHEATSTONE'S HARMONIUMS (English), in solid oak cases, manufactured by them expressly for Churches, Chapels, Schools, &c., have the full compass of keys, are of the best quality of tone, best workmanship and material, and do not require tuning.

No. 62 Gresham House, Old Broad street, E.C.,
Feb. 14, 1861.

EAST INDIAN RAILWAY

COMPANY.

The Directors of the East Indian Railway Company are prepared to receive applications for Debentures at par for the remainder (£990,000) of the sum of £1,500,000 required to complete the total amount which the Company has the power to borrow on Debentures not convertible into shares.

The payment of the principal and interest in the meantime, at the rate of 5 per cent. per annum, is guaranteed by the Secretary of State for India in Council.

The bonds will be for five years from the 15th December, 1860, transferable by endorsement under the provisions of the 16 and 17 Victoria, cap. 59, without stamp, and the holders may renew them for a second term of five years, upon giving one year's notice to that effect. Failing such notice, the bonds will be paid off at the expiration of the first five years on presentation at the Bank of England.

Payments may be made in full or by instalments, as may be agreed upon.

Interest will accrue on the respective payments from the dates fixed for the same.

No scrip receipt or bond will be issued for a less sum than £50.—By order of the Board,

D. I. NOAD, Secretary.

East Indian Railway House, Alderman's Walk,
New Broad street, London, Jan. 22, 1861.

MADRAS RAILWAY COMPANY.

—Her Majesty's Secretary of State for India having authorised the Directors of this Company to raise the sum of £1,000,000 on Debentures not convertible into Stock, the Directors are now prepared to comply with applications to that extent for Debentures at par, bearing interest at 5 per cent. per annum, payable by coupon, half-yearly, at the Union Bank of London.

The payment of the principal and interest is guaranteed by the Secretary of State for India in Council. The Debentures will be for five years, from the 1st of January, 1861, transferable by endorsement without stamp, and renewable at the option of the holder for a second term of five years, at the same rate of interest, upon notice being given by him twelve months previous to the expiry of the first term. Failing such notice, the Debentures will be paid off at the expiration of the first five years.

Debentures will not be issued for any less amount than £50.

The Directors will also receive applications for the limited amount, £194,000, which remains to be allotted of the previous Debenture Loan of £1,000,000 convertible into the Stock of the Company. These Debentures are for five years, or four years, at 5 per cent. per annum, payable by coupon, half-yearly, at the Union Bank of London.

The payment of the principal and interest is guaranteed in like manner by the Secretary of State for India, and the holders of these Debentures have the option at the end of twelve months from their date, and thenceforward, upon giving notice at any time before the Debenture becomes payable, of converting it into Capital Stock of the Company, bearing 5 per cent. interest, guaranteed under the contract entered into with the East India Company.

Forms of application for either or both descriptions of Debentures may be obtained at the Offices of the Company.—By order of the Board,

JAMES WALKER, Managing Director.

No. 33 New Broad street, London,
1st January, 1861.

ARMY CONTRACTS.

—Sealed Tenders will be received at this Office until Noon on the 6th of March, from persons who may be willing to enter into Contracts for the Supply of

FUEL AND LIGHT

(Coals, Coke), (Composite and Dip Candles),

in such quantities as may be required for the use of Her Majesty's Land Forces and Military Departments in any of the following places, from 1st April, 1861, to 31st March, 1862:—

1. Brompton House, Hyde Park, and Kensington—South Durham coals, coke, composite candles, dip candles.
2. Regent's Park, St John's Wood, and Portman Street Barracks—Newcastle coals, composite candles, dip candles.
3. Wellington Barracks, Horse Guards, Buckingham Palace, Royal Engineers, Pimlico, and St George's Barracks—Newcastle, Sunderland, and 10 tons Tanfield Moor coals, coke, composite candles, dip candles.
4. Tower, Bethnal Green, Finsbury, and Hackney—Newcastle, Wall's-end, and 180 tons Anthracite and 8 tons Tanfield Moor coals, coke, composite candles, dip candles.
5. Hounslow and Kneller Hall—Inland coals, coke, composite candles, dip candles.
6. Hampton Court—Inland coals, composite candles, dip candles.
7. Windsor—Ruabon coals, composite candles, dip candles.
8. Brighton, with Coast Forts from Newhaven to Shoreham—Newcastle coals, coke, composite candles, dip candles.
9. Croydon—Newcastle coals, coke, composite candles, dip candles.
10. Jersey—Wall's-end and Newcastle coals, composite candles, dip candles.
11. Guernsey—Wall's-end and Newcastle coals, coke, composite candles, dip candles.
12. Alderney—Wall's-end and Newcastle coals, composite candles, dip candles.

Separate tenders for Fuel and for Light must be made for each of the above-mentioned stations or barracks as separately grouped and numbered.

Forms of tender, and conditions of contract, may be obtained on application at this office, by letter or in person, between the hours of 10 and 4 o'clock.

Tenders on the printed forms must be properly filled up and signed and delivered at the undermentioned office, under closed envelope (marked on the outside "Tender for Army Supplies"), before noon on the 6th March next.

MR WILLIAM HUGHES'S MANUAL OF GEOGRAPHY.

In fcp. 8vo, with Six coloured Maps, price 7s 6d, cloth,

A MANUAL OF GEOGRAPHY,

PHYSICAL, INDUSTRIAL, and POLITICAL. For the use of Schools and Colleges.

By WILLIAM HUGHES, F.R.G.S., &c.

Or in 2 Parts { Part I.—Europe, price 3s 6d cloth. / II.—Asia, Africa, America, and Australia, 4s.

"The best testimony to the merits of Mr W. Hughes's 'Manual of Geography' is supplied by the fact of the numerous editions which have been called for within a recent period. The leading idea which its author has sought to embody in this volume is the connection of physical geography with the industrial pursuits and social condition of nations, or, in other words, the geography of industry and commerce, viewed as dependent upon the natural features, climate, and productions of the various regions of the earth."—Earl DE GREY and RIPON'S Address to the Royal Geographical Society, delivered at the Anniversary Meeting, May 28, 1860.

London: Longman, Green, Longman, and Roberts.

Wharfingers and Bonded Warehouse Keepers, under special security, Custom House and Wool Quays, Lower Thames street, E.C., London.

UNITED KINGDOM LIFE ASSURANCE COMPANY,

8 WATERLOO PLACE, PALL MALL, S. W.

THE HON. FRANCIS SCOTT, CHAIRMAN.
CHARLES BERWICK CURTIS, ESQ., DEPUTY-CHAIRMAN.
FOURTH DIVISION OF PROFITS.

SPECIAL NOTICE.—Parties desirous of participating in the fourth division of profits to be declared on policies effected prior to the 31st December, 1861, should make immediate application. There have already been three divisions of profits, and the bonuses divided have averaged nearly 2 per cent. per annum on the sums assured, or from 30 to 100 per cent. on the premiums paid, without the risk of copartnership.

To show more clearly what these bonuses amount to, the three following cases are given as examples:—

Sum Insured.	Bonuses added.	Amount payable up to Dec., 1854.
£	£ s	£ s
5,000	1,987 10	6,987 10
1,000	397 10	1,397 10
100	39 15	139 15

Notwithstanding these large additions, the premiums are on the lowest scale compatible with security; in addition to which advantages, one-half of the premiums may, if desired, for the term of five years, remain unpaid at 5 per cent. interest, without security or deposit of the policy.

The Assets of the Company at the 31st December, 1859, amounted to £690,140 19s, all of which had been invested in Government and other approved securities.

No charge for Volunteer Military Corps whilst serving in the United Kingdom.

Policy Stamps paid by the Office.

For prospectuses, &c., apply to the Resident Director, No. 8 Waterloo place, Pall Mall.

By order, E. L. BOYD, Resident Director.

THE TWENTY-SEVENTH ANNUAL REPORT, ACCOUNTS, and BALANCE SHEET of THE MUTUAL LIFE ASSURANCE SOCIETY for the year 1860 are now published, and may be had by a written or personal application to the Head Office, or to any of the Society's Agents.

CHARLES INGALL, Actuary.

The Mutual Life Assurance Society,
39 King street, Cheapside, E.C. London.

EMPEROR LIFE AND FIRE ASSURANCE SOCIETIES. 78 Cannon street west, and Queen street, London.

TRUSTEES.—J. F. Bontems, Esq.; Ebenezer Clarke, Esq.; Richard Harris, Esq.

Seventy per cent. of the profits given to the assured.

Upwards of 2,500 Life Policies have been issued during the past year.

Quarterly payments for a sum payable at death, or if living at a given age—

	For £20.	£50.	£100.	£500.
	s d	s d	s d	£ s d
Age 21	1 11	4 9	9 6	2 7 6
— 25	2 2	5 3	10 0	2 12 6
— 30	2 5	6 0	11 11	2 19 7

Policies made payable during the lifetime of the assured, without extra premium, in accordance with the reccommendation of the Select Committee of the House of Commons.

Claims paid to the policyholder within 14 days after satisfactory proof of death.

Stamps and medical fees paid by the office.

Loans granted on real and personal security.

Fire Insurance at the usual rates.

EBENEZER CLARK, Jun., Sec.

SPECIAL NOTICE.

PELICAN LIFE INSURANCE OFFICE, Established in 1797,
No. 70 Lombard street, E.C., and 57 Charing cross, S.W.

DIRECTORS.

Octavius E. Coope, Esq.	Henry Lancelot Holland, Esq.
William Cotton, Esq., D.C.L., F.R.S.	Wm. James Lancaster, Esq.
John Davis, Esq.	John Lubbock, Esq., F.R.S.

Interest allowed on current accounts.

THE FRENCH AND GERMAN PROTESTANT COLLEGE, Netherton House, Clapham, Surrey, combines the comforts of an English home with the advantages of a Continental Education. The French and German Languages, so indispensable to a good education, are taught by resident masters. They give lessons daily. The course of instruction adopted secures for young gentlemen a sound English, Classical, and Mathematical Education, combined with Drawing, History, Geography, and Modern Science. Pupils prepared for the military, naval, merchant, and civil service examinations. Terms, inclusive, from thirty to fifty guineas per annum, according to age and requirements. A difference will be made for two Pupils from the same family. For references and prospectuses apply to Monsieur A. de Chastelain, as above.

CHINA.—WANTED, a Gentleman fully qualified to undertake the management of a mercantile house in China. It is indispensable that he shall have had an experience of at least two years in a similar capacity in that country. Apply by letter only, stating qualifications, &c., to Alpha, 20 Threadneedle street, E.C.

AN ENGINEER AND SURVEYOR in extensive general practice has a Vacancy for a young gentleman as In-door Articled Pupil.—Address E. S., care of Mr W. Brownlow, Commission Agent, 16 Claremont place, Judd street, London, W.C.

A GENTLEMAN representing an English House in Egypt and the Levant generally, and visiting the principal ports, is open to take the Agency of a first-rate Shipping House in Manchester and Bradford goods, on commission or otherwise. He is thoroughly acquainted with the country, has had much experience, and could introduce at once a safe and respectable connection. The highest references will be given.—Address, by letter only, E. L., care of Mr J. W. Wallis, 127 Fenchurch street, London, E. C.

ENGLISH MERCHANTS AND TRADERS having business transactions with France, are informed that Mr Vital Foucqueron, Negociant de Paris, 28 Boulevart du Temple, keeps at his disposal Bills on Paris, at three and six months' date, and is prepared to open accounts by means of specie or securities.

TO SMALL CAPITALISTS.—Wanted, a few Gentlemen to join a small Commercial Company (under the Limited Liability Act) in connection with New Zealand. The undertaking is an important one, and the profits are likely to be very large.—Address "New Zealand," care of Messrs Hancock and Sharp, 20 Tokenhouse yard, London, E.C.

TO MERCANTILE CLERKS WITH SMALL CAPITAL.—Wanted, one or two Gentlemen of considerable commercial experience, and of active and persevering habits, with about £500 to £1,000 each, to join in an important and highly lucrative commercial undertaking in New Zealand, in connection with respectable parties at home. They would be required to manage the business in the Colony, for which an arrangement would be made with them, independent of their share of the profits as Partners. This is a most excellent opportunity for young active men of business with small capital.—Address to "New Zealand," care of Messrs Hancock and Sharp, 20 Tokenhouse yard, London, E.C.

A GENTLEMAN'S WARDROBE may be Completely, Expeditiously, Fashionably, and Economically Furnished at the Establishments of

The Political Economist.

The Editor of the ECONOMIST *intends to publish a Supplement half-yearly, giving* IN A COMPACT FORM *the Balance Sheets and Directors' Reports of* ALL *the Joint Stock Banks in the United Kingdom, as far as the same are made public, with some account of the most important Meetings of Shareholders.*

A HIGH RATE OF INTEREST NOT NECESSARILY A CAUSE FOR ANXIETY.

THE public are becoming accustomed to changes in the value of money, but it appears that some members of Parliament are not. From the discussion in the House of Commons last night, it appears that the number of variations in the rate of discount is considered to be a ground of accusation against some person or persons, but especially against the Bank of England. Yet, if the facts are investigated, it will be found that they have conformed very accurately to the supply and demand of loanable capital, and that they have protected the country from the consequences of a drain of bullion—we do not say effectively, time and events alone can show that—but more considerately, more anxiously, and with more of timely precaution, than in similar circumstances they have ever done at former periods.

It is an utter mistake to suppose that the Bank can make money dear by "small majorities" and when they will. The Bank of England has a guiding influence, but it has not a supernatural power. For a time the *prestige* of the Bank and the large funds at its exclusive disposal give a great weight to its weekly decisions. In reliance on the general correctness of its judgment, numerous contracts throughout the country are made to depend on the Bank rate;—to be so much greater or so much less, as the case may be. A general sensation is undoubtedly created by its variations. But further than this its power does not extend. The *prestige* of its influence is great, but it is momentary. Money lenders outside its walls would soon cease to follow its guidance, if its decisions were groundless, irregular, or incalculable.

The justification of the Bank of England is to be found in its published accounts. The unemployed bullion in the Bank of England, if the expression be allowed, is the *barometer* of industry; it *measures* the employment of capital. When capital is abundant and when it is seeking employment, the "bullion column" will be high; and when it is scarce and almost all absorbed in profitable employment, the bullion column will be low. By this test, the recent discretion of the Bank of England—far different from their indiscretion in past times—will bear to be tried. The figures are these:—

1860.	BULLION. £	DISCOUNT. Per cent.
Oct. 3	15,869,000	4
Nov. 7	13,897,000	4½ and 5
— 14	13,314,000	6
— 28	13,860,000	5
Dec. 26	12,798,000	6
1861.		
Jan. 2	12,652,000	7
Feb. 13	11,571,000	8
— 20	11,893,000	8

It is idle, therefore, to speak as if the fiat of the Bank of England regulated the value of money. The Bank of England is itself controlled by an infinitely stronger though much less conspicuous power—by the course of capital from country to country, which at one time removes from it funds which it might have reckoned on retaining, and at another brings to it other funds on which it could never have ventured to calculate.

Nor is it less idle to accuse the Act of 1844 or any other Act of these changes in the value of money. They are the necessary and inevitable results of trade and civilisation. They will happen as long as the vast transactions of commerce bear the floating capital of the world from country to country. When they cease it will cease; but while the trade of the world remains as it now is, we should no more hope for a fixed value amid its constant changes, than for fixed weather amid the annual succession of the seasons.

All this is now very generally understood by the more thinking part of the public. So far from being afraid of a higher value of money at the present moment, they would be seriously alarmed at a low value. If the Bank were neglecting their reserve—if gold were going from us—if the exchanges were against us, the public would be alarmed—they would fear a repetition of the events of 1847 and 1857: now they say the bullion in the Bank is 11,893,256*l*; the reserve of notes in the Banking Department is 6,045,645*l*; with such figures as these no panic was ever known, and while we see them we cannot be afraid.

At the present season, indeed, there is ground for great caution, watchfulness, and care. Trade has in some directions greatly slackened, and though this will almost immediately pour an accumulation of unemployed capital into the Bank, it also causes much distress among the labouring classes and strains the resources of many capitalists. The events which are passing in America, too, are vast and anomalous; they defy ordinary rules and ordinary calculations, and in the presence of great and irregular events, every wise man will be scrutinising and attentive.

At the same time, now that the public have learnt the lesson that "dear money" is the inevitable consequence of scarce money, there can be no motive for despondency and no reason for alarm. They must bear the natural results of uncontrollable causes; and, like ourselves, we are certain they would prefer to err on the side of caution; they would rather see the holders of money anxious to retain it than anxious to part with it; they would especially wish that the Bank reserve—the only unemployed money of the country—should be undiminished and unimpaired; they would prefer a continuance even of an 8 per cent. rate if it cannot be avoided, to the least danger of a recurrence of the terrible events of 1847 and of 1857.

ASPECT OF FOREIGN AFFAIRS.

It cannot be a pleasant thing to be Foreign Minister of a nation on whose dominion the sun never sets, whose ships swarm on every sea, and whose merchants have factories on every shore. Day by day he is called upon to consider not only the great and stirring questions of European policy, such as Italian Unity or Syrian Massacres, which interest every heart, but plaguing bagatelles about Mexican Bondholders or Mozambique Consuls, which interest no one but the parties personally concerned. And he must consider even the smallest and dullest of these matters cautiously and fully, since future wars and catastrophes, which will agitate the world and cost us millions, may easily grow out of disputes which now seem trivial even below contempt; and a cloud no bigger than a man's hand, if neglected or mismanaged, may in a few years swell into the cause of tempests and of earthquakes. At a moment when he would fain devote his continuous and undivided attention to the perplexing complications which America, Hungary, and Venetia are preparing for us, he is bothered out of his life by being suddenly called off, to watch the French in Cochin China, or the Russians in Servia, or the Germans in Schleswig-Holstein; or Juarez at Vera Cruz, or M. de Lesseps at the Suez Canal. All this must be exceedingly annoying, even to so highly-placed and highly-paid a functionary:—if the same obligations in their fullest extent where entailed upon unhappy journalists, life would become an unendurable burden. Fortunately, however, less is required of us; and the public is satisfied and considers itself honestly served, if we take cognisance only of those more prominent and important foreign questions, which the people as a whole wish to follow and to understand.

In Europe, since we last called attention to the subject, affairs have been advancing towards an inevitable issue, but so slowly and so obscurely that we can only just register the progress without being able in the least to predict when or by what precise road that issue will be reached. In reference to the Italian question three events have to be noted. The first Italian Parliament has met at Turin, and has been opened by Victor Emanuel in a temperate but not very explicit or informing speech. The essential point, however, is that Count Cavour has secured a large majority at the elections: it is obvious that the great mass of the Italian people are well inclined to place confidence and power in the hands of the statesman to whose ability, judgment, and patriotism they mainly owe their present proud position, and to trust him with the completion of the work he has so splendidly conducted hitherto.—Gaëta, too, has at length fallen; King Bomba is an exile, dethroned, wealthy, unpitied, but scarcely yet quite innocuous; for he has gone to Rome, a most convenient place from which to direct reactionary plots; and though we do not know the conditions of his surrender, we know enough of the man to be certain that, if they are stringent and disadvantageous, he will not observe them an hour longer than he must. We do not learn that the surrender of Messina was included in the capitulation, but there can be now no excuse for prolonging its anomalous position. The dethroned monarch can scarcely intend to put Victor Emanuel to the cost and trouble of another lengthened siege; and even were he disposed to do so, the garrison would scarcely deem it worth their while to encounter suffering and death to no purpose, on behalf of a monarch who has no longer any right to command them or any power to reward them.—The third event is the issue of another Pamphlet-oracle from the Delphi of the Tuileries, propounding, or professing to propound, the Emperor's policy with reference to Rome. The utterance is, as usual, perplexing and obscure:—its meaning, however, appears to be that the Pope must remain at Rome, but that he must remain on terms which will prevent him from being a permanent obstacle to the completion of Italian unity. The Emperor will not suffer him to be forcibly driven away, nor yet to be a hindrance to the developments rendered necessary by "the inexorable logic of facts." As to *how* this combination of objects is to be achieved, the oracle is silent. Perhaps Louis Napoleon has adopted the suggestion of the "Edinburgh Review,"—that Florence shall be the capital of Italy and the seat of the temporal Government; and that Rome shall be simply the Holy City, graced by the residence of the Spiritual Potentate. Or, perhaps, he does not see his way to a feasible solution more clearly than the rest of us, but is determined to protect the person of the Pope from outrage, and trusts to time and accident for offering some way out of the dilemma. Certainly the whole tone of the document is as unfavourable to the Pope's temporal sovereignty as it is friendly to the Pope himself.

The dispute between Austria and Hungary has reached another phase. The Hungarians, whatever may be the differences of opinion among themselves, maintain one resolute and unchanging attitude towards Vienna. They stand upon their old Constitution, because it was legal and ancient, though admittedly imperfect. They will pay no taxes but such as are voted by the Diet; and they will elect their Diet by no *forms* except those prescribed by the electoral law of 1848.—The Emperor is willing to concede everything which will leave him master of the financial and military resources of Hungary, for without these he cannot face Italy or coerce Venice; but he will not go a step further, since to do so would be to sacrifice the end to the means. The Hungarians, knowing his object as plainly as he knows it himself, are resolved that neither their revenue nor their soldiers shall be employed against Italy, and are convinced also that, unless they retain the constitutional command of these essentials, all other concessions will be evaded or revoked. The consequence is that the attitude of the Emperor towards Hungary has within the last three weeks become decidedly more obstinate and hostile. Finding that he cannot gain by conciliation the point for which alone he was willing to conciliate, he seems preparing again to be stiff and reactionary. Meanwhile there appears to be great restlessness, to say the least, in Servia, Montenegro, and the Principalities; and Russia, on the very eve of a vast internal change, the emancipation of 20,000,000 of serfs, is said to be moving troops with a view to intervention, unless France and England shall forbid the step. Prussia and Denmark also are at issue about the Duchies; and altogether there are several causes of war extant and in operation which it would be very easy to fan into a flame, and which it will be very difficult, we fear, to reduce to perfect harmlessness.

The position of affairs in America is alluded to in another part of our paper. Certain difficulties have arisen with reference to the want of Customs officers qualified to give clearances to ships which shall be recognised as valid by both the contending parties; and the Attorney-General of the Union, when applied to by the Foreign Ministers at Washington, has been most feeble and unsatisfactory in his reply. Shippers and merchants, however, are ingenious and usually successful in surmounting embarrassments of this sort. A more serious impediment to a large and lucrative commerce with America this year seems likely to arise from the confused state of the interior. Commerce hates disturbances and shrinks from *prospective* engagements with chaotic countries; and till *some* settlement is effected, we must expect that dealers will exhaust their stocks rather than send out fresh orders. Cotton, however, will continue to come forward for the two simple and omnipotent reasons, that Europe *must* have it, and that America *must* have the money which it brings. The tone of commercial advices, however, is decidedly uncomfortable.

THE EQUALISATION OF THE INCOME TAX.

We cannot but regret that Mr Gladstone refused his consent to the appointment of a Committee to consider and report on the best mode of equalising the income tax. We can well understand that a responsible Minister should shrink from making any such proposal himself. We could completely comprehend him if he said, 'I can be in no way a 'party to this Committee. I will not have any share in the 'responsibility for it. The subject is a very complicated 'one: it abounds in dangers and difficulties, and I will not 'profess that I have a plan for a great reform. Any change 'in the existing system is a very serious risk. We have now 'an effective instrument of taxation: if we begin to introduce 'theoretical refinements and manifold complications into it, 'we may end by destroying its power. Our last state may 'be worse than our first; for we may have destroyed the 'most potent means of getting money which any civilised

'Government has ever discovered. We may very pro-
'bably not succeed in making our taxes bear more equally,
'but we may very easily break up and annihilate the
'the best of them.' Such language would have been consistent, clear, and in a certain sense statesmanlike. It would have been refusing to be responsible for a committee of discovery; it would have been declining to participate in what may perhaps be a dangerous undertaking. But Mr Gladstone very unfortunately went further; he permitted himself to speak as if the inequalities in the income tax were inherent and irremediable, and as if the objection to them, which he admitted to be rooted in the popular mind, was based on 'sentiment' rather than on 'reason.'

The basis of the objection is, that people think that the more rich ought to be more taxed than the less rich. The public believe that a barrister with a precarious income of 1,000*l* a year, which cannot last longer than his life, and in all likelihood will not last so long, is not as rich as a landholder with 1,000*l* a year, whose estate is at his own disposal in perpetuity. The public believe that a fundholder, an owner of Consols, is far richer than the owner of a terminable annuity. They believe, in a word, that persons of durable incomes are richer than persons with short-lived incomes; they believe that people with secure incomes are richer than people with only precarious ones. And surely their convictions are very reasonable.

It is impossible that Mr Gladstone can have permitted himself to be puzzled by the ingenious but superficial arguments of the theorists who maintain that if the income tax is a perpetual tax, there is not now any injustice, because a perpetuity is taxed for ever, and a precarious income is taxed only while it lasts. The reply is so easy. Even while the precarious income lasts, it is not so efficient an income as a perpetuity; it does not give its possessor as much to spend; it does not give him the same command over the comforts of life; not only is it short lived and perishable, but even while it lives and before it perishes it is in comparison ineffectual. A lawyer with an income which may cease any day, which depends not only on his health but on his perfect health, which six months' illness would very seriously impair, and perhaps entirely destroy; a terminable annuitant who knows the precise day when he will cease to have any money; a merchant who makes his money by his daily judgment and daily attention,—cannot spend, cannot enjoy the same comforts and the same luxuries as a fundholder or a landowner of the same nominal income. The one must lay by for a future time at which his present means of subsistence will cease: the latter need do nothing of the kind; his land or his Consols are sure to provide for him—inevitably, spontaneously. The mass of mankind will always see this enormous difference between the two classes of men, even if ingenious theorists deny it; they will never consent that the two shall be taxed equally; they may endure it for a time as an inevitable wrong, but they will not cease to regret it as a manifest injustice; their deeply fixed opinion on this subject is not a mere sentiment; it is the instinctive perception of a cardinal fact.

But even if it were proved to be just to levy equally on all incomes of similar amount a perpetual income tax, it would not be the less certain that our present mode of levying the existing income tax is an unjust hardship on the industrial classes. Even if the abstract theory were proved to be good, the daily practice would certainly be bad. We levy not the same amount every year, but a variable amount. We find that it is inexpedient to alter annually the course of our indirect taxation to meet the changing expenditure of a country: duties which affect trade should be, as we have learned by long experience, kept as fixed and as invariable as they can be; yet some shifting element is necessary in every fiscal system: in ours, the income tax is now that element; and the causes which have made it such are unalterable and will certainly continue. And, if this be so, no one, not even the most speculative theorist, has ever maintained, or will ever maintain, that our mode of assessment is fair and equitable. Even if it were just to levy the same rate for ever on all classes of incomes, it would not be just to levy a variable rate. It is no answer to the annuitants who paid fourteen-pence in the pound during the Crimean war, that a long posterity of landowners are likely to pay sevenpence. Every theorist has admitted that a temporary income tax on our present plan is an unjust grievance, and an income tax which now increases and now diminishes is, to the extent of such variation, a temporary impost.

It is not true that the proposal to equalise the income tax was discussed and set at rest in 1853. On the contrary, when the events of that time are calmly reviewed, they will show that the public conviction of the extreme injustice of the present mode of assessment was as strong then as it is now, and that it was only by a casual and temporary circumstance that they were restrained from acting upon that conviction. In the last Budget of his first administration, Mr Disraeli proposed to alter the existing mode of assessment and to remove the pressure on the industrial classes. That Budget was rejected by the House of Commons on other grounds. Mr Gladstone then became Chancellor of the Exchequer and brought forward the celebrated Budget of 1853. He then explained, in perhaps the most effective practical speech which this generation has heard, that it was an error to suppose that the income tax was necessarily a permament impost: on the contrary, he proved that if the expenditure remained the same, and our indirect revenue augmented with the growing prosperity of the country, the income tax might be gradually reduced, and might in 1860 be relinquished. On the distinct ground of the temporary nature and exceptional character of the tax he obtained our consent to continue it as it was. If, as he then explained it, it was a financial reserve to be used only for rare and great objects—in rare and great emergencies—it seems to follow fairly enough that it was not very important to redress even the worst of its inequalities. It would soon pass away, and then both its justice and injustice would have ceased to vex us. These sanguine expectations are now past,—the year 1860 has gone, and the income tax is pressing on us more heavily than ever, in time of peace, it did before. Mr Gladstone, who told us it would cease, was the very Minister who proposed its augmentation. What practical man ever now expects to see its end? Who is credulous enough to hope for a year in which he will not pay it? Who indeed will be bold enough to say that without some such tax the higher classes of this country would pay their fair contribution to the public revenue? Who in this last point of view would wish to see it relinquished?

On the whole, therefore, as the natural, ineradicable feelings of mankind assure us that the income tax as now levied is unjust; as even the most refining theorist has not ventured to defend it so long as its amount is what in practice it will ever be; as it is now certain that it will always be a permanent element in our fiscal system,—is it dubious that at least we ought to consider whether its injustice is remediable or not, that we ought again to resume those inquiries and those investigations which we were induced to relinquish by the hope that the income tax would not be permanent, and that in 1860 we should see its end?

THE BISHOP OF NEW ZEALAND AND HIS MAORI CLIENTS.

THERE is one very distinct and irresistible conclusion on which all the voluminous evidence that has been collected concerning the origin and conduct of the Maori war in New Zealand converges,—the necessity of bringing the native population more effectually under the authority of the British Government. Whatever may be our duties to the natives,—and they are difficult and grave,—they can none of them be adequately discharged while the Maoris continue to be half exempted from the duties of subjects though claiming all the rights of favoured dependents or spoiled *protegés*.

It is a characteristic and honourable feature of British colonisation, that wherever we go we take with us a body of independent and disinterested clergy or missionaries, who no sooner arrive on a foreign shore than they identify themselves with the interests and wishes of the natives whether civilised or savage, and who would almost rather give up the ties of race and kindred than surrender that influence over the natives for spiritual purposes, which only a constant bias to their interests in secular disputes will give. Accordingly, whether it be in Africa or India or New Zealand, the views of the English settlers are sure to be balanced, and often strenuously opposed, by the views of the English missionaries, who invariably

detect with the acuteness of an advocate the first symptoms of selfish and greedy aggression on native rights, and by strong representations to both the local and Imperial Governments demand guarantees of safety and redress. This is as it should be. Nor is the local Government either in our colonies or in India usually incompetent to hold the scales of justice even, between the pushing self-interest of the settlers, and the conservative jealousy of the natives and their spiritual friends. For spiritual friends are not always wise, but sometimes very foolish. They do not invariably see that a strong Civil Government is the only school in which a due value for Christian morality can be learned. The missionaries, in their eagerness to win the love and confidence of their expected converts, are too apt to adapt themselves to those notions of natural right and traditional privileges which they find prevalent among their clients,—and, once having done so, to fall into the habit of regarding all conflicting views as the offspring of selfish cupidity or restless ambition.

We are sincerely afraid that the Bishop of New Zealand and his clergy have fallen into this grave mistake. No one can for a moment deny their noble and disinterested devotion to their great task. They have identified themselves absolutely with Maori views of hereditary and tribal right. They have become all things to the Maoris to save Maori souls. But they forget that a strict political discipline may be, and as far as experience goes always has been, an essential condition of any deep moral or religious impression. It is quite probable, even from the clerical point of view, that till the Maoris have learnt to live under an equal, impartial, and strictly-enforced law, they will not even be able to apprehend the full force of the deeper lessons the missionaries have to teach them. It is certain that, unless they do so, they can never be peaceable neighbours to the English settlers, whom they will regard, and by whom they will be regarded, as natural and necessary foes. Mr Richmond, the Prime Minister of the Colonial Government, in a masterly memorandum on the Bishop of New Zealand's policy, has drawn the following striking picture of the actual relation between the settlers and the Maoris :—

Perhaps those only who have lived as settlers surrounded by a Maori population are able to realise the intensity which the desire expressed by these addresses [for the extension of a firm civil Government to the native districts] can attain amongst Englishmen so situated. In his intercourse with the natives the colonist is exposed to daily provocations. His cattle, for example, stray from his paddock; he follows them to a neighbouring Pa, and is compelled to redeem them by an exorbitant payment. In the course of the altercation a musket is, perhaps, pointed at him, or a tomahawk flourished over his head. On the other hand, should he try the experiment of driving native cattle to the public pound for trespass on his cultivations, a strong party of Maoris, with loaded muskets, breaks down the pound and rescues them. He has to maintain party fences without contribution from his Maori neighbour. Herds of native pigs break through to his crops. The dogs of the Pa worry his sheep. To save his own farm he has to pay for the extirpation of thistles on the neighbouring native land, hundreds of thousands of acres of which lie waste, and worse than useless, around his homestead. Redress in the Courts of Law is not to be obtained because it would be dangerous to the peace of the country to enforce the judgment. On the other hand, natives freely avail themselves of their legal remedies against Europeans. At the present time a trader lies in Auckland gaol, under arrest for debt at the suit of a native chief. About a year ago this same European had a judgment for a large amount against the native who has now imprisoned him, which he was of course unable to enforce by execution.....

There is a reverse to the picture which has been drawn of the wrongs of the settlers. Much might be said of frauds practised by European traders, of wanton insults offered to natives by the lower class of settlers, and of other inconveniences which have followed from the settlement of the country. Nor would it be wise to expect that an uncivilised people should at once conform to the usages of strangers who have come to plant settlements amongst them. But freely admitting the whole of what may be said on these points, it is still true that the strong desire of the colonists for the thorough establishment of British authority is natural and laudable, and that its fulfilment, if attained by no violation of the laws of humanity and justice, will conduce to the benefit of both Europeans and natives.

Now the relations between the Maoris and the English settlers here depicted, is one which cannot and ought not to last. When the Bishop of New Zealand asserts, as he does, that "this colony was avowedly formed, not for the acquisition "of territory by the English race, but for the protection of the "New Zealanders," he virtually expresses his belief that there is a conflict between the two ends which he ought to be very loth to admit. If he means that the British Government was founded in great measure to control the selfishness of English settlers disposed to take from prior native occupants land which they cultivated, or which they claimed the right to cultivate, he is of course quite right. But if he means,—and this is the only practical application of his argument,—that the British Government was established to protect the natives in every act of opposition on which any of them may embark to the cultivation of really waste lands by the English settlers, after a fair and voluntary sale by the natives individually entitled to these lands,—then we say he proclaims a principle of necessary and internecine war between the British colonists and the Maori race.

The Governor of New Zealand has adopted in this matter the only wise and just course. While he has been the consistent friend of native rights, he has firmly resisted the extravagant claims put forth by the missionary party and the native chiefs. The whole mass of evidence shows that the true issue in New Zealand lies between reducing the native territorial rights to defined and reasonable limits,—or conceding to a few chiefs the full power to keep vast and fertile districts absolutely and perpetually waste, merely for the sake of barring out the British settler. We say with the strongest conviction, that this is a dangerous, false, and utterly unprincipled concession to the spirit of savage monopoly. There are limits within which we must confine such pretensions as these. The Maoris have every claim upon us for considerate and scrupulous treatment. Where they really occupy or cultivate, their title ought to be as assured as our own to the land which we have fairly purchased. Even where they do not, but have any colourable claim to the land, we ought to respect it. But where the actual and recognised owners are willing to sell, and do sell such tracts of waste land to British settlers,—and a Maori chief forbids the transfer, solely for the purpose of preventing the approach of British civilisation to the strongholds of Maori barbarism,—we say that he is not the true friend of Christianity who would sustain the Maori veto. The Bishop of New Zealand is guilty of a grave error, if not of something worse than an error. Singular as are his merits as a missionary, Colonel Gore Browne is at present a far truer friend to the Maori than he.

THE PROPOSED REPUBLICAN TARIFF IN THE NORTHERN STATES.

The Republican party in the United States are pursuing a very blind policy in pushing, at such a time as the present, an exceedingly irritating and complicated tariff through the Legislature. It seems, so far as we can judge by the statements of their leaders, that while they are willing to sacrifice their cherished principles to any proposition which, like Mr Crittenden's, holds out some faint hope of an ignominious reconciliation with the South, they are by no means willing to lose the opportunity which the withdrawal of the Southern Senators affords to enact a most odious tariff. They will not object to divide the Territories with the Slave States, share and share alike,—but they seize their opportunity while they have it to lay on protective or prohibitive duties. Appearances may belie them, but it would seem as if, finding themselves compelled to sacrifice their consciences, they were anxious to indemnify themselves by hastily snatching an advantage in taxation. The course is, we believe, as foolish as it is blind. There is no need of fresh barriers between the South and North besides those which a Slavery policy has reared. If ever there were a time when the Northern States should keep themselves above the suspicion of interested or selfish motives, it is just now when all foreign nations are feeling for their wrongs, and wishing them success in the endeavour to restore authority and order. And this is the time they choose to justify the Slave States in their secession,—so far as any economical measure can justify it,—by publishing their intention to return to the selfish and ruinous policy which drove South Carolina into rebellion in 1832, and has been a constant source of dissension between the North and the South. We believe that Mr Lincoln and Mr Hamlin, the incoming President and Vice-President, are by no means favourable to the excessively restrictive policy which a certain section of the Republican

party are now bent on introducing. Perhaps it is the fear of a firmer though more friendly Executive which is hastening the steps of the Protectionists. Mr Buchanan will scarcely veto a measure in the last days of his administration which is so likely to discredit his opponents as Mr Morrill's tariff.

This tariff, which, after passing the House of Representatives, went up to the Senate, was read twice and referred to the Committee on Finance, has been by that Committee amended and reported to the Senate in a form now before us. It seems to be generally expected that in this shape it will pass the Senate; and be accepted, in this or some slightly modified form, by the House of Representatives.

The tariff is indeed one of that kind over which the rival Southern Confederation may well exult. It is intended as a stimulus or spur to Northern trade,—but it will be indeed less a spur than a drag, a constant and clumsy encumbrance certain to trip up and wound and delay the wearers. It is a retrogression far beyond the tariff of 1846, for it is as bad as that tariff in the rate of duty fixed, and far worse in the complexity of the rules applied for ascertaining those duties,—a point which we need not say is up to a certain limit even more important than the rate of duty itself. The general character of the change from the tariff of 1846 to the greatly improved tariff of 1857 was this, that 30 per cent. *ad valorem* taxes in the tariff of 1846 became 24 per cent. *ad valorem* taxes in 1857, while the 24 per cent. taxes of 1846 became 19 per cent. in 1857. This was the general nature of the reform of 1857, Mr Morrill's tariff would be comparatively innocent if it reverted to the tariff of 1846. It does what is much worse; it complicates the comparatively simple system of 1846 so as to raise an infinity of difficult questions and disputes on the taxation of any cargo which is shipped to the North American ports. Specific duties are no doubt generally preferable as an instrument of taxation to *ad valorem* duties; but nothing can be worse than an extremely complicated *mixture* of the two systems of specific and *ad valorem* duties; and such a mixture is proposed in the present Bill. We subjoin a table of the changes in the duties on some of the more important articles between 1846 and 1857, with the proposed alterations of the present Bill.

	1846. Ad valorem. per cent.	1857. Ad valorem. per cent.	Proposed Tariff 1861.
Apparel and clothing	30	24	30
Brandy	100	30	1 dollar per gallon.
Caps, gloves, and stockings of cotton	20	15	30
Caps, gloves, and stockings, other	30	24	30
Carpets	30	24	30 per cent., or 20, 30, 40, 50 cents per square yard according to price.
Coal	30	24	50 cents to a dollar per ton.
Copper in rods and sheets	20	15	1 to 2 cents per lb, or 25 per cent. ad val.
Copper in pigs	5	free.	ditto ditto ditto
Copper articles	30	24	ditto ditto ditto
Copper buttons	20	15	ditto ditto ditto
Cotton cords	30	24	30
Cotton manufactures	20–25	24	25 and 30, or 1, 2, 3, 4 cents per square yard according to number of threads in square inch.
Cotton laces	25	19	30
Cotton and silk manufactures	20	15	30
Cutlery	30	24	30
Flax manufactures	20	15	20
Flax, raw	15	free.	15 dollars per ton.
Hemp manufactured	20	15	25-20 and 1 and 2 cents per lb.
Iron in bars	30	24	15 dollars a ton.
Iron castings	30	24	2 cents per lb, or 25 per cent. ad val.
Iron manufactures	30	24	ditto ditto ditto
Lead manufactures	30	24	1 cent. and 1¼ cent. per lb.
Lead in pigs	20	15	ditto ditto
Linen manufactures	30	24	25 to 30 per cent.
Linen, others	20	15	ditto
Silk, raw	15	free.	15 ad val.
Silk manufactures	25	19	20, 25, 30 ad val.
Wines	40	30	33⅓ ad val.
Wool, raw	30	24	3 and 9 cents per lb.
Wool manufactured	30	24	12 cents a lb, and in addition 20 or 25 per cent. ad val.
Woollen and worsted yarn	25	19	20-25 per cent. ad val.

But this comparison gives in reality no conception of the extreme complexity and minuteness of the proposed tariff, since it is impossible to express in any column of figures the variety of different duties provided for different cases. As an example, we give the provisions with respect to cottons, by no means the most elaborate of the sections :—

Sec. 14. *And be it further enacted*, That from and after the day and year aforesaid, there shall be levied, collected, and paid, on the importation of the articles hereinafter mentioned, the following duties, that is to say: First, On all manufactures of cotton not bleached, coloured, stained, painted, or printed, and not exceeding one hundred threads to the square inch, counting the warp and filling, and exceeding in weight five ounces per square yard, one cent per square yard; on finer or lighter goods of like description, not exceeding one hundred and forty threads to the square inch, counting the warp and filling, two cents per square yard; on goods of like description exceeding one hundred and forty threads, and not exceed two hundred threads to the square inch, counting the warp and filling, three cents per square yard; on like goods exceeding two hundred threads to the square inch, counting the warp and filling, four cents per square yard; on all goods embraced in the foregoing schedules, if bleached, there shall be levied, collected, and paid, an additional duty of one half of one cent per square yard; and if printed, painted, coloured, or stained, there shall be levied, collected, and paid a duty of ten per centum ad valorem in addition to the rates af duty provided in the foregoing schedules: *Provided*, That upon all plain woven cotton goods not included in the foregoing schedules, and upon cotton goods of every description, the value of which shall exceed sixteen cents per square yard, there shall be levied, collected, and paid, a duty of twenty-five per centum ad valorem: *And provided further*, That no cotton goods having more than two hundred threads to the square inch, containing the warp and filling, shall be admitted at a less rate of duty than is provided for goods which are of that number of threads. Second, On spool and other thread of cotton thirty per centum ad valorem. Third, On shirts and drawers, wove or made on frames, composed wholly of cotton, and cotton velvet, twenty-five per centum ad valorem; and on all manufactures composed wholly of cotton, bleached, unbleached, printed, painted, or dyed, not otherwise provided for, thirty per centum ad valorem. Fourth, On all brown or bleached linens, ducks, canvas paddings, cot bottom canvas, burlaps, drills, coatings, brown Hollands, blay linens, damasks, diapers crash, huckabacks, handkerchiefs, lawns, or other manufactures of flax, jute, or hemp, or of which flax, jute, or hemp shall be the component material of chief value, being of the value of thirty cents and under per square yard, twenty-five per centum ad valorem; valued above thirty cents per square yard, thirty per centum ad valorem; on flax or linen threads, twine and pack thread, and all other manufactures of flax, or of which flax shall be the component material of chief value, and not otherwise provided for, thirty per centum ad valorem.

When we add to complications such as these that it is proposed so far to do away with the bonding system as to oblige *all* goods to pay duty within 90 days of warehousing, and to give drawback on none which are not withdrawn for exportation within six months, we think we may say that the Legislature of the United States has never proposed to strike a more deadly and wanton blow at North American commerce than in this measure now before it. We are happy to know that many thorough Republicans are utterly opposed to it.

"MANIFEST DESTINY" OF CANADA.

THE discussions in the Northern States of the American Union, while they seem to show every day more clearly the hopelessness of any reconciliation between North and South, have brought prominently forward one political issue on which it seems not unlikely that the Democratic and Republican parties will combine. "Manifest Destiny," who has hitherto turned her eyes Southward, now wheels round and gazes in the opposite direction; and as she looks the boundary line of the Ashburton Treaty disappears from the map. The annexation of Canada is spoken of in the Democratic organs of the North as the only proper equivalent for the loss of political importance caused by the Southern secession. "The territory which the Canadians hold," says the *New York Herald*, "is about 350,000 square miles. It "would, therefore, make thirteen Sovereign States, averaging "in area thirteen States of the Northern Confederacy. Such "a prize is not to be lost.....Now that the Confederacy "is to be shorn of more than half its strength in territory, and "more than a third of its population, it is necessary to re-"pair the loss, else we would sink to a third or fourth-rate "Power. *By peaceable means or force, therefore, Canada "must be annexed.*" Now the policy of swelling the free States by the accession of the Canadas and British Columbia was expressly foreshadowed by Mr Seward last autumn in his great Presidential canvass, and now that the Republicans are on the look-out for some means of healing the breach with their Democratic opponents, it is not probable that the Republican leaders will in any way discountenance the agitation for "redressing the disturbed "balance of power" in this way. Even the Democratic organs admit that the Southern Confederacy "aspires to "the early absorption of Mexico, Central America, and "the island of Cuba." The more clearly they see in the Secession movement a premeditated scheme for carrying Southern empire down to the Isthmus and for absorb-

ing the West India islands, the more anxiously do the States of the Northern Confederation scan the area within which alone they can hope to expand. The annexation of the Canadas will be a question of daily increasing interest in the Northern States, as the power of the South is consolidated. The Democrats, with that passion for dominion which has never in any era of the world's history taken so unscrupulous or impudent a form, will identify themselves with the step. The Republicans, though far more scrupulous and modest in their party-aims, yet as in some sense the authors of the disruption which has so clipped the power of the Union, and as having themselves first pointed to this equivalent for the growing power of the South, can scarcely help lending their influence, more or less, to this movement. The sooner, therefore, we consider the attitude that England ought deliberately to assume, the more consistent and dignified our policy will be.

It seems to us clear that we should take our stand on the policy indicated long ago by Lord Derby (then Lord Stanley) and Sir Robert Peel, that if the people of the Canadas universally wish to throw off the yoke of England and annex themselves to the United States, no obstacle will be interposed on the part of Great Britain. To us Canada is, from a military point of view, expensive; and to defend for her so long a frontier line is no little responsibility in case of war with the United States. And even if this were not so, to keep down a vast and populous dependency, anxious to revolt, on the other side of the Atlantic, is a policy on which we are not likely to embark twice. Moreover, we sincerely believe that this is the policy which is most likely to retain for England the affection of the Canadas. The political jealousy of anything like interference in all independent dependencies, if we may be excused the expression, is naturally very great. And the least symptom of any wish on the part of England to coerce the political movements of Canada would immediately engender a feeling of disloyalty, however loyal the previous temper of the population.

And if we refrain from anything like menace or coercion in the matter, contenting ourselves with simply defending Canada against any aggressive movement of the American States, we do not think the people of that country will be disposed to listen to the voice of the Democratic charmers, "charm they ever so wisely." It is true that with the obliteration of slavery from the institutions of the Northern Confederation, by far the greatest obstacle to the Union will have been removed. But though the institution of slavery would have kept an impassable barrier between the people of the American Union and of the British dependency,—there are other, not indeed so great, but very serious objections to an amalgamation, which we do not think the Canadians will be disposed to surmount if they feel absolutely free to act exactly as they please. If, as our New York contemporary tells us, the Canadians have long been "panting for more freedom "than they can enjoy under British rule," we do not think it very likely that they will look to find it in the American Union. The protectionist policy which the Northern States are now so madly adopting is unfortunately not likely to deter Canada, as her own Legislature has embarked in the same course. But the result of the union with the United States would be the partition of Canada into a number of "Sovereign" States, as they are called, each with the complete direction of its own policy in all matters except those of which the Federal authority in Washington takes account. Lower Canada would be permitted to be as intolerantly Roman Catholic as it chose, Upper Canada as intolerantly Orange. The result of this removal of the tempering influence of a Central Government empowered to deal with all subjects of public importance would soon be felt in a fatal localisation of petty tyrannies. The truth is, that the partition of powers between Federal and State authorities does not work well for the interests of true freedom. The State appears to be much too *small* a unit for the good use of sovereign power. The petty tendencies of place and prejudice exercise too large an influence. The Federal Union ought to exercise many of the powers which the State really possesses. And this the Canadians can scarcely help seeing. They will not envy the States of America that so-called liberty which consists in enthroning the popular opinion of a very confined district, and investing it with sovereign power over all the most important departments of human life.

Agriculture.

AGRICULTURAL STATISTICS.

CROPS OF 1860—1861.

There has seldom been a period when an accurate account of the data on which agricultural calculations are founded can prove more useful than the present. After more than a year, during which the weather has been continuously unfavourable to the farmer in a degree unexampled in the present century, all who are directly interested as owners or occupiers of land can scarcely refrain from asking themselves "What is our actual position? what is the prospect of our immediate future?"

The public in general, as well as the trading sections of the community, too, are scarcely less interested in knowing what are the available resources of this country for feeding the people.

We have before us two statistical documents of great value in relation to this subject. One, the result of Government action, *i.e.*, "The Agricultural Statistics of Ireland for the Year 1860," collected under the superintendence of the Registrar-General, and presented to Parliament by Her Majesty's command; the other, an estimate of "The Crops of 1860" in England, founded on data obtained by private enterprise and inquiry, the results of which in a compendious form constitute a supplement to the *Mark Lane Express*. Aided by these documents, a tolerably accurate view of the actual produce of the past year in England and Ireland may be formed, while a glimpse of the probable produce of the current year may be obtained.

In Ireland there was a decrease of land under crops including meadows in the year 1859 as compared with the preceding year, there wes also a decrease of fallow and uncropped arable land, and of bog and waste, the increase consisting of equivalent quantities of grass or pasture, and woods and plantations.

In 1860 there was a total increase of land under crops of 105,365 acres, which consisted of meadow and clover, there being a decrease of the land under cereal, green, and flax crops. Of the cereal crops, wheat and barley increased, while of the area under oats, bere and rye, and beans and peas, there was a diminution, the greatest being in oats, of which 21,278 acres less were grown in Ireland in 1860 than in 1859. Taking the period from 1854 to 1860, there has been a considerably decreased acreage of all the cereal crops, and there has been an increase of flax and of meadow and clover. The mere difference of acreage of the two periods does not afford much indication of the progress of agriculture in Ireland, save that the necessary tendency towards pastoral husbandry created by the moisture of the climate evidently exercises a predominant influence.

Of live stock, horses have decreased in 1860 as compared with 1859 by 8,137, though taking the five years from 1855 to 1860 horse stock shows an increase of 64,651. In cattle the decrease of the year in 1860 amounts to 216,863, while between 1855 and 1860 the increase is no more than 34,835. Sheep have decreased by 54,958 in the year, and by 64,496 in the five years. Of pigs there is an increase by 2,879 in the year, and by 90,985 in the five years. The total decrease in the value of all kinds of live stock from 1859 to 1860 amounts to 1,528,360*l*. On the other hand, the five years' comparison shows an increased total value of 786,421*l*. The scarcity and high price of hay and other crops of 1859 will account for the decrease of live stock, and the Registrar-General considers it "satisfactory to find that the decrease in cattle and sheep is not so great as might have been expected, when the extraordinary prices of hay and all feeding for farm stock are taken into account."

We find a recurrence to the subject of weeds which has marked every report from Ireland, the evils of which seem to be undiminished. This, from the state of the weather during the past year, might have been expected. There are few farms in England so clean as usual, and not a few are in a wretched state. The Registrar refers to a bill to provide for the destruction of weeds in Ireland, introduced into Parliament last session by Sir W. Somerville and Mr Bellew, which he hopes may pass into a law in the present year. That bill contains provisions we should think rather stringent in England; but possibly it may be useful or even necessary in Ireland. Thus, by Section 2, occupiers who may have reason to apprehend injury from the seeds of weeds growing on adjoining land may serve a notice on the owner of the land requiring him to cut down and destroy the weeds. Neglect to attend to such notice subjects the weed grower to a penalty of 5*l* in the first instance, and to a double penalty on a second notice. That proving ineffectual, an order to cut and destroy the offending weeds is to be obtained from justices at petty sessions, when, in addition to first and second penalties, the expenses are to be paid by the offender. The injured occupier is to receive the penalties levied on his slovenly neighbour. It offers a somewhat odd view of the husbandry of a country to find that such provisions are even suggested. Would it not rather appear from the great prevalence of weeds on tillage land, that in the climate of Ireland it may be as pertinently asked now as it was in 1776 when Arthur Young wrote:—"Ought you to turn some of the finest pastures in the world into the most execrable tillage that is to be found on the face of the globe?"

Potatoes are increasing, and so long as farms remain so small

as they are in Ireland, such an increase must constantly be looked for. The emigrants from Ireland increased in 1860 by 2,776 persons.

Turning now to the privately collected statistics for England, we find very various reports as to the crops grown last year with reference to quantity, but, with scarcely any exception, the quality of all grain is stated to be inferior. The Buckingham "accounts of the wheat crop agree in stating it to be an average in quantity, but secured in very bad condition." Oats are a fair crop, and generally got in in good condition. In Cambridgeshire, which comprises a good deal of light land, some wheat crops are reported as very good, while others speak of only two or three quarters to the acre.

In Cheshire, again, there is a fair quantity of wheat, but the quality and condition are bad. In Devonshire, the deficiency of the wheat, both in quantity and weight, is stated to be very great. In Durham, the wheat crop is so bad as in many places to be almost useless. In Gloucestershire, the wheat varies from very bad to very good; the other grains were an average, but got in badly. In Lincolnshire, the yield of the wheat was deficient "and from 1½ to 2 stones per bushel under the average weight." These may be taken as samples. Though from most counties one or two of the accounts sent in report the crops as good or of average quantity, though the greater number of accounts from the same county report deficiency in quantity and weight. But, perhaps, the most important fact shown by the *Mark Lane Express* returns is, that the quantity of land sown with wheat during the late autumn is seriously deficient. After the frost the land remained for a time in but moderate condition for wheat sowing where it had previously been prepared for that purpose, but much land which ought to have come in for wheat this year had not been ploughed, and during the past week we have had a constant recurrence of rainy nights or days which remind us somewhat unpleasantly of the season of 1860. In a few of the light land counties nearly the usual breadth of wheat has been sown. This is the case in Norfolk, where, under the prevalent four-course system, wheat could be drilled or dibbled on the clover leys, when the fallow and root land could not be touched. So in Hertfordshire, for the most part a light land county, "nearly the usual breadth has been sown with wheat, but some of it was very wet."

In Kent, to the 1st of January, from one-third to one-half less than the usual breadth of autumn wheat has been sown, but a dry February, it was hoped, would enable a good deal of spring wheat to be sown. In Wiltshire, wheat sowing has been effected better than in most other counties, the light land having been sown in "tolerable order." The heavy lands were both wet and foul. In Suffolk and Surrey, on the light lands about the usual quantity of wheat has been sown. In the greater number of counties, however, the reverse is the case. Thus, in Leicestershire, "the breadth of winter wheat sown is from half to one-third less than usual, the land being generally foul with weeds and wet." In Lincolnshire, "from one-third to two-thirds of the usual breadth still to be put in." In Northamptonshire, "from one-third to one-half the land intended for winter wheat not yet sown." In Northumberland, "in the neighbourhood of Berwick-upon-Tweed and Coldstream no wheat has yet been sown, but in other parts more or less has been put in in fair condition on the fallows. In Nottinghamshire, the sandy soils have been sown as usual, and about one-half only of the strong lands was sown with wheat. In Lancashire, a considerable breadth of wheat remains unsown, and the same may be said, in somewhat differing proportions, of Warwickshire, Westmorland, Yorkshire, Worcestershire, Somersetshire, Huntingdonshire, Hampshire, Essex, Durham, Devonshire, Derbyshire, Cheshire, Cambridgeshire, Cumberland, Bedfordshire, and Berkshire. In many districts some of the wheat sown is stated to have been put in in bad condition, and in some places the slugs are stated to have done much mischief. It is certain great efforts will be made to sow spring wheat during this and next month, and should the weather prove dry there may be a good deal of the deficiency in autumn wheat compensated for. It is generally agreed that at present the deficiency of autumn and winter wheat sown is as great as that of the untoward season of 1852-53.

Turnips are better, especially on the light soils, than was at one time expected, and they have been less injured by the frost than it was feared they would be, but the mangold wurzel crops have almost universally turned out to be smaller than the worst anticipations of farmers suggested. Sun and a fair amount of dry weather seem to be quite essential to a good crop of mangold.

Literature.

COMMERCIAL LITERATURE.

THE HAND-BOOK OF INVESTMENTS. Cassell, Petter, and Galpin.

THE purpose of the present little book is to explain in a concise manner the character of the different securities offering to the public for investment, comprising the National Debt, Bank Stock, East India Government Securities, Railways (British and Foreign), Colonial Government Securities, American Securities, Foreign Stock, Mines, Joint Stock Banks, Insurance Companies, Docks, Canals, Water Works, House Property, Mortgages, &c. The statistics, when given, appear to us very accurately given. Of course it cannot be expected in so small a volume as this to give more than an outline, but as this work, like most of Cassell's publications, is destined to go through many editions, we think in giving an account of the various foreign funds, it would be as well to state with their amount *the securities on which they are based*, leaving the investor to form his own judgment as to whether they are likely to prove eligible or otherwise. A very faithful account, however, is given of the manner in which the various Governments have fulfilled their engagements. Again, in giving an account of the Bank of England Charter, it is stated "the Bank is now incorporated under the Charter of 1844, which was granted for 10 years, *and which has since been renewed.*" It would be well to state on what terms it has been renewed, for we were not aware that it had been renewed absolutely. It is, we believe, terminable at a certain given notice at the option of the Government. We point out these little omissions because they are easily rectified. Also in giving the names of the various American Railway Securities, the amounts of the various issues of bonds are not stated, neither are the amounts of the various Colonial Government Securities. The chapters on House Property and Mortgages are very excellently and clearly written, and will be of great value to those who are about to invest in this description of property.

TABLE OF EXPORTS OF PLAIN COTTONS AND YARNS FROM LONDON, LIVERPOOL, AND THE CLYDE, TO CALCUTTA, BOMBAY, HONG KONG, AND SHANGHAI, for the Years 1853 to 1860 inclusive. By S. MENDEL. Printed by J. Collins and Co., 76 King street, Manchester.

WE have received another of those useful tables compiled by Mr Mendel, in which he shows the number of yards of plain cottons and pounds of yarns that have been exported every month to the places above enumerated from 1853 to 1860.

The totals for each year will be interesting to our readers, and we may express our hearty approval of the form, manner, and accuracy with which these tables are compiled.

THE POST OFFICE LONDON SUBURBAN DIRECTORY. Kelly and Co.

THIS is a convenient directory, but puzzling in one respect. The book is divided entirely into "Northern" and "Southern,"—and we, of course, imagine that all containing the letter N are in the former part, all containing the letter S in the latter. But it turns out to be a division of the suburban districts which lie North and South of the *Thames;* so that while Ham, Kingston, &c. (all of which are in the S.W. district), are put in the Southern half,—Hampton, Teddington, Twickenham, &c. (which are also in the S.W. district), appear in the Northern half.

THOM'S ALMANAC AND OFFICIAL DIRECTORY OF THE UNITED KINGDOM OF GREAT AND IRELAND FOR THE YEAR 1861. Thom, Dublin. Longman, London.

THIS valuable Irish directory includes a vast mass of facts which Englishmen are as likely to need access to, as Irishmen. It has a full Directory to the Houses of Lords and Commons, embodying the latest changes; a Civil Service Directory for England as well as Ireland, with a complete Index; "Statistics of Foreign States, Population, and Revenue," as well as much other valuable information; a full Irish Directory, and a Post Office Dublin City and County Directory.

GENERAL LITERATURE.

A RESIDENCE IN JUTLAND, THE DANISH ISLES, AND COPENHAGEN. By HORACE MARRYAT. In Two Volumes. London: John Murray, Albemarle street. 1860.

THIS is a very entertaining book. Mr Marryat (who describes himself as "own brother to Snarley Yow") is one of the small number of travellers who go abroad for the simple purpose of enjoying the sight of a foreign country, without any *arrière pensée*, statistical or political. He seems to be thoroughly saturated with Danish history, biography, and legend,—so much so, that he scarcely makes sufficient allowance for the possible ignorance of his readers as to the order in which his numerous Frederics, Christians, and Valdemars succeeded each other. He is, indeed, wise enough to append the dates of almost every event to which he refers; but, considering how much the interest of the book

depends on the interconnection of these dates, and on a clear understanding of the respective identities of the many widely different royal characters who bear the same name, we think that Mr Marryat should have conferred upon us a table of the Danish kings, with the chief celebrities who flourished in each reign. Should the book reach a second edition, this might yet be added. The mass of anecdotes, historical and legendary, with which the work abounds, would then form a sort of introduction to the history of Denmark.

Some of the most interesting of these anecdotes, to English readers, are those which relate to the intermingling of Danish and English history, legend, and language. The invading Dane of King Alfred's days, known to us as Guthrum, appears here as "King Gorm the Old," a patriarchal monarch of high renown, who first united the provinces of Jutland under one sceptre. His Queen, Thyre, was "one of the favourite heroines of early Scandinavian history." Mr Marryat gives a wood-cut of a curious sepulchral stone at Jellinge, "11 feet high, a huge block of granite, triangular and misshapen," which was erected to the memory of King Gorm and his Queen by their son, King Harald Blue-tooth, and which is carved over with Runic inscriptions.

You must gaze at this stone for some minutes, constantly changing your position, until the eye becomes accustomed, and will be able to unravel the wild serpent decorations which trail over the surface, and you will then distinguish among its coils a rude figure of a man surmounted by a glory or nimbus (the points of the cross are plainly visible)—an uncouth and the earliest representation of the figure of our Lord extant in the North of Europe. The inscription may be translated thus:—"King Harald caused these hois to be made to his father Gorm and his mother Thyre, the same Harald who acquired all Denmark and Norway, Christianity as well" (that is, caused his people to be baptized).—(Vol. 1, pp. 70-1.)

The traditional lore which connects England with Denmark is often of a more agreeable character than the purely historical events. How strong a hold the early legends still keep on the popular affections of the Danes is pleasingly illustrated by the following anecdote. We should premise that "Havelock the Dane" was a really heroic and generous prince, who, saved in childhood by a faithful servant from the vengeance of a Danish usurper, was brought up incognito in England, where he ultimately married the Princess Royal and came into possession of the English crown.

We were talking over the English names, of which so many are to be met with in Denmark, when a lady, who devotes herself to teaching in the poor schools of Copenhagen, told us of the intense interest taken by the school children during the Indian war, in the fortunes of Sir Henry Havelock, our British general. The morning the news of his death arrived, she found the whole of her school dissolved in tears, weeping their very hearts out, for they looked upon him as their own countryman—the very Havelock the Dane of the popular ballad—the lapse of nine or ten centuries being nothing to an infant mind. Sir Henry was more grieved over by the children of Denmark from this early nursery association than by those of the British Empire. The story of Havelock is by the earliest French poet known, Geoffroi Ganier, 1147, and styled Le Lai d'Avalok.—(Vol. 2, p. 205)

Besides the names of persons, many names of places also are curiously identical in Denmark and England:—

Long and dreary was the way—sometimes catching a glimpse of the Mos-So on the hill top—till we arrived at the ancient but tumbledown church of Dover. We are all among the Cinque Ports to-day. Further on the left lies Rye. Sandwig—in ancient times written "wich"—lies by the sea-coast. Strange our five most ancient harbours of importance in England should all bear names of Scandinavian origin. Hastings derives her title from the pirate chief: and Winchelsea—Vinkel-So; though who this Vinkel might be who dared to name a part of our ocean So, as though a boggy tarn in his own marshy Jutland, I am unprepared to say.—(Vol. 2, pp. 21-2.)

Besides these towns, we hear of another Dover, of Ryde, Dyrby, and Biskopstorp. We must not quit the subject of English associations with Denmark without giving the following amusing account of the imaginary tomb which British hero-worship has unconsciously caused to be erected to the memory of Hamlet. Describing Elsinore, Mr Marryat says:—

You turn to the right, and before passing through the open gate which leads into the forest, find yourself in front of a raised mound, once surmounted by a cross (partly fallen), the so-called "Hamlet's Tomb:" no more his place of sepulture than that of Jupiter. Indeed, its origin dates from within the last thirty years. Hans Andersen assured me that, when he was a scholar at Elsinore, it existed not. In the good old times, when the Sound duties still were, and myriads of ships of all nations stopped at Elsinore to pay their dues and be plundered by the inhabitants, each fresh English sailor, on his first arrival, demanded to be conducted to the tomb of Hamlet. Now, on the outside of the town, by the Strand Vei, in the garden of a resident merchant, stood and still stands a hoi or barrow, one of the twenty thousand which are scattered so plentifully over the Danish dominions. This barrow, to the great annoyance of its possessor, was settled upon as a fit resting-place for Shakespeare's hero. Worried and tormented by the numerous visitors, who allowed him no peace, he, at his own expense, erected this monument in the public garden of the Marienlyst, caused it to be surmounted by a cross and a half-erased inscription, fixing the date of Hamlet's death the 32nd of October, Old Style, the year a blank. Admirably, too, it succeeded. The British public were content, and the worthy merchant allowed to smoke his pipe in peace under the grateful shade of his charmille.—(Vol. 1, p. 264-5.)

Mr Marryat's residence in Denmark extended from August, 1858, to December, 1859. Except the first winter, which he passed in Copenhagen, he spent his time in going up and down in the land, and sailing in and out among the isles, seeing all that was to be seen of antiquarian interest or of beautiful scenery. Of the latter, his descriptions are simple and life-like, and his intimate knowledge of natural history adds much to their distinctness. The following extracts will convey some idea of the kind of scenery which is most characteristic of North Jutland, and of our author's habitual style of narrating his experiences:—

A dreary drive over a cross road brings us to Tise; where we ascend to the church cemetery to obtain a view of the Vild Mose—the most extensive bog in Jutland, if not in Europe—another slopping of the deluge, and, like many other sloppings, leaving a dirty black mark on the fair face of nature. As far as eye can gaze, and further still, extends a vast expanse of mose, seldom traversed save by the sportsman after black game, and he must leap from hillock to hillock, for the bog is formed of small sugar-loaf mounds; and should his foot miss its destination, woe betide him—he rolls in the mud and mire, and sinks, perhaps never to rise again.....

The moor is all alive with tethered sheep, tethered geese, and tethered everything except the plovers, of which we never yet saw, certainly never yet ate, so many as to-day. Before arriving at Borglum Kloster we first distinguished in the distance what appeared to be rugged walls, standing alone, ruins of some gigantic castle; on nearer approach we find them to be bakkes, or klints as they here call them, of driven sand, not dunes, but upright walls, shutting out the sea from the inland country.....A change has come over the Danish flora since we came northwards. In Zealand all was white; here all is yellow—yellow water-lilies, yellow iris, yellow marsh cineraria, field chrysanthemum, galium, as well as potentilles and marsh buttercup. (Froe peber—seed-pepper—Ranunculus ficaria).....

The moor grows wilder and more undulating—semé, as the heralds say, with strong-scented cream-coloured orchises—how fragrant too it crushes under your feet! no wonder the bees thrive around in the cottage hives: look at the Lycopodium clavatum—the witches' own plant. What a network of green! pull up a piece—pull on—four yards, five yards in length: it breaks, you've handled it too roughly; you might have gone on for ever, it extends over the whole heath. Observe those long, tender shoots which rise pale-coloured above the brown heather: gather one—shake it—a fine dust, its seed, falls out; that dust is used by chemists; they place it in the boxes among the pills to keep them separate. Morison employs it. If it have a bad odour, it is owing to the sulphur they mingle with it, for the powder itself is fragrant. Hold it above the candle—see how it blazes like a firework, a godsend in early times to witches and necromancers. The sea now appears in sight, and then the town of Frederikshavn. We pass by the public garden, all avenue and shady walk; descend to Zimmermann's hotel to dine, and then proceed.....After two hours' drive over a waste moor, well backed by the rising dunes of the opposite coast, blue in the horizon, carpeted with the flowers of the thrift, we arrive at Jerup, a nest of dairy farms.....We drive close to the sea-side, one wheel in the water along the hard sand. A terrible coast this; the very shells are pounded into powder by the waves—all but the pelican's-foot (*Strombus pes pelicani*), and that is strong enough to resist the wear and tear of wind or ocean. Pontoppidan promised us sea-cats, sea-mice, and sea-wolves. This part of Jutland, as far as the village of Aalbæck, is more densely populated by the peasant tribe than any we have yet visited—gaards, farm-buildings, cattle in abundance; and then later we pass by a wreck—a ship sunk among the shoals; dip into a quicksand, and are dragged out again; then drive by the manor of Lindholm, the most Northern of all Jutland strongholds, in Queen Margaret's time, of the noble house of Bugge. Twilight comes on; the lighthouse of Skagen is faintly visible on the horizon. We drive now inland—brown moor, relieved by shining sand, and dunes glistening in the evening shades like snow. Pass by old Skagen church-tower, half buried beneath a waste—boats on the shore, nets hung to dry. We enter the village, or rather settlement, toil our way through the sand; each cottage stands by itself on a square plot of land, on espalier-frames; to a network of ropes hang fish drying by hundreds; corn too and potatoes flourish. At last we reach a small, long, one-storied house, embowered in trees—the kro [inn]—our resting place. We knock. Hallo! No answer. What traveller ever arrives at Skagen after midnight? At length the master appears, and later women but half awake; in ten minutes our beds are prepared, and before long we are asleep.....

Breakfast over, we drive to the newly-built lighthouse, mount to the summit, and, glass in hand, gain some idea of the village of Skagen..... Turning to the South, before you lies the village planted in the sand in the form of an English X. You will wonder why the fishers chose this place of sand for their settlement, when heath and dry moor—terra firma—were at command on the Western coast: patience and you will hear. In front to the right, stands the old lighthouse, now for sale, but no purchaser appears; who would wish to drag old materials over a plain of sand? By its side some pretty, clean, striped houses, backed by a little grove of trees; then again, beyond the village, in the centre of a baby forest stands the house of the chief magistrate; you can hardly see it, so shut in is it from the wrath of wind and sand. Further still, on the Western coast, stands, rising from a mountainous sea of silver-glistening sand, the half-buried church of "Gammel [old] Skagen," long since disused,—built, says tradition, of the stones brought by English and Dutch seamen; not improbable, as in old popish days these church landmarks fared well in offerings from the grateful mariner.

It was in the year 1775, on a common prayer day,—of which in the Danish Church there were formerly many, thanksgivings for fires extinguished and pestilence stayed, and other mercies long since forgotten,—while the inhabitants of Skagen were engaged in divine service, there arose suddenly a storm, accompanied by a whirlwind of "flying sand," carrying desolation over the fields and the village of this devoted settlement, and entirely filling up the holy well of St Laurence, whose water proved infallible even in the 18th century. Before the affrighted inhabitants could leave the building, where they still remained cowering for

shelter, the church was half buried beneath its fury, the doors blocked up, and they were compelled to escape by the windows of the belfry. Since that period the building has been no longer used. The colony has emigrated to the opposite coast, where the village is now situated.....

We pay our moderate bill, and start. N.B.—The women varnished our bottines—gratifying, but inconvenient, as the sand caked to them like scouring paper—and, after two hours' drive, we leave the sea and cross the moor land—a pleasant change, as the day is cool and the air fragrant—till we again arrive at Jerup, and stop to bait our horses in their native stalls. The Vendel boer, as they are here all called North of the Lumfiorde, ushers us into his house, which reminds me much of Brittany, with its ship-cabin beds, and carved chest of drawers, painted red and picked out in divers gaudy colours. The "huus fru" enters quickly, bids us welcome, placing on the table not "butter in a lordly dish," as they do in Norway—she brings us a jug of fresh milk, and bids us drink. But with the furniture and wooden settles ends the likeness to dirty Brittany; here all is of a Dutch cleanliness. The women in their queer frilled caps and good stout dressee, clean and neat, knit as fast as they talk, and as their tongues run glibly the stocking advances quickly. We sit down to write our journals, and then an aged peasant, in grey homespun, very white hair, and spectacles on nose, enters and wishes us good day. "Four people writing at the same time; we don't often see such a sight in these parts." He then examines our calligraphy—"You write the best," he says to one; "you next; you next; and you the worst," to me—a most unjust remark, and a proof of bad taste on his part. Had the ladies been ever at school? he was the schoolmaster: if we liked we might come across the road and write in his school-house at the desks—a tempting offer we could not accept, as the horses were already harnessed.—(Vol. 2, pp. 94-112.)

Of the present condition of the Danish people, Mr Marryat has much less to say than of their past exploits, but what he does say is mostly favourable, especially as regards the constant hospitality and kindness which he met with from all classes. In narrating his stay in Copenhagen, he gives us interesting accounts of the Thorvaldsen Museum and the Museum of Northern Antiquities. This latter collection is constantly receiving fresh treasures from all parts of the country. A royal edict has been issued,

By which all antiquities of precious metal discovered in the kingdom are declared to be the property of the Crown. The clergy of the different parishes have received orders to see them forwarded to Copenhagen, and the finders are rewarded according to the full value of the articles..... The excellence of this collection, unrivalled in Europe, is owing to the indefatigable exertions of Conferenzraad Thomsen, who for 30 or 40 years has held the direction of the Museum.....I was one day gossiping with him in the Ethnographic Museum, when suddenly he touched me on the shoulder. "See," he said, pointing to three blue soldiers, who, catalogue in hand, were examining the collection, "this is a triumph to me. Twenty years ago no soldier would have quitted his beer shop to visit a collection of art. I met those three men as I entered, and saw them club their skillings together to purchase a catalogue, and now see how attentively they examine everything. I am more proud of acting cicerone to men such as these than to a Grand Duke of Russia;" and off he went and addressed them, explaining the contents of the cabinets, until they passed on to another room.—(Vol. 1, pp. 231-2.)

The value of Mr Marryat's work is much enhanced by the numerous illustrations. With the exception of the sketch map of Denmark, and the portrait of Queen Louisa (daughter to our George II., and strikingly like him in countenance), these are wood-cuts, beautifully designed and engraved, and representing landscapes, buildings, and antiquities. We must not quit this agreeable book without noticing one of its prominent features,—the frequent reference to popular superstitions, many of which are believed even in the present day. With a few anecdotes relating to them, we will conclude our extracts :—

There is wind enough in Copenhagen, Heaven knows! but at the corner of the Place by the Frue Kirke more than anywhere, and I will tell you why. The Devil and the Wind went out one day together, and when they came to the corner of this Place, said the Devil to the Wind, "Wait a little for me, for I have an errand in the Bishop's Palace." He went in, but found himself so much at home he forgot to come out again; so the Wind is still there waiting for him.—(Vol. 1, p. 152.)

When [after a heavy shower of hail] we again peep forth from our shelter, the post-boy points to a branch of elder-flowers the maid-servant bears in her hand, shakes his head, and then points to the clouds fleeting through the air. Mademoiselle Thérèse, in her ignorance, had plucked during our halt at Tulstrup a branch of these flowers, preservatives, if steeped in water, against tan and freckles, without first demanding permission of Hyldemoir, "the elder-queen," who avenges any molestation of her tree, and no peasant would dare to pluck its flowers without first addressing her in the following words:—"O, Hildi, our mother; O, Hildi, our mother! let me take some of thy elder." These words thrice repeated, she grants permission willingly enough, but, according to the post-boy's theory, it was the neglect of this observance which caused this pelting hail, this inhospitable reception to the Highlands of Jutland —(Vol. 2, p. 24.)

The last time the Trolles appeared in public was in the years '48-9-50, at the time of the Slesvig-Holstein rebellion. All united Germany was down upon Denmark, and she had lately suffered some reverses—men's heart's were sad—when one morning a ship arrived at the little town of Ronne. The sailors related how, as they passed by the cliffs of Bornholm by night, they had seen hundreds and thousands of the Trolles busy doing military exercise on the heights, already prepared to rise in defence of their native country.

"Hurrah! hurrah!" exclaimed the people; "the Trolles are out—the Trolles are up—no fear of conquest now—the victory will be ours—hurrah! hurrah!" and they were at once wild with joy and delight. Well, it turned out as they expected; the Germans were repulsed and kicked out of the country, though whether the Trolles had much to do with the matter is uncertain. Educate the people as you may—and an excellent education all the Danish nation receive, from highest to lowest—you will find it difficult to eradicate from the heads of the peasants the belief, handed down from father to son, in the existence of the Trolles, who dwell within the hois and heights of the sea-girt island of Bornholm. —"Well, Sir," concluded the coachman, "I'm glad you don't laugh at the Trolles, for most of our people believe in them. I can't say I have ever seen them myself; but of a night, in the forest of Alminde, and along the sea-coast, I have seen lights wandering about up and down among the woods and the rocks, and followed them, too; but where they came from, or where they went to, I never could tell. I fancy the Trolles must have something to do with it." "No doubt," I replied. Was I wrong? Ought I to have unveiled to him the fallacies of igneous gases, of jack o' lanterns, &c.? May be I should; but I left him to his simple belief.—(Vol. 2, pp. 335-6.)

A Few Words on Garibaldi. An Answer to Numerous Letters from the Rev. Robert McGhee, Rector of Holywell, Huntingdonshire. By Lord Robert Montagu, M.P. for Huntingdonshire. Ridgway.

This pamphlet is apologetic. Lord Robert Montagu, in an hour of undue contempt for the national opinion of England, wrote a violent letter to the *Times*, in which Garibaldi and the Italian cause were insulted, and the "divine right" of kings was apparently maintained. This was a foolish step in a promising young member of the Conservative party. There were many of that party—some even of its leaders, as, for instance, Lord Ellenborough—who felt that such iniquitous Governments as the Neapolitan did more to shake the constitutional order of Europe than any outbreaks of democratic violence. And this feeling that was partially prevalent among the parliamentary Conservatives was still more prevalent among their country constituents. Some even of Lord Robert Montagu's clerical friends are shocked at his doctrine. One of them has expostulated with him in a copious correspondence, the drift of which Lord Robert Montagu summarises in the pamphlet before us.

As we commented somewhat indignantly in these columns on Lord Robert Montagu's letter at the time of its publication, we feel bound to notice his apology. We called attention at the time to the apparent discrepancy between the views of the modern Montagu and that of his ancestor, the Earl of Manchester, who was one of the great parliamentary leaders in the civil war. Lord Robert's defence does not admit this discrepancy. He concedes to his clerical monitor that the unfaithful steward should be called to account, the cowardly officer cashiered, the spendthrift landlord coerced into rendering his tenants their due, the unjust judge displaced, even tyrannical kings deposed. He only differs, he says, from his clerical correspondent as to the agency by which these results are to be accomplished. He takes as a motto for his vindication some words which we may translate thus,—"That which scares men is not the actual events, but the opinions passed on the events;"—or, as we may paraphrase it more freely for Lord Robert's own case perhaps, it is not the Neapolitan catastrophe which stuns Lord Robert Montagu, but Lord John Russell's despatches to Sir James Hudson concerning the Neapolitan catastrophe. He is not displeased with the judgment of Providence; but he is much offended with the comments of the Foreign Minister.

And he is offended on this account. The true remedy, he says, in case of misused power is that the highest constituted authorities who have not transgressed should stir to vindicate the right. If there is any higher power above the offender, that power should be the one to remove him. If not, then any below him may take up the responsibility which he has abused, and purify the State from its corruptions. Here, he says, lies the distinction between the English revolutions of 1642 and of 1688 and the Neapolitan revolution of 1860. In the former cases, the English authorities, reluctantly,—after many efforts to reform by milder measures,—headed the movement which declared the King unworthy to rule over them. All things were done "decently and in order." In the latter case, Garibaldi, an interloper who had no authority, no official public duty to fulfil, intervened, overthrew the Government in his name, or in that of a foreign sovereign (Victor Emanuel) whose consent he had never obtained; and thus, instead of vindicating the sacredness of political order, subverted the highest sanctions of that order;—and for this he was praised by Lord John Russell. Lord Robert Montagu's position is briefly this,—that all political order is sacred and divine,—so sacred and so divine, that though he who, like Garibaldi, overthrows an unrighteous system may be the blind instrument of Providence,—he is not personally justified in what he does, unless his previous official position *within* the constituted system *required* him to assert, in the nation's name, the violated principles of political equity and social order. If he is not thus himself called on to interfere, he may be a welcome "scourge," or a purifying "scavenger," in the hands of Providence, but he is himself doing an evil act. And such, he says, was Garibaldi,—while Lord John Russell, in the moral support he gave to Garibaldi and Count Cavour in their unauthorised intervention, committed the English Government to official approval of this evil act.

This is Lord Robert Montagu's apology for his letter; and we cannot deny that it does much to clear away the apparent presumptuous insolence of his *Times* effusion. Of course the position which he now defines is indefensible. If the suppressed Sicilian and

Neapolitan Parliaments were *too* weak and too disunited to act,—if they asked for a leader,—if, after noting Garibaldi's great services to the Italian cause in 1849 and 1859, his devotion to Victor Emanuel, and his pure and patriotic life, they asked his aid,—his was no unsolicited and arrogant intrusion into the public life of a foreign nation. He had in fact an official position,—however informal,—which was as morally enabling as that of the Earl of Manchester himself in the parliamentary wars. And Lord Robert Montagu's pamphlet will certainly not persuade the English nation to disbelieve that a public commission was in fact conferred on Garibaldi by the disheartened Sicilian people who asked him to come to their aid,—a commission as unsought by him, and as sacred in its claims upon him, as any which Ferdinand or Francis could have given and Carafa countersigned. Can Lord Robert Montagu find any more formal authority for many of those "judges of Israel" to whom he refers us? Were Ehud or Jephtha appointed by any superior human official to the duty of rescuing their brethren from oppression?

ON TRANSLATING HOMER. Three Lectures given at Oxford by MATTHEW ARNOLD, M.A., Professor of Poetry in the University of Oxford. Longman.

A POET's and scholar's treatment of a poet's and scholar's subject is scarcely a theme for any lengthened discussion in the pages of the ECONOMIST. We may, however, express briefly our sincere admiration for one of the most exquisite pieces of pure criticism which we ever remember to have read. It is evidently Mr Arnold's ambition to produce that clear intellectual poetry which is akin to criticism, and that lucid criticism which is often akin to a certain kind of poetry; and he has succeeded. In his poems he has given us many pieces of the truest critical insight,—as, for example, the lines on Goethe, Byron, and Wordsworth, and the sonnet to Sophocles;—and in the present lectures he has given us a criticism on the characteristics of Homer's poetry and the best mode of reproducing it in English, which often rises into the language of that stately poetic discrimination in which all Mr Arnold's finest poems are clothed. He not only loves Homer, but he sees "him steadily and sees him whole." We differ from some of his conclusions, which this, however, is not the place to discuss. Nor do we think his own versions of Homer succeed in realising the conceptions which he has raised in our mind. There is too little fire, too tranquil a flow of the thought and sentiment in the specimens he has given us. It is as it were an intellectual reflection of Homer, not Homer itself. The terse deep melancholy of the Greek line which Mr Arnold refracts into the following pair of verses, is sadly enfeebled in the transformation:—

> For that day will come, my soul is assured of its coming.
> It will come when sacred Troy shall *go to destruction*.

This last phrase is peculiarly weak. Mr Arnold finds with himself the fault that his verses are "somewhat too strenuous and severe by comparison with that lovely ease and sweetness which Homer, for all his noble and masculine way of thinking, never loses." We should rather say that his versions have too much of the languid and relaxed tone of a contemplative disposition—one that looks out of itself for satisfying action. Mr Tennyson has succeeded far better, at least in the latter portion of his short poem on Ulysses, in combining what Mr Arnold, with his usual felicity, calls "the pure lines of an Ionian horizon, the liquid clearness of an Ionian sky," with that Homeric fire which witnesses to an age of action.

The only fault of Mr Arnold's beautiful lectures is that they have a touch of the superciliousness of the Oxford man of letters. He condescends to an uncultivated age. His style is perfect, but his *thought* is in the "grand style." He speaks *ex cathedrâ*:—we listen with delight, but also occasionally with awe.

THE CANADIAN SETTLER'S GUIDE. Tenth Edition, considerably enlarged. Edward Stanford, 6 Charing Cross.

THAT a book of practical utility such as this should have reached a tenth edition is weighty testimony in its favour. A careful perusal of its contents and examination of the maps and plans with which it is furnished only confirm the judgment already passed upon it by the public. In the completeness and correctness of the information it affords upon all essential points,—in the variety and minuteness of its details upon lesser matters, which yet nearly concern the comfort and well-being of the emigrant,—and above all, in the sober estimate it gives of the comparative advantages and disadvantages of Canada as a place of settlement,—it is all that such a book should be, but seldom is. It cannot fail, we think, to produce upon the mind of the reader a deeper and more permanent impression of the great inducements held out to emigrants by this important colony than any *ex parte* statements, or highly-coloured pictures of immediate and impossible comfort, prosperity, and wealth.

The cheapness and compact form of the volume (considering the amount of additional matter it contains and the size of the accompanying map) is also greatly in its favour.

DOD'S PARLIAMENTARY COMPANION. 1861. Whittaker and Co.

THIS invaluable guide to the antecedents of members of Parliament is here renewed for 1861,—containing the results of the changes which have taken place in the last year owing to the death or resignation of members. It is also stated by Mr Dod that "the political opinions of members have been carefully indicated by recording the votes which each member has given during his parliamentary career; and that in stating the residences of the members of both Houses of Parliament, the post towns have in almost every instance been added to the names of their seats." This last change is a great convenience. The former has not been made as thoroughly as might be wished. With regard to *reform*, for instance, it would have been convenient if Mr Dod had indicated the general line taken by members who spoke in the debate of last year.

WHO'S WHO IN 1861. Edited by C. N. OAKES, M.A. 13th Year. Baily Brothers, Cornhill.

THE new editions of this useful publication are always welcome. It is brought up to the first ten days of December, 1860, but does not include news of the Earl of Aberdeen's death and of the succession to the Earldom. The less recent changes appear to be all chronicled.

THE PICTORIAL HAND-BOOK OF MODERN GEOGRAPHY, on a popular plan, compiled by the best authorities, English and Foreign, and completed to the present time; with numerous tables and a general index. By HENRY G. BOHN, F.R.G.S., F.L.S., F.R.S.L., F.H.S., Hon. Member of the Institute of Geneva. Illustrated by 150 engravings on wood, and 51 accurate maps engraved on steel. London: Henry G. Bohn, York street, Covent garden. 1861.

THIS is a systematic compilation from various authorities, and appears to be generally well done. The maps, however (to which the author tells us that the letter-press was written), are on too small a scale to be of much use, although they are clear and well engraved. The absence of colour, even in the marking of boundaries, is another disadvantage. The wood engravings are very poor, and are evidently impressions from half-worn blocks. This is not the case with all;—the fruits and animals of the Southern hemisphere being very fresh and spirited. In the letter-press, there are a few slips as to matters of fact. For instance, Kansas is set down as one of the United States admitted in 1858, whereas the terms on which Kansas *is to be* admitted remain undecided up to the present day. The book is not without occasional crudities of style and inaccuracies of expression, which, at times, even obscure the author's meaning; but these are exceptions. On the whole, the book is one that may be very useful to self-educating students, and will probably receive, as it deserves, a fair share of public approbation.

THE SQUIRE. A Biographical Sketch. Brighton: Robert Folthorp, 173 North Street; and sold by all Booksellers. 1861.

THIS is a curious little book, professing to be the writer's recollections of his great-uncle, Thomas Easy, Esq., of Cock-a-Roost Hall, near Shrewsbury, whose conventional name forms no introduction to his real character, which is that of an individual and not of a class. Every particular which the author can recollect concerning "my uncle's" tastes and habits is carefully set down:—his predilections for Molière and Don Quixote, Dante and Cardinal Borromeo,—his horror of Catholic Emancipation (in which the writer evidently coincides), and of the speculations of Malthus,—and his relations to his son-in-law, the worldly High-Church rector, and to his friend, the unworldly Low-Church curate, who refused to be made a bishop because he could not honestly say *Nolo episcopari*. There is a genuineness in the narration which conveys the impression of its being a sketch from life,—a real portrait of some good-hearted, sensible country gentleman, of the period between the old fox-hunting Tory squires and the modern disciples of Mechi and Liebig. There are however a few anachronisms, such as making the Squire talk of "Saturn and *Neptune*," long before the days of Leverrier, that spoil the keeping of the picture, which in other respects is that of fifty years ago. The whole production is of the slightest, but it is written with a quiet humour and unpretending sense which make it pleasant reading, and which recall some of the country sketches of Washington Irving, without any of his sentimentality.

THE BABES IN THE BASKET; or, Daph and her Charge. Sampson Low, Son, and Co.

THIS is a weakly written little tale, of which not much can be said. It turns on the fidelity of a negro woman, of the approved humble and religious pattern, who saves her master's children by carrying them in a basket on her head to a place of safety during a slave insurrection. The children are evidently cut down a year or two in age, in order to suit them to their nurse's strength; for babes of a year old do not boast of thick curls, or talk in intelligible sentences. The story is highly moral and evangelical, ending with the conversion and death of the faithful negress and the edification of the reader.

MYSTERIES OF LIFE, DEATH, AND FUTURITY; Illustrated from the Best and Latest Authorities. By HORACE WELBY. London: Kent and Co., Paternoster row. 1861.

THIS close-printed volume is a miscellaneous compilation of anecdotes and dissertations upon occult and speculative subjects. There is no coherence or power in it, but it contains several curious memoranda which may amuse an idle hour.

THE AUTOBIOGRAPHY OF LEIGH HUNT. Smith, Elder, and Co., 65 Cornhill.

WE are glad to see this pleasant volume republished in a cheap form, with all the neatness, correctness, and good taste that mark Smith and Elder's half crown editions. Essentially a writer for the people, it is but fitting that Leigh Hunt's last, and in many respects best work should be within reach of as large a circle of readers as possible.

Foreign Correspondence.

(FROM OUR CORRESPONDENTS.)

PARIS, Thursday.

The present week will be a memorable one in the financial history of France. The first, and greatest, and most daring of speculators who for years past has operated in this market,—the famous M. Mirès himself,—is now an inhabitant of the Mazas prison, on the charge of having in the management of the company of the Caisse Générale des Chemins de Fer, which he founded, and of which he was the head, committed breaches of trust and acts of swindling. It is even alleged by some persons that alterations have been made in his account books to prevent the discovery of his irregularities, and that consequently an indictment for forgery may perhaps be preferred against him.

You will remember that a few weeks back an altercation between M. Mirès and M. de Pontalba, who had been mixed up in his Roman railway affair, led to a complaint being deposited against him for fraud, or something very like it; but that by the interference of the Emperor the matter was hushed up. Since then other complaints by other persons are stated to have been made; and, besides, much dissatisfaction was expressed both by the public and the legal profession at his having been screened in the first instance. Accordingly, on consideration the Government thought best to let the law take its course; and so M. Mirès, as is usual in accusations of fraud, was arrested.

In this country preliminary investigations against accused persons are made with the greatest secrecy. The public consequently does not know anything more of the matter than that in general terms he is accused of having misappropriated sums intrusted to him, having by fraudulent devices obtained possession of others, and having in his Caisse Générale des Chemins de Fer, and perhaps other enterprises also, performed operations which resulted in benefit to himself and in loss to his shareholders. To these charges some persons, as already stated, assert may be added one of "forgery in commercial matters," arising out of tampering with the account books. At this moment the examining magistrates are busily engaged in overhauling his accounts and papers, and in interrogating persons who acted with him, or who had a knowledge of his transactions.

Two days after his arrest, that is on Tuesday, a notification was made at the Bourse that "by ordinance of the President of the Civil Tribunal of the Seine, Count de Germiny, Governor of the Bank of France, had been nominated Provisional Director of the Caisse Générale des Chemins de Fer, with the most extensive powers." Of course the President would not have made the nomination, and Count de Germiny would not have accepted it, except by express order of the Government. Its interference in the matter, and especially its appointment of so great a personage as the Governor of the Bank of France, caused much surprise; but the statement was made (not however authoritatively) that the Government, knowing that the shares in M. Mirès's enterprises are held chiefly by people of very modest means, was anxious as far as possible to prevent an excessive depreciation of them from panic, and thought that the best way of doing so was to place the control of the affair in the hands of a gentleman whose office gives him great commercial *prestige*. This statement was, on the whole, considered satisfactory. Yesterday, Count de Germiny issued this notice:—"The Provisional Administrator of the Caisse Générale des Chemins de Fer has the honour to inform the public that as a preservative measure, *payments are adjourned* during the time necessary for drawing up the inventory, to which there is reason for proceeding without delay."

Two most painful circumstances have now to be mentioned. Very shortly after the arrest of M. Mirès, the Vicomte A. de Richemont, one of the receivers of taxes at Paris (a high and well-paid office), who was one of the Council of Surveillance of his Company, died—of apoplexy. So at least it is officially announced: but there is, unfortunately, no doubt that the unfortunate gentleman blew out his brains. As a member of the Council of Surveillance he was to a certain extent responsible for the transactions of M. Mirès; and his self-destruction is not unnaturally interpreted as a proof that acts of exceeding gravity have been committed. Count de Simeon, a Senator, one of the Council of Surveillance, and I believe its chairman, has, it is reported, hastily left France, and if this be true it is another inference of the same kind.

It is expected that the judicial investigation into the affairs of M. Mirès will lead to strange revelations of more kinds than one, and that several eminent personages will be seriously compromised thereby.

The effect produced on the Bourse by the arrest of the banker may be imagined. The shares in his Caisse Générale des Chemins de Fer, which in December last stood for a time at 461f 25c, and were on Saturday 200f, fell on Monday to 181f 25c, on Tuesday to 160f, yesterday to 141f 25c, and to-day they are at 120f. And it is to be remarked that this depreciation has been caused, so to speak, by Paris alone; for as the newspapers have said scarcely anything about the matter, holders in the country do not yet know what has happened, and consequently have not sold. The Ports of Marseilles, another of M. Mirès's affairs, which on Monday were at 380f, are to-day at 350f, and there has been a greater decline in his Spanish railway and other enterprises.

In what precise position his affairs stand no one at present can of course tell, and from the vast and complicated nature of them it will probably take some time to ascertain. But even if they should turn out better than is at present thought probable, and even if the charges against him should on investigation not be so grave as alleged, his career as a Paris speculator and banker is evidently ended, and those persons who have invested their money with him must make up their minds to lose heavily.

A question is, what effect his failure will have at Constantinople? Unfortunately, there can be little doubt that it will have a disastrous one, especially as before it took place things were already in a bad state in that city. Disasters at Constantinople cannot fail to produce others among the Greek houses both at Paris and Marseilles: indeed, accounts from the latter place received to-day affirm that failures have occurred, and that others are feared. Nor is it likely that the Greek firms at London will escape unscathed.

The Bank of France has not raised its rate of discount, but it exercises great rigour in selecting the paper presented to it. This indeed is evident from its last return analysed in the ECONOMIST.

Subjoined are the quotations of the Bourse. There is, it will be seen, a rather large fall in the Credit Mobilier shares, but surprised is expressed, that considering the disaster in the Caisse Generalé des Chemins de Fer (to which by the way it lately came in aid), the decline has not been greater, as they were to some extent kindred institutions.

The monthly Customs returns have been published to-day. They are too long to be given in this letter, but the following are their principal features:—The import duties for the month of January last were 8,134,000f; and in the corresponding month of last year they were 13,611,237f, and in that of 1859 12,588,247f. The decline is owing to the large reductions in the import duties on articles of general consumption effected some time back, but the *quantities* of those imported have largely increased. Thus there were brought in for consumption in France in—

	Jan. 1861.	Jan. 1860.	Jan. 1859.
Coffee quintals	31221	22415	26538
Cotton	127172	74985	83769
Coal	2978835	3820346	4255346
Wool	20102	13812	19292
Pig iron	61451	51021	31546
French colonial sugar	118572	69224	42521

Of the 61,451 quintals of pig iron, not fewer than 58,651 came from England—more than double what was imported from that country last year, and more than fivefold what she sent in January, 1859. This testifies to the value of the commercial treaty in one of its most important points. Of the 2,978,835 quintals of coal imported, 1,004,221 were from England. As to exportations, the returns show that a certain degree of slackness prevailed.

The statistical department of the Ministry of Public Works has produced a table showing the length of railways worked in 1860 and in 1859 and the receipts therefrom. Subjoined is the principal part of this publication. The term "old net work" means the old lines; that of "new network" signifies the prolongations and embranchments to those lines which the Government has compelled

the Companies to make, but for which it has given them a guarantee of interest :—

* The kilometre is rather more than 1,093 yards, or about 6ths of a mile; and 25f equal to £1.

The Commercial Reform Association of this city has sent an address to the Minister of Commerce, praying him to press on the English Government the abolition of the system of taxing according to their alcoholic strength the French wines imported into England, and the adoption instead of a uniform duty for all wines as is done in the *octroi* of the city of Paris. Such a measure would please all wine producers, who are strongly opposed to the present system; but it would possess the disadvantage of taxing the poor man who drinks *vin ordinaire* as heavily as the rich one who feasts on the very best Bordeaux and Burgundy.

An Imperial decree of considerable importance has appeared in the *Moniteur*. It enacts that cotton fabrics may be imported free of duty into France to be printed, subject to the condition of being re-exported. This relieves cotton-printers of a grievance of which they have long complained—dependence on spinners and others who cannot meet their demands. The decree would, however, certainly have been better if it had not stipulated for the re-export of the foreign fabrics which may be printed.

The treaty with England has nowhere been received with less favour than by the manufacturers of Amiens. These people lately wrote to the Minister of Commerce to protest against against what they called "a premature application of the new tariff," in other words, the bringing into force of the treaty at an earlier date than that fixed in the treaty itself; and they represented that the "premature application" would be peculiarly injurious to them at this juncture, inasmuch as "the crisis in America, by preventing the English from selling in that country, would cause them to inundate the French market with their productions." The Minister of Commerce has just replied to the Amiens gentry: on the first point he says that the Government has not yet come to a decision in the matter referred to, and that it will endeavour to arrive at one in conformity with the general interests of the country: on the second, he gives them a little lesson of political economy to the effect that when there is a commercial crisis in one country it extends to all; that a crisis checks purchases by intimidating purchasers; and that, consequently, if the English were to inundate the French market with their productions, they would have no great chance of selling. "You, therefore," says the Minister, "have no need to fear the inundation of English productions, for they would remain unsold in our market. And," he adds, "the English have too great experience of commercial affairs not to know that perfectly well."

The following is an account of the markets:—

FLOUR at *Paris*, yesterday, was 68f to 70f the sack of 159 kilogs. Four marks for the current month, 68f 25c; March and April same price and 68f.

WHEAT.—At *Paris*, yesterday, there was a new rise, the quotation being 37f 50c to 38f and 38f 50c the sack of 120 kilogs. In the provincial markets, 124 have risen from 5c to 1f 54c the hectolitre; only seven present a fall of from 16c to 1f 35c; 38 are reported firm, and two without variation.

COTTON.—At *Havre*, this week, business has not been active, and yesterday low New Orleans was at 93f to 94f the 50 kilogs.

COFFEE.—At *Havre*, in the week ending Friday, an important amount of business was done. 6,030 sacks Port-au-Prince disposable went at 77f to 80f the 50 kilogs in bond; 750 Jeremie for delivery, 77f 50c; Cape disposable, 81f; 3,700 ditto for delivery, 79f 50c to 80f; 50 St Marc disposable, 82f; 200 Gonaives, 82f; 1,100 sacks Rio not washed disposable, 70f to 74f; 4,100 ditto ditto for delivery, 67f to 72f 50c; 1,258 sacks Rio washed disposable, 81f; 400 sacks Ceara, 86f to 87f; 6,950 Santos for delivery, 73f to 74f. In addition, some rather large quantities of damaged Hayti, Rio, and other sorts were disposed of. Also a cargo of 4,000 sacks Porto Rico (sound) expected was sold, but the price was not allowed to transpire. The arrivals were about 3,700 sacks. This week sales have been numerous: Rio, 68f 50c to 72f 50c; ditto washed, 82f; Hayti, 78f to 80f 50c; Gonaives, 81f 50c. At *Nantes*, last week, some small lots of Reunion "feve pointue," went at 126f; 2,800 sacks Manilla at about 114f. This week, the sole sale has been some damaged Java. At *Bordeaux*, last week, business was active: 669 sacks Ceylon native, 108f, and some small lots ditto, 118f to 121f; some Ceylon plantation at different prices; 585 sacks Mysore, 110f to 111f 25c; 700 sacks Rio not washed, 73f to 74f; 200 ditto washed, 87f; 550 Malabar, 108f 50c; 50 bales Reunion at established prices. This week, some Guayra has been taken at different prices, and some Malabar at 107f, Mysore at 106f 50c, and Rio not washed 75f. At *Marseilles*, last week, various lots of damaged Rio, washed and unwashed, were sold at different prices.

SUGAR.—Business at *Havre*, in the week ending Friday, was very dull:—200 casks French West India, part disposable, part for delivery, were taken at 47f 50c the 50 kilogs duty paid; and 1,670 Havana went at 34f in bond. The arrivals were about 700 casks and 625 sacks. This week, the sales have been more active: French West India, 47f 50c; Havana, 34f; Reunion, 51f; also some lots of different sorts of damaged. At *Nantes*, last week, 1,800 sacks Reunion went at 53f 50c to 57f 50c, and 1,200 sacks ditto at different prices. This week sales have been active. Reunion Murat at 55f 50c; Reunion gros grain, 51f 75c. At *Bordeaux*, last week, 800 bales Reunion went at 50f 50c; 2,730 Mauritius for delivery, 52f 50c. This week, Reunion has been at 50f. At *Marseilles*, last week, upwards of 55,000 sacks Mauritius arrived, all of which had previously been disposed of: various lots of French West India and Havana which had been purchased beforehand also arrived. In addition, 1,200 sacks Reunion went at 52f 25c; 350 casks Havana at 36f 50c.

INDIGO.—At *Havre*, in the week ending Friday, only 14 cases Bengal were disposed of, the greater part at 10f the half-kilogramme, which was 70c above the estimates. The arrivals were only a very small lot from England. This week, some small sales have been made: prices not given. At *Bordeaux*, last week, only 22 cases Java and 24 Bengal were sold: prices not stated. Some Kurpah has been sold this week: prices not given.

HIDES.—Business at *Havre*, in the week ending Friday, was not very active: 2,700 Buenos Ayres salted (cow), at 70f the 50 kilogs; 1,500 Rio Grande salted, at 70f for cow, and 73f for ox; 1,406 Pernambaco, salted, 88f; 180 horse La Plata, 7f 50c each. Some damaged New Orleans were also sold. The arrivals were insignificant. This week, Uruguay, salted (cow), has been at 70f.

WOOL.—At *Havre*, in the week ending Friday, a public sale by auction took place. Out of 3,098 bales wool and 287 bales sheep skin offered, only 1,427 of the former and 142 of the latter were disposed of. Holders, anxious to get rid of their old stocks before the arrival of the new wools, which are expected to be of superior quality, consented to a reduction in prices. Buenos Ayres unwashed went at 12 to 15 per cent. below the quotations of the November sale for the inferior quantities, and 10 per cent. for the others: Monte Video were firmer. The following were about the quotations: Buenos Ayes merinos, unwashed, 1f 85c to 2f 72½c the kilogramme; prima ditto, 1f 57½c to 2f 32½c, secunda ditto, 1f 37½c to 2f 17½c; tertia ditto, 1f 40c to 2f 15c; quarta and quinta ditto, 87½c to 1f 47½c; lamb, 1f 50c to 2f 25c; washed, 1f 35c to 4f 85c. Monte Video, unwashed: prima, 2f 12½c to 2f 35c; secunda, 1f 97½c to 2f 15c; tertia, 1f 47½c to 1f 70c; quarta and quinta, 1f 15c to 1f 65c; washed, 3f to 3f 10c. Sheepskins unwashed: merinos, 1f 70c to 1f 85c; prima, 1f 45c to 1f 72½c; secunda, 1f 25c to 1f 40c; lamb, 90c to 1f 50c; rasons, 1f 7½c. This week, Buenos Ayres unwashed has been at 19f 50c the 100 kilogs to 225f; Cape, washed, 405f.

TALLOW.—At *Paris*, yesterday, the 100 kilogs were 130f 25c.

SPIRITS.—At *Paris*, yesterday, 3-6 of 90 deg. first quality, was 99f to 100f the hectolitre; Montpellier of 89 deg., 130f. At *Bordeaux*, the day before yesterday, 3-6 Languedoc was 127f 50c; beetroot, 105f.

Correspondence.

THE LATE ADVANCE IN THE BANK RATE OF DISCOUNT.

TO THE EDITOR OF THE ECONOMIST.

SIR,—In your leading article of Saturday last you discuss the policy of the Bank Directors in advancing the rate of discount from 7 to 8 per cent. I fully coincide with the views and arguments you advanced in justifying the step taken by the Directors of that establishment. But there is one item I consider of very great importance in the present position of our currency, and which I doubt not was kept in view by the Directors in their discussion at their weekly meeting. I allude to the very considerable falling off in the imports of gold from Australia,—a fact of great importance, although almost lost sight of. This decrease has been going on steadily for about two years. The last mail advises the departure of seven vessels, taking altogether only 91,239 ozs of gold, amounting to 364,956*l*. Now the arrival from Australia for six years, say 1853 to 1858 inclusive, amounted to upwards of 860,000*l* per month, as the annexed statement shows. To account for this falling off, I may briefly state that various causes exist: for instance, the decrease in the quantity of surface gold, requiring an increased expenditure to obtain it, to which may be added the absorption for home use, arising out of increased population, and the large amounts coined at the Sydney mint. This state of things I deem in itself a justification for the cautious policy of the Bank in raising their rate, and a further argument in support of your admirable article of Saturday last. At any rate, with our metallic currency as at present constituted, it is a subject that demands the most serious attention of the commercial and monetary world.—I am, &c., your obedient servant, J. B.

SHIPMENTS of GOLD from AUSTRALIA.

We have received the following commercial advices from Bombay to the 26th Jan. :—The import market during the past fortnight has been characterised by a general dulness and depression, which state of things has been brought about chiefly by the extreme scarcity of money. A very small business has been done, at prices generally in favour of buyers. The export market, on the other hand, has become firmer, the late advices from home having led to the revival of a demand for both cotton and seed. The *Calcutta Englishman* says :—We have nothing new to report in the commercial world. The import trade is as dull as ever, and likely to remain so, from the terrible scarcity extending through large districts. The reports everywhere up country are most discouraging for all trading speculations. The same reasons operate against the export of produce, which is held in expectation of famine rates at prices which have already entailed heavy loss on the few sanguine operators who have endeavoured, at all risks, to force business.

The total quantity of coal and coke exported during the month of January from the various coal ports in the United Kingdom was—of coal, 379,824 tons, and of coke, 16,095 tons. Of this quantity, which shows a decrease when compared with the returns of the preceding month, Newcastle-on-Tyne exported 79,823 tons of coal and 10,904 tons of coke; Blyth, 9,948 tons of coal; Amble, 5,931 tons of coal; Sunderland, 36,066 tons of coal and 1,973 tons of coke; Hartlepool and West Hartlepool, 26,682 tons of coal and 879 tons of coke; Middlesborough, 1,557 tons of coal and 202 tons of coke; Hull, 6,982 tons of coal and 18 tons of coke; Goole, 1,340 tons of coal; Liverpool, 32,098 tons of coal; Cardiff, 101,747 tons of coal and 601 tons of coke; Newport, 20,166 tons of coal; Swansea, 27,832 tons of coal and 70 tons of coke; Glasgow, 5,948 tons of coal; Llanelly, 8,325 tons of coal and 620 tons of coke; Alloa, 1,490 tons of coal; Greenock, 3,576 tons of coal and 600 tons of coke; Charlestown, 1,634 tons of coal; Grangemouth, 2,772 tons of coal and 28 tons of coke; St David's, 4,433 tons of coal. The total quantity of coal, coke, and culm shipped during the month to London and other ports in the United Kingdom was—of coal, 557,518 tons; of coke, 2,580 tons; and of culm, 4,444 tons. Of this quantity, which is smaller than the shipments for December, Newcastle shipped 204,743 tons of coal and 630 tons of coke; Blyth, 7,782 tons of coal; Sunderland, 170,558 tons of coal; Hartlepool and West Hartlepool, 123,614 tons of coal and 745 tons of coke; Middlesborough, 15,071 tons of coal and 245 tons of coke; Hull, 250 tons of coal; Goole, 3,438 tons of coal; Swansea, 21,215 tons of coal and 3,315 tons of coke; Cardiff, 75,478 tons of coal and 820 tons of coke; Llanelly, 14,992 tons of coal and 1,072 tons of coke; Newport, 51,959 tons of coal and 130 tons of coke; Ayr, 8,839 tons of coal; Alloa, 502 tons of coal; Borrowstoness, 3,576 tons of coal; Inverkeithing, 2,030 tons of coal; Maryport, 31,688 tons of coal and 10 tons of coke; Whitehaven, 15,222 tons of coal and 57 tons of culm; and Charlestown, 4,961 tons of coal. During the month 5,742 British and foreign vessels were engaged in the trade, of which number 1,478 were engaged in the over-sea and 4,264 in the home coal trade.

The accounts for 1860, just presented to the shareholders in the joint stock provincial banking companies, show, in most cases, a very profitable investment of capital. At the annual meeting of the Worcester City and County Bank a dividend of 10 per cent. per annum clear of income tax was declared, carrying forward 4,000*l* to reserve fund. The paid-up capital of the bank, 50,000*l*, is to be increased to double that amount to meet the extending business. The Northamptonshire Banking Company, notwithstanding considerable losses connected with the leather trade, made a profit of 28,217*l*, out of which dividends of 16s per share and a bonus of 4s per share were declared. A balance of 539*l* was carried forward. At the meeting of the Leicestershire Banking Company the available balance for dividend was reported to be 26,857*l*, out of which a dividend of 25s per share and a bonus of 5s per share were declared, the sum of 4,000*l* being also carried to the reserve fund. The last year's profit of the Sheffield and Rotherham Bank was stated to be 27,008*l*, and after a payment of a dividend of 12½ per cent. per annum, a balance of 4,406*l* was carried to the reserve fund, which now amounts to 63,472*l*. The shareholders in the Dudley and Westbromwich Bank received a dividend at the rate of 5s per share. It was considered advisable at the meeting to reduce the remuneration of the directors from 450*l* to 225*l* per annum. The profit of the Wolverhampton and Staffordshire Banking Company was returned at 13,139*l*, out of which the directors declared a dividend of 10s per share, carrying forward 4,139*l*. The dividend declared at the annual meeting of the Derby and Derbyshire Bank was at the rate of 10 per cent per annum, beside a bonus of 10s per share and an addition of 1,000*l* to the reserved fund. The profit made by the Stamford, Spalding, and Boston Banking Company last year was 15,790*l*, out of which a dividend of 10 per cent. was declared, besides a bonus, and additions were also made to the capital and reserve fund.

An account, pursuant to the Act 8 and 9 Vict., cap. 38, of the amount of bank notes authorised by law to be issued by the several banks of issue in Scotland, and the average amount of bank notes in circulation, and of coin held, during the four weeks ending Saturday, the 9th day of February, 1861 :—

Name and Title.	Authorised Circulation.	Average Circulation.	Average Amount of Coin held.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT, pursuant to the Act 7th and 8th Victoria, cap. 32. for the week ending on Wednesday, the 20th day of February, 1861.

ISSUE DEPARTMENT.

	£		£
Notes issued	25,563,725	Government Debt	11,015 100
		Other Securities	3,459,900
		Gold Coin and Bullion	10,240,363
		Silver Bullion	848,362
	25,553.725		25,563,725

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	8,444,776
Rest	3,504,936	Other Securities	20,458,277
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	5,651,607	Notes	6,045,645
		Gold and Silver Coin	804,531
Other Deposits	11,453,279		
Seven Day and other Bills	590,407		
	35,753,229		35,753,229

Dated the 21st February, 1861. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	20,108,487	Securities	28,825,053
Public Deposits	5,651,607	Coin and Bullion	11,893,256
Private Deposits	11,453,279		
	37,213,373		40,718,309

The balance of Assets above Liabilities being 3,504,936*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£197,408
An INCREASE of Public Deposits of	951,314
A DECREASE of Other Deposits of	707,869
No change in the amount of Government Securities.	
A DECREASE of Other Securities of	270,119
An INCREASE of Bullion of	321,924
An INCREASE of Rest of	5,768
An INCREASE of Reserve of	494,004

The above return is favourable, the increase in the bullion and reserve indicating a material improvement in the position of the Bank. The bullion is now higher than when the rate was raised to 8 per cent.; and the reserve also shows a large augmentation over that period. The changes in the public and other deposits are chiefly attributable to the new Indian loan. The other securities are still more than half a million above the amount a fortnight ago.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851:—

At corresponding dates with the present week	1851.	1858.	1859.	1860.	1861.
	£	£	£	£	£
Circulation, including bank post bills	19,775,446	26,330 623	21,088,273	21,272,865	20,108,487
Public deposits	7,617,014	5,102,656	7,819,784	7,277,548	5,651,607
Other deposits	9,497,519	15,496,817	14,617,172	14,191,528	11,453,279
Government securities	14,145,696	9,806,405	10,696,147	10,171,190	8,444,776
Other securities	12,135 618	17,164,143	16,256,758	20,940,989	20,458,277

Coin and bullion	14,435,537	17,623,251	19,952,548	15,152,824	11,893,256
Bank rate of discount	3 p. c.	3 p. c.	2½ p. c.	4 p. c.	8 p. c.
Price of Consols	96¾ ¼	97¼	95½	95	91⅛
Average price of wheat	37s 2d	44s 6d	40s 10d	43s 11d	54s 9d
Exchange on Paris (shrt)	25 0 5	25 5 15	25 10 15	25 10 15	25 35 45
— Amsterdam ditto	11 15½ 16	11 14 15	11 15½ 16	11 13 13½	11 17 18
— Hamburg (3months)	13 6½ 6¾	13 5 5½	13 6 6¼	13 5 5⅛	13 9 9⅛

At the corresponding period of 1851 the money market was somewhat heavy. The Ministry of Lord John Russell was on the point of resigning, in consequence of the amendment threatened by Lord Stanley to devote the surplus of the year to a reduction of the income tax.

In 1858, the public mind was troubled by one of the periodical fits of distrust of France. The relations between the French and English Governments were by no means cordial. The desire for good investments, however, and money being abundant at 3 per cent., maintained the funds at 97¼.

In 1859, the Bank's resources had accumulated to an extraordinary point, the reserve being upwards of 14,000,000*l*, and the bullion nearly 20,000,000*l*. The best bills were taken in Lombard street at 2 per cent. The balance of 65 per cent. was about to fall due on the second series of 1,380,000*l* of Messrs Dent, Palmer and Cos.'s Turkish loan of 5,000,000*l*. This loan had fallen to 5 discount, and the Chilian loan to 3 discount, and the Austrian to 1½ discount. The stock markets were in an agitated and uncertain state, owing to the progress of the quarrel between France and Austria, although much confidence was placed in Lord Cowley's mission of mediation to Vienna. Much satisfaction was expressed in commercial circles at the announcement that Lord Palmerston had determined to bring on a debate on foreign politics, with a view to extract some information from the Government.

In 1860, there was temporary ease in the money market, and bills were readily discounted at 3¾ per cent., or ¼ per cent. below the Bank rate, and money in the Stock Exchange was abundant at 1½ to 2 per cent. The usual notice had appeared for the renewal of the March Exchequer Bills at 1½d per diem, or 2*l* 5s 7d per cent. per annum. Mr Gladstone's Budget was the main topic of discussion in all political and commercial circles, and was at the height of its popularity.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 2,638,099*l*; in 1858, a deficiency of 1,667,326*l*; in 1859, a deficiency of 1,639,586*l*; and in 1860, a deficiency of 6,749,461*l*. In 1861, the deficiency is 9,004,998*l*.

DISCOUNT AND MONEY MARKET.—The demand for money this week has been moderate, and in the first few days good short paper could be negotiated at a fraction below 8 per cent. The market, however, was still unsettled, and the unfavourable news from America, the bankruptcy of M. Mirès, and the stagnation in the manufacturing districts caused a want of confidence, and a general indisposition to do business. The discount houses, yesterday and to-day, would only deal with regular customers, and even then limited their transactions as much as possible, nothing being done under 8 per cent. At the Bank, the applications were comparatively small until to-day, when a brisk demand took place, the restrictive action of the other moneyed establishments, causing the bulk of the discount business to be taken thither. There is, however, nothing like pressure, notwithstanding that the value of money now stands unprecedentedly high, except as compared with a time of panic. On the Continental exchanges the rates of interest remain much lower than here:—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	7	4½
Amsterdam	3	3
Berlin	3	2¾
Hamburg	...	2
Frankfort	...	1½

On the Stock Exchange loans on Government securities could be freely obtained in the earlier part of the week at 6 to 7 per cent. Yesterday and the day before, the settlement in the new Indian loan and the payment in full of some rather large amounts caused more demand, and the charge was raised to 7 to 8.

The shipment of specie to America has recommenced, 11,000*l* having been taken by the steamer Australian last Saturday, and 51,000*l* by the City of Manchester on Wednesday. The letters from Liverpool state that the consignments of cotton from the United States for this country are much larger than is generally supposed, and a serious fall in the American exchange is therefore apprehended. The future mails to America are consequently expected to convey increased amounts of gold, the amount to be sent by the packet to-morrow being estimated at from 100,000*l* to 200,000*l*.

ENGLISH FUNDS.—The funds have shown a drooping tendency throughout the week, and are now quoted about three-eighths per cent. lower than last Friday. The same features that have caused uneasiness in the money market have unsettled the Stock Exchange, and public and other securities have generally declined. Some realisations of stock have also been made on account of the Court of Chancery, and further amounts were sold to-day both of Consols and New Three per Cents. Consols for money opened last Saturday at 91⅝ to ¾, and receded this afternoon

to 91¼. A rally then occurred to 91⅜ to ½ on the anticipation of a favourable Bank return. For the 7th of March the last transactions were at 91¾. Exchequer bills were again heavy in the middle of the week, but a partial recovery has since taken place.

The Government have advertised the usual notice to pay off the Exchequer bills dated in the month of March, 1860. The new bills to be issued will bear interest at the rate of 2d per day or 3*l* 0s 10d per annum, the previous rate having been 1½d or 2*l* 5s 7½d for the year.

The scrip of the new India loan has been rather flat, the final price being 99⅞ to 100⅛. The stock was last quoted 99⅝ to ¾.

Owing to investments of trust funds under the late order of the Court of Chancery, Bank stock advanced on Monday to 241, but a relapse has since taken place to 234 to 236, purchases on this account having ceased for the present.

Foreign Funds.—The principal change in foreign stocks has been a decline in the Turkish Six per Cent. loan of 1858, owing in some measure to the failure of M. Mirès, but chiefly from the increasing distrust with which Turkish finance is regarded. The improvement in Mexican has not been maintained, partly from sales to realise profits by previous speculators for the rise. There is less inquiry for Spanish Certificates, although it is known that negotiations have been resumed with the Spanish Government for their surrender at a fixed price. The present moment is considered peculiarly opportune for this purpose, as it has transpired that the Spanish Government are on the point of providing for the claim of France for 6½ millions sterling, the expense of putting down the Constitutionalist party in 1823. Peruvian bonds have been in demand.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and to-day :—

Railways.—The railway market has been heavy on the apprehension that the traffic returns will sooner or later suffer from the stagnation in trade. Any temporary improvement is also followed by sales, the high price of money inducing holders to realise at every favourable opportunity. The dividends which have been lately declared are likewise at the lowest rate that had been previously expected, while the working charges have in many cases considerably increased. The chief speculators are in the provinces, and the rise during the past half-year and the present fall are mainly due to their operations. At the close this afternoon the market showed a slight rally, but prices are still much below those of last week.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and this day :—

Railways.

Miscellaneous Shares.—No transactions have taken place in Commercial Bank shares since the discovery of the late frauds, and the dealers refuse to make a quotation. The previous price was 20½ to 21½.

Foreign Exchanges.—The rates are all firmer, owing to the high value of money here compared with the Continent.

Bullion.—Annexed is the weekly circular of Messrs Pixley, Abell, and Langley, giving an account of the bullion transactions of the week, and also those in India Government Loan Notes :—

Gold.—The remainder of the gold ex Strathdon has been sent into the Bank, and we have now to report the arrival of the five following vessels :—The Champion of the Seas, the Lincolnshire, the Clutha, the Moravian, the Essex, bringing together about 350,000*l*. As there is not any demand for bar gold for export, the whole of this amount is likely to be sent into the Bank. The Teutonia has brought 1,350*l* from New York; and the Australasian has taken 11,000*l*, and the City of Manchester 51,000*l* to New York; and the steamer on Saturday will probably take a larger amount.

Silver.—The silver ex Atrato has not yet been sold, and the stringency of the money market will doubtless stop any large amount being sent to Bombay by the outgoing steamer. We quote the price as 61¼d per ounce standard, and a quiet market. The Tasmanian has taken 10,000*l* to the West Indies.

Mexican Dollars.—The market is very quiet. We quote the price as 4s 11⅛d per ounce, but quite nominal.

Exchange on India for Bank 60 days' sight drafts is unchanged, viz., 2s to 2s 0⅛d. Bills with documents, 1s 11¼d to 1s 11½d. Drafts on Madras by Banks, 1s 11¾d to 2s 60 days' sight.

India Government Loan Notes are quite nominal, although prices, under the present pressure for money, have been wonderfully steady. We quote prices 100½ to 101⅛ for 5½ per Cents., and 94½ to 95½ for 5 per Cents.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, refinable, 77s 10½d per oz std. Silver—Bar silver, 5s 1½d per oz std, last price; bar silver, containing 5 grs gold, 5s 1⅝d per oz std, last price; fine cake silver, 5s 5⅞d per oz, last price; Mexican dollars, 4s 11⅛d per oz, last price; Spanish dollars (Carolus), 6s 6d per oz, last price; five-franc pieces, 4s 11⅛d per oz, last price.

Frauds upon the Commercial Bank, and the Transfer of its Business to the London and Westminster Bank.—On Monday the public were surprised with the announcement that the business of the Commercial Bank had been transferred to the London and Westminster Bank, and pained to learn that it was in consequence of a gross fraud committed to the extent of 60,000*l* by a ledger-keeper of the name of Durden, who, with his alleged accomplice, have been committed for trial. The following is the announcement made to the public :—

The Commercial Bank of London, 6 Lothbury,
London, E.C., Feb. 16, 1861.

I beg to inform you that arrangements have been made for the transfer of the business of this Bank to the London and Westminster Bank, who will, for the present, continue the business at our banking-houses in Lothbury and Henrietta street, Covent Garden.

The Directors of the Commercial Bank, therefore, equally with myself, will feel personally obliged by your transferring your account to the London and Westminster Bank, or any of its branches which may suit your convenience, and they will be ready to afford you every banking facility.—I am, &c.,

Alfred R. Cutbill, Manager.

The promptitude with which the Directors transferred the business of the Bank to the London and Westminster is highly commendable, and will probably save the shareholders much loss and the customers much inconvenience. The reserve fund of the Bank was stated to be 75,000*l*. It

is needful to explain that, although the London and Westminster takes the business, there is no merging of the capital of the Commercial Bank into its own. The assets of the defunct bank will be divided among the shareholders. The paid-up capital of the Commercial Bank was 300,000*l*; it was founded in 1839; its current and deposit accounts amount to 908,624*l*. A special general meeting of the shareholders has been convened for the 19th March.

FAILURES.—At a meeting of the creditors of Mr D. E. Rodocanachi, in the Levant trade, held at Manchester, the following balance sheet was presented:—

DR.	£	s	d
To amount owing to creditors on open account and on acceptances	121,372	6	9
To amount on acceptances for Mr Rodocanachi's account	108,141	16	8
To liabilities on firms suspended, a portion of which will be paid in full	45,368	9	0
	274,882	12	5

Liability on bills receivable, in circulation, 66,358*l* 19s 9d

CR.				£	s	d
By debtors, considered good				5,302	15	0
Ditto doubtful	£9,795	19	4			
By bills on hand	1,050	0	0			
	10,845	19	4			
By balance appearing due from Constantinople house				181,338	18	5
By property in Manchester				7,450	0	0
				194,091	13	5
Less amount to be paid in full, viz.:—Rent	£68	15	0			
Salaries, &c.	100	0	0			
				168	15	0
				193,922	18	5

It was resolved that the estate be wound up under inspection, and a desire was expresed that Mr Rodocanachi shall go to Constantinople to realise the assets there.

The stoppage is announced of Messrs Johnson and Hanson, hop merchants, &c., a respectable house. The amount of their liabilities is believed to be limited.

At a meeting of the creditors of Messrs Ledgard and Sons, bankers, held at Poole, it was resolved to agree to the proposal of the Wilts and Dorset Banking Company, to pay 10s in the pound upon the estate being legally placed in their possession, and a further dividend when it is realised, if the property will allow it.

Meetings of the creditors of Messrs W. B. Westall and Co., of Blackburn, and of Messrs Thwaites, Westall, and Co., of Manchester and Blackburn (both firms in the cotton trade), have been held at Manchester. The liabilities of the former amount to 11,304*l*, and the assets to 13,438*l*—leaving a surplus of 2,134*l*; against which there may be considerable liabilities upon bills arising out of cross transactions with Thwaites, Westall, and Co. The gross liabilities of the latter firm are computed at nearly 80,000*l*, and the available assets at 22,000*l*. It is believed, however, that the creditors will be paid in full, the private estate of Mr Thwaites being large. It was finally resolved:—"That the various actions and proceedings should be stayed until the next meeting of creditors, which will be held on Monday, the 4th of March, and that in the meantime Messrs Broome, Child, Murray, and Co. be requested to prepare a statement of affairs, and collect all accounts due to either concern."

In the Bankruptcy Court there was a dividend sitting in the case of Messrs Davies and Troughton, bankers, of Shoreditch. The amount of dividend about to be declared is expected to be from 5s to 7s 6d in the pound.

At a meeting of creditors of Mr D. Navone, a Greek merchant, who suspended payment on the 26th ult., the following statement was read by Mr W. Moates, the accountant:—Liabilities, 31,228*l* 2s 7d; assets, 4,458*l* 0s 4d. By claim on the house of D. Parodi and Son, 10,616*l* 14s 5d; P. Ananian, 13,355*l*; total claims, 23,971*l* 14s 5d. It was explained that the liabilities on acceptances are on account of Messrs D. Parodi and Son, of Smyrna, and P. Ananian, of Constantinople, and that in the event of these being retired and the liability on endorsements, chiefly on account of Messrs Francis, Ede, Son, and Co. and Messrs C. W. Ede and Co., being provided for, the present estate will be solvent. The advices from Messrs Parodi and Ananian are favourable, and express a confident hope that they will be able to meet these bills, but meanwhile they require time to ascertain fully their position. The following resolution for an adjournment was accordingly adopted:—

That as the liquidation of the debts and liabilities of Mr Navone is almost entirely dependent on the solvency or otherwise of Paul Ananian, of Constantinople, and D. Parodi, of Smyrna, it is for the general interest of the creditors that this meeting be adjourned until the 25th of April next, and that meantime no proceedings be taken against Mr Navone on acceptances or other engagements.

Some small failures in the Greek and Levant trades were announced on Saturday last. Mr G. P. Zolas, of Manchester, and Messrs A. M. Copchili and Co., of Manchester, were amongst them. The bills of Messrs Henry Lennox and Co., of Liverpool, have also gone back.

The suspension is announced of Messrs Scarlato M. Mavrogordato and Co., a respectable Greek house, established since 1842 at Manchester, with liabilities of about 35,000*l*, and assets showing a considerable surplus. The difficulty has been caused by the late failures and the absence of remittances from the East.

The suspension has also taken place of Messrs F. Whittall and Co., Lutrari and Co., and Armstrong, Pelton, and Co., all in the Levant trade, with liabilities which are believed to be moderate, and assets generally good.

Messrs Gomidos, Panos, and Co., Greek merchants, of Paris, whose suspension was announced last week, have resumed payment.

MISCELLANEOUS.—THE GREAT WESTERN RAILWAY OF CANADA.—The report of the Committee of Investigation on the Great Western Railway of Canada, appointed on the 4th of April last, has at length been issued. It is a striking document from the nature of the accusations it contains, especially with reference to the early conduct of the undertaking, but can scarcely be weighed with justice to all parties until the reply of those affected by it shall have been published. The Committee state that the sums which they have ascertained to have been misappropriated or wasted would probably amount to a million sterling, and that they have deemed it expedient to withhold from publication the greater part of the evidence taken, owing to "transactions having come to light of so questionable a character that in their opinion the best legal advice should at once be had as to the proper proceedings to be instituted against the persons concerned." They make an exception, however, as regards the evidence of Mr Samuel Laing, which, as that gentleman is absent in India, they consider should be given in connection with the remarks they feel called to put forth upon it. These remarks involve a charge that Mr Laing, as representative of the shareholders of the Hamilton and Toronto branch, entered into a contract with himself for the construction of the work. The entire report is characterised by great severity, and the affair is likely to excite much public discussion. It must be remarked that this report is *ex parte*, and it would be extremely unfair to judge of it until the reply of the Directors is published; it has already brought forward the following reply from Mr Wythes, the contractor alleged to be mixed up with Mr Laing in the contracts:—

Reigate, Nov. 20, 1860.

Gentlemen,—Having heard from the late Mr Peter Buchanan, that the Committee of Investigation of the Great Western Railway of Canada Company are prosecuting some inquiries relative to my contract for the construction of the Hamilton and Toronto Railway, and understanding that some questions have been raised by them, though without any communication with me, I beg to say (in order to prevent any misapprehension as to my position as respects such contract) that I am perfectly willing to open the whole of my accounts for the construction of that railway, and to refer the same to arbitration in the usual manner, as provided for in my contract, and I will undertake to refund whatever the arbitrator may decide I have been overpaid, if anything, provided your Company will on their part undertake to pay me such sum, if any, as the arbitrator may determine I am fairly entitled to receive in excess of the moneys I have received.—I am, gentlemen, yours truly, GEORGE WYTHES.

To the Directors of the Great Western Railway of Canada Company.

The advices from America state that all producers, both in the North and South, are shipping goods to Europe as fast as possible. In the North the motive probably is to anticipate the possibility of communications being interrupted in case the crisis should end in hostilities; while in the South, in addition to the same reason, there is the stimulus to escape the suggested export tax on cotton, which, according to some accounts, is threatened as high as a cent (one halfpenny sterling) per lb.

Messrs Robert Benson and Co. draw the attention of the holders of bonds of the Pittsburg, Fort Wayne, and Chicago, Ohio and Pennsylvania, Ohio and Indiana, and Fort Wayne and Chicago Railways to the plan for the reorganisation of these undertakings, to which their assent is now required.

A copy of the following letter from Her Majesty's Consul at Charleston, reporting the reopening of the main channel to the harbour of that port, has been received at Lloyd's from the Admiralty:—

British Consulate, Charleston, Feb. 1, 1861.

My Lord,—With reference to my letter of the 11th ult., in which I had the honour to acquaint your Lordship that the *de facto* authorities of the State of South Carolina had closed the various channels leading into this harbour, with the exception of Moffit's Channel, I have now satisfaction to report that the main or ship channel is again open, and available for vessels drawing sixteen feet of water.

I regret to add that the lighthouse, beacons, light ship, and buoys, alluded to in my letter of the 3rd ult., have not yet been lighted or replaced.—I have, &c.,

(Signed) ROBT. BUNCH, Consul.

The Secretary to the Admiralty.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 2½ per mille premium, and the short exchange on London is 25.32½ per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is rather more than 3-10ths per cent. dearer in London than in Paris.

By advices from Hamburg the price of gold is 424½ per mark, and the short exchange on London is 13.6 per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 6-10ths per cent. dearer in London than in Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is 106½ to 107 per cent., which, when compared with the Mint par between the two countries, shows that the exchange is against England. But at the present rate there is no profit on the transmission of gold to the United States.

Imports of the week ..... 236,243 qrs.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The demand for most kinds of English wheat at Mark lane, this morning, was inactive, at about Monday's quotations. Foreign wheat mostly sold in retail quantities, but at full prices. Barley, oats, and flour were quite as dear; but other produce was rather heavy. The imports from abroad are liberal—viz., 29,010 quarters of wheat; 8,940 barley; 5,550 oats; 500 sacks and 15,510 barrels of flour.

At Liverpool, to-day, wheat moved off slowly, at late rates. Other articles commanded very little attention.

Messrs Briggs and Co., of Alexandria, writing on the 12th instant, report the corn trade as follows:—

The unfavourable intelligence received from England by last mail, produced a feeling of extreme dulness in our grain market; but, prices having gradually given way, business was resumed with renewed activity, and at the present moment the demand is firm for all descriptions at the quotations given hereunder, to which we subjoin the usual note of sales since our last, viz.:—Wheat, Saide, Pasha's produce, 875 qrs, 40s; private trade produce, 5,700 qrs, 34s 6d to 35s 6d; Beheireh, 33s to 34s nominal: beans, Saide, 3,440 qrs, 28s to 28s 6d; Indian corn, 8,570 qrs, 25s to 25s 6d; barley, 322 qrs, 20s 6d to 21s 6d; lentils, 125 qrs, 26s to 27s per quarter. Freights may be quoted for beans to the United Kingdom for orders 5s 3d to 5s 6d per quarter; wheat and other grain or seed in proportion: to a direct port nominally about 5s: grain ballasts to Liverpool by steamer, 5s 6d per quarter; by sailing vessel, 3s 6d to 4s.

There has been again a very limited business transacted in the Liverpool cotton market during the past week, and the total sales amount to 26,000 bales only, 15,000 bales of which are to spinners, 2,000 on speculation, and 9,000 bales for export. Quotations are fully ⅛d per lb below those current last week. The market closes with a rather better feeling to-day: sales 7,000 bales. Some accounts have spoken of a large speculative business having taken place in cotton this year: this is incorrect, as well as improbable. Perhaps less has been done on speculation in this article this year than for many years previous. The rate of the money market has ruled too high throughout to encourage that kind of business. Some small operators may have played a little with the article in and out for small profits, but regular speculators in the article have kept aloof.

The public sales of tea held this week have gone off slowly; nevertheless, prices have been supported. Privately, the transactions have been somewhat restricted.

Owing to the high range in the value of money in the discount market all descriptions of sugar have moved off heavily, and, in some instances, low qualities have had a drooping tendency.

Plantation coffees have maintained their previous value, but other kinds have gone rather lower.

In rice, next to nothing has been doing, and, to force sales, lower rates must be submitted to. Saltpetre has fallen in value 6d per cwt. Rice, however, has maintained its previous value.

The arrival of several vessels from Australia has caused a large addition to the quantity of wool to be offered at the forthcoming public sales of foreign and colonial, which are appointed to commence on the 28th instant, and will terminate on Wednesday, the 27th March. The quantity arrived amounts to about 48,993 bales, including 5,127 bales from Sydney, 20,692 from Victoria, 459 from Tasmania, 6,893 from Adelaide, 1,120 from New Zealand, and 14,693 from the Cape of Good Hope. In the corresponding sales last year the quantity offered was only 26,094 bales, the greater portion of which was from the Cape of Good Hope.

Hemp and flax have commanded very little attention, and jute has given way 5s per ton.

The quarterly sales of Spanish indigo have ruled steady, at an advance in the quotations of from 1d to 6d per lb.

Messrs Layton, Hulbert, and Co., report the last indigo sales as under:—

When it became known, in November, that the ryots in Bengal refused to sow indigo, and that the October season was lost to the planters, considerable operations were entered into in this market, and the value rose from week to week until the quotations for Bengal qualities were 8d to 9d, and for Oudes 1s per lb advance upon the prices established in the auctions of October; nor was there any relaxation in the stringency of the market until the Bank of England made the rate of discount 7 per cent. on the 7th of January. The trade had taken little or no part in the movement. Speculators, awaiting the issue of the Bank measure, refrained from further purchases, and a month of inactivity preceded the present sales. The amount brought forward, although less than usual in the sales of February, was greatly in excess of the demand. But few of our country customers appeared, and no foreign buyers. The catalogue contained an indifferent assortment, desirable medium qualities of Bengal being particularly scarce; for these descriptions and fair Kurpahs only was there tolerable competition. In the midst of the sale on the 14th instant, the Bank directors advanced the minimum rate from 7 to 8 per cent., giving further discouragement to the buyers. Prices may be quoted as under:—Bengal—Fine purple and violet, 8s to 8s 9d per lb; good, 7s 6d to 7s 10d; middling and defective, 7s 2d to 7s 5d; consuming, fine, 6s 8d to 7s; consuming, good, 6s to 6s 7d; consuming, middling, 5s 3d to 5s 10d; consuming, ordinary, 4s 3d to 5s 2d: Oudes—Plant, 4s 3d to 5s 6d; middling, 3s 3d to 4s; ordinary, 2s 6d to 3s: Madras—Velore, 5s to 5s 7d; middling, 3s 4d to 4s 6d; ordinary, 1s 7d to 3s 2d: Kurpah—Fine, 6s 6d to 6s 10d; good, 5s 4d to 6s 3d; middling, 4s to 5s; ordinary and low, 1s 3d to 3s 9d. Compared with October sales, Bengal qualities have advanced 3d to 6d per lb, Oudes and plant Oudes 4d, Kurpah 3d to 7d, and Madras 2d per lb. The quantity sold is 2,500 chests; 1,800 chests remain bought in.

The public sales of silk, observe Messrs Durant and Co., are concluded. The quantity offered was 2,500 bales Bengal silk, 6,000 bales China, and 1,100 bales Japan. The only feature was an intimation previously to the sale that about 300 bales of the Japan would be sold without reserve. This attracted the attention of buyers, and at the same time reminded importers that Japan silk had not fully shared in the general reduction of prices, and induced them to modify their pretensions. The result is, that in addition to these 300 bales, about 200 bales have been sold at prices somewhat under their former parity with other classes. All other silk was allowed to pass without biddings. The business doing by private contract previous to this week had been for some time active and considerable.

The metal and oil markets have been devoid of animation; nevertheless, very little change has taken place in prices compared with last week.

The demand for tallow is much restricted, yet the quotations have continued tolerably firm. To-day, P. Y. C., on the spot, has changed hands at 59s 9d; February to March, 59s 6d; March, 59s 6d "buyers"; April to June, 58s to 58s 6d; October to December, 56s per cwt. Town tallow is 58s net cash.

Commercial advices from New York to the 5th inst. state that the Stock Exchange was in a depressed state from political causes. The disposition at the early board was to make lower prices by about 1 per cent. on nearly all the speculative contracts on the railway list, while the State securities had a further fall of 2 per cent. on Tennessees, 1 per cent. on Virginias, and ½ to 1 per cent. on Missouris. The market for exchange was weaker than for the previous market by ¼ to ½ per cent. in actual sales on London, and full ½ per cent on Paris. Bankers' sterling had been done at 106¼ to 107, and francs at 5f 32½c to the dollar. This feeling also extended to merchant bills on England, which rated within wider range, say 104 to 106¼ per cent. The Alabama Legislature had declared the pound sterling, or gold sovereign of Great Britain, as legal tender at 4 dols 85c when of full standard weight. As this is 2c to 3c higher than the market value at New York, it was probable that some use would be made of the new regulation by sending English coin to Mobile, as the best medium with which to buy exchange at that point. Money was easier on call to the old stock firms in the street, deposits being left with them in some cases as low as 5 per cent., in others at 6 per cent. The rule among or between the brokers themselves was still 7 per cent., and the same figure was charged on temporary loans at most of the banks. The movement of the banks in the four principal cities of the Union, in which weekly reports are made, as shown by their last statements, is as follows:—

	Loans. dols.	Deposits. dols.	Specie. dols.	Circulation. dols.

New York	5	11000	⅛c lower	Upl. 12⅛c	⅛d —	6.76d
Total		140000 bales			Average	6.69d

The decrease in receipts is reduced to 591,000 bales from last year, when the crop reached 4,675,000, and to 128,000 bales from 1858-9 (crop 3,851,000).

New York Market.—Business has been quiet in this market during the week, although the Liverpool advices have been of a stimulating character. Buyers have shown little disposition to operate, and the demand has been confined chiefly to the home trade. Holders have made concessions to encourage sales, and prices are ⅛ to ¼c lower for cottons on the spot, while transit cottons have been very irregular. The week's sales reach about 11,000 bales, of which about half in transitu. Middling Upland is quoted 12c to 12⅛c.

The following is a statement of the movements of cotton for the last week, and since 1st September last, compared with the five preceding years:—

	Receipts. Week's Receipts. bales	Since 1st Sept. bales	Exports for the Week. To Great Britain. bales	To France. bales	To other For. Pts bales
1860-61	194000	2342000	76000	15000	5000
1859-60	167000	2934000	82000	31000	30000
1858-59	132000	2471000	61000	5000	16000
1857-58	110000	1483000	40000	12000	11000
1856-57	72000	2015000	68000	9000	9000
1855-56	82000	1987000	50000	28000	13000

	Exports since First September.			
	To Great Britain. bales	To France. bales	To other For. Pts. bales	Total. bales	Stock. bales
1860-61	1066000	272000	162000	1501000	721000
1859-60	1227000	335000	180000	1742000	1040000
1858-59	762000	303000	216000	1281000	920000
1857-58	524000	190600	126000	840000	612000
1856-57	541000	204000	143000	888000	786000
1855-56	763000	260000	190000	1213000	598000

Thus the receipts show a decrease of 591,000 bales from those of last year, and a decrease of 128,000 from 1858-9, and the exports exhibit the following results :—

	To G. Britain.	To France.	To other F.P.	Total.	Stock.
Compared with last year	Dec. 161000	Dec. 63000	Dec. 18000	Dec. 241000	Dec. 319000
Compared with 1858-9	Inc. 304000	Dec. 31000	Dec. 54000	Inc. 260000	Dec. 199000

Southern Markets by Telegraph.—There has been rather more activity at the South this week, buyers being encouraged by the favourable Liverpool advices, and a good supply offering on the market. At New Orleans the week's sales reach 90,000 bales, but without any advance in prices, and at the close the market was quiet again on the basis of 11¼c for middling. The week's sales at Mobile have been 36,000 bales, and with small receipts, sellers have obtained an advance of ⅛c upon the low rates at the opening of the week, middling being quoted 10¾ to 11c at the close. There has been more doing at Charlestown, and prices are rather dearer. At Savannah, 9,000 bales have changed hands, closing on the basis of 11c for middling. Freights are without material change.

Receipts. — The receipts by mail this week sum up largely, amounting at all ports to 194,000 bales against 167,000 same week last year. The total is now 2,388,000 bales, and the decrease, as compared with last year, is reduced to 591,000 bales, and to 128,000 bales compared with 1858-9. We have yet to compare against a month of large receipts last year, after which we come to the smaller figures. By telegraph the receipts at New Orleans for the following week were 74,000 bales against 86,000 last year.

Exports.—The clearances reported at New Orleans last week were on a very large scale, amounting in the aggregate to 242,000 bales from that port alone. This was occasioned, however, by the fact that nearly every ship in port was cleared in advance in order to obtain federal clearances. The actual sailings of the week were about one-fourth of this quantity (57,000 bales), and we have made up our tables accordingly, so as to maintain a correct comparison with former years. Thus the week's exports from all ports have been 97,000 bales; of which 76,000 bales are for Great Britain, 15,000 bales for France, and 5,000 bales for other foreign ports. The total to Great Britain is now 1,066,000 bales against 1,227,000 last year, a deficiency of only 161,000 bales—while compared with 1858-9 there is an excess of 304,000 bales. The total to France is 272,000 bales, showing a deficiency of 83,000 from last year. To other foreign ports the total is 162,000 bales against 180,000 last year.—*From Messrs Neill Bros. and Co.'s Circular, forwarded by Mr Ollerenshaw, of Manchester.*

New York, Feb. 8.—The market continues dull and heavy, and we note a further reduction of one-eighth of a cent. per lb, to which we conform our quotations. To effect sales to any extent, however, holders would be compelled to grant a further concession. The sales for the three days foot up 3,200 bales. We quote :

New York Classification.

	Upland. c	Florida. c	Mobile. c	New Orleans and Texas. c
Ordinary	9½	9½	9½	9⅝
Good ordinary	10⅛	10⅛	10⅛	11⅛
Middling	12	12⅛	12⅛	12⅛
Good middling	12⅝	12⅝	13	13
Middling fair	13	13⅛	13⅜	14⅜

The arrivals have been from Florida, 1,163 bales; Georgia, 2,445; South Carolina, 576; North Carolina, 1,209; Virginia, 1,218; Baltimore, 20—total, 6,991. Total import since 1st inst., 17,134 bales; total import since 1st September, 265,201 bales. Export from 1st to 5th February, 7,725 bales, against 5,375 in 1860.

The cotton market has again been almost stagnant during th past week. The trade continue to work off their stocks, which in the last month have suffered a heavy reduction. Speculators and exporters are deterred from operating by the state of the money market, and some holders, influenced by the same cause, have supplied the very limited demand at a further reduction in price. Our quotations for American are to-day fully ¼d per lb below those of last week. Egyptian have been selling at irregular prices, and generally rather lower. Brazil must also be quoted ¼d per lb lower. East India have declined ⅛d to ¼d per lb. The sales to-day are 6,000 bales. The market continues depressed. The reported export amounts to 3,810 bales, consisting of 1,850 American, 160 Brazil, and 1,800 East India.

MARKETS IN THE MANUFACTURING DISTRICTS.

The advices at hand, this week, from the manufacturing districts are extremely unfavourable. Both for home use and export, next to nothing has been doing in goods, and prices have, in some instances, ruled almost nominal. The iron trade has continued in a depressed state, and coals have shown a tendency to give way in value.

Manchester, Feb. 21.—Since this day week prices have gone down considerably. In cop yarns from 30's to 40's there was great pressure to sell at about 2d per lb reduction from the highest rates of last month; but, in consequence of the Blackburn strike, this opportunity was not taken advantage of, except for a few large lots on speculation. To-day, these yarns are nominally firmer on the announcement that the strike is virtually at an end, the weavers having agreed to go in on the masters' terms. It is considered, however, that few weeks can elapse before manufacturers as a body, not only in Blackburn, but the other districts, will be working not more than four days per week. On Tuesday, cloths were depressed, with few transactions; to-day there has been a further fall, and we close heavily.

Bradford.—The wool market is still in an exceedingly dull state. There have been a few inquiries about, especially for deep-grown wools, but few transactions in any sort have been effected. Where sales are made to any extent, some concession is given, but the general firmness, notwithstanding the great dulness that has so long prevailed, is a matter of astonishment to everybody. There is not much improvement in yarns, though they can hardly be worse than for some weeks back. Business on the whole continues exceedingly flat in pieces, and buyers exercise caution.

Huddersfield.—The business doing is, with three ar four warehouse exceptions, almost nominal. In wool, trade is very languid, and although prices are in some kinds a trifle easier, scarcely any buyers are found.

Leeds.—There is a fair attendance of buyers, and a rather better feeling prevailed. The transactions are principally in Meltons and light fabrics. In the white market the tone is quiet, and only a moderate quantity of cloth has changed owners.

Leicester.—The hosiery trade is by no means active. The high rate of discount operates prejudicially to speculation, and the greatest prejudice is evinced by manufacturers in the production of goods. The same quiet state of things exists in the adjacent hosiery districts. There is not much doing in wools, the market not being so firm. Yarns also are not much in request.

Nottingham.—The lace trade is quiet; there is not much activity in any department; still manufacturers are anticipating that more will be done as the spring advances. Plain nets are not in request. Cotton fancy goods are in fair demand. The silk branch is a shade more active. The hosiery trade continues to improve.

Belfast.—The Linen Trade—Some slight evidence of improvement has been seen in the market for white goods, and the prospect of better days are more hopeful; but, as yet, the favourable turn is only to be found in one or two sections of the trade. Continental demand has been moderate. The home trade remains very quiet.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

New York, Feb. 5.—Flour, State and Western declined 5c to 10c; superfine State, 5.10 dols to 5.20 dols; extra ditto, 5.30 dols to 5.35 dols; round hoop Ohio, 5.55 dols to 5.70 dols; extra Western, 5.30 dols to 5.50 dols; Southern, mixed to good, 5.50 dols to 5.90 dols; fancy and extra, 6 dols to 7.50 dols; Canada, extra, 5.30 dols to 7.25 dols. Wheat has declined 1c; Chicago

spring, 1.16 dol; Milwaukee Club, 1.25 dol; amber Iowa, 1.26 dol; red winter Western, 1.30 dol to 1.32 dol; Canada Club, 1.20. Corn has a declining tendency; mixed Western, 67c to 68½c; white Southern, 72c to 76c.

NEW YORK, Feb. 9.—FLOUR AND MEAL.—There is apparently no change to note in the complexion of the market for State and Western flour, the demand having been moderate during the three days, and the transactions having been fair at prices strongly tending in favour of the purchaser. The bulk of the sales since our last have been to meet the demand for home consumption and for shipment East. The proportion taken for export is comparatively small. For the three days the sales foot up 35,000 bbls, including 10,000 yesterday, the market closing dull, with still a downward tendency in prices. Canada flour is also dull and drooping, and we reduce our quotations somewhat; the sales comprise 1,000 bbls, including 300 yesterday. The market for State and Western flour has been dull and heavy, and nearly all kinds have experienced a further depreciation. Transactions since Tuesday amount to 2,700 bbls, of which 1,000 were disposed of yesterday, at 6.05 dols for Brandywine, 5.75 dols to 7 dols for Georgetown, and 5.40 dols to 6.75 dols for Baltimore.

EXPORT, from 1st to 5th February.

	1861 barrels	1860 barrels
Wheat Flour	41,347	11,058

GRAIN.—The market for grain has sympathised in a considerable degree with that of flour, and dulness and depression have constituted the chief characteristics during the three days. For wheat, the inquiry has been moderate, and chiefly confined to the existing wants of local millers. There have been sales to a fair extent for export, however, notwithstanding advices from Europe continue of a more or less unfavourable nature. Corn has met with moderate request, and all kinds have receded 1c to 2c per bushel.

EXPORT from 1st to 5th February.

	1861 bushels.	1860 bushels.
Wheat	248,621	29,270
Corn	68,086	12,170

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Very moderate supplies of home-grown wheat have been on offer in the whole of the leading markets held this week, in, for the most part, very middling condition. All good and fine samples have moved off freely at full quotations, but low and damp parcels have commanded very little attention. There has been a fair retail inquiry for most descriptions of foreign wheat. In prices, however, no change has taken place. Fine barley has commanded quite as much money as of late, but other descriptions have met a dull inquiry. Malt has moved off heavily on former terms. Good and useful oats have changed hands, at very full prices. Beans and peas have sold heavily at late currencies. Flour has commanded full quotations, although the supplies of foreign continue very large.

Throughout the Continent, there has been a moderate demand for wheat for spring shipment to this country. Barley and most other produce have realised full quotations. Advices from New York state that both wheat and flour were dull in sale, and rather cheaper. A fair business was, however, doing for export.

In Scotland, wheat has moved off slowly; nevertheless, prices have been well supported. Barley has sold freely on English account, and a steady business has been passing in oats.

The Irish markets have been firm for fine barley and oats, at very full prices. Otherwise, the trade has continned in a most inactive state.

The supply of English wheat at Mark lane to-day was very limited. Fine dry samples sold readily at extreme rates, but all inferior qualities were very dull, and next to nominal in value. Good and fine foreign wheat met a fair retail inquiry, and prices ruled firm. Low parcels attracted very little attention. Barley, malt, oats, beans and peas moved off slowly, yet no change can be noticed in the currencies of any description. The flour trade was inactive. Prices, however, ruled about stationary.

Mr Ed. Rainford thus reports the state of the floating trade:—Since the 14th instant, 78 arrivals off coast for orders are reported up to last night, consisting of 34 cargoes of wheat, 2 rye, 17 maize; 22 barley, and 3 miscellaneous, viz.:—Wheat, 7 from Odessa, 6 Alexandria, 2 Trieste, 3 Galatz, 2 Yeisk, 1 Constantinople, 3 Venice, 3 Ibraila, 2 Marianople, 1 Sulina, 1 Taganrog, 1 Santander, 1 New York, 1 Berdianski; rye, 1 Galatz, 1 Eupatoria; maize, 4 Sulina, 2 Philadelphia, 1 Ibraila, 3 New York, 2 Constantinople, 4 Mazagan, 1 Galatz; barley. 7 Ibraila, 1 Tulza, 3 Odessa, 6 Sulina, 1 Galatz, 1 Constantinople, 1 Marion, 1 Salonica, 1 Scala Nova; beans, 1 Alexandria; beans and lentils, 1 Alexandria; locust beans, 1 Cyprus. About 12 of the above had previously changed owners. A fair business has been done in cargoes afloat during the week, especially in wheat and barley; the latter, it will be observed, at lower rates. The prices paid are as follows:—Wheat, arrived, per 492 lbs, Marianople at 56s and 57s; Berdianski at 55s 9d to 56s; Kanizza, 57s; new Odessa Ghirka, 56s, and a cargo, part injured and warm, at 52s, with option to reject 50 qrs; on passage, Marianople at 55s; arrived, per 480 lbs, Galatz at 48s; Ibraila 41s to,43s 6d; Wallachian, 43s; per imperial quarter, Saide (fine) at 44s, and at 42s and 43s 6d. Rye, arrived, per 480 lbs, Galatz at 33s 6d. Maize arrived, per 480 lbs, Ibraila (wevilled) at 37s 6d, and 2 cargoes at 39s 6d; American mixed (a portion damaged) at 38s 9d, tale quale; yellow American at 40s. Barley, arrived, per 400 lbs, Odessa, an imperfect cargo, at 26s 6d, 2 at 28s, and 1 for Continent at 28s 9d; Galatz, 27s 3d; Moldavian, 27s; Wallachian, 28s; Ibraila, 26s 9d to 27s; and a cargo for Continent at 28s; Salonica, 26s 6d. Beans,' arrived, Egyptian, 37s per imperial quarter.

The London averages announced this week are:—

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS, SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market has been unsettled, and in many cases prices have receded 6d per cwt, low qualities showing the greatest depression. Some floating cargoes are also reported sold upon moderate terms. At the Barbadoes sale, comprising 235 hhds, former prices were not maintained, this description being higher in proportion than other sugars. The range was from 37s to 43s 6d per cwt for soft brown to good yellow. Including the above, only 1,200 casks West India had sold during the three days.

IMPORTS and DELIVERIES of SUGAR to February 16, with STOCKS on hand.

	1861. tons	1860. tons	1859. tons	1858. tons
Imports	23500	26000	24100	21800
Deliveries	25900	29500	26750	28800
Exported	900	1150	2000	1050
Stock	49700	53000	48900	49500

Mauritius.—The public sales have again been rather large, comprising 19,760 bags, of which about three-fourths sold: brown, 31s 6d to 35s 6d; low to middling grey, 35s 6d to 38s 6d; grainy and crystallised, 36s to 42s 6d. The qualities under 38s 6d per cwt went cheaper.

Bengal.—877 bags went at easier rates, including middling white Benares, at 44s 6d to 45s 6d; middling Gurpatta date, at 39s 6d to 40s; moist grainy brown, at 35s 6d per cwt.

Madras.—2,521 bags were withdrawn: native brown and low yellow, 31s to 33s; black Jaggery, 30s 6d per cwt.

Penang.—Of 1,770 bags, by auction, about 1,000 sold: grainy yellow. middling to fine bright, 39s 6d to 42s 6d; greyish, 37s 6d to 39s; low to good brown, 33s to 36s per cwt.

Foreign.—The public sales have not been very large. 254 casks Cuba from New York partly sold at 34s 6d to 37s 6d for brown to middling soft greyish yellow. 1.859 bags China sold at 36s to 38s for low to middling yellow. Of 2.886 bags Manilla, the sound portion was bought in: common clayed, 35s; unclayed, 32s to 33s: some washed lots were sold cheap, viz., at 33s and 30s to 30s 6d for the above descriptions. 2,149 boxes Havana partly sold at 36s 6d to 40s for washed brown and yellow; sound bought in at 38s 6d to 41s 6d; and some grainy white in bond realised 26s 6d to 28s 6d. About 3,500 boxes Havana have sold by private contract. Three floating cargoes of Havana are reported for the United Kingdom: Nos. 11½ to 12, at 25s 3d to 25s 6d; No. 9, 23s 6d. 2,700 baskets Java to arrive have sold at 26s, equal to No. 12½, for Amsterdam.

Refined.—The market has been quiet, and quotations are almost nominal: low to middling dry goods, 49s 6d to 50s per cwt. Dutch crushed remains steady.

MOLASSES.—Business to the extent of 300 puns Barbadoes has been done during the last fortnight at 19s per cwt.

MELADO.—550 casks offered by auction were mostly bought in at 28s 6d to 30s, a few lots good selling at 31s to 32s; the remainder since found buyers at 28s 6d per cwt.

RUM.—A more active demand has prevailed this week, the sales at slightly higher prices for Demarara, good marks selling at 1s 11d to 2s. Mauritius and Madras have realised 1s 8½d, and Penang 1s 8d per proof gallon. Jamaica of common to middling quality has sold at 3s 4d to 3s 6d per gallon.

COCOA.—No public sales of West India or foreign have taken place, and the market is quiet. With steady deliveries, the stock of West India has fallen to 5,121 barrels and bags. Of foreign, it is still large, viz., 10,400 bags, against 3,420 bags at the same date last year.

COFFEE.—There has not been any further change in the quotations of Ceylon, owing to the reduced supplies offering. 156 casks 223 barrels and bags plantation chiefly sold at 65s to 72s for good ordinary to low middling. 233 casks 551 barrels and bags native: common to very good, 63s to 65s 6d. 414 bags Cannon's Mysore part sold at 80s 6d to 96s 6d. 3,313 pockets Mysore realised 63s to 64s for good ordinary palish. 72 half-bales Alexandria Mocha were bought in at 92s to 95s. A floating cargo of St Domingo has sold at about 60s for a near port.

TEA.—Business by private contract has been checked by the large public sales. These opened yesterday; the catalogues containing 40,048 packages China, &c., and 1,787 packages Assam. The latter chiefly sold, good to fine qualities at extreme rates; broken leaf and ordinary went cheaper. The China tea will commence to-morrow.

SPICES.—There has been very little alteration in prices this week, and the markets are quiet. At auction, on Wednesday, 900 bags pimento realised 2¾d to 3d for low to good. Nothing of importance has transpired in pepper, which is firm, both for black and white. 6 cases good Penang cloves sold at 1s 4d per lb. 700 boxes cassia lignea were partly disposed of at 86s to 91s for third and second piles. 150 barrels Jamaica ginger went upon rather lower terms, selling at 57s to 75s per cwt.

RICE.—Transactions by private contract have been confined to a few parcels soft grain, including old Necrancie Arracan at 10s 3d to 10s 9d; damaged sorts, 10s to 10s 7½d; middling white Bengal, 12s 6d. In public sale, 3,390 bags middling to good white Bengal were bought in at 12s to 14s per cwt.

IMPORTS and DELIVERIES of RICE to February 16, with STOCKS on hand.

Delivered	1415	1960	2500	2600
Stock	4500	4925	2800	5500

Deliveries last week 805 tons.

COCHINEAL.—This article remains steady, and 434 bags principally found buyers at the improvement last quoted. Honduras silvers, 2s 9d to 3s 1d; blacks, 3s to 4s 3d: Teneriffe silvers, 2s 9d to 2s 11d; blacks, 3s 2d to 3s 3d per lb.

OTHER DRYSALTERY GOODS.—Gambier remains steady: 2,505 bales by auction partly sold at 17s to 17s 6d. Cutch is again dearer, 25s to 25s 3d having been paid for good quality. The market for safflower continues firm and 10s higher: 128 bales ordinary to fair Bengal sold by auction at 3*l* to 6*l* 2s 6d. Bengal turmeric was bought in at 15s per cwt. Red Saunders wood sold at 6*l* 5s per ton.

SHELLAC.—Further reduced rates have been accepted this week for the lower descriptions and block, the latter selling at 5*l* 7s 6d to 5*l* 10s, but good to fine sorts remain steady. Good livery orange sold at 8*l* 10s per cwt.

RUBBER.—A small parcel of East India has sold at 1s 4d per lb.

METALS.—The general tone of business has not exhibited any change for the better this week. Moderate orders have been executed in British manufactured iron at the quotations. The market for Scotch pig is inactive, the last sales of mixed numbers being at 48s 6d to 49s per ton. There continues to be a limited demand for spelter, but holders are firm. The present quotations may be considered 18*l* 5s to 18*l* 10s on the spot, 18*l* 15s to 19*l* per ton for arrival. Foreign tin, although firm, has been quiet: Straits, 122s to 123s per cwt. Other metals have experienced little alteration, the general tendency of prices being downwards.

HEMP.—Some business has been done in Manilla, by private contract, at further reduced rates. 200 bales Bombay, by auction, sold at 22*l* to 22*l* 15s.

JUTE.—The sales yesterday went off with diminished animation, and 2,200 bales about half sold, some marks being rather cheaper: ordinary to good, 14*l* to 20*l* 12s 6d.

HIDES.—185,000 East *India*, by auction yesterday, went at about former rates, but the demand from the home trade is still inactive. Shipping sorts commanded extreme rates.

LINSEED.—Arrivals continue to be on a liberal scale, and the market is steady. Calcutta, 52s to 53s; Bombay, 56s. Floating cargoes of Black Sea and Azoff quoted 52s to 53s per quarter.

OIL.—A good business has been done in linseed at 28s 3d per cwt for export and home consumption. Rape is in better demand: foreign refined commands 40s to 40s 6d; brown, 37s. There has been some desire shown to buy cocoa-nut by those who recently forced sales: Cochin, 52s to 52s 6d; Ceylon, 50s to 51s. Palm dull at 46s per cwt for fine. Floating cargoes of olive can be obtained at lower rates, viz., Gallipoli, 60*l* to 60*l* 10s for the Continent. Sales on the spot are limited at the quotations. No change has occurred in olive.

TURPENTINE.—3,000 barrels rough sold during the week at 9s 3d. Spirits steady at 31s 6d to 32s per cwt for American drawn.

TALLOW.—Operations are still chiefly of a speculative character, and the market has been devoid of animation. Y.C. this morning is 59s 6d to 59s 9d on the spot; 59s 3d to 59s 6d for delivery in February and March; 58s 6d April to June; and 56s per cwt for the next three months. The Russian holders keep firm, notwithstanding the high value of money.

PARTICULARS OF TALLOW.—Monday, February 18.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The sales of Mauritius were rather large. Fine descriptions are firm, low sorts went rather cheaper. Of 13,165 bags, a large proportion sold: fine crystallised realised as high as 44s 6d. 750 bags native Madras, 30s to 32s 6d. 280 bags white Benares, 44s to 45s. 72 casks crystallised Demerara, 42s to 42s 6d per cwt. The week's business in West India is 1,195 casks. 300 baskets Java sold privately at 39s per cwt.

COFFEE.—2,510 bags Rio partly sold at 55s 6d to 60s. 541 bags native Ceylon at 62s 6d to 64s. 397 cases Neilgherry sold at 67s to 78s. 736 bags Madras were bought in at 63s to 63s 6d. 53 half-bales Alexandria Mocha were withdrawn at 95s. A floating cargo of Rio sold for a near port at 50s 3d, and one at 52s per cwt for the Mediterranean.

RICE.—870 bags Bengal partly sold at 11s to 12s for broken to middling white.

SPICE.—2,000 bags pepper found buyers: Singapore, 3¾d to 4d; Penang, common, 3½d to 3⅝d per lb.

SAGO FLOUR.—200 bags were bought in at 17s per cwt.

SALTPETRE.—611 bags, refraction 15½ to 14½, went at 35s 6d per cwt.

TEA.—15,474 packages passed, and 4,417 packages sold, the China descriptions being without further alteration. 24,781 packages remain for sale on Monday.

SAFFLOWER.—145 bales sold rather dearer again, good selling as high as 7*l* 12s 6d per cwt.

SHELLAC went at further reduced rates: good orange, 7*l*; liver, 6*l* 12s 6d to 6*l* 17s 6d per cwt.

OIL.—Cochin cocoa-nut by auction sold at 50s 6d to 51s 9d; Ceylon, 49s 9d to 50s; Sydney, 46s 3d to 49s. 444 casks of palm were mostly bought in at 40s to 47s per cwt. Winter bagged sperm was bought in at 106*l* 10s per tun.

TALLOW.—Town and foreign were unchanged. 450 casks by auction went as follows: Odessa, 58s to 59s; North American, 57s 3d to 57s 6d; South American, 56s to 57s; Belgian, 57s to 58s 6d: 13 casks 300 cases Calcutta, 53s to 56s per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar continues inactive. Unstoved goods are in moderate demand. For export, 120 of crushed have been sold at 34s f. o. b. Dutch crushed neglected.

GREEN FRUIT.—Large arrivals of oranges, but owing to the heavy gales at the Azores, the fruit is landing out of condition, some cargoes of which, sold by Keeling and Hunt at public sale, went at prices proportionate to condition and quality. Lemons and Seville sours lower. Nuts of all kinds without alteration; and a parcel of Para has arrived, via New York, which are wanted, stock being light.

DRY FRUIT.—In currants the business doing is merely nominal. There are no signs of weakness on the part of holders. Valencias are forgotten. Chesme raisins sell freely at 31s, and Eleme off stalk move slowly at 34s. Sultanas are easier. Figs selling freely at low rates.

ENGLISH WOOL.—There is not any improvement whatever in the English wool trade. Prices are barely supported in a general way, but where sales are pressed lower rates are submitted to.

FOREIGN WOOL.—The market is without change. The public sales, which commence on the 28th instant, will continue until the 27th March. The quantity arrived to date is 32,000 bales of colonial.

FLAX unaltered.

HEMP.—Market quiet, and not much business doing.

TOBACCO.—The market has not presented any change. Prices remain firm and steady, but sales have been generally of a very limited character.

LEATHER AND HIDES.—The leather market has not presented any new feature during the past week. The stringency of the money market has, no doubt, restricted business, but the transactions have not materially declined in extent, and prices remain unaltered. At Leadenhall, on Tuesday, the attendance of buyers was small and the sales limited. There is still a good demand for extra thick foreign butts at full rates.

TIMBER.—The market is exceedingly dull. Prices are lower, and stocks very large.

METALS.—The universal depression occasioned by the state of monetary affairs continues to put almost a total stop to business. Copper is unchanged *in* quotations; there have been one or two inquiries for Burra at 101*l*, but sellers are indisposed to take the price. There is still but small demand for tin plates, the American trade being totally suspended. Scotch pig iron quiet.

TALLOW.—Official market letter issued this evening :—

	s	d
Town tallow	30	3
Fat by ditto	3	1½
Yellow Russian	61	6
Melted stuff	40	6
Rough ditto	24	6
Greaves	18	0
Good dregs	7	0

METROPOLITAN CATTLE MARKET.

MONDAY, Feb. 18.—The total imports of foreign stock into London, last week, amounted to 3,691 head. In the corresponding period in 1860, we received 1,953; in 1859, 2,645; in 1858, 495; in 1857, 1,208; in 1856, 612; and in 1855, 289 head.

There was a full average time-of-year supply of foreign stock on offer in our market to-day, in, for the most part, good saleable condition. Sales progressed slowly, and prices had a drooping tendency. The arrivals of beasts fresh up from our own grazing districts were seasonably good, and of full average quality. Although the attendance of buyers was somewhat numerous, the beef trade was in a very sluggish state, at prices barely equal to Monday last. However, the primest Scots and crosses realised 4s 10d per 8 lbs. From Norfolk, Suffolk, Essex, and Cambridgeshire, we received 1,400 Scots, crosses, and Shorthorns; from other parts of England, 1,000 various breeds; and from Scotland, 130 Scots and crosses. We had a full average number of sheep in the pens, and most breeds came to hand in very middling condition. The mutton trade was heavy, and prices gave way from 2d to 4d per 8 lbs. The top figure for the best Downs was 5s 10d per 8 lbs. There were about 300 shorn sheep in the market, and which sold at 1s per 8 lbs beneath those in the wool. The lamb trade has not yet fairly commenced. Calves were in short supply and fair request at full prices; the primest veal realised 5s 8d per 8 lbs.

SUPPLIES

	Feb. 20, 1860.	Feb. 18, 1861.
Beasts	3890	3600
Sheep	18510	19150
Calves	91	147
Pigs	210	340

THURSDAY, Feb. 21—Our market to-day was very moderately supplied with all breeds of beasts; nevertheless, the beef trade was in a sluggish state at Monday's currency. The show of sheep was by no means extensive, yet the mutton trade was somewhat heavy at Monday's decline in value. Calves though in short supply were dull, and 2d per 8 lbs lower in price. Pigs moved off slowly at late rates, and there was scarcely any demand for milch cows. The general quality of the stock was by no means prime.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	0	3	4	Prime Southdown sheep	5	8	5	10
Second quality ditto	3	6	4	0	Large coarse calves	4	6	5	0
Prime large oxen	4	2	4	6	Prime small ditto	5	2	5	6
Prime Scots, &c	4	8	4	10	Large hogs	4	0	4	6
Coarse and inferior sheep	3	8	4	0	Small porkers	4	8	5	0
Second quality ditto	4	2	4	6	Suckling calves.....each	19	0	23	0
Prime coarse-woolled do.	4	10	5	6	Quarter old store pigs	23	0	30	0

Total supply—Beasts, 850; sheep and lambs, 3,220; calves, 105; pigs, 250.
Foreign supply—Beasts, 180; sheep, 980; calves, 65.

HOP MARKET.

BOROUGH, Monday, Feb. 18.—Our market continues exceedingly dull, and, in the absence of business, our quotations remain nominally the same. Mid and East Kents, 80s, 140s, 200s; Weald of Kents, 60s, 120s, 180s; Sussex, 60s, 90s, 140s; Yearlings, 80s, 126s, 190s.

FRIDAY, Feb. 22.—The market continues firm, at late prices.

POTATO MARKET.

SOUTHWARK WATERSIDE, Monday, Feb. 18.—During the past week the arrivals both coastwise and by rail have been very large, and a consequent reduction in prices has taken place, with a downward tendency. The following are this day's quotations:—Yorkshire Flukes, 150s to 160s; Lincolnshire Regents, 110s to 120s; Dunbar red soil ditto, 150s to 160s; North Berwick ditto, 120s to 125s; Perth, Forfar, and Fife ditto, 95s to 105s: ditto, ditto, ditto Reds and Rocks, 90s to 95s; American Reds, 90s; French Whites, 60s to 90s; Belgian ditto, 60s to 80s; Dutch ditto, 60s to 80s per ton.

THURSDAY, Feb. 21.—The arrivals of potatoes, coastwise and by rail, have not materially diminished since our last report, and the supplies on hand being now large, trade continues exceedingly inactive with a downward tendency in prices. The present rates are—York Flukes, 120s to 160s; Scotch Regents, 100s to 120s; ditto Cups, 100s to 110s; ditto Rocks, 95s to 105s; Dunbar Rocks, 160s to 180s per ton.

HAY MARKETS.—THURSDAY,

SMITHFIELD.—Meadow hay, 2*l* 0s to 5*l* 0s; clover, 3*l* 0s to 5*l* 10s; and straw, 1*l* 10s to 1*l* 18s per load. Trade dull.

CUMBERLAND.—Meadow hay, 2*l* 0s to 5*l* 0s; clover 3*l* 0s to 5*l* 10s; and straw, 1*l* 10s to 1*l* 18s per load. A slow demand

WHITECHAPEL.—Meadow hay, 2*l* 0s to 5*l* 0s; clover, 3*l* 0s to 5*l* 15s; and straw, 1*l* 10s to 1*l* 18s per load. Supply good and trade dull.

COAL MARKET.

FRIDAY, Feb. 22.—Wall's-end Durham 18s 6d—Wylam 17s 6d—Bebside Hartley 18s—Lambert's Hartley 17s 6d. Ships at market. 2.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Feb. 22.—Our market continues very quiet, buyers not purchasing any more than what they absolutely require for immediate use. However, as there is no accumulation of stocks, prices are much better supported than they otherwise would be.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Feb. 22.—Thin attendance at to-day's market. Wheat dull of sale at Tuesday's prices. Flour slow. Indian corn a moderate sale at 36s 6d for mixed American; 39s 6d for Galatz. Beans steady. Oats and oatmeal dull.

METALS.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Feb. 22.—There still continues a very languid demand for manufactured iron, the prices of which have a drooping tendency. The business in Scotch pig iron has this week been of a limited character, the market remaining with little or no alteration. No change in the copper market. Little inquiry for lead or tin plates.

The Gazette.

The Lord Chancellor's Bill in reference to Trade Marks makes every one of the following acts to be a misdemeanour if done with intent to defraud:—1. For any person to forge a trade mark, or so imitate it as to be likely to deceive; or to apply a trade mark, genuine or not, to any chattel not being the manufacture denoted by such trade mark; or, 2, to sell or expose for sale any chattel with such a forged trade mark or imitation, or with any trade mark which shall have been applied without lawful authority or excuse (the proof thereof shall lie on the party accused); or, 3, to put upon any chattel, or upon any case, cover, wrapper, cask, bottle, reel, stopper, label, or other thing, in, on, or with which any chattel shall be intended to be sold or exposed for sale, or for any purpose of trade, any false indication, statement, or description of the quantity, measure, substance, our material of such chattel or any part thereof, or of the manner or place in or at which, or of the person by whom, such chattel was manufactured or produced, or was or is dealt in; or, 4, to sell or expose or keep for sale, or for any purpose of trade, any chattel with such false indication, &c., as above described; or, 5, to forge or imitate (so as to be likely to deceive) any name or mark used to denote any picture, &c., model, sculpture, or other work of art to be the production of any person alive or dead, or to apply any such name or mark to any picture, &c., not the production of the person denoted thereby. It is not to be necessary to prove an attempt to defraud any particular person. The punishment is to be by imprisonment for not more than two years, with or without hard labour, or by fine, or both.

We have received the following from Calcutta, under date the 8th Jan.:—Produce Market.—Little change is noticeable since our former report. Most articles of export are in no demand, with the exception of shellac and indigo, but holders refuse to give way as yet. Import Market.—A remarkable dulness prevailed throughout the last fortnight. Almost all kinds of imports remained without demand at nominal prices. Piece goods are quiet at easier prices generally, but buyers do not feel inclined to operate without some reduction. The consumption in Bengal is very limited, and very discouraging accounts are daily arriving from the upper provinces, where food is extremely dear and scarce. Yarns have been also quiet, but lately, after a small decline, prices have kept up rather steadily. The market, however, closes quiet. Metals are inquired for occasionally at low prices. We quote sheathing copper at rs 41-8 per maund. Money Market.—The demand for money continues so limited for commercial purposes that, notwithstanding the advance in Bombay, our rates remain the same, and the supply in the banks and the bazaar remains undiminished. Freights.—Rates the same as last report, but with a downward tendency.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic returns of railways in the United Kingdom for the week ending the 9th of February amounted to 480,450*l*, and for the corresponding week of last year to 447,885*l*, showing an increase of 32,565*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 206,557*l*, and for the corresponding week of 1860 to 197,838*l*, showing an increase of 8,719*l*.

EASTERN COUNTIES.—The directors of this company have declared a dividend of 4*s* 9*d* per share for the half-year ending the 31st of December, carrying forward about 5,000*l*.

SOUTH-EASTERN.—The directors of this company have resolved to recommend the proprietors at the ensuing half-yealy meeting, on the 28th inst., to order payment of a dividend of 18*s* on each 30*l* stock, being at the rate of 6*l* per cent. per annum.

RAILWAY AND MINING SHARE MARKET.

LONDON.

MONDAY, Feb. 18.—The railway market to-day was inactive, but comparatively firm, partly from the limited supply of floating stock, and partly from the traffic returns continuing generally favourable. On the other hand, there was a want of confidence, arising from the impression that the receipts will shortly be affected by the present dulness in trade, and from the knowledge that a large amount of stock is being held speculatively on borrowed money, particularly in the provinces. The chief improvement was in London and North-Western, Midland, Great Western, South-Western, Caledonian, and Sheffield. York and North Midland, North British, and Eastern Counties were flat, particularly the latter.

TUESDAY, Feb. 19.—The railway market opened this morning with increased firmness, but relapsed towards the close, and left off nearly the same as yesterday. The principal changes were a further decline of ¼ per cent. in Eastern Counties and North British, and 1½ in Sheffield, and a slight improvement in Midland, Great Western, York and North Midland, and South-Eastern. The general business was limited. In the colonial market, Canadian descriptions were flat, Buffalo and Lake Huron, Great Western, and Grand Trunk, showed a reduction. The two last were finally quoted 11½ to ¼, and 21¾ to 22¼. Foreign railways were steady, Bahia having especially improved, Lombardo-Venetian were also firmer at 1⅛ to 1 dis. In American railway securities, Illinois Central shares were higher. Mines were moderately dealt in, and in some cases exhibited a decline. Joint stock banks closed about the same as yesterday, There was no regular price for Commercial Bank shares, but a nominal quotation was at one period made of 12 to 18. In miscellaneous descriptions, a rise occurred in Electric Telegraph and Canada Land, and a fall in Red Sea Telegraph.

WEDNESDAY, Feb. 20.—The railway market was heavy to-day on sales chiefly speculative, but including a few of real stock. Compared with last evening, nearly all the principal stocks receded ¼ to 1½ per cent., Midland, Lancashire and Yorkshire, North British, Sheffield, and Eastern Counties showing the chief decline. Great Northern was exceptionally steady. The final prices were the lowest of the day. Colonial descriptions were fairly supported, and exhibited no material change. East Indian left off at 98½ to 99; Grand Trunk of Canada, 21¾ to 22¼; and Great Western, 11½ to ⅝. In the foreign market, a decline took place in Lombardo-Venetian. Joint stock banks also showed some heaviness. In miscellaneous descriptions, there was a reduction in Crystal Palace stock, and an improvement in Red Sea Telegraph shares.

THURSDAY, Feb. 21.—The railway market to-day was flat. All the leading stocks left off lower than yesterday, Midland and North-Eastern descriptions being the heaviest. In the colonial market, Indian guaranteed descriptions were less steady, East Indian especially, receding to 98 to ½. Grand Trunk stock was also lower, at 21½ to 22. Foreign railways remained without material change. The transactions in mines were on an average scale, but previous prices were barely maintained.

FRIDAY, Feb. 22.—In the railway share market to-day there were several variations. Amongst others, there was an improvement of ¼ per cent. in Great Western, and ½ per cent. in Eastern Counties stocks, and a decline of ¼ to ⅜ per cent. in Midland, Lancashire and Yorkshire, and South-Eastern. The quotations were as follows:—London and North-Western stock, 99 to ½; Great Western, 69½ to 70: Midland, 130½ to 131; Lancashire and Yorkshire, 109½ to 110, ex. div.; Caledonian, 97¼ to ¾; South-Eastern, 85½ to ¾; Eastern Counties, 48 to ½; and Great Northern, 111 to ½. Lombardo-Venetian Railway shares were steady, at 1¼ to 1¼ dis.; Great Western of Canada were rather firm. The Indian lines remained quiet.

DRURY LANE.—Mr Charles Kean's engagement will terminate during the ensuing week, and it appears to have been highly successful. Judging from the crowded state of the house, his popularity has rather increased than otherwise.

GALLERY OF ILLUSTRATION.—Mr and Mrs German Reed continue to draw large and fashionable audiences to this place of amusement.

The Economist's Railway and Mining Share List.

EDUCATION.—International.—The Royal Continental Collegiate Institute (limited to 20 young gentlemen), on Bushey heath, three miles from Harrow station and two from Watford. Principal, Dr Vellère, late of the Harrow Preparatory School. This school is highly recommended for three reasons—first, for very excellent board, liberal supply, judicious treatment, great success in education, and, above all, as preferable to going abroad with regard to acquiring the French language perfectly; secondly, for very moderate and strictly inclusive terms, within the reach of nearly every one; and, thirdly, that no case of illness has ever occurred since the school has been established in 1857, a fact which has never been heard of in any other school, not even those excepted at the seaside. From the great attention incessantly paid by the principal to his pupils' comfort, happiness, and future welfare, he trusts that he will be patronised by a discriminating public. Travelling expenses beyond 25 miles are entirely paid by him. The quarter or half-quarter is dated from the day of the arrival of the pupil. Terms from 30 guineas upwards. Address, stating age and requirements, Dr Vellère, Bushey heath, Watford.

TRADE MARK.

BROWN AND POLSON'S
PATENT CORN FLOUR.

The LANCET states,
"This is superior to anything of the kind known."

FIRST OF THE KIND Manufactured and Patented in the United Kingdom and France, as explained with Engravings in THE ILLUSTRATED LONDON NEWS, of May 26th, 1860. Prepared without fermentation, it is warranted to keep sweet for years. It is respectfully suggested that the Trade Mark, and name in full should be observed on each Package, as similar articles are sometimes substituted or recommended as "the same" or "as good as Brown and Polson's." BROWN and POLSON, Manufacturers and Purveyors to Her Majesty: Paisley, Manchester, Dublin, and London.

PRACTICAL OBSERVATIONS on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.

AND

Just published, second edition, price 1s 6d,

CASES and OBSERVATIONS illustrative of the beneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings. By SAMUEL HARE, F.R.C.S, &c.

"Mr Hare may take credit to himself for having effected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.

"Mr Hare is, we think, a sound and successful practitioner.'—MEDICAL CIRCULAR.

"We unhesitatingly commend this work as a truthful and trustworthy statement of the power of scientific surgery and medicine over some of the most grievous hindrances to human activity and industry."—MEDICAL GAZETTE.

"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.

London: John Churchill; and may be had of al booksellers

HOLLOWAY'S PILL AND OINTMENT.—Hope for Invalids.—In all cases of ill-health these well known and highly-prized remedies should be tried even after the failure of all other medicines. Holloway's Pills and Ointment will be found both safe and efficient curatives in all diseases affecting the throat, chest, liver, stomach, bowels, and kidneys. For the cure of gout, rheumatism, and dropsy, they have attained a fame unequalled in the history of medicine. The Pills strengthen the system by thoroughly purifying the blood: the Ointment extinguishes inflammation and allays pain. The virtue of these noble restoratives are strikingly exemplified in disorders of the brain and nervous system, such as apoplexy, palsy, tremours, and all kinds of fevers, fits, and epilepsy.

DR KAHN ON MARRIAGE.—A new and entirely re-written edition (the forty-fifth of this celebrated treatise), with new steel plates, woodcuts, &c., is now ready.

The object of the work is not to maintain any particular hypothesis, but to enable every one to understand for himself the structure and functions of the organs concerned in the fulfilment of the physical obligations of the married state; to acquaint him with the consequences arising from excesses; to prevent unnecessary misapprehension from unfounded fears, and to indicate, when those fears are well founded, the means of speedy relief. The work is not crowded with the technicalities of ordinary professional books, nor does it present the crudeness which characterises the so-called "popular works" on the subject.

Price One Shilling, free by post for thirteen stamps, or in a sealed envelope, twenty-two stamps, either from the publisher, J. Allen, 20 Warwick-lane; or from the author's address, 17, Harley street, Cavendish-square, London.

Just published, 71st thousand, price 1s, post free for 13 stamps. Sold by Mann, 39 Cornhill, or direct from the Author.

DR LA'MERT ON THE CURE of Nervous and Physical Debility, resulting from pernicious habits or excess. With cases and engravings from life.

CONTENTS:—The Physiology of the Generative Organs—Puberty—Manhood—True and False Morality—Marriage, in its Moral and Physical Relations—Youthful Abuse—The Secret Cause of Nervous Debility, Impotence and Sterility—Spermatorrhœa, or Chronic Impotence: its History, Causes, and Moral Consequences.

DR LA'MERT, M.D., L.S.A., &c., is the only legally qualified practitioner on the Medical Register who, for 20 years, has devoted his studies to the treatment of these disorders.

37 Bedford square, London.

DR ROBERT ROWE ON INDIGESTION.
This day is published, price 2s 6d, the fifteenth edition,

NERVOUS DISEASES, Liver and Stomach Complaints, Low Spirits, General Debility, and Diseases of Warm Climates; the Result of Thirty Years' Practice.

By G. ROBERT ROWE, M.D.

"Dr Rowe claims with justice a priority of authorship, while he yields to none in his treatment. The value of this work is enhanced by its practical nature."—LANCET.

"We have no hesitation in placing this work among the first ranks. We entertain a high opinion of its value."—MEDICAL TIMES.

"This is a clever and useful work; contains much that is worthy of attention, and should be read by all martyrs to indigestion and other ills."—TIMES.

Also by the same Author, 2nd edition, price 4s 6d, On some of the Important Diseases of Women and Children.

London: J. Churchill. and to be had of all booksellers.

DR CURTIS'S MEDICAL WORK, "MANHOOD."
An Essay on Nervous and Generative Diseases.
The 140th thousand, with numerous plates, in a sealed envelope, price 1s, or post paid, by the Author, for twelve stamps,

MANHOOD: THE CAUSE AND CURE of PREMATURE DECLINE in MAN, with Plain Directions for Perfect Restoration to Health and Vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, the result of twenty-five years' successful practice. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London. Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a parent, preceptor, or clergyman."—SUN, evening paper.

"Dr Curtis has conferred a great boon by publishing this little work, in which is described the sources of these diseases which produce decline in youth, or more frequently premature old age."—DAILY TELEGRAPH, March 27, 1858.

N.B. The Author of the above Medical Treatise may be consulted as usual, either by letter or personally, at his residence. The efficacy and harmless nature of the remedies employed by Dr Curtis, having been demonstrated by the most complete success during a practice extending over a period of 20 years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

Published by Allen, 20 Warwick lane, Paternoster row; Mann, 39 Cornhill; and free from the Author for 12 stamps.

A BOON TO NERVOUS SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Burton cresent, Tavistock square, London, W.C.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price from 7s 6d to 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

VALUABLE INFORMATION.—GRATUITOUS EDITIONS of the following LECTURES, delivered at the Royal Institute of Anatomy, Science, and Medicine, 369 Oxford street, London, by W. B. MARSTON, the Principal, are being issued, with plain directions for SELF-TREATMENT and CURE in each of them.

No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.

No II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.

No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.

No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.

Each Lecture, neatly printed and bound, will be sent GRATIS, on receipt of two stamps to prepay postage, or THE WHOLE FOUR, BOUND TOGETHER, with numerous additions, and full directions for SELF-TREATMENT and CURE, 160 pages, 8vo, post free, for Six Stamps. Address, Treasurer, Royal Institute, 369 Oxford street, London.

KINAHAN'S LL WHISKY v. COGNAC BRANDY.—This celebrated old Irish Whisky rivals the finest French Brandy. It is pure, mild, mellow, delicious, and very wholesome. Sold in bottles, 3s 8d each, at most of the respectable retail houses in London; by the appointed agents in the principal towns in England; or wholesale at 8 Great Windmill street, Haymarket.—Observe the ed seal, pink label, and cork branded "Kinahan's LL Whisky."

TRUSTEES, SOLICITORS, AND OTHERS desiring to meet with a well-secured Investment for Money, yielding a liberal Rate of Interest, the principal sum being withdrawable on short notice, may do so by communicating with THOMAS H. BAYLIS, 429 Strand, London.

AIR-CIRCULATING AND ANTI-GREASE HATS, Patented and Manufactured by MAYHEW and CO., 89 New Bond street.

These hats are waterproof, grease-proof, and ventilating; they are peculiarly soft and easy in wear, and insure a comfortable and complete fit to any formation of head, and are also light and durable.

First quality, 21s; second ditto, 17s, Cash.

ALLEN'S PATENT PORTMANTEAUS and TRAVELLING BAGS, with Square Opening; Ladies' Dress Trunks; Dressing Bags, with silver fittings; Despatch Boxes, Writing and Dressing Cases, and 500 other articles, for home or continental travelling. Illustrated Catalogues for 1860 by post for two stamps.—J. W. ALLEN, Manufacturer of Officers' Barrack Furniture and Military Outfitter (see separate catalogue), 18 and 22 Strand, London

AT HAMBLY HOUSE ACADEMY, Streatham Common, Surrey, Young Gentlemen are carefully Educated for the Public Schools, Military Colleges, Professions, or Commerce, by Mr R. S. TROUSDALE, L.C.P., aided by highly qualified assistant masters.

The domestic arrangements are on the most liberal scale; and the house is very delightfully situated. The terms for pupils under ten years of age, 30 guineas per annum; ten and under fourteen, 35 guineas per annum; fourteen, 40 guineas per annum. The above amount includes board and instruction in the Latin, Greek, French, and English Languages, Writing, Arithmetic, Merchants' Accounts, History, Geography, the Use of the Globes, Astronomy, Geometry, Algebra, and the other branches of the Mathematics. A library is devoted to the instruction and amusement of the pupils during their leisure hours. Religious works are provided for Sunday perusal; and lectures on various popular subjects are occasionally delivered. German Drawing, Dancing, and Music, on the usual terms. Washing, half-a-guinea per quarter. Drilling during the summer months, at a trifling charge; and board during a vacation, four guineas. All accounts are expected to be settled quarterly. Excellent accommodation for foreigners or gentlemen of neglected education. A quarter's notice of removal is required.

DR DE JONGH'S
(Knight of the Order of Leopold of Belgium)
LIGHT-BROWN COD LIVER OIL, Prescribed by the most Eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for

CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,
Is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.

Dr JONATHAN PEREIRA, F.R.S.—"It was fitting that the author of the best analysis and investigations into the properties of this oil should himself be the purveyor of this important medicine. I am satisfied that for medicinal purposes no finer Oil can be procured."

Dr GRANVILLE, F.R.S.—"Dr Granville has found that Dr de Jongh's Light Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."

Dr BARLOW, Physician to Guy's Hospital.—"I have been well satisfied with the effects of Dr de Jongh's Oil, and believe it to be a very pure Oil, well fitted for those cases in which the use of that substance is indicated."

Dr BANKS, King's Professor of the Practice of Medicine at the University of Dublin.—"I have in the course of my practice extensively employed Dr de Jongh's Light Brown Cod Liver Oil, and I have no hesitation in stating that I consider it the best of all the specimens of Oil which have ever come under my notice."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists.

SOLE AGENTS,
ANSAR, HARFORD, and CO., 77, STRAND, London, W.C.

CAUTION.—Beware of Proposed Substitutions.

FREEDOM FROM COUGH IN TEN MINUTES by DR LOCOCK'S PULMONIC WAFERS. From Mr James Macarthy, Medical Hall, 4 Essex bridge, Dublin:—"I can bear testimony to the efficacy of Dr Locock's Wafers, which act as a specific in affections of the lungs, viz., Influenza, Colds, Asthma, Irritations, Cough, &c. To many elderly persons who could not leave home on a damp or foggy day, they have proved a complete boon." To singers and public speakers they are invaluable for clearing and strengthening the voice. They have a pleasant taste. Price 1s 1½d, 2s 9d, and 11s per box. Sold by all druggists. Beware of imitations.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

ADULTERATIONS.—Several Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Another White Zinc has been now introduced containing impurities from the mode of manufacture which retard the drying. Whether these are sold under the name of "Improved Zinc Paint," or as the Number Two or Three qualities, no workman can produce good work with such material. Workmen who have once used the Patent Zinc Paint will never willingly use any other Paint for their best work.

To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"Among other tests to which it has been subjected, has been that of painting the hold of a sugar vessel, which after a voyage to St Kitt's and back, was found, after washing, to be as white as the first day the paint was applied."—JOHN BULL, September 14, 1850.

FORD'S EUREKA SHIRTS

are made with that rigid adherence to details in manufacturing, which alone can ensure a good and comfortable shirt. A box of six excellent shirts for 33s. Illustrated catalogues, mode of self-measurement, price list, &c., post free.

RICHARD FORD, 38 Poultry, London.

SALE OF LAMPS, CHANDELIERS AND GAS FITTINGS.

TUCKER and SON having purchased of Messrs Pearce and Son (of Ludgate hill) their entire stock of Lamps, Gas Chandeliers, &c., (on their relinquishing that branch of their business to devote exclusive attention to the China and Glass Trade) have distributed it among their three Show Rooms as under; and being goods of first-rate quality, and offered to the public at a reduction of one-third from their usual price, to insure their immediate realisation, they must command the attention of purchasers.

City Show Rooms, 36 King William street (4 doors from London Bridge); Central do., 190 Strand (opposite St Clement's church, and near Temple Bar).

TUCKER and SON—Established 43 years.

Manufactory, Essex Works, W.C.—November, 1860.

DUTY OFF MODERATOR LAMPS.

—J. Schlossmacher's celebrated Manufacture. Burner of every Lamp stamped J. S. The duty being now off, and J. S. being enabled by machinery to reduce the prices of his Lamps to the charges of other makers for their commonest qualities, the full benefit of both reductions is given to the public through his London Agents, TUCKER and SON, at their Establishments, as under:—

Central Show Rooms, 190 Strand (near Temple Bar); City Show Rooms, 36 King William street (4 doors from London Bridge). Established 43 years.

Engravings free by Post.

VOLUNTEER PIPE.—

RIFLE BORE.—The most delightful, economical, and permanent medium for the enjoyment of tobacco ever invented. This new pipe only to be had of the patentee. Sample pipe in case sent post free for 28 stamps.—EDWARD PILLINER, 53 Great Queen street, London, W.C.

66 Queen street, London, 23rd August, 1860.

MESSRS R. WOTHERSPOON and CO., 46 Dunlop street, Glasgow,

DEAR SIRS.—I have, as requested, to-day visited the Royal Laundry, with reference to the advertisement of the Nottingham firm, who state that their starch has been used for many years in the Royal Laundry, and have been assured by Mr Thompson, the superintendent, that none but yourselves have any right to state that they supply starch to Her Majesty's Laundry, as no other starch is there used, nor has been used for some years, but the Glenfield Patent Starch. I have been further assured that your starch continues to give complete satisfaction, and that though trial has been made of samples of various starches, none of these have been found nearly equal in quality to the Glenfield.—I am, dear Sirs, your obedient servant. WM. BLACK.

KEATING'S COD LIVER OIL.

Just Imported. The Pale from Newfoundland, and the Light Brown from Norway. The supplies of the present season have never been surpassed, the fish being unusually fine, and the oil nearly tasteless. Professors Taylor and Thompson, of Guy's and St Thomas's Hospitals, have analysed, and pronounced the PALE NEWFOUNDLAND OIL the best and most desirable for invalids of very delicate constitution. The Light Brown being more economical in price, is brought within he reach of all classes. NO HIGHER PRICE NEED BE PAID than the following:—Light Brown, 1s 8d per pint, or 3s per quart. Pale, 1s 6d half-pints, 2s 6d pints. 4s 6d quarts, or in five-pint bottles, 10s 6d, imperial measure, at 79 St Paul's Churchyard.

HEALTH AND HAPPINESS

for the NERVOUS and DEBILITATED.—The proprietors of the Birmingham Institute of Anatomy desire to make known an infallible means of self-cure for the nervous, debilitated, &c., and will forward the same gratuitously on receipt of a stamped directed envelope.—Address "To the Secretary, Institute of Anatomy, Birmingham."

Second Edition, price 2s 6d, post free for 30 stamps,

TOOTH-ACHE: ITS CAUSES,

and a New Painless Method of Cure (with as much certainty as water quenches thirst). Teeth cured by this Method will never ache again, and thus prevent the necessity of the painful operation of extraction. By THOMAS HOWARD, Surgeon Dentist to His Grace the Archbishop of Canterbury, 17 George street, Hanover quare, London

IMPORTANT NOTICE.

GLENFIELD PATENT STARCH

is the only STARCH used in HER MAJESTY'S LAUNDRY.

And as some unprincipal Parties are now making and offering for Sale an Imitation of the

GLENFIELD STARCH,

we hereby caution all our Customers to be careful, when purchasing, to see that the word GLENFIELD is on each Packet, to copy which is Felony.

WOTHERSPOON and CO., Glasgow and London.

DINNEFORD'S PURE FLUID

MAGNESIA has been, during twenty-five years, emphatically sanctioned by the Medical Profession, and universally accepted by the Public, as the Best Remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a Mild Aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescing Draught, in which its aperient qualities are much increased. During hot seasons and in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD and CO., 172 New Bond street, London; and sold by all respectable chemists throughout the Empire.

NO MORE PILLS OR ANY

other Physic.—For Constipation, Indigestion (Dyspepsia), Palpitation, Nervous, Bilious, and Liver Complaints, Debility, Dropsy, Epilepsy, Paralysis, Cough, Asthma, Consumption, Bronchitis, Sore Throat, Fevers.

DU BARRY'S delicious Health-restoring REVALENTA ARABICA FOOD, which, at a few pence per day, saves fifty times its cost in medicine, and cures without purging or any of the uncertainties, annoyances, and ruinous expenses incurred by medicine, cod liver oil, or visits to distant climates.

Certificate No. 36,418.—We find it the safest remedy Andrew Ure, M.D., F.R.S.; Dr Harvey; Dr Wurzer Dr Shorland; Dr Campbell.

We extract a few out of 56,000 cures:—

Cure No. 1,771.—Lord Stuart de Decies of many years' dyspepsia.——Cure No. 49,832.—"Of fifty years' indescribable agony from dyspepsia, nervousness, asthma, cough, constipation, flatulency, spasms, sickness and vomiting." Maria Joly, of Lynn, Norfolk.——Cure No. 47,121.—Miss Elizabeth Jacobs, of extreme nervousness, indigestion, gatherings, low spirits, and nervous fancies. ——Cure No. 54,816.—The Rev. James T. Campbell, Syderstone Rectory, near Fakenham, Norfolk, of indigestion and liver complaints.——Cure No. 56,814.—Mr Samuel Laxton, Leicester, of two years' diarrhœa.——Cure No. 180.—Mr W. Reeves, 181 Fleet street, London, of 25 years' nervousness, constipation, indigestion, and debility.——Cure No. 4,028. Eight years' dyspepsia, nervousness, debility, with cramps, spasms, and nausea." Rev. John W. Flavel, Ridlington Rectory, Norfolk.——Cure No. 3,906.—"Thirteen years' cough, indigestion, and general debility." James Porter, Athol street, Perth.——Cure No. 58,314.—Miss Elizabeth Yeoman, Gateacre, near Liverpool, of ten years' dyspepsia and all the horrors of nervous irritability."——Cure No. 46,270.—Mr James Roberts, timber merchant, of Frimley, Surrey, of 30 years' diseased lungs, spitting of blood, liver derangement, partial deafness.

Similar testimonials from 56,000 patients who can be referred to.

The food is sold in canisters, 1 lb, 2s 9d; 2 lbs, 4s 6d; 12 lbs, 22s; 24 lbs, 40s. Super-refined quality, 5 lbs, 22s; 10 lbs, 33s. The 10 lb, 12 lb, and 24 lb canisters carriage free, on receipt of post-office order by Barry Du Barry and Co., 77 Regent street, London; Fortnum, Mason, and Co., 182 Piccadilly; also at 60 Gracechurch street, 4 Cheapside, 330 Strand, 63 and 150 Oxford street, London; and all grocers and chemists.

FREE ISSUE.

Notice.—The following invaluable works have just been published, and are now being issued gratis to all who enclose two stamps for postage, to No. 27 Alfred place, Bedford square, London.

DR WATSON'S NEW MEDICAL

ESSAYS on Nervous and Physical Debility, with their easy Detection and Self Cure. Lately discovered and now made public by the author, with cases and diagrams, showing the connection between the brain and other organs. Also prescriptions and other appropriate remedies for the self-treatment and cure of those special diseases, and whether acquired in youth, manhood, or old age. By Dr Watson, F.R.A.S., London, Member of the Medical Society of Rouen, the National Academy of Sciences, Paris, and Fellow of the Imperial Institute of France, &c., &c. (vide Diplomas and Medical Directory).

FINE TEA CHEAPER.

STRACHAN & CO.'S

justly celebrated DRAWING ROOM TEA is now reduced to 4s per lb. Guaranteed the Finest and Cheapest Tea in the United Kingdom.

26 Cornhill, London, E.C.

DEANE'S TWO-HOLE BLACK PENS

which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped

"G. and J. Deane, London bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed

"G. and J. DEANE's Two-Hole Black Pens, 46 King William street, London bridge."

ALLSOPP'S PALE OR BITTER

ALE.—Messrs S. ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the October Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent; and at the undermentioned Branch Establishments:—

Messrs SAMUEL ALLSOPP & SONS.

LONDON	61 King William st., City.
LIVERPOOL	Cook street.
MANCHESTER	Ducie place.
BIRMINGHAM	Upper Temple street.
DERBY	London road.
WOLVERHAMPTON	Exchange street.
CHESTERFIELD	Low Pavement.
STOKE-UPON-TRENT	Wharf street.
DUDLEY	Burnt Tree.
WORCESTER	The Cross
SOUTH WALES	King street, Bristol.
DUBLIN	Crampton quay.
CORK	Cook street.
EDINBURGH	Union street lane.
GLASGOW	St Vincent street.
PARIS	279 Rue St Honoré.

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Bottles and Casks, and on Draught, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

When in bottle, the genuineness of the lable can be ascertained by its having "ALLSOPP and SONS" written across it upon red and white ground striped.

The Brewery, Burton-on-Trent, April 30, 1860.

JULLIEN FUND.

Committee Room—50 New Bond street.

The Committee of the Jullien Fund, fearing that the subscriptions have been materially checked by the unfortunate death of Mons. Jullien, desire to explain that a widow and others, members of his family, can be protected from want only by the kind aid of those who appreciate the great services rendered by the late lamented maestro to the cause of the musical education of the English people.

The Committee confidently appeal to that benevolence for which their countrymen are so distinguished, for such prompt and liberal additions to the subscription list as shall enable them to do some justice to the memory of M. Jullien, and at the same ime afford adequate relief to his bereaved family.

COMMITTEE for the DISTRIBUTION of the JULLIEN FUND.

KEATING'S COUGH LOZENGES.—

Statistics show that 50,000 persons annually fall victims to Pulmonary Disorders, including Consumption, Diseases of the Chest, and the Respiratory Organs. Prevention is at all times better than cure; be, therefore, prepared, during the wet and wintry season, with a supply of KEATING'S COUGH LOZENGES, which possess the virtue of averting, as well as of curing, a Cough or Cold; they are good alike for the young or for the aged

RESTORATION OF VOICE BY KEATING'S COUGH LOZENGES. Glasgow.

SIR,—I have great pleasure in informing you of the great good your excellent COUGH LOZENGES have done me. In December, 1845, I caught a severe cold from riding two or three miles, one very wet night, which settled in my lungs, and quite took away my voice, so that I could not speak above a whisper from that time until December last. I tried all kinds of medicines, but they were of no avail. I was then advised to try your Lozenges, which I did only to please my friends, but before I had finished a 2s 9d tin, my voice, to my great joy, came back as strong as ever.—I am, Sir, yours respectfully, JAMES MARTIN.

THOMAS KEATING, Esq.

Prepared and Sold in Boxes, 1s 1½d; and Tins, 2s 9d, 4s 6d, and 10s 6d each, by Thomas Keating, chemist, &c., 76 St Paul's churchyard, London. Retail by all Druggists, &c.

METAL FOILS AND CAPSULES.—

THE CONSERVATIVE LAND

SOCIETY.—FREEHOLD LAND, HOUSES, and GROUND RENTS.—The first allotment for the present year is fixed to take place on Thursday, Feb. 28, at the offices of the Conservative Land Society, between 12 and 1 o'clock. On this occasion will be offered the second portion of the Woodbury Park Estate, Tunbridge Wells, presenting the most picturesque sites; Building Plots on the North Bow Estate, Old Ford; Building Plots at Boundsgreen, Woodgreen; and also Building Land adjoining the village of Tottenham. All the situations of the before-mentioned Estates are first-rate, in the immediate vicinity of railroad stations, with good roads, well drained, and supply of water and gas. The Ground Rents are on the St Margaret's and Battersea Estates and the Freehold Houses are at Enfield and Camberwell. Plans and full particulars may be had at the offices, No. 33 Norfolk street, Strand, London, W.C.; price 6d each estate, or 7d by post. Prospectuses free of charge.

CHARLES LEWIS GRUNEISEN, Secretary.

EAST INDIAN RAILWAY COMPANY.

The Directors of the East Indian Railway Company are prepared to receive applications for Debentures at par for the remainder of the sum of £1,500,000 required to complete the total amount which the Company has the power to borrow on Debentures not convertible into shares.

The payment of the principal and interest in the meantime, at the rate of 5 per cent. per annum, is guaranteed by the Secretary of State for India in Council.

The bonds will be for five years, from the 15th December, 1860, transferable by endorsement under the provisions of the 16 and 17 Victoria, cap. 59, without stamp, and the holders may renew them for a second term of five years, upon giving one year's notice to that effect. Failing such notice, the bonds will be paid off at the expiration of the first five years on presentation at the Bank of England.

Payments may be made in full or by instalments, as may be agreed upon.

Interest will accrue on the respective payments from the dates fixed for the same.

No scrip receipt or bond will be issued for a less sum than £50.—By order of the Board,

D. I. NOAD, Secretary.

East Indian Railway House, Alderman's walk, New Broad street, London, Jan. 22, 1861.

MADRAS RAILWAY COMPANY.

—Her Majesty's Secretary of State for India having authorised the Directors of this Company to raise the sum of £1,000,000 on Debentures not convertible into Stock, the Directors are now prepared to comply with applications to that extent for Debentures at par, bearing interest at 5 per cent. per annum, payable by coupon, half-yearly, at the Union Bank of London.

The payment of the principal and interest is guaranteed by the Secretary of State for India in Council. The Debentures will be for five years, from the 1st of January, 1861, transferable by endorsement without stamp, and renewable at the option of the holder for a second term of five years, at the same rate of interest, upon notice being given by him twelve months previous to the expiry of the first term. Failing such notice, the Debentures will be paid off at the expiration of the first five years.

Debentures will not be issued for any less amount than £50.

The Directors will also receive applications for the limited amount, £194,000, which remains to be allotted of the previous Debenture Loan of £1,000,000 convertible into the Stock of the Company. These Debentures are for five years, or four years, at 5 per cent. per annum, payable by coupon, half-yearly, at the Union Bank of London.

The payment of the principal and interest is guaranteed in like manner by the Secretary of State for India, and the holders of these Debentures have the option at the end of twelve months from their date, and thenceforward, upon giving notice at any time before the Debenture becomes payable, of converting it into Capital Stock of the Company, bearing 5 per cent. interest, guaranteed under the contract entered into with the East India Company.

Forms of application for either or both descriptions of Debentures may be obtained at the Offices of the Company.—By order of the Board,

JAMES WALKER, Managing Director.

ATLASES AND MAPS.

THE COMPLETE ATLAS, from the maps designed and arranged under the Superintendence of the Society for the Diffusion of Useful Knowledge, containing 225 Modern, Classical, and Celestial Maps, including recent Geographical Discoveries, with plans of the principal Cities of the World, strongly bound in half Russia, with the Maps coloured, and copious Index, price £9 10s; or two Volumes, half morocco, £10; or without the plans of Cities, 174 Maps, £7 7s.

In reviewing this Atlas and the series generally, the SATURDAY REVIEW says (February 16, 1861):—"The well-known and, in their way, excellent maps of the Society for the Diffusion of Useful Knowledge. It forms a most useful and cheap collection.....British Columbia is very well mapped in the Atlas now before us, and the United States are given with great fulness in this series." Then after noticing some defects in special maps, the SATURDAY REVIEW goes on to say:—"Still, as a comprehensive Atlas, procurable at a small cost, the present work is likely to retain its deserved popularity."

Also, from the same series,

THE FAMILY ATLAS, a selection of 80 of the maps, coloured, price £3 3s; The CYCLOPÆDIAN, or ATLAS of GENERAL MAPS, 39 maps, coloured, price £1 1s; and various selections for schools (including the Harrow Educational Atlases), prices from 7s to £1 11s 6d; separate maps at 6d each plain, 9d coloured. Detailed catalogues may be had of all Booksellers, or gratis from the Publisher.

MR MAY'S CONSTITUTIONAL HISTORY.

Just published, Vol. I., in 8vo, price 13s cloth,

THE CONSTITUTIONAL HISTORY of ENGLAND, since the Accession of George III., 1760—1860.

By THOMAS ERSKINE MAY, C.B.

In Two Volumes; Volume the First.

"The design of this work is excellent, and its execution equal to its design. Mr May's History may be regarded as a continuation of Hallam's; but with this great advantage, that as it treats of matters which come more closely within the cognisance of the present generation, so it is calculated to be more popular and more universally read.....From this admirable book there is a grand moral to be drawn, exemplifying the truth of the assertion that the life, the soul, the spirit of our constitution is publicity."—LONDON REVIEW.

London: Longman, Green, Longman, and Roberts.

ENGLISH POLITICAL SONGS AND BALLADS.

Just published, in 2 vols., post 8vo, price 18s cloth,

POLITICAL BALLADS OF THE SEVENTEENTH and EIGHTEENTH CENTURIES,

annotated by W. WALKER WILKINS.

"Mr Wilkins has done his work well; he has produced a useful and satisfactory book."—GLOBE.

"This is a book that will be of great use to the general student of English history—one who reads to know the history of the English people during the 17th and 18th centuries. It is a book that was wanted."—SPECTATOR.

CONTRACT FOR ROUND TOWELS for the ROYAL MARINES.

Department of the Comptroller for Victualling and Transport Services,
Somerset place, 23rd February, 1861.

The Commissioners for executing the Office of Lord High Admiral of the United Kingdom of Great Britain and Ireland do hereby give notice, that on Thursday, the 14th March next, at Half-past One o'clock, they will be ready to treat with such persons as may be willing to contract for supplying and delivering into Her Majesty's Victualling Stores at Deptford, all such quantities of ROUND TOWELS for the use of the ROYAL MARINES as may be from time to time demanded, under a contract for twelve months certain, and further until the expiration of three months' warning.

A pattern towel may be seen at the Royal Marine office, New street, Spring Gardens, between the hours of 11 and 2 o'clock.

No tender will be received unless made on the printed form provided for the purpose, and which may be obtained on application at the said office.

Particular attention is called to the recent modification of the conditions of the contracts, which may be seen at the said office.

No tender will be received after half-past one o'clock on the day of treaty; and it will not be required that the party tendering, or an agent on his behalf, should attend at the office on the day of contract, as the result of the offer received from each person will be communicated to him and his proposed sureties in writing.

Every tender must be addressed to the Secretary of the Admiralty, and bear in the left-hand corner the words "Tender for Round Towels," and must also be delivered at Somerset place, and signed by two responsible persons, engaging to become with the person tendering, in the sum of £100, for the due performance of the contract.

THE AGRA AND UNITED SERVICE BANK, LIMITED.

HEAD OFFICE, 52 Threadneedle street.

Agencies and Branches at Bombay, Calcutta, Madras, Colombo, Singapore, Penang, Hong Kong, Shanghai, and Mauritius.

The Bank, at its Head office in London, grants Drafts on its various Agencies and Branches; issues Letters of Credit; purchases approved Bills on India, China, Ceylon, and Mauritius; undertakes the purchase and sale of Indian Government and other Securities, and the collection of Private and Mercantile Bills, at the ports and places at which its Agencies are established; receives Deposits at Interest for Fixed Periods, the terms of which may be ascertained on application; and transacts generally all Indian Banking business, including the receipt of Pay, Pensions, and Dividends on Stock of all kinds.

Office hours, 10 to 3; Saturdays, 10 to 2.

ORIENTAL BANK CORPORATION.

Incorporated by Royal Charter, 30th Aug., 1851.

Paid-up capital, £1,260,000; reserved fund, £252,000.

The Corporation grant Drafts, and negotiate or collect Bills payable at Bombay, Calcutta, Madras, Ceylon, Hongkong, Singapore, Mauritius, Melbourne, Sydney, Auckland, and Wellington, on terms which may be ascertained at their office. They also issue Circular Notes and Letters of Credit for the use of Travellers by the Overland Route. They undertake the agency of parties connected with India, the purchase and sale of Indian Securities, the safe custody of Indian Government Paper, the receipt of Interest, Dividends, Pay, Pensions, &c., and the effecting of remittances between the above-named dependencies.

They also receive deposits of £100 and upwards, repayable on a notice of 10 days, and allow interest thereon at 1 per cent. below the Bank of England minimum rate of discount, not falling below 2 per cent. nor rising above 5 per cent. Deposits subject to longer notices of repayment bear higher rates which may be ascertained at their office.

Office hours 10 to 3. Saturdays, 10 to 2.

Threadneedle street, London, March 23, 1860.

UNION BANK OF AUSTRALIA.

London Office, 38 Old Broad street.

The Directors of this Bank grant LETTERS of CREDIT and DRAFTS on its Branches as under, viz.:—

NEW SOUTH WALES.
Sydney | Orange
Bathurst | Goulbourn

QUEENSLAND.
Brisbane.

VICTORIA.
Melbourne | Ballarat | Portland
Geelong | Castlemaine

SOUTH AUSTRALIA.
Adelaide | Port Adelaide

TASMANIA.
Hobart Town | Launceston

NEW ZEALAND.
Auckland | Nelson | Lyttelton (Canterbury)
Wellington | Christchurch (Canterbury) | Dunedin (Otago)
Napier (Hawke's Bay)

They likewise negotiate approved Bills on the Colonies, and send out Bills for collection, the terms for which may be obtained on application at the offices of the Bank.

N.B. Letters of Credit and Drafts may also be procured of Messrs Glyn and Co., 67 Lombard street.—By order of the Board, H. W. D SAUNDERS, Secretary.

BANK OF NEW SOUTH WALES (Established 1817, Incorporated by Act of the Colonial Legislature in 1850, and confirmed by Her Majesty in Council), 37 Cannon street, City. Capital £750,000. Reserve Fund £205,000.

The Board of Directors GRANT LETTERS of CREDIT, payable on demand, and BILLS of EXCHANGE, at 30 days' sight, on the undermentioned Establishments of the Corporation, at the rate of £101 for every £100 sterling paid here.

NEW SOUTH WALES.
Sydney | Albury | Rocky River
Maitland | Mudgee | Deniliquin
Newcastle | Tamworth | Adelong
Bathurst | Kiandra | Windsor

VICTORIA.
Melbourne | Ballarat | Ararat
Geelong | Sandhurst | Tarrangower
Kyneton | Beechworth | Wangaratta
Castlemaine | Chiltern | Inglewood

QUEENSLAND.
Brisbane | Ipswich | Toowoomba

And also on the Commercial Bank of Van Diemen's Land at Hobart Town and Launceston.

The Directors also negotiate approved Bills of Exchange, and send them for collection, drawn on any of the Australian colonies and New Zealand.

The Royal Bank of Scotland, Stuckey's Banking Company, the Manchester and Liverpool District Bank, the North and South Wales Bank, and the National Bank in Ireland are authorised to grant credits on this Bank at the several establishments in Australia, and will negotiate bills drawn on the Australian colonies.—By order of the London Board,

JOHN CURRIE, Secretary.

The Editor of the ECONOMIST *intends to publish a Supplement half-yearly, giving* IN A COMPACT FORM *the Balance Sheets and Directors' Reports of* ALL *the Joint Stock Banks in the United Kingdom, as far as the same are made public, with some account of the most important Meetings of Shareholders.*

THE BANK RETURN OF THIS WEEK.

THE return of the Bank of England for the present week is the best justification of the policy which the Bank has lately pursued. Money is beginning to flow hither from the Continent and to accumulate in the Bank, notwithstanding the unfavourable state of the American exchange and the generally confused aspect of American affairs. Money is following the ordinary laws of supply and demand. It is leaving the country where it is cheap, and coming to the country where it is dear.

	£
On the 20th February the coin and bullion were	11,893,256
Reserve in the Banking Department	6,850,176

At present they are—

	£
Coin and bullion	12,208,721
Reserve in Banking Department	7,165,611

It may be said that the same effect would have been produced by 7 per cent. as by 8 per cent., and that if the Bank of England had never raised the value of money to the latter rate, we should still have been in the same position that we now are. But the answer to this is very simple. We were *not* getting money: we were *not* attracting it from abroad: on the contrary, it was leaving us. The following table shows the exports and imports of gold into the country at the time in question:—

IMPORTS AND EXPORTS OF GOLD.

Week ending 1861.	Gold Imported.	Gold Exported. To America.	To France.	To India, &c.	Total.	Bank rate of discount.
	£	£	£	£	£	per cent.
Jan. 2	489,000	268,000	80,000	2,000	350,000	6
— 9	132,000	520,000	318,000	8,000	846,000	7
— 16	24,000	264,000	84,000	36,000	384,000	7
— 23	80,000	507,000	2,000	81,000	590,000	7
— 30	338,000	84,000	119,000	38,000	241,000	7
Feb. 6	44,000	22,000	76,000	28,000	126,000	7
— 13	244,000	81,000	24,000	... ...	105,000	7
— 20	84,000	56,000	16,000	28,000	100,000	8 from 14th
	1,435,000	1,802,000	719,000	221,000	2,742,000	

This table shows that, so far from 7 per cent. having proved to be an effectual rate, so far from its being sufficient to attract capital from abroad, we actually lost 1,346,000*l* after the rate was raised to 7 per cent., and were continually becoming poorer and poorer.

WHY MONEY IS DEAR.

THE returns which have been issued by the Board of Trade thoroughly explain the state of the money market. It is true that we have not even yet all the information we could desire, but we have enough to indicate the great extent to which the capital of the country has been absorbed in our foreign trade, and to convince us that the present high rate of interest is not an arbitrary exaction or a needless burden upon industry, but the legitimate consequence of great and peculiar commercial events.

It is not uncommon, as we have before had occasion to remark, to find the attention of those who comment on the periodical returns of our trade fixed too exclusively on the returns of *exports*. For many purposes this interest in the Exports is certainly natural and reasonable. As our industry must always be a subject of close interest to us, it is not without something like triumph that we scrutinise the plain figures which register its progress and its conquests. But for the purposes of the money market, the returns of our imports are just as important as those of our exports. English capital is as much absorbed in the one as in the other; the pressure upon our available resources occasioned by a sudden and considerable extension of the one, is as great as would have been occasioned by an augmentation of like nature in the other.

On the present occasion these remarks are very important. Our exports show an increase from 130,411,529*l* to 135,842,817*l*, which is not a startling change. We must look deeper if we would comprehend the real cause of the scarcity of capital which we see. As usual, however, the most satisfactory returns of our imports—viz., those which give their real value as computed by the officers of the Customs—are a month behind the returns relating to our exports: we have only the means, therefore, of thoroughly examining our import trade up to the 30th November, 1860; but this is enough to suggest some important reflections.

	£
The total real value of the enumerated or principal imports during the 11th months ending 30th Nov., 1860, was	144,887,078
Whereas in the corresponding months ending 30th Nov., 1859, it was only	122,538,694
And in the corresponding months ending 30th Nov., 1858	115,146,095

showing that in 1860 we have exceeded the imports of the year before by 22,000,000*l*, and the imports of two years before by 29,000,000*l*. When we remember that two months and a half have elapsed since the 30th November, and consider that these months have unquestionably been months of great activity in our import trade, we shall be able quite to understand why capital is scarce with us now: it would be matter of surprise if it were still plentiful.

The following are the largest items in the account:—

For the ELEVEN MONTHS ending Nov. 30 in each Year.	1858. £		1859. £		1860. £
Wheat	8,576,628	...	8,064,614	...	14,010,570
Cotton	26,340,402	...	28,762,560	...	31,567,130
Barley	1,924,856	...	1,961,761	...	3,060,801
Oats	1,866,824	...	1,667,398	...	2,494,671
Tea	4,597,787	...	4,509,645	...	5,931,346
Timber	2,228,455	...	3,264,729	...	3,940,137
Wool	7,474,584	...	8,538,910	...	9,472,810
Wine	1,799,003	...	2,320,479	...	3,882,651
Butter	1,693,016	...	1,842,114	...	3,119,812

These figures speak for themselves and need no comment. We read in them that we have had a bad harvest,—that we have imported grain largely to feed our people,—that there has been an American revolution—for no less a name is sufficient,—that the first effect of this revolution has been to make every holder of American produce anxious to ship it to Europe while the old track is still open, and before the possible, though not, as we think, the inevitable consequences of disruption should have intervened. We cannot wonder that in such a state of commerce the rate of interest is higher, for it is evident that our available resources *must* be largely absorbed.

Nor is this the whole of the instruction which these tables afford us. It is not only necessary for our trade that we should have *capital*, we must likewise have *money*, and our imports of bullion were seriously less in 1860 than in 1859. The figures are these:—

	1860. £		1859. £
Importation of bullion from United States	4,792,582	...	9,672,981
— — Australia	6,719,857		8,627,854
	11,512,439		18,300,835

and in addition to this diminution of the supply, we have had a new demand to satisfy. We have sent 1,727,220*l* of gold to America, a country which in all ordinary times takes none from us, but, on the contrary, sends us much. Not only, therefore, is the loanable capital of the country largely absorbed in our extended imports, but the supply of that *kind* of capital which is most available for foreign payments, and which must effectually and rapidly tell on the rate of interest, is for the present diminished.

PROGRESS OF AMERICAN DISUNION

THE great drama of Disruption is surely and not very slowly evolving in the United States. There are still some features in the case which foreigners cannot well understand, and which seem not perfectly clear even to Americans themselves. But two or three points are becoming plainer day by day. It now appears that Secession has not been an act hastily forced upon the seceding States by Mr Lincoln's election, or by any *bonâ fide* fears brought home to them by that event, of fresh aggressions upon their "peculiar institution"; but that it is an occurrence which has not only been long foreseen and prepared for, but resolutely determined upon. It is obvious that the South were ready to remain in the Union, so long as they could unreservedly dictate its policy and nominate to all places of power and trust, but not one hour longer;—that they had for some time perceived symptoms that this supremacy was about to be wrested from them;—and that Mr Lincoln's election merely indicated to them that it was gone, and that the expected moment for action had, therefore, arrived. From that date there has been neither hesitation nor delay; they never attempted to make terms; they never proposed any real scheme of arrangement; they never showed the slightest desire or intention of remaining in the Union; but, on the contrary, pushed forward their proceedings with a reckless and indecent haste, as if they dreaded nothing so much as a compromise which would stop the Secession movement at the outset. While the Border States have been concocting schemes of adjustment, while the Northern politicians have been bringing forward project after project for what is called "conciliation," but which in fact is nothing less than ignominious capitulation, the seceding States have not given one moment's attention to any of these countless propositions, but have rushed at once upon action, in a manner which betrays three things as clearly as the sun at noonday. *First*, a violence and intemperate haste which augur ill for the future wisdom and decency of their Government; *secondly*, a resolution that *nothing* now shall baulk them of their purpose; and *thirdly*, the absolute certainty that their plans have been laid for months if not for years, and at least the *first* steps consequent upon separation carefully determined on beforehand. They at once seized, where they could, upon the Federal fortresses and stores; they fired on Federal ships; they obstructed the entrances to their harbours; they summoned conventions to meet without an hour's delay; and—while Virginia is still offering her mediation, while Senators at Washington are still discussing terms of accommodation, while the obnoxious Lincoln is still uninstalled and powerless—they have already chosen the style and title of their new Republic, and nominated Mr Jefferson Davis President of the SOUTHERN CONFEDERATION. Nay, more, it seems highly *probable*—for without further proof we are unwilling to speak with anything like positive conviction—that at least three members of Mr Buchanan's Cabinet, in fact all his chief ministers have been for some time traitorously and fraudulently using their positions to facilitate separation, and to make the North comparatively powerless to resist it when it came. There is reason to believe—indeed, there is something amounting to official proof—that the late Secretary at War, the Secretary of the Treasury, and the Secretary of the Interior have combined with each other to manipulate the army appointments and the public chest, with the purpose of impoverishing and disarming the North, and enriching and organising the South in the immediate view of the Secession crisis. It is not easy either, as far as appearances at present go, to acquit Mr Buchanan himself of a guilty knowledge and tolerance of their proceedings—at all events to some extent.

With such promptitude, too, have the Secessionists acted, and so resolute do they seem *not* to lose a single hour, that they have framed their new constitution without a single attempt to improve it in any one of the particulars in which experience had shown it to be defective. They have, in fact, merely re-enacted the old Federal institutions and the old Federal laws. The truth is—and we do not wonder at it—their imaginations have been so fired and their cupidity so excited at the prospect of a vast Slave Empire, with uncontrolled dominion and almost illimitable territory, stretching over all the magnificent lands which lie between Virginia on the North and the Isthmus of Panama on the South, that they are actually intoxicated by the dream; and are resolved, cost what it may, to shake off the incubus of the Northern States, whose citizens they both despise and detest as pedantic and shopkeeping quill-drivers, and envy as being at once more numerous, more wealthy, and more clever than themselves. There is perhaps scarcely a Southerner now who does not fancy himself a member of the ruling class in a Republic exercising absolute sway over Central America, Cuba, the Antilles, and the whole of the Gulf of Mexico, as well as over the largest portion of the old Union itself. The Southerners are a very excitable race, and usually very ignorant of their relative power and position in the world: they see no difficulties, and make light of all dangers; they seem actually to have no scruples, and their morality on all points seems to have been strangely warped by slavery.

There are already indications, however, that in their reckless violence and haste they have somewhat overshot their mark. The Border States, whose cause is not identical, whose real interests in the strife are far from clear or simple, and who would have protected the seceders against Northern coercion, are by no means all inclined to join or encourage them, now that their policy is so obviously one of aggression. Though the Southerners have introduced into the laws of their new Confederation an absolute prohibition of the African slave trade—with a view to *bribe* the Border States, and a contingent prohibition of the internal slave trade from non-seceding States—with a view to *alarm* them,—neither Kentucky, Tennessee, Virginia, nor Maryland, has given in its adhesion to the separation:—on the contrary, they are all pronouncing more and more distinctly in favour of the maintenance of the old Union. We do not for a moment fancy that any line of action adopted by these States can now prevent the consummation of the severance, but their adherence to the North will materially affect both the terms of separation, and the relative prospects of the two Republics.

Meanwhile the intentions of the Northern politicians seem

to be undetermined, or far from unanimous. They are by no means either as clear or as resolute as their antagonists. They still talk hopefully of the maintenance of the Union. They still go on discussing proposals of compromise and adjustment. They say, with perfect truth, as Mr Lincoln has well put it in one of his recent speeches, that the crisis is "artificial"; that there no new grounds for disunion, and that, if time be given for angry passions and unreasoning panic to die away, the danger will blow over, and the South will return to its allegiance. It is difficult to know how far they believe this in their hearts. Some are for coercion, some are for conciliation, some are for a policy of "masterly "inaction." The President-elect seems to be of the number of these last. To our thinking, though of course we speak with diffidence, they are all wrong. Coercion we hold to be nearly if not wholly impossible; but whether possible or not, we are sure it would be very foolish. What would they gain by *compelling* eight millions of men to remain members of the Union against their will? How could such compulsion be permanently continued in a Republican nation? How could the Government at Washington be carried on in the face of such a virulent and hostile minority of representatives as the coerced States would send up? No—depend upon it, it is not for Americans to take a leaf out of the book of Austria. Mr Lincoln says that retaking by force the Federal fortresses and property from the States which have so lawlessly seized them, would not be coercion or invasion. This may be very true; but where would be the use of retaking them? The moment the separation is effected and acknowledged, the fortresses would necessarily be surrendered, or sold to the Southern Confederation, or to the separate States composing it. *Half* the property in them belongs to the South, if a peaceable and equitable division of territory and property is effected; and it would be simply idle to make South Carolina purchase Fort Sumter, and then return her half the purchase money, and then perform a counterbalancing operation on one of the Northern forts, and pay half the price of that to the Southern Confederation. If the Secession be consummated by agreement, of course all the strong places in the seceding States will be given up to them; if consummated by connivance and reluctant acquiescence (which it will be, if no coercion is to be used), then why be at all the pains of retaking what no one would dream of *permanently* holding as a menace and an irritating sore?

Again, why endeavour to retain the reluctant Southerners by compromise which *must* be humiliating and an admission of defeat, and yet could only for a short period postpone the evil day? Does any one in his heart believe that the fiery and ambitious citizens of the Slave States will submit to remain in the Union—the power of which, by the inevitable operation of the existing constitution, must yearly be handed over more and more completely to the increasing population of the North—unless they can do so on their own terms? or that these terms will or can be anything short of virtual and secure supremacy? If they remain in the Union, they see clearly enough, they must do so *as a minority*—and a minority which every year becomes more decided;—and how can a minority hope permanently to govern under democratic institutions? Let them go then, since they can only be retained at the price of servility and dishonour.

The policy of "inaction" might have much to say for it, if the South were really in a panic or merely in a passion, and were likely to come round if time were allowed it. But, as we have said, there is ample evidence that this is not the case. The seceding States have long since determined to be free. Moreover, the position of affairs is growing too serious in the commercial world to permit the continuance of uncertainty. Politicians might live for a while in a provisional condition and wait for the natural development of the crisis; but merchants cannot do so. Already great difficulty and uneasiness is felt, and this must increase day by day till a final settlement is effected. Property is decreasing rapidly in saleable value; cautious men are curtailing their transactions; loans can scarcely be negociated, because no one knows what positive security can be offered; and, what is still more embarrassing, debtors in the South are withholding payment from their Northern creditors (even where they are not infamous enough openly to speak of repudiation); and merchants at New York, deprived of their remittances on acconnt of the planters of Alabama, Carolina, and Mississippi, are beginning to feel anxious about their power of meeting their own engagements. A continuance of this uncertainty for three months longer, would in all likelihood bring about a more wide-spread commercial ruin than has been seen for many years. On any account, therefore, an immediate termination of the crisis has become imperatively needed;—and we confess we cannot see any termination that would be at once desirable, possible, and permanent, except *a separation by acquiescence and negotiation.* We are sure that a peaceable severance on such terms as would induce the Border States to adhere to the Northern Confederation (which sooner or later they must ultimately join), every friend of humanity ought to hail with joy.

THE DEBATE ON THE SLAVE TRADE.

With the separation between the Northern and Southern States of America, we trust that a new era may open for Africa, and we wish that the debates in the House of Commons on Monday night had more clearly recognised the opportunity that was opening to the Government in this direction, instead of going off into fruitless verbal denunciations of Spain, and vague panegyrics on the policy of improving our West Indian islands by Coolie immigration, so as to undersell the slave produce of Cuba and the United States. We have always been warm advocates of the Coolie immigration into the West Indies. We are convinced that by no other plan can the population of these fertile islands be increased up to the high-pressure point at which alone Africans can be induced to labour hard. Barbadoes is the only highly successful island among our West Indian colonies, because Barbadoes is so fully peopled that the negroes are compelled to work for their subsistence, and to work hard. We cannot lay too great stress, as Mr Buxton wisely said, on the duty of aiding the overflowing population of China and India to fill up the vacuum in our West India Colonies. We know now that this can be done without inhumanity and with the greatest advantage to both the Coolie and the English planter. And it is the part of common sense and good judgment to do it as effectually as we have already done it in the Mauritius, and as speedily as possible.

But however obvious it is that we ought to do this and to do it well,—it is quite as obvious that this alone will not prevent, scarcely even diminish the slave trade. It may take a few hackneyed arguments out of the quiver of the enemy; but it will do no more. Even now this Chinese and Coolie immigration is the ground on which we are accused of insincerity in the United States Senate by the partisans of slavery. "Great Britain," said Mr Clingman of North Carolina, in the Senate of the United States the other day, "is just now concluding a war with China, and one of its "very objects is,—if the newspapers are to be relied on,— "the right to take Coolies from China and to transport them "to the British Colonies. Remember that China had "earnestly resisted the seizure of her people by British "agents, and done all in her power to suppress this trade in "the bodies of her subjects. Of this Coolie trade I need "not speak. Everybody knows that it is vastly more "inhuman than the slave trade was in its worst days, that the "proportion of Chinamen who are destroyed in Cuba and "other countries to which they are sent, is vastly greater "than that of Africans who perish under the slave trade "and in the countries to which they are carried; but yet, "if the papers are to be relied upon, Great Britain is im- "proving on the old Coolie traffic, and instead of holding "them to labour for eight years, she is going to work "them for twenty years." We do not quote this curious amalgam of erroneous facts and unworthy imputations from any design of taking it to pieces in a country where the strenuous resistance of the British Government to the Coolie-crimp system is well known, and where it is well-known also that the Chinese authorities have themselves approved the emigration system as now carried on by the Emigration Commissioner. Mr Clingman may satisfy himself on this point, if he really wishes to do more than

raise a cry against the hypocrisy of England, by perusing the proclamation of Governor-General Laou on the subject, in the correspondence presented last year to Parliament,* of which a copy was forwarded at the time to Lord Lyons, our Ambassador at Washington, by Lord John Russell's command. We quote Mr Clingman's injurious imputations only to show that the Coolie immigration, carefully and satisfactorily as it is now conducted, is regarded in many quarters as implicating England in the crime of the slave trade. And though its direct effects will be to take away the reproach of the free-labour system—the uncultivated condition of our West India islands—it will react very gradually, if at all, on the Slave trade, while in the meantime there will be growing up a great Slave-power among the Disunited States of America, ready on the first opportunity to reopen that hateful traffic, and compete with Spain for the merit of bringing the cheapest labour from Africa to America.

There are but two effective remedies. The one is that sketched out by Mr Buxton in his able speech,—to occupy a longer line of the African coast with British forts for the protection of the natives,—so as to destroy all barracoons on the coast and prevent their re-erection. This would save us much cost in naval force,—as we have already experienced off Cape Coast Castle,—where the one fort, aided by two or three cruisers, has proved to be more effective in suppressing the Slave trade than four times the number would have been without it. In this way, on from 300 to 400 miles of coast the Slave trade has been totally suppressed where it was most active before. The remedy ought certainly to be more extensively applied. It would not increase the cost of our present arrangements for keeping down that trade. Till the Slave trade is suppressed, commerce cannot even begin to flourish. When commerce is once established, it will effectually prevent the renewal of the Slave trade.

But the other remedy to which more marked attention ought to have been drawn at the present crisis, is to obtain the concurrence of the incoming United States administration in a joint and earnest effort against the Slave trade. Confessedly we have failed hitherto, because, and only because, the American Government has shamefully shirked its duty. The only flag which covers the trade is the American. With Spain and Portugal we have treaties granting us the right of search. The French Government, though it *will* not see the offences of French merchants in this direction, would never endure to have her flag the reproach of the world. If once we could effectually stop vessels under the American flag, the trade would cease. Now there is no point on which Mr Lincoln's administration is more deeply pledged than the effectual suppression of this traffic. Lord John Russell should lose no time in seeking the co-operation of the new administration. It will be long before the Southern Confederacy has anything that she could call a navy, if the time ever comes. In the meantime, if we draw close our relations with the North, the combined opposition of England and the Northern States to the Slave trade will interpose in the way of its renewal an obstacle too formidable for the Southern Confederacy to overcome.

THE TRADE OF THE COUNTRY FOR 1860.

The annual tables of the Board of Trade showing our exports and imports for the year 1860 will be found in our usual Monthly Supplement. The total declared value of exportations was 135,842,817*l*, being an increase over 1859 of 5,431,288*l*, or rather more than 4 per cent., and over 1858 (a year of depression caused by the crisis of 1857) of 19,234,061*l*, or nearly 15 per cent. The principal augmentation has been in cotton goods and cotton yarn, the two figuring for 3,811,257*l*. Linens, silks, and woollens also appear on the favourable side. On the other hand, beer and ale, haberdashery, and iron have diminished,—in the two former articles chiefly from smaller shipments to India and Australia. An analysis of the tables shows that out of the total exports of 135,842,817*l*, the colonies take 43,672,257*l*, nearly one-third of the whole; the United States 21,613,111*l*, or about two-thirteenths; and the various South American States no less than 11,443,677*l*. If we group the various States of Germany, Italy, &c., together, we find our European customers standing in the following order of importance:—

	£
Germany	13,491,735
Holland	6,113,898
France	5,249,681
Italy	4,515,668
Turkey	4,408,649
Russia	3,267,732
Spain	2,606,802
Portugal	1,847,635
Belgium	1,611,899
Austria	993,664
Denmark (and Iceland)	729,877
Sweden	549,660
Norway	495,091
Greece	343,548
Wallachia and Moldavia	172,862
Europe	46,398,401

The exports to the colonies have been about 5 per cent. lower than in 1859, owing to the diminished demand from India, and the stagnation of trade in Australia. Our commerce with the United States has also been affected, although only in a partial degree, by the political disturbances which are still prevailing. This falling off, however, has been more than compensated by an increased demand from other parts of the world, among which Brazil, Buenos Ayres, Uruguay, Chili, and Peru figure prominently. The large imports of grain from Northern Germany have also been followed by a corresponding augmentation in the shipments of manufactured goods to those States. Our export trade with France in 1860 has increased by less than half a million on that of the previous year. The new treaty has, of course, not yet begun to act upon the exports, though it has already considerably affected the imports of wine and spirits. The exports to Turkey show an increase of 17 per cent., contrasting favourably with Russia, which has declined to a large extent. The position of the two countries is reversed this year, the quantity of manufactured goods exported to Turkey being 35 per cent. more than to the Northern Empire.

The most important remark which the export tables suggest is on the advantages of a wide distribution of our commercial relations with other nations. In the present year, our exports to India have diminished by a value of nearly three millions sterling as compared with last year, to the Australian colonies by a million and a half, to the United States by more than a million, and to Russia by 770,000*l*; and notwithstanding all these very large items on the wrong side of the account, amounting in all to a loss of more than six millions sterling, the number of small customers with whom our trade has increased is so large, that on the whole our exports are valued at more by nearly five millions and a half sterling than last year. The following table gives a remarkable picture of the wide distribution of our export trade, and of the importance of so wide a distribution to the elasticity of our commerce. We include in it in detail all countries our exports to which amount to a million sterling or upwards. Where their value falls beneath that amount, we have classed them as "other countries."

The table of the *values* of the year's imports is not yet given;—it will be given in the return for January. The quantities of the principal raw materials imported for the year are contained in the Supplement. From the tables it will be seen that a very large additional expenditure in grain has resulted from the deficient harvest,—and also that in cotton, wool, coffee and tea, wine, and provisions, English capital has been much more largely invested than in preceding years. The deficiency of our harvest will have cost us at least an extra 12,000,000*l* sterling in the year, beyond what we paid last year, in grain and flour alone. And in cotton, wool, tea and coffee, provisions, and wine, we shall have spent besides, another 10,000,000*l* sterling beyond last year.

A great deal of wine, especially of Spanish and Portuguese wine, was in bond at the end of the year waiting for the change of duty, which will, we believe, prove to have been entered for home consumption in January.

By the return of the imports and exports of bullion, it appears that our exports have exceeded our imports by about two millions and a half sterling in the year.

THE KOSSUTH NOTES.

A CASE of considerable interest, bearing on the revolution which is brewing in Hungary, was raised in the Vice-Chancellor's Court on Wednesday last.. It appears that Louis Kossuth has engaged the eminent lithographers, the Messrs Day, to lithograph an immense number of notes, mainly of a single florin each, but amounting, it is said, to 100,000,000 florins in all, in the Hungarian language (in which no Austrian paper money is ever issued), and running as follows:—"One Florin.—This monetary note will be received in every Hungarian State and public pay office as "one florin in silver,—three zwanzigers being one florin, and "its whole nominal value is guaranteed by the State in the "name of the nation.—(Signed) LOUIS KOSSUTH." The Royal Arms of Hungary are placed at the bottom of this document.

We believe that before authorising the engraving of his name, Kossuth took legal advice, and was positively assured that the engraving of such notes contravened no law of this country. The Austrian Ambassador, however, had in some way got news of his proceeding, and the Home Authorities sent, we believe, through Sir R. Mayne, the head of the metropolitan police, a warning to the engraver, that until hearing further on the matter he must regard himself as liable to a summary Government interference. The advice of the law officers of the Crown was taken, and the result was, as we understand, that the Cabinet came to the conclusion that the administrative Government at least had no power to interfere, and the notice to the lithographers was withdrawn.

The Austrian Ambassador, finding that he had no resource except in the judicial decision of an English Law Court, after asking for and receiving the authority of his Government, applied in the name of the Emperor of Austria to the Vice-Chancellor's Court to restrain the Messrs Day (the lithographers) from issuing these notes. The affidavits allege that the Emperor of Austria has, as King of Hungary, the exclusive power of authorising the issue in Hungary of notes for payment of money, intended to be circulated as money, in that country,—that he also has the exclusive power of authorising the affixing of the Royal Arms of Hungary to any document,—and that "the deponent had no doubt that "Louis Kossuth intended to use the same, among other pur-"poses, to promote revolution and disorder in Hungary." On this *ex parte* statement of the case, the Vice-Chancellor granted a temporary injunction until further orders, in the terms asked.

So the case now stands. It will be argued fully, of course, when M. Kossuth's counsel move for a dissolution of the injunction thus obtained. The case clearly does not come under any of the statutes against the issue in this country of coin or notes counterfeiting the coin or notes of foreign countries. There is nothing of the character of counterfeit notes about them. There is no effort, and no intention, to counterfeit any resemblance to Austrian notes. On the contrary, they boldly proclaim themselves to all the world of Hungary as revolutionary notes. They assume the Royal Arms of Hungary, but they bear the signature of a well-known rebel against the present Emperor of Austria,—one who is known throughout the country as the sworn opponent of the present Emperor, and as disputing his title—which is indeed extremely disputable in point of law—to be considered King of Hungary, or to assume any power belonging to the King of Hungary. It cannot, therefore, be under any statute forbidding the issue of counterfeit coin or notes of any other nation that the injunction to restrain the issue of these notes would be confirmed. On the contrary, the question may eventually turn on the defiance of the Austrian authority which the use of the Royal Arms by an Hungarian exile, and the obvious subserviency of the notes to the purposes of a revolutionary government, seem to imply. It may be said that this is, in fact, evidence of a conspiracy against the *de facto* authority of Austria in Hungary, and on that ground the Austrian Ambassador might be able to use the notes in order to convict Kossuth of a conspiracy.

But conspiracy is not a question for a Court of Chancery. It is a question on which no doubt a great deal may be said on both sides, but it is a matter for an English jury to determine. Any criminal charge of that nature must be argued in a Common Law Court and the decision of a jury obtained. And such a charge would assuredly be decided on those general grounds, not perhaps always free from political bias, but almost always broad, generous, and sensible, by which juries are habitually influenced, rather than by the more strictly technical considerations which guide the Bench. On the Austrian side, it would no doubt be alleged that the use of the Royal Arms by an unauthorised individual, and the issue of notes which could have no value at all unless the demolition of the *de facto* Government of Hungary were probable or resolved upon, are evidences of a conspiracy to undermine that Government, of which these notes are to be one of the instruments. On the other hand, it may be denied that it is a criminal offence at all by English law to conspire to upset a foreign Government. Or it may be asserted that though the preparation of such notes points to an expectation that the *de facto* Government of Hungary may no longer exist, they could not be made instrumental in destroying it, and do not demonstrate an intention on the part of M. Kossuth to exert himself for its destruction,—that they are the speculative provision of a dreamer against an exigency which may never occur. The use of the Royal Arms, it may be argued, is not at present either the exclusive privilege of the Emperor of Austria, or indeed his privilege at all. Not only has the present Emperor of Austria never yet been crowned King of Hungary, nor taken the oath to the Hungarian constitution,—but the abdication of Ferdinand the last King of Hungary has never in fact been *produced* at all, still less accepted by Hungary. In short, the arguments on both sides of the case may be multiplied to any extent,—and an English jury, with its natural and wholesome reluctance to admit even convincing evidence of conspiracy against the political authority of a foreign court,—considering that we have absolutely no power to control the tyrannical policy which multiplies such conspiracies,—would, we think, refuse to find in this act the evidence required. We can scarcely believe that there is any ground on which the Court of *Chancery*, at least, can seriously interfere at all in the case.

We have reason to approve warmly the refusal of our Administration to meddle in the matter on diplomatic grounds. We only wish it had been more speedily and decisively given. The Austrian Government has no claim

upon the sympathy of Englishmen, unless we can believe that the present constitutional concessions are voluntary on its part. To our eyes every month brings ample evidence that they are not so. The treachery shown to the officers of the Hungarian Legion, who, after the peace of Zurich, returned into Austria with not only a full amnesty, but written promises from the Austrian Government that they should not again be obliged to serve in the Austrian army, is but a sample of the general treachery of the recent Austrian policy. After receiving this promise the officers in question were, we are told, not only forced to serve, but most cruelly treated in consequence of the hostile animus they had betrayed. This could not have happened had the Emperor made it known that he intended to abide strictly and honestly by all the engagements made at Zurich. Under the present Emperor we can look for no good faith from Austria. And we should be sorry indeed to see either an English Law Court or an English jury go one step out of the path of strict legality, to avert from the head of the Austrian Emperor the natural consequence of his own evil deeds.

WHAT IS AN ACCOMMODATION BILL?

TO THE EDITOR OF THE ECONOMIST.

SIR,—The great interest which the public take at present in the subject of accommodation bills, induces me to trouble you with the results of some very careful reflections upon it.

Every bill is an accommodation bill, and as such a fraud, which, purporting to be a legitimate trade bill, is not a legitimate trade bill.

If two parties have no trade transaction between them, and one draws upon the other who accepts, although valuable consideration may have passed, this is not a trade bill, nor has it the security of a trade bill.

If two parties join in a promissory note and obtain an advance upon the note from a banker, no fraud is committed. But if, by putting it into the form of a trade bill, and presenting it to a banker as a trade bill, the same parties induce the banker to discount it in the belief that it is a trade bill when it is not, a fraud has been committed. And why? Because if the bill is really not a trade bill, *it is not as good a security to the banker as if it were really a trade bill.*

A sells goods to B upon credit. Why does A give B that credit? Because in the course of trade B, before the bill is due, will have resold the goods, and thereby receive sufficient funds to meet the acceptance.

And why does A's banker discount the bill? Not solely on the credit of either A or B or both of them, but because he relies upon the very same circumstance which induced A to give credit to B, viz., that the bill represents a trade transaction, which in the ordinary course of trade will provide B with the funds wherewith to meet the bill when due.

No valuable consideration of any other kind will give the same security to the bill as the particular circumstance that it represents an actual and legitimate trade transaction. If B on an old account is indebted to A, and A now draws for the amount, the very nature of the case, if understood by the banker, would lead him to doubt the solvency of A; and with every explanation, however satisfactory, the security of such a bill would be no more than that of an ordinary promissory note. Therefore, to pass off such a bill as a trade bill is fraud; it is by false appearances obtaining money from the banker.

The same may be said of passing off a bill in any other way for what it is not. Whatever the misrepresentation and the extent of the misrepresentation, there is fraud.

I may mention another practice which, though not so apparently fraudulent, is equally destructive of the real security, and what in its inception may have been a legitimate trade bill—a practice which, as such, ought to be discouraged by traders.

If A sells goods to B and draws upon B, and B, after having accepted the bill, immediately pledges the goods or the warrants for the goods to a third party, and thus obtains an advance upon them, the implied security of the acceptance is thereby destroyed, and consequently (though we fear it is not so regarded in some quarters) a fraud has been committed upon A and the discounters of his bill. A, in giving credit to B for the goods, and no less the banker in discounting the bill, relied upon the good faith and fair trading of B for the ultimate payment of the bill.

But is it fair and legitimate trading for a purchaser who has accepted for goods to pledge those goods to a third party while his acceptance is still running?

What is made an act of bankruptcy when a man is *in*solvent, on the ground that giving preference to one destroys the right of the other creditors, must, *pro tanto*, when a man is *not* insolvent, *injure* the security of his other creditors.

So long as the security of trade bills rests entirely upon the adherence of all parties to the sound custom of trade,—the custom of trade cannot be sound if, while it sanctions the bill system, it sanctions at the same time any practice which strikes at the root of the security of trade bills.—I am, Sir, yours obediently, A THINKER.

Agriculture.

SCOTCHMEN FARMING IN ENGLAND.

We find Scotchmen in great numbers farming in all parts of the British dominions except in England, where there are very few Scotch farmers to be met with. Yet it is a subject of constant remark amongst Scotch farmers visiting England that rents here are low as compared with Scotch rents, and that in climate and sometimes in soil the English farms have many advantages over the generality of Scotch farms. Still none of these things seem to attract the Scotch farmers to become competitors for English farms. In the comparatively few instances in which Scotch farmers have been induced to take English farms their success has not been very conspicuous. The absence of leases and the defective state of the buildings on the majority of English farms will probably account for this in a great measure. Still there are landowners who will grant leases, and would not be unwilling to improve their farm buildings or even to erect new ones for tenants of capital and enterprise, prepared to give rents adequate to the outlays required. At the Canterbury meeting of the Royal Agricultural Society in July last, we met with several Scotch farmers who had visited some Kentish farms, and were much struck with the moderate rents at which they were let and of their vast capacity for improvement; but they, one and all, exclaimed against the sad want of accommodation for stock visible on all the farms. A correspondent of the *North British Agriculturist* addresses himself to this subject, offering "some of the most prominent causes why Scotchmen are often so unsuccessful on English farms;" and he adds "that in three cases out of four they come to a very speculative and false conclusion where the land has arrived at the last extremity of poverty." He says that lettings on yearly tenancies, on undrained and unproductive farms, held by generation after generation of farmers at very low rents, have so reduced the fertility of the land that no examination of the composition or general character of the soil will afford any true measure of its actual want of productive power. He illustrates his position thus:—"A farm of say 200 acres is managed something in this style. 30 or 40 acres of it are lying in permanent grass. A quantity of rushes, heather, or whins are generally to be seen in these pastures. The remainder of the farm is tilled. A few shorthorn cows, their only enviable stock, are kept, from which they rear calves for sale; and a mare, from which they rear a coach-horse, which, mayhap, pays half the rent; from ten to twenty sheep and work horses comprises the stock of the farm. Their rotation of cropping may be termed a three-course system—fallow, wheat, oats; an acre or two of turnips is sometimes robbed off the fallow break, and the manure made during the winter is applied to the fallow at about three loads per acre. This system goes on till a tenant or two fail, their farms are put together, and a comfortable steading erected at the suggestion of some enterprising Scotch steward, and the farm advertised on a lease. Now, canny Scotchmen, I must tell you that where there is a nice desirable farm to be let in this country, there are plenty of men here that know how to make the most of it; it is only such farms that have undergone such an amount of exhaustion that the land has refused to acknowledge honest industry, that generally fall into the hands of unfortunate strangers." A farm thus reduced in fertility is not, even though drained, to be made fertile in a short time. "It so happens," says the writer, "as my experience has proved to me, that a certain quantity of manure is applied and totally lost—straw without a reasonable quantity of grain is sometimes the result; and turnips without stamina is another result. Such sterility has only arisen from a long course of want, and productive yielding soil will only be restored by a gradual process of advancement." This is true, and constitutes a great obstacle to the better cultivation of land which has long been held by a succession of bad tenants. Even if the landlord should drain and otherwise improve the farm, the risk to a yearly tenant of bringing the farm up to a really productive condition is greater than prudent farmers like to incur. Leases are essential to any considerable further advance of English farming, especially on the stronger soils.

THE LARCH.

ITS USES AND DEFECTS.

For more than a century great expense has been incurred by the proprietors of land in planting larch trees, and great and valuable results have been obtained, especially in the hill districts of Scotland. Larch plantations were the more desirable as likely to supersede in some degree the hedgerow timber which in England operates so injuriously on husbandry. If, therefore, the waste and inferior portions of an estate were planted with larch trees, the assumed necessity for perpetuating the nuisance of timber trees amongst cultivated fields with a view to provide timber for the use of the estate would no longer exist. That other timber as well as larch ought to be grown in plantations and not scattered haphazard over a farm is admitted by all judicious managers of landed property, but the comparatively rapid growth of the larch offered an inducement to extend its cultivation, while no one would dream of planting it in hedgerows. It was, therefore, with some regret we find from a tract by Mr Charles M'Intosh, called "The Larch Disease, and the present Condition of the Larch Plantations of Great Britain," that there are evidences of disease and degeneracy in larch plantations over fifty years' old of a serious character. This is a subject which it will be well to understand, for if after fifty years' growth the larch tree is not to be depended upon, it is plain plantations of larch trees alone should not be formed. They may still be usefully planted as nurses to protect slower-growing trees, and will as thinnings be very valuable, but they must not form the sole reliance of the planter.

Mr M'Intosh states that it is an admitted fact that larch plantations in this country, in the majority of situations, are in a state of decay, and various opinions as to the cause of the evil have been held—such as "degeneracy in the seed; too wet and stagnant soils and subsoils; want of sufficient moisture at the roots; soils and subsoils surcharged with oxide of iron, or other deleterious mineral matters; microscopic fungi; insects; ungenial climate; atmospheric influences; and bad management." Possibly all contribute to the evil, but most careful investigations have not been able to dispel much of the obscurity in which the causes are wrapped. The writer thinks that if the plants be raised from healthy seed, and placed in favourable circumstances, as at Dunkeld, Monzie, Craigdarrock, Kirkconnel, &c., the larch trees would arrive at their natural period of existence, said to be from about one hundred and fifty to two hundred years. This shows it not to be a long-lived tree. After enumerating some of the most extensive and notable planters of larch in England and Scotland from its introduction to this country about 1734 to the year 1800, Mr M'Intosh says:—"Above we have twelve individuals planting upwards of 28,000,000 of larch between the years 1759 and 1800, namely in the space of forty-one years; and it is not unreasonable to assume that even this great number was not a fourth of the larch planted in Britain during the same period. Out of this 28,000,000 and upwards, and at the end of one hundred years (little more than half the natural term of its existence), have we fifty trees in a living state? We know only of very few. The larch, therefore, has not hitherto shown itself a long-lived tree in this country. In the ordinary circumstances in which we find it, it decays before its natural period of maturity arrives." Except for rough buildings, the writer does not consider larch timber economical as compared with Baltic pine. "On this point architects entertain but one opinion. The extra expense of working it, and the time and labour bestowed in attempting to prepare it by seasoning, even presuming it growing on the proprietor's own estate, are admitted greatly to exceed the carriage, under all ordinary circumstances, of the best Baltic pine from the nearest seaport." For joiners' work and internal furnishings, larch is not fit from its tendency to warp. The Atholl frigate, built of larch in 1819-20, has undergone an unusual amount of repair, and the Woolwich Dockyard authorities have long considered larch unsuitable for shipbuilding, and no war vessel has been built of it since that time. Having established the fact that disease is generally found in our larch plantations, Mr M'Intosh proceeds to consider the causes and remedies under the following heads:—1. Total neglect in procuring seed from healthy and fully developed trees. 2. Planting on soils and in situations unsuited to the nature of the trees. 3. Want of sufficient drainage in water-logged land. 4. Too thick planting, neglect of thinning, and injudicious pruning. 5. Planting in ground on which a previous crop of larch, Scotch fir, or other coniferous trees has been grown. 6. Pampering young trees in rich soils in nurseries, with a view to their attaining a large size within the least possible time. 7. The attacks of game, and browsing of cattle and sheep. 8. The period at which the disease attacks them; and 9, the accidental misfortunes they are liable to, such as the attacks of insects, parasitic fungi, late spring frosts, diseases in the bark, dying away of the branches, &c. Under all and each of these heads the author has much of interest and practical value to say. Under the 8th head he says:—"Generally speaking, there are few larch plantations [in England and Scotland] under fifty years' growth that are wholly exempt from this disease, and its virulence is somewhat in proportion from that age of the trees downwards.....Many plantations, but not all, above seventy years' growth are comparatively healthy; and in those from eighty to one hundred years little or no disease is to be found, except that arising from old age.....One of the originally introduced trees known to have been planted 130 years, was blown down about five years ago at Monzie, and was found sound and perfect in every respect. Its companion is still in a very healthy and vigorous state, although both grew on the edge of a pond in front of the garden, and not many feet distant from the water." The conclusions to which the author arrives are, that in many cases degeneracy is attributable to disease in the parent stock; that larch won't thrive long on the red sandstone formation; that a bright clear atmosphere, moderate elevation, sloping rather than flat surfaces, proper ventilation, and a soil neither too dry or too wet, are the conditions requisite to successful plantations of larch. Too high or too low situations are adverse to the growth of larch.

Literature.

Egypt in its Biblical Relations and Moral Aspect. By J. Foulkes Jones, B.A. Smith, Elder, and Co., 65 Cornhill.

Freshness and novelty are not often to be found in summer rambles or autumn tours: the beaten tracks, for the most part strictly kept to by the tourist, have been already too well trodden to leave much new to be seen or said about them. The readers' chance of entertainment or profit is not so much in the countries described as in the writer who describes them; not, as in old books of travel, in the simple narration of new and strange facts, and adventures, but in the power the writer may chance to possess of looking at old things from a new point of view, of giving to ordinary adventures the life and variety of his own thoughts and impressions, or to well-known scenery the charm of graceful and eloquent description. If this is the case with regard to most countries to which the English tourist delights to resort, it is pre-eminently so with regard to Egypt. The "Tours in Egypt" or "Trips up the Nile" are not to be easily surpassed in the monotony of their outline. They are as like each other as peas in the same pea-pod. Here all travellers start from the same point, journey by the same conveyance, along the same route, to the same "bourne from whence" they *do* return to tell us of the same scenes, the same ruins, and the same people. The sole difference lies in the amount of moral reflections,—or of antiquarian knowledge—sometimes got up for the occasion with praiseworthy diligence—which the traveller gives us. The book of one (we are here, of course, only speaking of slighter works of travel, not of the learned and valuable works that now and then appear,) consists of descriptions with meditations; of another, of meditations with descriptions: proportions differ, but the receipt is the same. The individuality of the writer gives the sole variety to his production. We pretty well know what he has to tell us: how he will tell it is all we have to find out. Will he be grave or gay, lively or severe—funny amidst ruins, and sportive over the plague—high flown and full of sensibility about "the mouldering dust that years have made," or simply prosy? It is what the tourist takes with him, not what he finds, that makes his book pleasant or otherwise. Mr Foulkes Jones has carried with him good sense, intelligence, and a fair amount of reading on Egyptian lore. His book, too, has the advantage of a definite point of view, and does not lose itself in aimless descriptions of what has been described already over and over again. It is altogether one of the most readable books of its class, premising that its class is not of the amusing kind.

The aim Mr Jones has kept in view is twofold. To illustrate the early history of the Jews as far as possible from Egyptian sources, showing the probable influence of the captivity upon their character and religion, or rather religious polity,—and to gather some hints of the inner meaning and worth of the religion of the ancient Egyptians themselves from the records of their monuments, inscriptions, and paintings.

On the first head he has collected much that will be new and pleasing to the greater number of his readers; on the second, he shows a thoughtful and liberal spirit, free in general from the narrowness that will see no good in any heathen religion, and that speaks with scorn of all natural faith as the foolish imagination of a corrupt heart. Mr Jones, on the contrary, shows a ready appreciation of the germs of truth in the ancient Egyptian faith; of the light which, faint indeed, and clouded over with superstition, yet did visit "those that sat in darkness and in the valley of the shadow of death."

There are, however, two points on which Mr Jones is either not so clear of sight, or in which he has allowed himself to use the prevailing modes of thought without bestowing much thought upon the matter. These are when he asserts that on those points where the Bible touches on the domain of science "its statements are found to be in accordance with her most rigid deductions." This is surely a bold and sweeping assertion, hard to prove or

to maintain;—and in his treatment of the Egyptian and Mosaic chronologies. After a brief survey of the difficulties that lie in the way of a reconcilement of the two, he exclaims:—"Let the monuments (of Egypt) be harmonised with the lists of Manetho, and these again with those of Eratosthenes, and all with each other; and further, let all our modern authorities come to some understanding among themselves, and, having done all this, it will be time enough then to impugn the truth of Moses." And yet he himself a few pages further on is forced to admit that the Mosaic chronology is likewise at variance with itself. "We have," he says, "a different chronology for each of the channels through which the books of Moses have come down to us: these cannot all be true; some two of them at least must necessarily speak false. Some of the biblical scholars of the present day have given their verdict in favour of the Septuagint numbers; this, although a translation, being older than any Hebrew MS. now extant, and, it is supposed, more in accordance with the original text than even our present Hebrew copy. On the other hand, the Septuagint is not a pure Jewish production as Hody has shown. Its authors were Alexandrian scholars, and, doubtless, naturalised Egyptians; and, having the ancient Pharonic lists before them, it is not likely that they would commit themselves to a more limited chronology than that of the Egyptian records."

If the case be thus,—if the sources from which we derive our knowledge of what Moses wrote are thus at variance,—we do not see how it helps us in the least to be told that "Moses at first must have written a true account both nominally and numerically; and this forming a constituent part of his record, must have possessed Divine authority equally with the rest." On the next page our author asks, "Is chronology of the *matter* of Revelation;" evidently finding a true relief in the knowledge that it is not. But then, why this anxiety to throw discredit on profane chronology,—why this effort at stifling all inquiry? The inconsistency arises from an acquiescence in half views of truth,—from stopping the progress of freer thought directly it seems, however slightly, to pass beyond the bounds of strict orthodox safety.

SPEECH OF THE HON. THOMAS L. CLINGMAN, OF NORTH CAROLINA, ON THE STATE OF THE UNION, delivered in the Senate of the United States, February 4, 1861. Printed by Lemuel Towers.

THIS is one of the ablest speeches which has yet been delivered in Washington in defence of the Southern view of existing troubles in America by any temperate-minded speaker. Mr Clingman understands the advantages under which he speaks in advocating either immediate concession of the Crittenden Compromise resolutions, or a peaceable disunion,—and he uses them with great effect. He points out with great ability the necessity under which the South lay of taking immediate action on Mr Lincoln's election, if it would not see its favourite institution, which is the centre and mainspring of its industry at home and its policy abroad, gradually undermined. He admits,—even more broadly than the Republican leaders would now be willing to admit,—the inevitable antagonism between the policy of slavery and the policy of freedom. He says: Grant that slavery within the Slave States were regarded as sacred by Mr Lincoln, still if a Republican Administration were to come in without resistance and without being fettered by the most stringent obligations, it would have it in its power to shake the institution without any kind of illegal interference in the Southern States. It would first revert to its old policy of keeping slavery out of the Territories by the authority of Congress. It would then set free the slaves of the Congressional district of Columbia, which is entirely under the government of Congress. Citizens of the Northern States would then probably embark in the movement already on foot for buying up the few slaves in Missouri (containing 115,600 slaves), in Maryland (containing 85,400), and in Delaware (containing 1,800 slaves), which might be done for about the sum which England paid to ransom the slaves of the West Indies: and this would increase still further the power of the Northern States. And while all these things, strictly within the constitutional power of the Republican party, were being done, the South would find that a party was being cherished by the Republican Administration into considerable strength within its own borders,—*and this is what the South really fears from Mr Lincoln's régime*,—in favour of the anti-slavery movement. "There is perhaps not a country in Europe," says Mr Clingman, "where there would not be a revolution every ten years if it were not for the arms and power of the Government. But when a Government undertakes to foment revolution it is omnipotent; and I have no doubt that with all the patronage and all the power which a Republican President could bring to his aid, with a free post office distribution of abolition pamphlets, you would see a powerful division in portions of the South. In the meantime the forts and arsenals could all be well-occupied and strengthened, and all the public arms removed from the Southern States.....and if the South in that condition, with additional armaments in all the forts, *with some division among our people*, and threatened with negro insurrection, and deprived of all share in the public arms, were then to resist more serious aggression, we should fight under great disadvantages, and perhaps, if not subdued, have a long and bloody struggle before us."

This gives us the key to the Southern excitement about Mr Lincoln's election. The South has learnt by the practical experience of many years how powerful an American Administration is in strengthening the hands of a minority favourable to themselves living among an unfavourable majority. For years they have ruled the Northern States by dexterous manipulation of their instrument, the democratic party in the North. President after President elected by the Southern interest, though frequently a Northern man,—has strained all the strength of the Government to keep the Northern Democrats in close alliance with the Southern party, and in favour of slavery extension. And their success has been marvellous. No wonder that they are alarmed at the prospect of their opponents playing the same game. The Republicans once in power, and backed by a vast majority in the North, would be certainly able to raise up a very powerful party in the South entirely opposed to slavery-extension, and disposed to confine the slave territory within the narrowest limits. This is really what the South dreaded so excessively. They were not willing to see the tables turned,—to see the same game which they had played so long with wonderful effect played at their expense by their opponents. They know well that in Tennessee, in North Carolina, and in all the border States, there is a very large party deeply convinced of the evil of slavery, and anxious to put a definite limit to its progress. This party would receive new vitality from a firm and skilful Republican Administration, and would break the unity of the South. The only course open to them was, therefore, to secede in the first moment of irritation, before the Republican Administration came in.

After justifying the secession movement on these grounds, Mr Clingman goes on to argue that if the North cannot *conciliate* the South by conceding timely guarantees against the results of Republican Government, it is useless to hope to *conquer* it. As for a blockade, he says, the South could bear it for any length of time, and still support their population by their own resources, even if an effective blockade were possible. But an effective blockade is not possible, and an ineffective blockade would never be recognised by France or England. He then indulges in the vulgar and unworthy rhodomontade which we hear so often from Americans,—though seldom from men so able and clear-headed as Mr Clingman,—concerning the indifference with which England really regards slavery, except so far as motives of interest lead her to sow disunion among the Americans. His purpose in talking this nonsense is to prove that England will be ready and willing to acknowledge the new Confederacy as soon as her interests require her.

He concludes his speech by an able *argumentum ad hominem* addressed to the North. The North will never, he says, get better terms than the Crittenden Compromise. It would by that compromise get four-fifths of the existing territory of the Union, and in return only pledge itself not to abolish slavery in Columbia, not to interfere with the inter-State Slave Trade, and to return fugitive slaves as the Constitution requires. And as to future acquisitions of Southern territory,—the North, he says, would be able to *prevent* such future acquisitions. The majority of the North is large and yearly increasing, and no fresh territory could be annexed without the consent of Congress, which would never be given.

Mr Clingman's argument is able, and in a certain sense persuasive. Fortunately for the North, it is not likely to be tempted into this iniquitous compromise,—though if the temptation came we fear it would yield. Events have taken it, we trust, out of Mr Clingman's power to offer, out of the Republicans' power to accept, the terms suggested by the Crittenden Compromise. Mr Jefferson Davis, elated with visions of being the first founder of a great Commonwealth, possibly of a great Empire, is not likely to retrace his steps,—nor will his party wish him to do so. The die seems to be cast. The Northern States are likely to be freed from the stains of the worst political guilt more by the decree of a higher Power, than by any virtue inherent in the Republican party.

THE RECREATIONS OF A COUNTRY PARSON. Second Series. Parker, Son, and Bourn.

WE are not at all surprised at the success of these essays. They are rambling, and diffusive, and now and then a little tedious, but they present in many ways a very favourable contrast to much of the periodical writing of the day. In the first place, they are the writing of a man who has thoughts of his own and communicates them to his readers. They are not written to order. It is evident that the writer has selected subjects which have a natural interest for him; and fortunately these subjects are of a kind that interest also most cultivated persons. He has an earnest, unaffected interest in human life, in natural scenery, in literature, and this gives a force and a charm to what he says about them, even when it is not new or remarkable. Then the mind of the writer is sufficiently "strung" and sufficiently refined to prevent his candid, comprehensive, unreserved discourse from degenerating into flippancy and impertinence on the one hand, or into twaddle on the other. The dying out of the old familiar "essay" like Lamb's, or Hazlitt's, or Leigh Hunt's, is sometimes spoken of as a mere change of fashion in literature; but we believe the fact to be that

such essays would be as popular now as ever, if only the proper sort of man could be got to write them. The success of these before us, inferior as they are (and we are sure the writer would be the first to admit it) to any of those just named, goes far to prove this. There is a very large class of people who like to read about "Growing Old" or "The Worries of Life" better than Iron-Plated Vessels or the prospects of the Rebellion in China; but they must have familiar themes treated by the right sort of persons. They will not stand "cockney chatter" about them; or the inflated eloquence of boys; or the maundering of well-intentioned but weak old gentlemen. The essayist must be, at least, a man of more than average thoughtfulness, of good education, and good taste, and the deserved success of these pleasant essays shows how welcome to a considerable section of the reading public these by no means exorbitant qualifications prove, when brought to bear upon familiar subjects of perennial interest.

The most remarkable of these essays, as might be expected, is the one in which the writer has, as he admits, been assisted by the stronger and more systematic mind of the Archbishop of Dublin, viz., "Concerning Scylla and Charybdis." The distinction between "primary" and "secondary vulgar errors" is really a step towards a scientific classification of human blundering. The whole of this essay is most instructive. Here are one or two vulgar errors of each class:—

Primary—Idleness, and excessive self-indulgence;
Secondary—Penances, and self-inflicted tortures.

Primary—*Swallowing whole* all that is said or done by one's party;
Secondary—Dread of quite agreeing, or quite disagreeing on any point with any one; and trying to keep at exactly an equal distance from each.

Primary—Following the fashion with indiscriminate ardour;
Secondary—Finding a merit in singularity, as such.

Primary—Being quite captivated with thought which is striking and showy, but not sound;
Secondary—Concluding that whatever is sparkling must be unsound.

Next among these papers we rank that "Concerning the Dignity of Dulness," an extract from which will give our readers a better idea of the author's general turn of thought and manner of writing than anything further we could say on the subject:—

Once upon a time, in a certain church, I heard a sermon preached by a certain great preacher. The congregation listened with breathless attention. The sermon was indeed a very remarkable one; and I remember well how I thought that never before had I understood the magic spell which is exerted by fervid eloquence. And walking away from church, I was looking back upon the track of thought over which the preacher had borne the congregation, and thinking how skilfully and admirably he had carried his hearers, easily and interestedly, through very difficult ground, and over a very long journey. Thus musing, I encountered a very stupid clergyman who had been in church too. "Did you hear Mr M.?" said he. "It was mere flash; very flimsy; all flowers. Nothing solid." With wonder I regarded my stupid friend. I said to him: Strip off from the sermon all the fancy and all the feeling; look at the bare skeleton of thought: and then I stated it to the man. Is not *that*, said I, a marvel of metaphysical acuteness, of rigorous logic, of exact symmetry? Cut off the flash, as you call it; here is the solid residuum; is *that* slight or flashy? Is there not three times the thought of ordinary humdrum sermons even in quantity, not to name the incalculable difference in the matter of quality? On this latter point, indeed, I do not insist; for with some folk quantity is the only measure of thought; and in the world of ideas a turnip is with such equal to a pine-apple, provided they be of the same size. "Don't you see," said I, with growing wrath, to my stupid friend, who regarded me meanwhile with a stolid stare, "that it only shows what an admirable preacher Mr M. is, if he was able to carry a whole congregation in rapt attention along a line of thought in traversing which you and I would have put all our hearers asleep? You and I might possibly have the thought like the diamond as it comes from the mine, a dull pebble; and because that eminent man gave it polished and glancing, is it therefore not a diamond still?" Of course it was vain to talk. The stolid preacher kept by his one idea. The sermon could not be solid, because it was brilliant. Because there was gleam and glitter, there could not be anything besides. What more could be said? I knew that my stupid friend had on his side the majority of the race.

THE YEAR-BOOK OF FACTS IN SCIENCE AND ART: exhibiting the most Important Discoveries and Improvements of the Past Year. By JOHN TIMBS, F.S.A. London: Kent and Co., Paternoster row. 1861.

THIS is a very interesting volume of Mr Timbs's useful annual. Besides the usual array of isolated facts, he gives us a clear condensation of the discussions on Darwin's theory at the British Association last year, and of several discourses on the same subject delivered by men of science, among which the speech of Professor Asa Gray before the American Academy of Arts and Sciences will be found extremely interesting. Under the head of "Astronomical and Meteorological Phenomena," we have several accounts of the great solar eclipse of July 18, and the mention of three new planetoids between Mars and Jupiter; but we are disappointed at not finding any reference to the observations and theories (of which a concise epitome was inserted in the *Daily News* of March 1, 1860, by Mr Benjamin Scott,) relating to the new inferior planet or planets, which have been seen by several astronomers, within the orbit of Mercury. We also observe three omissions in the Obituary, viz., Mr G. P. R. James the novelist, Lady Byron, and Dr Rigby. One other remark on the Obituary will not, we hope, appear hypercritical; namely, that it would be far more useful as a table of reference if it were arranged on some definite plan. At present, the names are not given either in alphabetical or in chronological order, but follow each other in no order at all, and neither the month nor the day of death is recorded. We must not omit to mention that a memoir of Lord Brougham is prefixed to this volume, and is accompanied by an admirable portrait from a photograph by Mayall.

HAND-BOOK OF BUSINESS.etter, and Cassell, P Galpin.

THIS is another of those useful little books Cassell and Co. are in the habit of publishing. It contains a dictionary of the terms and technicalities of commerce so useful to the beginner, and likewise tables of foreign moneys, weights, and measures, so useful to every one.

We have carefully examined the contents of this book, and find the explanation of the terms used in business remarkably accurate. The tables also of foreign moneys perfectly describe what foreign moneys are, and their value in English money, which of course varies according to the exchange. There is also a table of the principal foreign weights and measures, and land measures, reduced to their equivalent with those in England. All this useful and indeed indispensable information for those in business is to be obtained for one shilling.

WAYS AND WORDS OF MEN OF LETTERS. By the Rev. JAMES PYCROFT, B.A., Trin. Coll., Oxon., Author of "Twenty Years in the Church," &c. London: L. Booth, 307 Regent streeet 1861.

THIS compilation of scraps and anecdotes relating to literary men is one of the poorest and heaviest specimens of book-making that we have lately seen. The author intimates that "should this volume be favourably received, it may probably prove to be the first of a series." But this result will, we should think, be averted by the *ennui* of those who attempt the perusal of the present work.

Foreign Correspondence.

(FROM OUR CORRESPONDENT.)

PARIS, Thursday.

Count de Germiny, Governor of the Bank of France, has obtained the assistance of several experienced lawyers in making the examination into the affairs of M. Mirès with which he has been intrusted; but though he and they work hard every day, they have not yet been able to make any public announcement as to the position in which he stands; and from the magnitude and complicated state of his operations, it is probable that they cannot do so for some days to come. The want of anything like correct information in such a case is of course annoying to the public at large, and positively injurious to the vast number of persons who have invested money in his different enterprises: but it must be borne. In the meantime the most extraordinary rumours are current and the most extravagant speculations are made as to the amount of his liabilities and assets. It would be idle to repeat either: but with regard to the former, it may be noticed that the name of a Cardinal of great notoriety is represented to be implicated in some singular transactions in connection with the Roman Railways, one of his affairs, and with regard to the liabilities, it may be said that there is reason to believe that the greater part of them will be found to arise from scandalously irregular transactions with the funds of the Roman and the Pampeluna Railways, and of the Caisse Générale des Chemins de Fer, and with securities and cash deposited in the latter. As to the great people connected with the Government or the Court who were reported to be implicated, it is probable that they will escape all responsibility by paying back, by the Emperor's order, the sums they borrowed, or otherwise received. His Majesty himself is said to have paid a very large sum for two of the most distinguished of these individuals, and he will probably help others, if they cannot of themselves raise the money required. Count de Morny's name has been so often repeated in connection with the affair, that there can be no impropriety in mentioning that, in the belief of gentlemen in a position to be well informed in this matter, it will turn

out either that he has had nothing to do with M. Mirès, or that he has conducted his transactions with so much legal skill as to keep them clear of that person's irregularities.

The Tribunal of Commerce was yesterday called on to decide a question arising out of M. Mirès's catastrophe. The Directors of the Roman Railways represented that that person had entered into an arrangement with them (on what conditions they did not state) to give them from time to time the sums they required for continuing their works, such sums to be raised by the sales of their shares or bonds; that they were now in pressing want of 2,000,000f (80,000*l*) to pay claims become due; and that they therefore prayed either that the Caisse Générale des Chemins de Fer should be made to advance them that sum, or that they should be allowed to sell bonds or shares to the amount, or obtain a loan on deposit thereof. Count de Germiny, as judicial administrator of the Caisse des Chemins de Fer, opposed the application on the ground that the bonds and shares which the Roman Railway Directors held were the property of the Caisse, and ought to be given up to it. But the Tribunal decided that the Directors might borrow the 2,000,000f they want on deposit of bonds,—subject, however, to the condition of their doing so at the risk of their Company.

The persons who subscribed in the Ottoman loan of M. Mirès took, it appears, somewhere between 110,000 and 130,000 bonds, and on them 62f have been paid. They are naturally very anxious to know in what position they are to stand. Is the Ottoman Government or M. Mirès to be considered their debtor for that sum? Are they expected to pay the new calls about to come due, under pain of forfeiting the first one? Or will the Ottoman Government endeavour to find some banker to take up the matter as it stood with Mirès, or contract for a new loan and admit them to share in it for the amount they have paid? These questions are natural enough no doubt: but assuredly they are premature. The first thing to be done is to ascertain what the position of Mirès really is: it will be time enough afterwards to ask what is to be done with his different operations.

The statement made in London that the Credit Industriel Bank has undertaken to provide, in the room of M. Mirès, for the bill drawn by the Ottoman Government and falling due in the course of some days, caused a painful impression on the Bourse here, which led to a decline in the shares of that establishment; but it protests that it has entered into no such arrangement.

The nominal capital of the Caisse Générale des Chemins de Fer is 50,000,000f in shares of 500f, all of which is paid up; but in January 1860, a resolution was come to for reducing it to 20,000,000f, the reduction to be effected, not by paying back part of the money given, but by shares in other enterprises held by the Caisse. Of the other affairs of M. Mirès, the Ports de Marseilles has a nominal capital of 15,000,000f in 500f shares, all paid up; the Roman Railways have issued 170,000 shares of 400f, and 70,000 bonds of 250f, and all are paid. In addition, there are the gas and iron-works of Marseilles, and other affairs in which large sums have been invested.

The quotation of the actions of the Caisse Générale des Chemins de Fer has improved since last week—it is to-day at 105f.

The Graissessac to Beziers Railway Company, which has always been mismanaged, has been declared bankrupt. This is the first time such a thing has happened to a railway company in this country. The Directors, however, have appealed to a superior court against the decision. The number of shares in this company is 36,000 of 500f each, and 109,500 bonds at 140f.

The Director-General of the Customs, in a circular to his subordinates, makes known that the Government has decided that English copper cylinders destined to be prepared for engraving, but having undergone only the preliminary operations, shall be admitted into France on the same terms as (under the treaty of commerce) copper of the first fusion, that is to say, free of duty.

Considerable commotion has been caused in the shipping interest by the announcement that the Government intends to present a Bill in the present session of the Legislative Body for modifying without any delay the commercial *régime* of the colonies, which, as is known, imposes on them many burdensome restrictions for the advantage of the mother country, and especially of her shipping. By the word "colonies," it must be explained the French mean the three islands of Martinique, Guadaloupe, and Reunion, the rest of their non-European possessions being subjected to special regulations. The Government Bill, it appears, proposes, in substance, to allow imports from foreign countries to be made into the colonies by foreign or French vessels on the same terms as into France, and exports to be made to any foreign countries; whilst as to productions of the colonies brought into France, it proposes that foreign vessels may as well as French be employed, subject to the condition of their paying 30f per ton from Reunion, and 20f from Martinique or Guadaloupe. Now, French shipowners have hitherto enjoyed *exclusively* the navigation to and from the colonies, and that navigation was not unimportant for them, it having employed (imports and exports united) an average of 729 vessels for the five years ending 1858, and 699 in the year 1859, and having amounted to 231,000 tons for the five years, and 211,000 tons for 1859. The loss of the "reserved trade," as it was technically called, following close on the recent changes in the tariffs and in presence of those which are threatened, fills the shipping interest with alarm, and they are making energetic efforts to prevent it. On the other hand, the friends of liberal commercial policy very naturally object that the duties proposed to be placed on foreign shipping bringing sugar and coffee from the colonies, will simply have the effect of making such things dearer in France than they will be in England. A few nights back this view was adopted, after full discussion, by a meeting of the Commercial Reform Association, and a resolution to recommend to Government not to impose those duties was passed.

The *Avenir Commercial* says that it has reason to believe that the Government will not make any alteration in the dates stipulated in the treaty with England for bringing into operation the new tariff on yarns, tissues, and certain other articles.

Commercial treaties are now the order of the day. In addition to that between France and Belgium which is on the eve of conclusion, and that with the Zollverein which is being negotiated, one between France and Switzerland is likely to be entered into, one between her and the new Italian kingdom has already been suggested, and she is to have another with Holland. Moreover, Russia, it is said, proposes a treaty with the Zollverein.

The new tariff of the United States has naturally caused great dissatisfaction here. It will, it appears, raise the import duties on French silks from 19 per cent. *ad valorem* to from 20 to 30, and on French wines from about 30 to 33½. It will thus strike two of the most important branches of French trade with America. In 1859 the value of silk fabrics and silk sent there direct exceeded 137,000,000f, and that of wines was more than 28,000,000f; besides which a great deal of the silk goods and wine which passed through the Customs for England were really destined for the States. The French, however, expect that the restrictions imposed by the Northern States will be largely counterbalanced by the liberality which the Southern will be sure to display in the event of separation being maintained.

People in Algiers, it appears, are not unmindful of the "cotton question," to which events in America give so much importance. In a communication lately addressed to the Agricultural Society of the colony, the admission was made that, owing partly to heavy rains, partly to insects, and other causes, planters had been somewhat discouraged of late years, and that the consequence was that whereas 700 hectares (the hectare is 2½ acres) were planted in 1854, only about 100 were cultivated in 1860. But, nevertheless, farmers were earnestly recommended to continue to cultivate with spirit, and to encourage them, numerous instances of persons having done so with marked advantage to themselves were related. The statement was besides made that it has been ascertained that on an average the expense of bringing a hectare into cultivation is 225f (25f are 1*l*), and that of producing a crop of 6 quintals (the quintal is nearly 2 cwts) on one is 150f; total, 375f; but the 6 quintals will sell for 630f, so that a balance of 255f will remain.

An impudent attempt to cause a fall on the Bourse was made on Tuesday. A lithographed circular was sent to all the stockbrokers and many of the principal speculators, announcing that the Bank of England had increased its rate of discount to 10 per cent. But, apart from the unusual circumstance of announcing such a fact by circular, the document was evidently a piece of imposture, and it called the Bank of England the "Bank of London." If the authors of this communication can be discovered they will be brought to justice.

Notwithstanding the apprehensions which are entertained of failures at Marseilles, owing to the very critical state of things at Constantinople, which failures if they take place will certainly have their *contre-coup* here—and notwithstanding the Mirès affair, the Bourse presents an improvement compared with last week:—

Subjoined is an account of the markets:—

FLOUR at *Paris*, yesterday, was 71f to 73f the sack of 159 kilogs—a marked rise on last week's quotations. The four marks were 71f 50c to 72f for March and April.

WHEAT at *Paris* has again risen, the quotations yesterday having been 37f to 39f 50c, and 40f the sack of 120 kilogs. As many as 119 provincial markets present a rise of from 10c to 1f 67c the hectolitre, only 12 a fall of 16c to 1f: 24 are reported firm, and 15 without variation,

COTTON.—At *Havre*, in the week ending Friday, the sales were 4,978 bales, and the arrivals 36,379. Low, very low, ordinary and

very ordinary qualities of all sorts fell from 3f to 5f: low New Orleans was consequently 92f the 50 kilogs, and very ordinary ditto 99f. This week, a fair amount of business has been done, and low New Orleans has been at 94f to 95f.

COFFEE.—At *Havre*, in the week ending Friday, a fair amount of business was done: 1,630 sacks Hayti Port-au-Prince, disposable, went at 77f 50c to 80f the 50 kilogs in bond; 620 ditto for delivery, 78f; 500 sacks Jeremie, for delivery, 77f 50c; 930 Gonaives, disposable, 81f; 670 for delivery, 80f to 80f 50c; 500 Rio not washed, disposable, 72f 50c; 110 sacks Rio washed, disposable, 82f. In addition, a considerable quantity of damaged Hayti was sold. The arrivals were large—about 36,000 sacks. Numerous sales have been made this week. Gonaives, 81f 50c; Port-au-Prince, 78f to 80c; Jeremie, 78f; Santos, 78f; Bahia, 70f; Ceylon, 107f to 112f duty paid. At *Nantes*, last week, a small lot of Reunion *feve pointue* went at 126f the 50 kilogs, and a lot of damaged Java was also sold. No sales have been made this week. At *Bordeaux*, last week, business was active: 930 sacks Mysore at 106f 50c to 112f; 160 sacks Rio not washed, 74f 50c to 75f; 185 Rio washed, 90f; 672 Malabar, 107f to 110f; some Ceylon plantation, 119f to 121f; and some Guayra, at prices not stated. The arrivals were about 2,700 sacks Rio. This week, some Guadaloupe "habitation" has been sold, but prices are not given. At *Marseilles*, last week, 2,000 sacks Hayti were taken at about 80f. The arrivals were 10,000 sacks Rio, 3,400 Hayti.

SUGAR.—The sales at *Havre*, in the week ending Friday, were 175 casks French West India disposable at 47f 50c the 50 kilogs duty paid; 2,400 bales Reunion, 51f; 1,363 sacks Mauritius, same price; 4,420 casks Havana about 34f in bond. Some damaged Havana and Reunion were also sold. The principal arrivals were 229 casks French West India, and about 1,700 bales Reunion and Mauritius. Little has been done this week: French West India at 47f to 47f 50c; Havana, 33f 25c. At *Nantes*, last week, some rather large sales were made; but, nevertheless, prices closed 75c lower for Reunion and Mauritius, and 1f for Havana. This week, a large lot of Reunion has been taken, but prices are not given. At *Bordeaux*, last week, numerous sales of Reunion were made at 48f to 52f and 57f for *gros grain*. Mauritius was at 51f to 51f 50c. Of French West India the sales were insignificant, and nothing was done in Havana. The arrivals were 7,622 bales Mauritius. This week, some Reunion has been taken at 48f; and for *gros grain*, 56f 50c. At *Marseilles*, last week, the sole sales were 400 bales Reunion at 52f; a small lot of Cayenne at 36f 50c. The arrivals were 4,659 bales Mauritius.

INDIGO.—Business was calm at *Havre*, in the week ending Friday, the sales having only been about 20 cases Bengal and 14 Kurpah, at established prices. There were no arrivals. But few sales have been made this week. At *Bordeaux*, last week, sales were active: 15 cases Bengal, 46 Kurpah, 33 Madras, 30 Carracs. The quotations for Bengal were 12f 50c to 26f the kilog, duty paid; Kurpah, 10f to 21f; Madras, 6f to 12f 50c; Carraca, 7f to 14f. Very little has been done this week, but prices are not given.

HIDES.—At *Havre*, in the week ending Friday, transactions were not important: 1,055 Buenos Ayres cow dry, 117f 50c to 122f 50c the 50 kilogs; 700 Uruguay salted, 70f; 500 Bahia dry, 100f; also 3,940 horse La Plata salted, at 90f to 92f the 100 kilogs. Several lots of different sorts of damaged were also sold. The arrivals exceeded 7,500. This week, Monte Video dry has been at 120f; Buenos Ayres, 132f 50c.

WOOL.—At *Havre*, in the week ending Friday, 43 bales Buenos Ayres unwashed went at 1f 80c to 2f 25c the kilog; 2 ditto washed, 2f 40c to 3f 40c; 5 Cape washed, 4f 5c; 12 African washed, 2f 40c; also some lots of damaged. The arrivals were about 175 bales. The stock is estimated at about 2,500 bales. This week, Buenos Ayres unwashed has been at 1f 85c to 1f 90c; Plata, 1f 45c to 1f 70c.

TALLOW.—At *Havre*, last week, there were no sales, but 10 casks arrived. Nothing has been done this week. At *Paris*, yesterday, the 100 kilogs were 131f 50c.

SPIRITS.—At *Paris*, yesterday, 3-6 of 90 degrees was 100f the hectolitre; Montpellier, 130f. At *Bordeaux*, the day before yesterday, 3-6 Languedoc was 127f 50c; beetroot, 104f.

COMMERCIAL AND MISCELLANEOUS NEWS.

The following commercial report is dated Calcutta, January 21:—Imports.—The inactivity of the market during the past fortnight has been general, and there are signs of a decided downward tendency. There are no indications yet of a revival of the demand for the Eastern markets and Lower Bengal generally, for which the purchases at this season are frequently considerable, and the accounts from up-country are of a nature to preclude all hope of an early reaction in that quarter. It is discouraging to notice with reduced stocks of some goods and the falling off in supplies, that in the face of these favourable circumstances there is total absence of all speculative demand. The dealers literally limit their purchases to their most urgent requirements, and have in many instances obtained concessions in price from the sellers. Exports.—Business generally has been slack and restricted, and, to the disappointment of all, prices of all produce are well maintained and out of all proportion to the rates at home. In sugars we remain as we were; the shipments for Europe are trifling, and, as far as we are aware, no contracts for forward delivery have been concluded for yellows. Linseed—Buyers continue their small purchases with great caution; the firmness of freights and the reduced stocks prevent any important shipments; and we do not anticipate any change before the arrival of the new Hanskali in five or seven weeks. Saltpetre—The neglect, inactivity, and downward tendency of the article remarked in our last report was suddenly relieved a few days ago by purchases to the extent of 500 to 600 tons of Calcutta refined for forward delivery at previous rates, part for shipment, but the larger portion on speculation; these operations have lightened the pressure on the refiners, and for the present they certainly prevent any further decline. Silk—Native filatures are going off freely at steady rates. Rice is being shipped in considerable quantities for England and France, but we have no change in prices, which remain steady and firm.

The demand continues light, and we note a further reduction in prices of ⅛ to ¼ of a cent per lb on middling and the better grades. Holders manifest but little disposition to press sales, however, and the market must be considered steady. The sales for the three days foot up 4,500 bales.

NEW YORK, Feb. 16.—The demand has been exceedingly light during the three days, but as holders have not manifested any anxiety to sell, previous prices are supported. The sales comprise 3,000 bales, the market closing steady. We quote—

The market has been much depressed this week, and prices have shown much irregularity. The buyer has had a decided advantage, purchases having been made ⅛d to ¼d per lb below last week's quotations, and in some cases even lower. Egyptians have maintained their value, and the lower qualities have commanded full prices. Brazil are less saleable, but without quotable change in value. Surat are partially ⅛d per lb lower. The sales to-day are 10,000 bales. The reported export amounts to 10,930 bales, consisting of 6,390 American, 430 Brazil, and 4,110 East India.

MARKETS IN THE MANUFACTURING DISTRICTS.

During the whole of the week, trade in the manufacturing districts has been in a most inactive state, and, in many instances, forced sales of goods have been effected on lower terms. The transactions in wool have been so trifling that prices may be considered almost nominal. In iron, next to nothing has been done; nevertheless, coals have sold at comparatively high rates.

MANCHESTER, Feb. 28.—At the close of last week there was a considerable business in yarns at low rates, for Germany, China, and home manufacture, induced by the belief that the Blackburn strike was almost at an end. On Tuesday less confidence was expressed in that result, owing to subsequent conduct of the operatives, whilst to-day it is reported that those of the operatives who had recommenced work have again gone out. This fact has led to renewed depression in yarns, quotations are nominal, and business is suspended. In cloths for India and China, lower offers continue to be made, and as sellers become weaker day by day, they continue to be accepted. The market is consequently irregular and lower, and where stocks exist, as of low $\frac{7}{8}$ printers and many other sorts, it is almost impossible to make a sale at all.

COMPARATIVE STATEMENT OF THE COTTON TRADE.

BRADFORD.—From several causes the wool market is exceedingly quiet. There is a total absence of speculative demand. Spinners, though bare of stock, buy only for immediate requirements, which are small. There is no improvement in the demand for yarns, either for export or for home consumption. Speculation is almost unknown, so little inducement exists at the present unremunerative rates. Prices are somewhat irregular, but on the whole firmer than could be looked for, owing probably to the small quantity of yarns producing. There is no improvement to notice in prices. the quotations, however, rule about stationary.

LEEDS.—Our market has presented no feature of any importance. The transactions are principally in meltons and summer goods, but only a moderate business is doing in them.

ROCHDALE.—Yorkshire goods are stagnant, and prices less firm. Blue flannels accumulate in the warehouses, but no abatement can be afforded. Scourers are scarce, and maintain their value, but linseys are pressed, as the principal season has passed, and sales have been effected at from 10 to 15 per cent. reduction.

LEICESTER.—The hosiery trade in many branches remains quiet, and there has not been much doing this week in the warehouses. There is not much doing in wools, but material is without change in price.

NOTTINGHAM.—There has been a little more doing in the lace trade this week, and although business in most branches is still very dull, upon the whole matters look rather brighter than they did a fortnight ago. Buyers, however, are yet cautious in their purchases, and manufacturers exercise equal prudence in the finishing of their goods. There is a little doing in plain nets. Fancies are not quite so easy to dispose of as they were a few weeks since. The silk lace trade, although flat, is a shade improved. There are, however, still many good workmen out of employ. In many branches of the hosiery trade, as respects the home department, there is a fair amount of business doing, and business generally is assuming a more healthy tone. The export trade is dull. Yarns remain without material change in price.

BELFAST.—The supplies of flax in the markets of the county Armagh district were small, and prices were well maintained. In Cookstown, anything approaching to good milled brought very full prices. In Derry and Strabane, medium and superior qualities were eagerly bought up at an advance of 2s per cwt on previous week's prices. Yarns—In the home trade, although manufacturers buy with caution, yet the quantity of yarn going into consumption is very considerable. Transactions for England and Scotland have not been numerous. Hand-Loom Linens with Manufacturers—This branch of the trade still continues depressed. Prices generally remain without any material alteration. Linen handkerchiefs, however, are easier of purchase, and printing lawns can be had at ¼d per yard lower than on preceding week. White Linens with Bleachers—The home trade has slightly improved, and some buyers—usually large ones—have appeared in the market. The continental demand is moderate.

WOLVERHAMPTON.—Current prices of pig iron:—Staffordshire cold blast, 4*l* 5*s*; Old Windmill End Mine, Nos. 1, 2, and 3 melters, made with Lord Ward's thick coal warm air, 4*l*; Old Windmill End Mine forge pig tron, made with Lord Ward's thick coal, 3*l* 12s 6d; best native hydrate pigs, 3*l* 10s to 4*l*; first-class All Mine grey forge pigs, 3*l* 5s to 3*l* 10s; good mine pigs, with a modicum of flue cinder, 2*l* 10s to 2*l* 15s; mine pigs, deteriorated by cinder, 2*l* 7s 6d to 2*l* 12s 6d; Cleator Moor hæmatites, 3*l* 7s 6d to 3*l* 10s; Barrow hæmatites, 3*l* 7s 6d to 3*l* 10s; Workington hæmatites, 3*l* 7s 6d to 3*l* 8s 9d; Kirkless Hall hæmatites, 3*l* 5s to 3*l* 7s 6d; grey forge cinder pig iron, 2*l* 5s to 2*l* 10s; white forge cinder pigs, 2*l* 2s to 2*l* 7s 6d; ordinary melters, Nos. 1, 2, and 3, 2*l* 12s 6d to 2*l* 17s 6d; superior makes of mine melting iron, 3*l* 2s 6d to 3*l* 15s, according to make and quality. The above prices are all delivered on to the wharves at the South Staffordshire manufactories. Favourite Shropshire and Forest of Dean brands, 4*l* 5s delivered; Northern hæmatites from 3*l* 5s to 3*l* 10s, according to brand or quality.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Feb. 13.—FLOUR AND MEAL.—The unfavourable tenor of the private advices from Liverpool received since the date of our previous writing have tended to further depress the market for State and Western flour, and prices may be written 10c to 15c per bbl lower. The demand has been moderate for the local trade and for the East, while for shipment transactions have been light. The sales for the three days foot up 25,000 bbls. Canada flour is dull and drooping, and the sales have been small at reduced rates, amounting to 1,000 bbls, including 300 bbls yesterday at 5.15 dols to 6.75 dols per bbl. The market for Southern flour has also been characterised by dulness and depression, and all kinds have experienced a considerable depreciation in value. Transactions during the three days comprise 3,000 bbls, at 5.70 dols to 6.75 dols for Georgetown, 6.25 dols to 7.50 dols for Petersburg City, and 5.30 dols to 5.50 dols for Baltimore, closing dull and declining. Corn meal is dull and declining, and we have only to record sales of 100 bbls. Brandywine, yesterday, at 3.50 dols; Jersey may be quoted at 3 dols. Puncheons are quiet.

EXPORT, from 1st to 12th February.

	1861 barrels	1860 barrels
Wheat Flour.....	79,126	20,815

GRAIN.—The market for wheat has been dull and irregular, and prices, though without material alteration, have favoured the purchaser. The demand has been fair for export, but the scarcity of freight room, and consequent firmness in the rates of freight, have interfered with operations considerably. The difficulty in negotiating sterling exchange has also tended to restrict sales. Transactions for the three days foot up 50,000 bushels, at 1.32 dol for red Jersey, 1.15½ dol for mixed Western, and 1.32 dol for poor white Canada; a lot of white California also sold on private terms. Corn is dull, heavy, and fully one cent per bushel lower; the sales comprise 100,000 bushels, closing at 65c to 76c for white Southern, 63c to 69c for yellow ditto, 63c to 66c for mixed ditto, 66c to 70c for round yellow, and 64c for Western mixed, in store. Rye is steady.

EXPORT from 1st to 12th February.

	1861 bushels.	1860 bushels.
Wheat	438,676	47,733
Corn	149,690	19,208

NEW YORK, Feb. 16.—The continued purchases of State and Western flour have been confined almost exclusively to the immediate wants of the local and Eastern trade. Prices are somewhat fluctuating, some grades being somewhat below, and others slightly above, our previous quotations. Canada flour has met with steady fair demaed, at previous rates. The market for Southern flour has ruled steady. There is little or no change to note in wheat since Tuesday last. The market has been somewhat heavy, and prices rather irregular. For corn, there has prevailed a steady demand, and holders have been enabled to obtain a slight improvement on the closing rates of Tuesday last.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT, pursuant to the Act 7th and 8th Victoria, cap. 32. for the week ending on Wednesday, the 27th day of February, 1861.

ISSUE DEPARTMENT.

	£		£
Notes issued	25,844,745	Government Debt	11,015,100
		Other Securities	3,459,900
		Gold Coin and Bullion	10,521,383
		Silver Bullion	848,362
	25,844,745		25,844,745

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	8,770,776
Rest	3,436,215	Other Securities	20,569,958
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	5,820,870	Notes	6,326,635
Other Deposits	12,109,781	Gold and Silver Coin	838,976
Seven Day and other Bills	586,479		
	36,506,345		36,506,345

Dated the 28th February, 1861. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	20,104,589	Securities	29,262,734
Public Deposits	5,820,670	Coin and Bullion	12,208,721
Private Deposits	12,109,781		
	38,035,240		41,471,455

The balance of Assets above Liabilities being 3,436,215*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£3,898
An INCREASE of Public Deposits of	169,263
An INCREASE of Other Deposits of	656,502
An INCREASE of Government Securities of	326,000
An INCREASE of Other Securities of	111,681
An INCREASE of Bullion of	315,465
A DECREASE of Rest of	68,721
An INCREASE of Reserve of	315,435

The above return is again favourable. Although an increase has taken place in the "other" securities, a considerable augmentation is shown in the bullion and reserve. Another principal change is the large increase in the "other" deposits.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851:—

At corresponding dates with the present week	1851.	1858.	1859.	1860.	1861.
Circulation, including bank post bills	£ 20,289,171	£ 20,945,162	£ 21,368,042	£ 21,346,850	£ 20,104,589
Public depcsits	7,794,344	5,193,108	8,315,065	7,613,442	5,820,870
Other deposits	9,521,505	14,726,081	13,955,063	13,787,883	12,109,781
Government securities	14,145,696	9,502,459	10,696,147	10,171,190	8,770,776
Other securities	13,174 857	17,306,470	16,782,980	21.164,840	20,569,958
Reserve of notes & coin	9,212,846	12,048,893	13,750,377	9,000,711	7,165,611
Coin and bullion	14,448,421	17,617,283	19,884,632	15,171,021	12,208,721
Bank rate of discount	3 p. c.	3 p. c.	2½ p. c.	4 p. c.	8 p. c.
Price of Consols	96⅜	97	95½	94¼	91¼
Average price of wheat	36s 11d	45s 0d	40s 5d	44s 5d	54s 0d
Exchange on Paris (shrt)	25 2½ 7½	25 5 12½	25 7½ 15	25 5 12½	25 37½ 42½
— Amsterdam ditto	11 15¾ 16	11 14	11 15 16	11 13½ 13¾	11 18 19
— Hamburg (3months)	13 7¼ 7½	13 5¼ 6	13 6 6¼	13 5 5¼	13 9¼ 9¾

In the corresponding week of 1851, there was a ministerial crisis, Lord John Russell's administration having resigned in consequence of a defeat by the Conservative party on a motion to relieve agricultural distress, and a subsequent vote of the House of Commons, when Ministers were beaten by a majority of nearly two to one in a thin house, on the question of giving leave to Mr Locke King to introduce his Bill for extending the 10*l* franchise to counties. Lord Stanley (the present Earl of Derby) had failed to form a Ministry, and the crisis was still unsettled at the close of the week.

In 1858, numerous political arrests were in progress throughout France, the Imperial Government persisting in the system of violent oppression which was inaugurated after Orsini's attempt upon Napoleon's life. Yet Consols were at 97, money being very cheap and trade stagnant.

In 1859, war between France and Austria was beginning to be regarded as almost inevitable, the hopes suggested by Lord Cowley's mission to Vienna having died away. Great discouragement consequently prevailed in financial circles on the Continent, and the Austrian exchange was rising with extraordinary rapidity. In preparation for the coming struggle, Sardinia had announced a new loan. The whole of the amount due on account of the Turkish loan of 1858 representing 4,380,000*l* of stock) had been liquidated. 42 per cent. remained to be paid on account of the Chilian loan of 1,554,800*l*.

In 1860, trade was suffering from the changes introduced in the Budget, the discussions upon which were at that time the main point of interest. In external events, the war between Spain and Morocco chiefly attracted attention. The Italian question was exciting much doubt and distrust.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 3,653,352*l*; in 1858, a deficiency of 2,580,389*l*; in 1859, a deficiency of 2,827,917*l*; and in 1860, a deficiency of 7,376,957*l*. In 1861, the deficiency is 8,460,177*l*.

DISCOUNT AND MONEY MARKET.—There has been a steady though not pressing demand for money this week, and the discount houses continuing to restrict their operations as much as possible, the bulk of the business has been taken to the Bank. In some quarters, however, more disposition was shown in the earlier part of the week to take first-rate paper, and on one or two days transactions took place at a fraction below the Bank minimum of 8 per cent. Notwithstanding the high rate of interest and the renewal on an increased scale of our shipments of gold to New York, there appears, however, no general want of confidence, and the supply of capital may be considered ample, although cautiously held, owing to the uncertainty respecting the future course of trade, especially with America. To-day, as is not unfrequently the case on a Friday, the demand for money has been much more active than at any other time of the week, and no business was done under 8 per cent.

On the Stock Exchange loans on Government securities were in request this afternoon, 7 per cent. being paid for a few days, while for longer periods 8 was demanded.

The following are the rates of interest on the principal Continental exchanges:—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	7	4½
Amsterdam	3	3
Berlin	3	3
Hamburg	...	2½
Frankfort	...	1⅝
Brussels	4	4

ENGLISH FUNDS.—The funds were firmer during the greater part of the week, the American advices being considered so far favourable as indicating no actual outbreak of hostilities, and at one period they had improved ⅜ per cent. The first price last Saturday for immediate delivery was 91⅜ to ½, and this morning the quotation was 91¾ buyers. The increased demand for money, however, appears to have affected the market, and a partial relapse took place, the final transactions being at 91⅝ to ¾, being still a quarter per cent. higher than last Friday. For the new account in April the last quotation was 92¼. The general business during the week has been unusually limited.

Investments have been freely made by the public in the new Indian loan scrip, and the price advanced on Tuesday to 100¼ to ½. A sudden fall then took place upon no ostensible cause to 99¾ to 100, but a rally has since followed, and the quotation is again 100¼ to ½.

There has been a further relapse in Bank stock of 3 per cent., the last quotation being 231 to 233.

The Government intend to alter their system regarding Exchequer bills, and to revert in some degree to the regulations in force some years ago. At that time they were available for revenue payments after running three months, and it is intended to restore this privilege with the proviso that, instead of three months, the limit is now to be six. Notwithstanding this announcement the price remains heavy at 7s to 2s discount, being a recovery of only 1s from the low quotation of last Friday.

FOREIGN FUNDS.—The principal fluctuations in foreign stocks have been in Mexican, which at one period was quoted as high as 24½. A relapse, however, took place this evening to 23⅝ to ¾ on the later news published by the Committee of Bondholders, by which it appears there is some apprehension of fresh disturbances in that republic. Spanish certificates have been in more demand. Peruvian bonds are also inquired for, and being scarce in the market a further improvement has taken place. Russian stocks have been

dull and heavy. The disinclination shown by investors during the last year or two for these securities affords a marked contrast to the favour with which they were regarded before the last war, and even while the contest was at its height. Turkish 6 per Cents., after some changes, closed rather firmer, the 1854 loan being last quoted 69½ to 70, and that of 1858 51½ to 52 ex div.

Considerable dissatisfaction has been expressed by the holders of Spanish Three per Cent. bonds with the new coupon sheets just issued to replace the old coupons now exhausted. It appears that they are for a shorter term of years than had been stipulated, and are otherwise not in accordance with the tenor of the original obligation. The Committee of the Stock Exchange have taken action on the subject, and have determined to address a representation to the Spanish Ambassador. A special meeting will be held by the Committee on Monday to consider the question.

RAILWAYS.—In the railway market during the week there has been increased flatness, sales having been pressed both here and in the provinces. The general feeling in this department continues adverse, although the traffic returns remain, on the whole, favourable. It is, however, apprehended that the stagnation in trade will soon affect the receipts, while the dearness of money offers considerable inducement to holders to realise. As yet, however, the public have done little either as buyers or sellers, business being mainly confined to speculative operations. Lancashire and Yorkshire and Midland have been the flattest among the heavy stocks, the reaction in these descriptions being proportionate to the rapid advance last autumn. Sheffield has also receded considerably, owing to the withdrawal of the proposition for a permanent lease of the line to the London and North-Western and Great Northern. Other stocks are also depressed.

Great Western of Canada shares have improved to 11¼ to ½ on the announcement that the Directors propose to declare a dividend for the past half-year at the rate of 3 per cent. per annum.

MISCELLANEOUS SHARES.—The decision of the Committee of the House of Commons with regard to the dividend at present due, has caused a rise in Red Sea Telegraph shares to 18 to 19.

FOREIGN EXCHANGES.—The rates generally improved on Saturday, and this afternoon were firmly maintained, although no actual change took place.

BULLION.—Annexed is the weekly circular of Messrs Pixley, Abell, and Langley, giving an account of the bullion transactions of the week, and also those in India Government Loan Notes:—

Gold.—The gold mentioned in our last circular as having arrived from Australia, viz., 350,000*l*, has all been sent into the Bank, there not having been much demand for bar gold for export, and we have now to report the arrival of the Hebe, from Melbourne, with 29,000*l*. The export of sovereigns and coin to New York has continued during the week, the Niagara having taken 75,400*l*, and the Etna 250,000*l*; the greater part of this last amount consists of Russian and French gold coin received from the Continent. The Arabia, to leave on Saturday, will also take a considerable amount. The Ellora has taken 11,000*l* to Bombay.

Silver.—The market for silver has been rather buoyant during the week. The bars per Atrato have been sold at 61d per ounce standard, and the price afterwards improved to 61⅛d per ounce standard; we quote the rate now at 61⅛d per ounce standard. The West India steamer has, however, arrived with 1,500,000 dols, and this will doubtless influence the price. The Ellora has taken 195,490*l* to Bombay, and the Delta has brought 2,715*l* from the Peninsula.

Mexican Dollars.—There are but very few dollars in the market, and we quote the price at 4s 11⅛d per ounce, nominally.

Exchange on India for bank drafts at 60 days' sight remains about the same—2s to 2s 0⅛d, Bombay and Calcutta; Madras 60 days' sight bank drafts, 1s 11⅞d to 2s 0⅛d.

India Government Loan Notes are inactive, but prices are about the same as last week, perhaps a little weaker. We quote 5½ per Cents. 100½ to 101, and 5 per Cents. 94½ to 95.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, refinable, 77s 10½d per oz std. Silver—Bar silver, 5s 1½d per oz std, last price; bar silver, containing 5 grs gold, 5s 1⅝d per oz std, last price; fine cake silver, 5s 5¾d per oz, last price; Mexican dollars, 4s 11⅛d per oz, last price; Spanish dollars (Carolus), 6s 6d per oz, last price; five-franc pieces, 4s 11⅛d per oz, last price.

A portion of the gold received from the Continent is sent into the Bank, a parcel of 8,000*l* having gone there to-day.

The steamer with the Calcutta and China mail sailing on the 4th will take 167,417*l*, of which 122,561*l* is for India, and 44,856*l* for China and the Straits. Of this sum, 160,156*l* is in silver and the remainder gold.

By the out-going West India steamer to-morrow, 7,688*l* will be sent, mostly in gold.

PUBLIC COMPANIES.—The annual meeting of the Bank of Egypt took place on Monday, W. Tite, Esq., M.P. in the chair. The report and discussion chiefly had reference to the late proceedings of the managers with regard to the loan to El Hami Pasha in Egypt. It appeared that the first transaction with the Prince was entered into during the temporary absence of Mr Pasquali, the chief manager, and one of the founders of the Bank, but was subsequently endorsed by him, and, notwithstanding the express instructions of the Board to close the affair, further sums were advanced by his sanction until the total due was 162,000*l*. Against this amount the Bank hold enough security, but for the present a large portion of the capital remains unavailable. The question having excited a good deal of interest, the report of the Directors is subjoined in full:—

The Directors submit the accounts for the half-year ending the 31st December, 1860. Those accounts would have worn a very different aspect if the Directors had taken credit for the large amount of interest which has accrued on the debt of the late Prince El Hami Pasha. They entertain no doubt that this debt and interest will be eventually paid in full; but as a part only of the amount due has as yet been recovered, all the moneys realised have been placed to the credit of capital. The transactions connected with this loan to the Prince have attracted so much public attention, and have also exercised so large an influence on the affairs of the Bank, that the Directors deem it necessary to give a brief statement of the facts of the case. El Hami Pasha was the son of the late Viceroy, Abbas Pasha; he had a very large income, but, being in want of ready money, his agents, Messrs Oppenheim and Chabert, borrowed from to time to time sums amounting in the aggregate to 162,000*l* from the managers in Egypt. This money was advanced on bills for three months, collaterally secured by assignments of very valuable property. Advances of such magnitude to one person were contrary to the direct instructions of the Court, who, in this particular case, added an express

prohibition, which was entirely disregarded by all the managers. The Prince being about to leave Egypt for Constantinople before the bills matured, the managers deemed it advisable, under the circumstances, to prevent his departure. This attempt, however, failed, on its being proved, by an investigation made (at the instance of the Viceroy) by the British Consul-General and Mr Hugh Thurburn, that the securities held by the Bank were amply sufficient to cover their claim. The bills, however, were not paid; and, owing to the consequent lock-up of the capital of the Company, and to the great confusion and scandal which followed upon the attempt to detain the Prince in Egypt, the business of the Bank was brought nearly to a standstill. The Directors, having had much cause to feel dissatisfied with the conduct of the managers even before this incident, requested the Deputy-Chairman, Mr Anstruther, to proceed at once to Egypt, to inquire into the exact position of this large debt, and the affairs of the Bank in general. This duty was undertaken by the Deputy-Chairman under circumstances of great personal inconvenience, and at the hottest season of the year. He went out armed with full powers from this Court, and was accompanied by an able English lawyer. The information obtained by the Deputy-Chairman satisfied the Court of Directors that they were fully justified in their feeling of dissatisfaction. His visit and examination of affairs led to the almost immediate resignation of Mr Pasquali, to the putting an end to the engagement with Mr Ranking, and to an entire remodelling of the establishments in Egypt. The Directors, as before stated, entertain no doubt that the debt due from the estate of El Hami Pasha will be paid in full; it has already been reduced by various payments to the extent of 70,000*l*, up to the 31st of December, and further sums are being received daily. The Deputy-Chairman inquired into other advances injudiciously made, and entirely contrary to repeated instructions. These were all fully investigated, and arrangements were made by him for placing them in a course of speedy settlement. The total amount is about 120,000*l*, and, though the Directors do not expect that these advances, mainly secured on land taken as collateral security, can be realised without some loss, they have no doubt that the deficiency will be covered without encroachment on the capital of the Bank. The Board of Management in Egypt has been entirely reorganised; and the Deputy-Chairman has obtained the valuable assistance of Mr Charles Thurburn, one of the principal merchants in Alexandria, who takes his seat at the Board in Egypt as local director, and exercises a general supervision over the affairs of the Bank. The present managers are Mr Christian and Mr Rowlatt, both Englishmen in the prime of life, and well acquainted with Egypt and its resources. From the foregoing statement the shareholders will readily understand that, the business of the Bank in Egypt having been completely paralyzed for several months, no considerable profits could be realised. Indeed, as soon as it was determined not to take credit as interest for any part of the payments recovered from the estate of El Hami Pasha, it was evident that the accounts of the half-year must necessarily exhibit a loss. The balance of profit and loss, amounting to 2,887*l*, has been written off the reserve fund. In conclusion, the Directors are happy to state that the credit of the Bank of Egypt is entirely re-established, and that the current expenses in Egypt have been reduced by one-third. The crisis has been trying, but the Directors confidently assure the shareholders that the business of the Bank has now been put upon a sound basis. It is already, though cramped for the present in regard to capital, doing a highly profitable and really banking business, and the Directors have no doubt that the Bank will henceforth occupy a highly respectable local position, and yield an ample remuneration.

It appears also that the interest at the usual rate of 12 per cent. on El Hami Pasha's debt is about 7,000*l*, making a total of nearly 170,000*l* on this account. The Viceroy is said to have shown the best disposition towards the Bank, and through his instrumentality 40,000*l* out of the 70,000*l* repaid was obtained. Since the 1st January a further sum of more than 3,000*l* has come in.

At a meeting of the Mercantile Discount Company on Monday, the resolution to wind up voluntarily was confirmed.

The report of the Universal Marine Insurance Company, issued preparatory to their meeting next Thursday, gives a complete account of the operations of the undertaking since the commencement on the 23d January, 1860, to the close of the year. The total risks underwritten in that period were 27,907,141*l*, of which 18,513,935*l* have been run off, leaving 9,393,206*l* outstanding on the 31st of December last. The premiums received have been 526,788*l*, and the claims settled and paid 209,880*l*. The preliminary expenses of 8,288*l* are written off, and out of the balance of 302,473*l*, including 5,736*l* for interest on investments, a dividend at the rate of 5 per cent. is proposed. The Company having been in existence too short a period to form a reliable estimate, no profit and loss account is presented.

The London and Provincial Marine Insurance Company have distributed a circular to their shareholders, by which it appears that the net amount of premiums received in the seven months from May to December has been 63,970*l*, while the claims settled have been 20,538*l*, leaving a balance of 43,432*l*. The meeting of this Company does not take place till June, which accounts for the apparent lateness of the issue of the report compared with the other new marine insurance undertakings.

The Victoria Dock Company held their half-yearly meeting on Tuesday, Charles Morrison, Esq., presiding. The only business was the reception of the report, which gave a satisfactory account of the business of the docks during the past year, the ships entering in 1860 being 2,682 in number, measuring 850,337 tons, against 2,522 in 1859, of 716,131 tons. The total trade of the port of London from foreign countries was 10,694 ships in 1859, measuring 2,802,463 tons, and 11,108 in 1860, of 2,957,082 tons. The other points alluded to were the adjustment with the lessees of the question respecting the warehouses in the Minories, the revenue from which will in future be included in the general accounts, and the resolution to oppose the Charing Cross Railway Bill, which contains a provision for the purchase of the Victoria Dock Company's Steelyard estate. The Directors have also called upon the lessees to proceed, in accordance with existing contracts, with the Eastern works.

At the half-yearly meeting of the General Steam Navigation Company, the usual dividend of 14s per share (being at the rate of 10 per cent. per annum) and bonus of 2s 6d were declared.

The Agra and United Service Bank have declared a dividend of 2*l* 10s per share, with a bonus of 1*l* per share, making a total distribution of 12 per cent. for the past year.

The Thames and Mersey Marine Insurance Company held their first meeting on Thursday, when the following details were given respecting the business of the undertaking since its formation up to last Saturday. The amount of risks underwritten during that period has been 12,655,000*l*, of which about 7,477,000*l* have run off, leaving 5,178,000*l* outstanding. The gross premiums to that day were 154,000*l* and the losses 61,000*l*, the balance in hand being thus 93,000*l*. The business, however, has been less profitable in the current year than in the preceding six months, the position of the Company on the 31st of December, 1860, showing:—premiums received 107,700*l*, and losses 13,300*l*, the balance then in hand being 94,400*l*. The expenses, 11,587*l*, for the six months have been necessarily large, owing to the Company having three offices respectively at London, Manchester, and Liverpool. There are also some exceptional items included for expenses and attendant on the starting of the concern. In answer to a question, it was stated that the operations at Liverpool are considered satisfactory. No dividend was proposed on the present occasion, on account of the recent formation of the Company. The business, however, was said to be steadily extending.

The meeting of the Great Ship Company also took place on Thursday. The report consisted chiefly of details of the works in progress to improve the Great Eastern, the most important being expected to be finished next month. The claims either wholly or in part in dispute are 31,815*l*, of which 18,000*l* is on account of Mr Scott Russell. A further small sum may have to be raised for the purchase of stores, coals, &c., prior to the next voyage of the Great Eastern.

At the meeting of the Standard Life Assurance Company at Edinburgh; the report stated the assurances for the year at 705,897*l*, yielding in annual premiums 22,565*l*. The subsisting assurances are 6,968,825*l*; the accumulated fund, 1,805,982*l*; and the annual revenue, 304,161*l*.

FAILURES.—The suspension is announced of Mr T. Gues, a Levant merchant, with liabilities at between 20,000*l* and 30,000*l*.

The meeting of creditors of Mr E. Vitalis, Greek merchant, held on Wednesday, was adjourned till the 25th of April, to obtain further information respecting the ultimate engagements which will come upon this house. The liabilities at present are expected to reach 25,124*l*, with assets here of 15,425*l*, besides capital at Constantinople to the amount of 20,000*l*.

Several meetings of creditors have taken place this week At that of Messrs O'Halloran and Co., East India and Ceylon merchants, the balance sheet showed liabilities likely

to rank upon the estate 20,541*l*, with assets estimated to realise 27,939*l*, exclusive of private property at Ceylon and Wynand of 7,500*l*. It appears that the house was reconstituted in 1847, the partners being General Sir John Fitzgerald, Mr O'Halloran, and Mr Greenhill. Sir John Fitzgerald, though possessing the larger portion of the capital, did not take an active part in the concern, the management being left to the care of the two other partners. Up to the year 1857 the trading was very prosperous, and the realised capital on the 21st December, 1851, was 70,081*l*. In the following October, Mr O'Halloran proceeded to Ceylon for the purpose of regulating the affairs of the house there, and while absent from this country was furnished with periodical balance sheets, purporting to give the true position of the house in London. These documents set forth that the accumulated capital on the 31st December, 1857, was 73,345*l*; in 1858, 61,957*l*; and in 1859, 70,323*l*. On Mr O'Halloran's return to England, however, he found these statements to be fictitious, Mr Greenhill having falsified the books in order to meet losses by private speculation to the amount of 47,900*l*. An immediate dissolution of partnership took place on this discovery. The proximate cause of the stoppage has been the losses in the trading since Christmas 12,876*l*, against which there is a reserve of 3,000*l* and a profit from the operations of the previous six months of 7,465*l*. It was resolved, after some discussion, to wind up under a deed of inspectorship.

A meeting of creditors of Messrs Schilizzi and Vuros, in the Levant trade, was held on Tuesday. The balance sheet showed liabilities expected to come on the estate 31,893*l*, with assets in this country 16,386*l*, besides a balance of 1,841*l* retained by the bankers against bills discounted, but it is fully believed that this amount will ultimately become available. In addition to these sums, Messrs Schilizzi have a claim on their Constantinople house of 17,796*l*, which is anticipated to produce 7,500*l*. As, however, in the present state of uncertainty it is impossible to decide with any accuracy what the final outturn of the estate will probably be, it was determined to adjourn to the middle of April.

The creditors of Messrs (C. W.) Ede and Co., Levant merchants, at their meeting on the same day, also decided to adjourn for further information. There is no doubt that in this case every one will be paid in full, the debts being 20,058*l*, and assets 23,200*l*, without reckoning the capital at Constantinople, which is estimated at fully 30,000*l*. Included in the debts is a sum of 1,396*l*, which is all that is expected to come upon this estate from the liabilities on bills payable and receivable of 161,800*l*. Messrs Ede have been between thirty and forty years in business, and their connection was among the best houses in Constantinople. It is owing to this circumstance that the portion of their engagements for other parties which will have to be met by the firm is so moderate.

MISCELLANEOUS.—The Select Committee of the House of Commons on the Red Sea Telegraph Bill have decided in favour of the payment of the present dividend. On Monday the Committee will place before the Chairman of the Company the Bill, with such alterations as will carry out the views of the Committee, and the nature of the measure is looked for with much anxiety.

The remainder of the Danish Five per Cent. loan of 1850, amounting to 691,300*l*, was paid off to-day, in accordance with a notice given last August.

Mr North, a Russian broker, was tried yesterday for larceny, in obtaining warrants for 10,000*l* worth of tallow in exchange for crossed cheques on his banker, his balance at the time being less than 10*l*. After the case had been stated, the Lord Chief Baron ruled that such a proceeding did not amount to either larceny or obtaining goods under false pretences, and directed an acquittal. The question is of considerable importance to merchants connected with the Baltic trade. The warrants forming the subject of the trial have been returned to their owners.

An inquisition has been granted, at the instance of the Austrian Government, against the proposed issue by a London printer of Hungarian notes to the amount, it is said, of 150,000,000 florins, purporting to be signed by Kossuth, and bearing the Arms of the Kingdom of Hungary. The notes had been finished, and were on the eve of delivery.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 3 per mille premium, and the short exchange on London is 25.37½ per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 5-10ths per cent. dearer in London than in Paris.

By advices from Hamburg the price of gold is 427 per mark, and the short exchange on London is 13.6⅝ per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 3-10ths per cent. dearer in London than in Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is quoted at very wide ranges; for first-class bills it may be called 104½ to 105½ per cent. Although this shows the exchange to be against England, the high rate of interest in both countries, and the loss of time before the gold is received back from the American mints, render it doubtful if any profit can be made at the present rates by sending gold to the United States.

Imports of the week ..... 234,666 qrs.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

There was a very poor show of English wheat at Mark lane this morning, coastwise and by land-carriage. Good and fine samples moved off freely, other kinds slowly, at Monday's currency. Foreign wheat was in fair request, at full prices. Barley and oats realised quite former terms. Beans, peas, and flour, however, were inactive. The imports of foreign produce, this week, amount to 5,330 quarters of wheat, 5,480 barley, 10,940 oats, 70 sacks and 16,040 barrels of flour.

At Liverpool, to-day, a fair amount of business was doing in most kinds of produce, at full prices.

The latest advices from Alexandria, forwarded by Messrs Briggs and Co., state that the grain trade was steady, at very full prices. Wheat in store was selling at 33s 6d to 36s; beans, 29s; Indian corn, 26s 3d to 26s 6d; barley, 22s to 22s 6d; and lentils, 26s to 27s per quarter.

There has been a rather improved demand in the Liverpool cotton market during the past week, and the total sales reach 64,000 bales, and include 51,000 bales to spinners, 2,000 bales on speculation, and 11,000 bales for export. Quotations are about the same as on Friday last. At the commencement of the present week the market wore a more healthy appearance, with firmer prices; but in the last few days again some apprehensions of a dearer money market appear to have existed. The market has quieted down, and closes to-day lifeless, with sales of only 5,000 bales.

"The tendency of our cotton crop estimates," observe Messrs Neill and Co., of New York, "has been in favour of the larger figures. The course of receipts during the past month, though quite to be expected, considering the rapid advance in prices, has surprised most of the low crop views. The bottom lands have yielded well everywhere, and the total receipts already foot up two and a half millions. Picking has also been finished earlier this year than last, and we shall, therefore, not get so much low, trashy cotton. The result is, that though there are still extremes on both sides, the majority now regard four million bales as tolerably certain to reach the ports, providing no serious interruption is again met with.

The late heavy public sales of tea were brought to a close in the early part of the week. Privately, the trade has been in a very inactive state, but without leading to any quotable change in prices.

The annexed statement, in reference to tea and silk, is dated Hong Kong, January 15:—

Tea—During the fortnight a fair business has been done, and settlements within the last few days show an advance of 5 mace to 1 tael. In scented kinds but little alteration is shown. Country Greens—A chop of fine Moyune has been sold at extreme rates, and further supplies are looked for. The season's supply of congou is said to be nearly exhausted. Settlements are—Congou, 29 chops; Oonams, 22 to 24½ taels; Oopacks, 25 to 28½ taels; stock, 50 chops: Souchong no sales; stock, 7 chops: scented orange Pekoe, 4,000 boxes, at 19 to 21 taels; scented caper, 6,000 boxes, at 14 to 23½ taels; Canton-packed congou, 1,700 half-chests, at 19 to 24 taels; Canton-packed Pouchong, 2,000 half-chests, at 19 to to 24 taels. Canton Greens—Gunpowders, 1,500 boxes, at 16 to 18 taels; young hyson, 1,000 half-chests, at 15 to 16 taels. Country Greens—One chop finest Moyune, at 31 to 62 taels (1,000 half-chests). Foo-chow advices are to the 7th instant. Tea—Throughout the fortnight a firm tone has prevailed in this market, and settlements generally have been at somewhat enhanced rates. Arrivals have been moderate, and about 30,000 chests more it is expected will close the season's supply. Oolongs have been taken to a moderate extent. In Pekoe and scented kinds little doing. On comparing prices with those current on the 22nd ultimo, Congou shows an advance of 5 mace, and Oolongs a decline of 1 tael. Shanghai advices are to the 5th inst. Silk—Settlements are reported at 4,500 bales, making the total for the season 63,500 bales. Stock of silk actually ready for sale is put down at about 6,000 bales, but large quantities are daily arriving without passing through the inland custom houses, and unfit for market. Quotations show no alteration. The total export of silk from China to Europe:—Bales, 58,703, against same time last year 43,431 bales, showing an increase for this season of 15,272 bales. Tea—A continued absence of supplies of black tea, and consequently transactions have been but trifling. No quantity to come forward. Settlements are—Congou, 400 chests, Kaisow kind at 27¾ taels; Pekoe, 1,000 ditto, at 32 to 37 taels. In greens there is very little to report, and arrivals have been on foreign account, having been bought at Ningpo. It is quite uncertain when further supplies may be expected. Settlements are 2,500 half-chests China growth, 700 Japan. It is impossible to give any quotations, but prices are as high as the opening rates, and holders are unwilling to sell, except at an advance. Stocks—6,000 chests against last season 28,000 chests; green, 2,500 half-chests against last season 75,000 half-chests. Departures have been two vessels for London and two for New York, one vessel loading for London and two for New York. Total export of tea from China to Great Britain is 58,119,400 lbs, against last year 54,129,600 lbs; or an increase for this season of 3,989,800 lbs. To the United States the export is 20,406,700 lbs, against 23,377,400 lbs last year; or a decrease for this season of 2,970,700 lbs.

For good and fine raw sugars, there has been a moderate inquiry, at full quotations; but low and damp parcels have moved off heavily, at, in some instances, a further decline in value of 6d per cwt. Refined goods continue very dull. A letter from the Havana to the 6th ult., forwarded by Messrs Van Notten and Co., says:—"The failure of one of our principal export houses, and the still increasing stringency in our money market, have caused buyers in our sugar market to operate very cautiously, buying only for immediate wants to complete shipments. Prices have declined fully 1r per arrobe and we quote No. 12, according to condition, 6¾ to 7¼ rs; the finer qualities are still very scarce and much inquired after for Spain, and fetch much higher prices in proportion. The market closes dull, and as money matters cannot be expected to improve for some little time to come, we may look for a further decline of present rates. Our quotations are:—No. 5 to 10, 18s 1d to 21s 1d; 11 to 12, 21s 9d to 22s 4d; 13 to 14, 22s 11d to 24s 1d; 15 to 17, 24s 8d to 27s; 17 to 20, 27s 8d to 28s 10d; white inferior to prime, 28s 10d to 33s 7d at 11 per cent. pm., f.o.b. The arrivals of sugar are very considerable, and stocks to-day between here and Matanzas amount to about 110,000 boxes, against

35,000 boxes last year. The exports from here and Matanzas since the 1st January up to date amount to 47,083 boxes, against 11,761 boxes last year."

The transactions in the coffee market have been on a very moderate scale, at previous currencies. The demand has chiefly run upon plantation kinds.

The following report of the coffee trade at Ceylon to the 30th of January has been forwarded by Messrs Volkart Brothers:—

The weather has continued most favourable for shippers, and produce has been pushed rapidly forward; still coffee shipments do not equal those of last year. To date they are as follows:—

PLANTATION COFFEE.

To Great Britain .....cwts	102,867	against last year, cwts		111,569
Foreign Ports	8,988	—	—	7,318
Australia and India.....	5,934	—	—	4,418
	117,789			123,305

NATIVE COFFEE.

To Great Britain.....cwts	26,881	against last year, cwts		46,011
Foreign Ports.....	9,405	—	—	13,335
Australia and India.....	3,441	—	—	493
	39,727			59,839

Plantation coffee has not arrived from the interior as freely as was expected, rainy weather in the coffee districts having delayed the drying of parchment on estates, and means of transport not being very plentiful. The transactions in native coffee have been of an unimportant character, and such parcels as have been taken since the last mail have been at about previous values. Plantation coffee, mountain, 11s 3d to 11s 6d per bhl: native coffee, unpicked, 42s 6d; picked and dried, 45s per cwt. Cinnamon, plantation, 9d; inferior, 6d to 7d per lb.

Cocoa and rice have ruled heavy, but without leading to any quotable change in value. Inferior kinds of saltpetre have ruled in favour of buyers.

The first series of colonial wool sales for the present year commenced on Thursday, with a full average attendance of home and foreign buyers. Prices as compared with last sales are lower by 1d per lb on Sydney, and 2d per lb on Port Philip and Cape fleeces. Scoured wool of all descriptions is on the average full 2d per lb lower; a large proportion of this class was contained in yesterday's sale, of which about 500 bales were withdrawn, as also some fleece wool. Quantity arrived to date:—From Sydney, 6,201; Port Philip, 24,431; Van Diemen's Land, 459; Adelaide, 8,454; New Zealand, 1,129; Cape of Good Hope, 14,693—total, 55,367 bales.

The transactions in indigo have been much restricted. Prices, however, have ruled steady.

Messrs Moran and Co., of Calcutta, writing on the 22d January, thus report the state of the indigo market:—

Our indigo market has become less animated, notwithstanding the increased demand and further advance in London advised by the last mail. The fact that that advance was chiefly caused by speculation produces a want of confidence in the soundness of the trade (although to us the prospects for next crop appear to justify the increased value of indigo), and the public sales go off with less spirit; fine indigo is decidedly rs 5 to 10 cheaper than it was at the date of our last, and consuming kinds are also a shade lower. About 75,000 mds are now out of the market, including all the Lower Bengal marks of European make, with the exception of about 500 chests. The French have bought freely, and will take probably 7,000 chests against 5,200, 4,993, and 4,380 for the three past years respectively. The Arabs and Americans have so far bought very sparingly. Exports of indigo from the 1st November, 1860, to the 21st January, 1861:—To Great Britain, 11,394; to Havre and Bordeaux 4,858; to America, 228; to Gulf, &c., 543—total, 17,083 chests.

The following remarks from Messrs Grant, Hodgson, and Co.'s circular, refer to the state of the tobacco trade during the past month:—"Sales last month were 220 hhds of Kentucky leaf and strips, 65 hhds of Virginia leaf, 40 hhds and 200 tierces of strips, the latter said to be for re-sale. As was fully anticipated, the market has been extremely quiet, in consequence of the trade having supplied themselves so liberally in the previous month. The absence of business has not produced any apparent change in the views of holders; and we are not aware of any parcels having been placed on the market that had been previously withdrawn. The limited business transacted has been at full prices, and the general firmness exhibited for good and fine sorts of all descriptions, at the commencement of the month, has been fully maintained; we have therefore resumed our previous quotations. For exportation, sales unimportant. Latest advices from the United States represent no change in the markets; the limited sales effected at New Orleans had been chiefly on private terms; quotations unchanged."

There has been a fair demand for rum, at quite last week's currency; but brandy and grain spirit have commanded very little attention.

Oils, generally, have ruled about stationary. The dealings in tallow have continued trifling, yet prices have been very firm. To-day, P. Y. C., on the spot, has sold at 60s 6d; March, 60s 6d; April to June, 58s 6d; October to December, 55s 6d per cwt.

"The general features of the money market," observes the New York *Shipping List* of the 13th ult., "present but few changes since our last. The amount of capital seeking investment is daily increasing, without any new outlets for it that are considered safe or profitable. The frequency of suspensions in mercantile circles induces increased caution in respect to paper that is not strictly first class. On call, the supply continues very free at quotations, the security in all cases being unexceptionable. We quote:—

	Per cent. per annum.
Loans on call, stock securities	5 to 6
Do. other good securities	6½ 7
Prime endorsed bills, 60 to 90 days	7½ 8
Do. 4 to 6 months	8 9
First class single signatures	8 10
Other good bills	12 15
Names less known	18 24

The Bank statement for the past week shows a further heavy augmentation of the specie reserves, with a decrease of over a million and a half in the discounts. During the week, twenty-seven banks increased their loans, and thirty-three their specie. The ratio of specie to circulation and net deposits exhibits an increase of 2 71-100 per cent. for the week. The actual amount in vault is at least a million and a half above the returns. The following is the usual summary, compared with the previous exhibit:—

	Feb. 2. dols		Feb. 9. dols			dols
Loans.....	121,907,924	...	120,368,050	...	Dec.	1,539,874
Specie	31,054,509	...	34,655,645	...	Inc.	3,601,136
Circulation	8,099,376	...	8,361,305	...	Inc.	261,929
Deposits	87,879,743	...	88,988,631	...	Inc.	1,106,888

Foreign exchange is receding again, while domestic remains about as previously noticed. The Custom House returns of the foreign trade of the port for the week past show a heavy falling off in the import entries compared with previous season's, with exports of domestic produce and general merchandise nearly double those of the corresponding week last year. We annex the usual tables:—

IMPORTS.

For the week—	1860. dols		1861. dols
Dry goods	3,563,327	.....	2,022,078
General merchandise	1,639,618	.....	1,765,066
Total for the week	5,202,945	.....	3,787,144
Previously reported	20,983,842	.....	20,029,998
Since January 1	26,186,787	.....	23,817,142

EXPORTS.

For the week	1,404,754	.....	2,664,873
Previously reported	7,378,490	.....	13,432,094
Since January 1	8,783,244	.....	16,096,967

The stock market continues to fluctuate according to the ever-varying character of the Washington despatches. For Treasury notes there is quite an active inquiry at 101¾ for the 12 per cents. In railway shares the operations are on a moderate scale, and there are but few buyers outside the brokers' circle."

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Notwithstanding that nearly, or quite, the whole of the markets held this week have been scantily supplied with home-grown wheat, the demand for all kinds has been in a sluggish state. Good and fine dry samples have commanded full quotations; but inferior qualities have been sold with difficulty, at irregular currencies. On the whole, a fair average retail business has been passing in most descriptions of foreign wheat, on former terms. Fine barley has sold readily, at extreme rates; but low and damp parcels have met a dull inquiry. Malt has continued heavy, but without leading to any quotable change in value. Oats have commanded very full prices. Both beans and peas may be considered steady; but the transactions in flour have fallen off.

The latest advices from New York state that the exports of produce compared with last year were still on an extensive scale. Wheat, flour, and maize were steady in price. Throughout the Continent fine wheat, barley, and oats have continued in fair request for spring shipment to England. The stocks in most of the leading shipping ports appear to be good.

In Scotland, wheat has realised former terms with a moderate inquiry. Barley and oats have commanded extreme rates, with a good export demand.

The Irish markets have continued very inactive for all kinds of wheat, but both barley and oats have sold readily at full quotations. Indian corn has met a dull inquiry on former terms. The stocks of grain imported are heavy.

At Mark lane, to-day, the show of English wheat was very moderate, and without the slightest improvement either in quality or condition. Selected samples sold freely, at very full prices; but damp and inferior qualities were extremely difficult to move. The supply of foreign wheat was tolerably extensive, and the trade generally ruled inactive, yet previous rates were fully maintained. Fine barley met a fair inquiry, at full quotations; but without change in value. The oat trade ruled firm, notwithstanding that the demand for all descriptions was devoid of animation. Beans and peas changed hands slowly, on former terms. All kinds of flour were in limited request. Prices, however, were fairly supported.

Mr Ed. Rainford thus reports the state of the floating trade:—Since the 21st ult. 59 arrivals off coast for orders are reported,

consisting of 26 cargoes of wheat, 15 maize, 13 barley, and 5 miscellaneous, viz.:—Wheat, 5 from Odessa, 5 Ibraila, 2 Constantinople, 3 New York, 1 Marseilles, 3 Alexandria, 1 Venice, 2 Sulina, 1 San Francisco, 1 Taganrog, 1 Berdianski, 1 Trieste; flour, 1 Bilboa; maize, 1 Venice, 2 Mazagan, 3 Galatz, 1 Philadelphia, 1 Odessa, 3 New York, 2 Ibraila, 1 Constantinople, 1 Casa Bianca; maize and flour, 1 New York; barley, 5 Odessa, 1 Alexandria, 3 Ibraila, 1 Kertch, 2 Constantinople, 1 Scala Nova; beans, 1 Saffi, 2 Alexandria. About 10 or 11 of these were previously disposed of. The demand for cargoes afloat is less animated than it was. The following are the transactions since this day week, the prices of wheat and barley drooping:—Wheat, arrived, per 492 lbs, Berdianski, at 55s; new Odessa Ghirka, 53s; Odessa Ghirka, 53s 6d and about 52s 6d; Taganrog Ghirka, 52s and 54s; Venetian, 58s; per 480 lbs, Sandomirka, about 61s 6d (for the Continent); Polish, 55s 6d, 54s 3d, 51s; Ibraila, equal to 45s 7d, 42s 6d, and (for the Continent) 44s 3d; Wallachian, 43s 6d; Milwaukee, 55s; per imperial quarter, Egyptian, at 40s 6d. Maize, arrived, per 492 lbs, Galatz, 41s 3d and 42s; Moldavian, 41s 3d; per 480 lbs, Ibraila, 40s; American, mixed, 38s and 39s; American, yellow, 40s; Mazagan, equal to 40s 7d. Barley, arrived, per 400 lbs, Galatz, 26s 9d; Odessa, 26s 9d and 27s; Ibraila, 27s 3d, 26s 9d, 27s 6d; Wallachian, 26s 9d, 27s 3d, 26s 6d; Danubian, 26s 6d; Scala Nova, 27s. Beans, per imperial quarter, Saide, about 36s 10½d.

The London averages announced this week are:—

	qrs	s	d
Wheat	2088	at 53	8
Barley	793	43	2
Oats	2179	22	4
Rye	...	...	
Beans	210	35	6
Peas	68	47	6

ARRIVALS THIS WEEK.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS, SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The heavy supplies of Mauritius brought forward and the high value of money continue to prevent any improvement in the demand. Low brown to middling refining kinds are the most depressed, these being 6d to 1s per cwt cheaper. On Tuesday, the grocery sugars sold readily, but have since been less inquired after. The transactions in West India to yesterday (Thursday) evening reached only 780 casks, including the portion sold by auction: Barbadoes, 37s to 43s 6d; Jamaica, 36s to 37s 6d; grainy Demerara, 39s 6d to 44s per cwt. The Netherland Trading Company's spring sale, fixed for the 21st proximo, will contain 70,600 baskets Java. The deliveries last week were 4,350 tons, making a decrease of 3,330 tons since the beginning of the year. The stock amounts to 50,350 tons, against 51,500 tons in 1860.

Mauritius.—Of 20,645 bags by auction, a large proportion met with buyers, and the quotations were as follows: grainy and crystallised, 37s to 45s; soft grey to fine yellow, 36s to 41s 6d; low dark to good brown, 30s to 35s 6d per cwt. Three floating cargoes of Mauritius have recently sold at 26s to 27s per cwt, No. 11 to 12½, for Bristol.

Madras.—3,444 bags of the lower qualities were mostly bought in: native, 30s 6d to 32s 6d; a few lots good brown selling at 31s; soft date kinds taken in at 29s to 31s per cwt.

Bengal.—1,367 bags principally sold: grainy bright yellow, 41s 6d to 42s; good middling yellow Gurpatta date, 39s; brown, 35s per cwt.

Foreign.—A few parcels Havana have sold by private contract. 745 baskets Java, at public sale, were taken in or withdrawn, one lot fine yellow bringing 43s 6d. 14,008 bags unclayed Manilla were withdrawn. 3,442 boxes Havana chiefly met with purchasers on easier terms: brown and yellow, 42s 6d; grainy sorts, 38s to 43s 6d. A floating cargo of Havana, No. 12, is reported at 25s 9d for a near port. On the spot, 9,000 bags clayed Manilla are reported at 34s to 34s 6d per cwt.

Refined.—The market has been inactive, but prices are unchanged since last Friday, and the stock of dry goods continues moderate. Low to middling descriptions are quoted 49s to 50s; crushed, 47s to 48s 6d per cwt.

MOLASSES.—A small quantity of Barbadoes has been sold at 20s per cwt.

RUM continues steady, and East India descriptions are firmer, Bengal and Penang commanding 1s 8½d. Good marks of Demerara maintain their former value, but common sell slowly. The total stock is 22,000 puns 5,200 hhds, against 26,330 puns 6,100 hhds at the same time last year.

COFFEE.—The market is quiet. A floating cargo of St Domingo has been sold for the Mediterranean at 63s; and one of mixed quality at 60s, and two of Rio at 50s, for near ports. Sales on the spot comprise 1,000 bags Rio at 55s to 57s 6d; the parcel of Mysore bought in last week at 62s 6d to 63s; and 130 casks native Ceylon, latterly at 64s. By auction, 184 casks plantation Ceylon obtained the previous value, ranging from 69s to 73s for low middling to good. 200 bags African partly found buyers at 78s to 80s per cwt.

COCOA.—Nothing of interest has transpired in West India.

TEA.—The market is inactive. At the public sales, which concluded on Tuesday, the remaining 24,800 packages passed, 12,519 being sold, more than three-fourths of that quantity being printed "without reserve." General quotations showed little variation, and the private transactions have since been upon a limited scale.

RICE.—Several contracts have been made in soft grain sorts at 10s to 10s 7½d; and 100 tons Ballam, ex ship, sold at 10s 1½d. By auction, 3,973 bags Bengal partly found purchasers at 11s 6d to 12s for middling rather broken to middling, the remainder being taken in above the value.

IMPORTS and DELIVERIES of RICE to February 23, with STOCKS on hand.

	1861.	1860.	1859.	1857.
	tons	tons	tons	tons

Exported	*	3950	3100	2300
Stock	30400	65500	83500	75400

* The deliveries of duty-free goods for export are not given now, and the total will be shown under the head of home consumption.

SPICES.—The public sales on Wednesday passed off steadily 702 bags pimento realised extreme rates: common to good, 2¾d to 3d. 139 bags fair Penang white pepper, at 5¾d to 6d, was slightly dearer. 119 cases brown nutmegs obtained fully former rates: small, 1s to 1s 3d; middling to very bold, 1s 5d to 3s 9d. 23 cases middling mace realised 1s to 1s 1d per lb.

SALTPETRE.—This article remains very unsettled. Of 800 bags in public sale, a portion only sold at 36s for 9¾ refraction. Privately, small orders have been executed at about previous rates: refraction 14¼ to fine, 35s 6d to 38s 6d. 784 bags Bombay, by auction, refraction 53½ to 39¾, sold at 32s 6d to 33s per cwt.

IMPORTS and DELIVERIES of SALTPETRE to February 28, with STOCKS on hand.

	1861.	1860.	1859.	1858.
	tons	tons	tons	tons
Imported	2800	3120	2740	1350
Delivered	1620	2230	2800	2260
Stock	5000	4750	2900	5500

COCHINEAL has barely sustained the rates current last week, but of 336 bags by auction a large proportion sold: Teneriffe silvers, 2s 8d to 2s 11d; blacks, 2s 11d to 3s 6d; Honduras silver, 2s 7d to 3s 2d; black, 2s 11d to 4s 6d per lb.

DYESTUFFS.—The price of Cutch is firmly supported by speculators. Gambier remains steady. 64 bags Bengal safflower sold at 4*l* 2s 6d to 7*l* 10s for low middling to good bright quality.

LAC DYE is quiet, but good marks remain steady in price.

DRUGS.—The public sales yesterday went off at about previous rates. Castor oil sold steadily. Camphor went at 9*l* 5s to 9*l* 15s per cwt.

RUBBER.—East India has been depressed by the late arrivals, and the value must be considered nominally 1s 4d per lb.

DYEWOODS.—Cuba fustic sold at 8*l* 15s to 8*l* 17s 6d per ton.

METALS.—Great heaviness has pervaded the market generally. Iron of all kinds is dull, and prices of manufactured descriptions cannot be accurately quoted. The last sales of Scotch pig were at 48s 3d to 48s 6d per ton cash for mixed numbers. Some business has occurred in spelter, at 18*l* 5s, which is now the nearest price on the spot. Foreign tin has been firm: Straits, 122s to 123s per cwt, but with sales upon a very limited scale.

HEMP.—More inquiry prevailed for Russian towards the end of last week, when several contracts were made in Petersburg. The market is now devoid of animation. Manilla can still only be sold at very low rates. The sale of 630 bales jute held on Wednesday went off at former rates.

LINSEED.—Large arrivals keep the market well supplied, and the market is slightly lower. Bombay, 55s to 55s 6d; Calcutta, 51s to 52s 6d; Black Sea, &c., cargoes off the coast have sold at 52s per quarter delivered in the United Kingdom.

OIL.—Linseed is quiet at 28s to 28s 3d. Rape has become flat: foreign refined, 39s 6d to 40s; brown, 36s 6d to 37s. Cocoa-nut has been firmer: Cochin, 51s 6d; and Ceylon, 50s to 50s 6d. Fine palm is steady at 46s per cwt., but the lower qualities have been almost neglected. Common fish oils have become firm, as the stocks are chiefly in second hands. Sperm commands 104*l*. Pale seal quoted 40*l* per tun.

TURPENTINE.—Rough can be obtained at 9s to 9s 3d, but no sales are reported. Spirits 31s 6d per cwt. for American drawn.

TALLOW.—There has not been any improvement in the demand by consumers, but the large speculative holders remain very firm. Foreign closes dearer in most cases. Y. C. on the spot and for delivery to the end of March, 60s 3d to 60s 6d; April to June, 59s; for the last three months, 56s per cwt. By auction, yesterday, 224 casks North American

sold at 55s 3d to 58s 6d. 50 casks Odessa partly realised 58s to 58s 6d per cwt for sheep.

PARTICULARS OF TALLOW.—Monday, February 25.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The sales proceeded flatly to-day, but 15,500 bags Mauritius were about two-thirds sold at and after the sales, and quotations rule 6d to 1s lower than on Friday last, excepting for fine qualities. 6,142 bags native Madras were chiefly taken in, a few lots selling at previous rates. 432 bags Penang sold from 32s 6d to 35s. 389 bags white Benares, at 43s to 44s 6d; and a few lots West India by auction. The week's transactions in the latter reach 1,303 casks.

COFFEE.—Two floating cargoes of St Domingo sold to-day at 61s and 60s for the Mediterranean and near ports respectively.

SPICES.—370 bags pimento partly sold at 2¾d to 3d, the remainder being held at 3d.

SAGO FLOUR.—227 bags were bought in at 16s 6d per cwt.

SALTPETRE.—1,836 bags Bengal were partly sold: refraction 11 to 4, 35s 6d to 38s 6d. 233 bags Bombay were disposed of: refraction 57¼ to 39, 32s to 32s 6d per cwt.

COCHINEAL.—340 bags went at easier rates for Honduras and Teneriffe. Mexican silver, 2s 9d; black, 3s per lb.

GAMBIER.—400 bales were bought in: heated and dark, 16s 6d to 17s per cwt.

TALLOW firm, at previous quotations.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar continues neglected, except unstoved, goods continue in moderate demand. Treacle steady. Some few sales have been made in Dutch crushed, at 32s to 32s 3d, in barrels, for B & H, No. 1, and V O, f.o.b. in Holland.

GREEN FRUIT.—Market depressed in consequence of so many parcels landing in bad condition, owing to the severe gales of late. Some cargoes oranges from St Michael, Palermo, and Seville, sold by Keeling and Hunt at public sale, went at prices in character with condition and quality. Lemons and Seville sours lower, the crop of the latter being larger than was anticipated. Nuts of all kinds without alteration; stock moderate.

DRY FRUIT.—In low currants there has been a fair demand, but at easier rates. A large sale of fine has been made at full rates. Valencia raisins have been brought forward in several lots at public sale, finding buyers at 37s for good sound, and 27s to 29s for badly damaged. Chesme raisins are attracting attention at their present quotation of 31s for fine descriptions. 30s has been refused for a large parcel, notwithstanding they are to be bought at that figure. Elemes are of good value at 33s to 34s. Sultanas are lower. Figs, in consequence of the greatly reduced stock, are selling at a slight advance.

ENGLISH WOOL.—The market is very flat; prices quite ½d lower.

FLAX unaltered.

HEMP.—Market very quiet, and but little business doing.

SILK.—The silk market continues much depressed, without any

TOBACCO.—The market remains unchanged, sales chiefly of a retail character, at present quotations. Holders have shown no desire to press orders, or make concessions on good and fine descriptions.

sales in prices; tendency rather downward.

LEATHER AND HIDES.—The leather trade remains nearly unaltered. The same restricted demand prevails, and more extended transactions can scarcely be expected so long as the high value of money is maintained. In prices there is very little change. The supply of fresh leather at Leadenhall on Tuesday was about an average. Extra thick foreign butts were the only scarce article. The demand was of a general character, and fully equal in extent to the previous week.

METALS.—There is no relief from the long-existing stagnation. Copper is unchanged, and prices of ores are steadily maintained. Iron is reported much depressed in all quarters. Tin is steady in prices, with continued limited demand. Spelter having been neglected for a week or two, is again from 5s to 10s per ton lower. Lead finds fair inquiry. Tin plates unchanged.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	60	3
Fat by ditto	3	1½
Yellow Russian	62	0
Melted stuff	40	6
Rough ditto	24	6
Greaves	18	0
Good dregs	7	0

METROPOLITAN CATTLE MARKET.

THURSDAY, Feb. 28.—To-day's market was seasonably well supplied with beasts, in, for the most part, fair average condition. All breeds sold steadily at fully Monday's currency—the best Scots having realised 5s per 8 lbs. The show of sheep was moderate, and the mutton trade was firm at extreme quotations. The best old Downs were worth 6s per 8 lbs. Lambs moved off slowly, at from 6s 4d to 7s 4d per 8 lbs. We have to report a dull inquiry for calves, the supply of which was only moderate, at late rates. Pigs and milch cows moved off slowly, on former terms.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	2	3	6	Prime Southdown sheep	5	10	6	0
Second quality ditto	3	8	4	2	Large coarse calves	4	8	5	2
Prime large oxen	4	4	4	8	Prime small ditto	5	4	5	8
Prime Scots, &c	4	10	5	0	Large hogs	4	0	4	6

Second quality ditto	4	2	4	6	Suckling calves, each	19	0	22	0
Prime coarse-woolled do.	4	10	5	8	Quarter old store pigs	22	0	29	0

Total supply—Beasts, 1,000; sheep and lambs, 3,800; calves, 170; pigs, 300.
Foreign supply—Beasts, 250; sheep, 700; calves, 95.

HOP MARKET.

BOROUGH, Monday, Feb. 25.—Our market continues exceedingly heavy, with scarcely anything doing in any description. Our quotations remain nominally the same:—Mid and East Kents, 80s, 140s, 200s; Weald of Kents, 60s, 120s, 180s; Sussex, 60s, 90s, 140s; Yearlings, 80s, 126s, 190s.

FRIDAY, March 1.—Our market continues very dull, and sales can only be effected by submitting to lower prices.

POTATO MARKET.

SOUTHWARK WATERSIDE, Monday, Feb. 25.—During the past week the arrivals, both coastwise and by rail, have been moderate, but the quantity on hand and in store is considerable. Trade remains dull, and prices have undergone little alteration. The following are this day's quotaitons:—Yorkshire Flukes, 150s to 160s; Lincolnshire Regents, 110s to 120s; Dunbar red soil ditto, 150s to 160s; North Berwick ditto, 120s to 125s; Perth, Forfar, and Fife ditto, 95s to 105s ditto, ditto, ditto reds and Rocks, 85s to 100s; French whites, 60s to 90s; Belgian ditto, 60s to 80s; Dutch ditto, 60s to 80s per ton.

THURSDAY, Feb. 28.—Fair average time of year supplies of home produce have come to hand coastwise and by rail at this market since our last report, but trade continuesvery slow, at the annexed rates:—York Flukes, 140s to 150s; Scotch Regents, 95s to 105s; ditto Cups, 90s to 100s; ditto Rocks, 90s to 100s; Dunbar, 160s to 180s per ton.

HAY MARKETS.—THURSDAY,

SMITHFIELD.—Meadow hay, 2*l* 0s to 5*l* 5s; clover, 3*l* 0s to 5*l* 15s; and straw, 1*l* 10s to 1*l* 18s per load. A moderate demand.

CUMBERLAND.—Meadow hay, 2*l* 0s to 5*l* 8s; clover 3*l* 0s to 5*l* 15s; and straw, 1*l* 10s to 2*l* 0s per load. Trade steady.

WHITECHAPEL.—Meadow hay, 2*l* 0s to 5*l* 5s; clover, 3*l* 0s to 5*l* 15s; and straw, 1*l* 10s to 2*l* per load. Supply good.

COAL MARKET.

FRIDAY, March 1.—Walls End Hetton 21s—Walls End Haswell 21s—Walls End Stewarts 21s—Walls End South Hetton 21s—Walls End Hartlepool 20s 9d—Walls End Braddylls Hettons 20s—Walls End Russell Hetton 20s—Walls End Gosforth 18s 9d—Walls End Riddells 18s 9d—Walls End Thorpe 19s—Walls End Hedley 19s—Byron 19s—Bell's Primrose 14s 6d—Wylam 17s 6d—Tanfield Moor 16s 3d—West Hartley 17s—Buddle's Hartley 17s—Davidson's Hartley 17s—Hastings Hartley 17s. 169 ships at market.

LIVERPOOL MARKETS.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, March 1.—A fair attendance at to-day's market. A good business in wheat at Tuesday's prices. Fine qualities of flour more sought after, and a fair business done. Indian corn steady. Beans rather easier. Oats and oatmeal dull, without change.

METALS.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, March 1.—There is little or no variation to note in the state of the market for manufactured iron during the past week, the demand generally continuing limited. For Scotch pig iron there has been little inquiry, prices remaining almost nominal. Copper continues to be little inquired for. Lead is also very dull. Most other metals are nominally without change.

The Gazette.

TUESDAY, Feb. 26.

BANKRUPTCY ANNULLED.

J. M. Nicholson and G. Plummer, Manchester, cabinetmakers.

BANKRUPTS.

W. D. Simpson, late of Crayford, Kent, brickmaker.
E. Botting, Brighton, grocer.
J. B. Hutt, Cambridge, printseller.
W. T. Bellingham, Gresham street, auctioneer.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic returns of railways in the United Kingdom for the week ending the 16th of February amounted to 467,474*l*, and for the corresponding week of last year to 443,461*l*, showing an increase of 24,013*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 199,550*l*, and for the corresponding week of 1860 to 191,935*l*, showing an increase of 7,615*l*.

NEW RAILWAY BILLS.—The following summary of railways bills now before Parliament is contained in the Board of Trade report to the House of Commons, just issued: —The number of bills relating to railways in Great Britain and Ireland deposited this session amounts to 283; of this number 240 authorise new works. The proposed new works to be authorised by the 240 before-mentioned bills may be classed as follows:—

BY NEW COMPANIES.

	No of Bills.		Miles.
England	93	Length of line	1,446
Scotland	10	—	220
Ireland	14	—	349
Total	117	.....	2,015

BY EXISTING COMPANIES.

	No of Bills.		Miles.
England	94	Length of line	814
Scotland	17	—	67
Ireland	12	—	121
Total	123	.....	1,002

The total length of new lines is, therefore, 3,017 miles, and there are in addition fifty-two miles of deviation line.

RAILWAY AND MINING SHARE MARKET.

LONDON.

MONDAY, Feb. 25.—British railway stocks opened lower this morning on the adverse movement in the American rate of exchange, but improved in the afternoon. Towards the close, however, there was a tendency to renewed heaviness. The principal change was a decline of nearly 2 per cent. in Sheffield. In the colonial market, Great Western of Canada shares improved to 10⅞ to ¼. Indian guaranteed stocks experienced little alteration, but closed with a rather dull appearance. In foreign descriptions, Lombardo-Venetian were firmer at 1⅛ to 1 dis. In American securities the shares of the Illinois Central, and New York and Erie advanced. The transactions in mines were limited, but in several cases a rise took place.

TUESDAY, Feb. 26.—The railway market improved in the morning from a demand for stock for the settlement, but relapsed in the afternoon on sales for the new account in March. Great Western was scarce, and advanced nearly 1 per cent. Eastern Counties was also 1 per cent. higher. Other stocks left off much about the same as yesterday. The market showed rather a dull tendency at the close. In colonial descriptions, Atlantic and St Lawrence shares receded. Great Western of Canada were firmer, and East India stock recovered to 98 to ½. The only change of importance in the foreign market was a reduction in the Pernambuco. Illinois Central and New York and Erie shares were also lower. British mines were dull, and in some cases showed a decline. In foreign adventures, St John del Rey and United Mexican advanced, particularly the latter.

WEDNESDAY, Feb. 27.—In the railway market the principal business was in connection with the settlement, and the general transactions were limited. In the earlier part of the day prices were steady, but towards the close the tendency was unfavourable. Although the quotations were for the new account in March, in some cases they show a decline, especially in Midland, Lancashire and Yorkshire, and Great Western. Eastern Counties, on the other hand, advanced ¼ per cent. South-Western was also firmer, while other stocks left off without material change. In the colonial market, East Indian improved at 98½ to ¾, and Great Western of Canada to 10⅞ to 11. Grand Trunk was depressed at 21½ to ¾. Foreign descriptions were dull, Lombardo-Venetian being especially heavy.

THURSDAY, Feb. 28.—The railway market was depressed the whole day and closed heavily at the lowest point. Sales were pressed, both on London and provincial account, and there was a general disposition to operate for the fall. Midland and Lancashire and Yorkshire, which were especially in speculative demand in the country during the past half-year, were chiefly affected among the heavier stocks, the former declining ⅝ and the latter ⅜ per cent. Sheffield also declined 1½ per cent., and North-Eastern descriptions ¾ to 1; Great Northern was higher. Colonial descriptions experienced no alteration of importance. Foreign and American railways closed about the same as yesterday. Mines were inactive, and in one or two cases showed an advance.

FRIDAY, March 1.—The railway share market was very dull and inactive. In two or three instances a further decline of ¼ to ½ per cent. occurred, but prices generally may be considered nearly the same as at four o'clock yesterday. Lombardo-Venetian railway shares were dull, at 1¼ to 1⅛ dis. Great Western of Canada ruled firm. Mining market quiet, and without material alteration in prices.

The Economist's Railway and Mining Share List.

THE HIGHEST PRICES OF THE DAY ARE GIVEN.

DR ROBERT ROWE ON INDIGESTION.

This day is published, price 2s 6d, the fifteenth edition,

NERVOUS DISEASES, Liver and Stomach Complaints, Low Spirits, General Debility, and Diseases of Warm Climates; the Result of Thirty Years' Practice.

By G. ROBERT ROWE, M.D.

"Dr Rowe claims with justice a priority of authorship, while he yields to none in his treatment. The value of this work is enhanced by its practical nature."—LANCET.

"We have no hesitation in placing this work among the first ranks. We entertain a high opinion of its value."—MEDICAL TIMES.

"This is a clever and useful work; contains much that is worthy of attention, and should be read by all martyrs to indigestion and other ills"—TIMES.

Also by the same Author, 2nd edition, price 4s 6d, On some of the Important Diseases of Women and Children.

London: J. Churchill, and to be had of all booksellers.

DR CURTIS'S MEDICAL WORK, "MANHOOD."

An Essay on Nervous and Generative Diseases.

The 140th thousand, with numerous plates, in a sealed envelope, price 1s, or post paid, by the Author, for twelve stamps.

MANHOOD: THE CAUSE AND CURE of PREMATURE DECLINE in MAN, with Plain Directions for Perfect Restoration to Health and Vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, the result of twenty-five years' successful practice. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London. Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a parent, preceptor, or clergyman."—SUN, evening paper.

"Dr Curtis has conferred a great boon by publishing this little work, in which is described the sources of these diseases which produce decline in youth, or more frequently premature old age."—DAILY TELEGRAPH, March 27, 1858.

N.B. The Author of the above Medical Treatise may be consulted as usual, either by letter or personally, at his residence. The efficacy and harmless nature of the remedies employed by Dr Curtis, having been demonstrated by the most complete success during a practice extending over a period of 20 years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

Published by Allen, 20 Warwick lane, Paternoster row; Mann, 39 Cornhill; and free from the Author for 12 stamps.

Just published, 71st thousand, price 1s, post free for 13 stamps. Sold by Mann, 39 Cornhill, or direct from the Author.

DR LA'MERT ON THE CURE of Nervous and Physical Debility, resulting from pernicious habits or excess. With cases and engravings from life.

CONTENTS:—The Physiology of the Generative Organs—Puberty—Manhood—True and False Morality—Marriage, in its Moral and Physical Relations—Youthful Abuse—The Secret Cause of Nervous Debility, Impotence and Sterility—Spermatorrhœa, or Chronic Impotence: its History, Causes, and Moral Consequences.

Dr LA'MERT, M.D., L.S.A., &c., is the only legally qualified practitioner on the Medical Register who, for 20 years, has devoted his studies to the treatment of these disorders.

37 Bedford square, London.

HOLLOWAY'S OINTMENT AND PILLS.—Whooping Cough, Colds, Pneumonia.—These infantile disorders were the terrors of parents, who knew the impossibility of administering medicine internally to children, till Professor Holloway discovered his invaluable Ointment. This Ointment, rubbed externally on the throat and chest, passes through the skin and penetrates to the affected tissues without causing the irritability and feverishness always produced by a child's repugnance to medicine, and which vastly procrastinates the cure. No inconvenience or difficulty attaches to this treatment, by which thousands of children are annually saved, or secured against future pulmonary disease. In all disorders to which childhood is particularly liable, parents, guardians, and nurses may with confidence resort to Holloway's Ointment, which, when practicable, should be assisted by his purifying Pills.

VALUABLE INFORMATION.—GRATUITOUS EDITIONS of the following LECTURES, delivered at the Royal Institute of Anatomy, Science, and Medicine, 369 Oxford street, London, by W. B. MARSTON, the Principal, are being issued, with plain directions for SELF-TREATMENT and CURE in each of them.

No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.

No II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.

No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.

No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.

Each Lecture, neatly printed and bound, will be sent GRATIS, on receipt of two stamps to prepay postage, or THE WHOLE FOUR, BOUND TOGETHER, with numerous additions, and full directions for SELF-TREATMENT and CURE, 160 pages, 8vo, post free, for Six Stamps. Address, Treasurer, Royal Institute, 369 Oxford street, London.

DR DE JONGH'S

(Knight of the Order of Leopold of Belgium)

LIGHT-BROWN COD LIVER OIL, Prescribed by the most Eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for

CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,

Is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.

Dr JONATHAN PEREIRA, F.R.S.—"It was fitting that the author of the best analysis and investigations into the properties of this oil should himself be the purveyor of this important medicine. I am satisfied that for medicinal purposes no finer Oil can be procured."

Dr GRANVILLE, F.R.S.—"Dr Granville has found that Dr de Jongh's Light Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."

Dr BARLOW, Physician to Guy's Hospital.—"I have been well satisfied with the effects of Dr de Jongh's Oil, and believe it to be a very pure Oil, well fitted for those cases in which the use of that substance is indicated."

Dr BANKS, King's Professor of the Practice of Medicine at the University of Dublin.—"I have in the course of my practice extensively employed Dr de Jongh's Light Brown Cod Liver Oil, and I have no hesitation in stating that I consider it the best of all the specimens of Oil which have ever come under my notice."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists.

SOLE AGENTS,
ANSAR, HARFORD, and CO., 77, STRAND, London, W.C.

CAUTION.—Beware of Proposed Substitutions

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price from 7s 6d to 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

A BOON TO NERVOUS SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions, by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Burton crescent, Tavistock square, London, W.C.

DR KAHN ON MARRIAGE.—A new and entirely re-written edition (the forty-fifth of this celebrated treatise), with new steel plates, woodcuts, &c., is now ready.

The object of the work is not to maintain any particular hypothesis, but to enable every one to understand for himself the structure and functions of the organs concerned in the fulfilment of the physical obligations of the married state; to acquaint him with the consequences arising from excesses; to prevent unnecessary misapprehension from unfounded fears, and to indicate, when those fears are well founded, the means of speedy relief. The work is not crowded with the technicalities of ordinary professional books, nor does it present the crudeness which characterises the so-called "popular works" on the subject.

Price One Shilling, free by post for thirteen stamps, or in a sealed envelope, twenty-two stamps, either from the publisher, J. Allen, 20 Warwick-lane; or from the author's address, 17, Harley street, Cavendish-square, London.

PERFECT FREEDOM FROM COUGHS is secured by Dr LOCOCK'S PULMONIC WAFERS.—An eminent Wesleyan Minister, the Rev. W. H Evans, in writing the biography of his father, in the WELSH WESLEYAN MAGAZINE for December, 1859, says:—"He had been very painfully affected by an asthmatic complaint and a troublesome cough; but by the use of Dr Locock's Wafers these were removed, so that he enjoyed ease in his latter days, and was entirely free from the cough which so generally troubles old ministers"—See the WELSH WESLEYAN MAGAZINE for December, 1859, p. 402. They have a pleasant taste. Price 1s 1½d, 2s 9d, and 11s per box. Sold by all druggists.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

ADULTERATIONS.—Several Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Another White Zinc has been now introduced containing impurities from the mode of manufacture which retard the drying. Whether these are sold under the name of "Improved Zinc Paint," or as the Number Two or Three qualities, no workman can produce good work with such material. Workmen who have once used the Patent Zinc Paint will never willingly use any other Paint for their best work.

To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"Among other tests to which it has been subjected, has been that of painting the hold of a sugar vessel, which after a voyage to St Kitt's and back, was found, after washing, to be as white as the first day the paint was applied."—JOHN BULL, September 14, 1850.

FORD'S EUREKA SHIRTS are made with that rigid adherence to details in manufacturing, which alone can ensure a good and comfortable shirt. A box of six excellent shirts for 33s. Illustrated catalogues, mode of self-measurement, price list, &c., post free.

RICHARD FORD, 38 Poultry, London.

SALE OF LAMPS, CHANDELIERS AND GAS FITTINGS.

TUCKER and SON having purchased of Messrs Pearce and Son (of Ludgate hill) their entire stock of Lamps, Gas Chandeliers, &c., (on their relinquishing that branch of their business to devote exclusive attention to the China and Glass Trade) have distributed it among their three Show Rooms as under; and being goods of first-rate quality, and offered to the public at a reduction of one-third from their usual price, to insure their immediate realisation, they must command the attention of purchasers.

City Show Rooms, 36 King William street (4 doors from London Bridge); Central do., 190 Strand (opposite St Clement's church, and near Temple Bar).

TUCKER and SON—Established 43 years.

Manufactory, Essex Works, W.C.—November, 1860.

DUTY OFF MODERATOR LAMPS.—J. Schlossmacher's celebrated Manufacture. Burner of every Lamp stamped J. S. The duty being now off, and J. S. being enabled by machinery to reduce the prices of his Lamps to the charges of other makers for their commonest qualities, the full benefit of both reductions is given to the public through his London Agents, TUCKER and SON, at their Establishments, as under:—

Central Show Rooms, 190 Strand (near Temple Bar); City Show Rooms, 36 King William street (4 doors from London Bridge). Established 43 years.

Engravings free by Post.

VOLUNTEER PIPE.—RIFLE BORE.—The most delightful, economical, and permanent medium for the enjoyment of tobacco ever invented. This new pipe only to be had of the patentee. Sample pipe in case sent post free for 23 stamps.—EDWARD PILLINER, 53 Great Queen street, London, W.C.

---

66 Queen street, London, 23rd August, 1860.

MESSRS R. WOTHERSPOON and CO., 46 Dunlop street, Glasgow,

DEAR SIRS,—I have, as requested, to-day visited the Royal Laundry, with reference to the advertisement of the Nottingham firm, who state that their starch has been used for many years in the Royal Laundry, and have been assured by Mr Thompson, the superintendent, that none but yourselves have any right to state that they supply starch to Her Majesty's Laundry, as no other starch is there used, nor has been used for some years, but the Glenfield Patent Starch. I have been further assured that your starch continues to give complete satisfaction, and that though trial has been made of samples of various starches, none of these have been found nearly equal in quality to the Glenfield.—I am, dear Sirs, your obedient servant. WM. BLACK.

KEATING'S COD LIVER OIL. Just Imported. The Pale from Newfoundland, and the Light Brown from Norway. The supplies of the present season have never been surpassed, the fish being unusually fine, and the oil nearly tasteless. Professors Taylor and Thompson, of Guy's and St Thomas's Hospitals, have analysed, and pronounced the PALE NEWFOUNDLAND OIL the best and most desirable for invalids of very delicate constitution. The Light Brown being more economical in price, is brought within the reach of all classes. NO HIGHER PRICE NEED BE PAID than the following:—Light Brown, 1s 8d per pint, or 3s per quart. Pale, 1s 6d half-pints, 2s 6d pints, 4s 6d quarts, or in five-pint bottles, 10s 6d, imperial measure, at 79 St Paul's Churchyard.

HEALTH AND HAPPINESS for the NERVOUS and DEBILITATED.—The proprietors of the Birmingham Institute of Anatomy desire to make known an infallible means of self-cure for the nervous, debilitated, &c., and will forward the same gratuitously on receipt of a stamped directed envelope.—Address "To the Secretary, Institute of Anatomy, Birmingham."

Second Edition, price 2s 6d, post free for 30 stamps,

TOOTH-ACHE: ITS CAUSES, and a New Painless Method of Cure (with as much certainty as water quenches thirst). Teeth cured by this Method will never ache again, and thus prevent the necessity of the painful operation of extraction. By THOMAS HOWARD, Surgeon Dentist to His Grace the Archbishop of Canterbury, 17 George street, Hanover quare, London.

IMPORTANT NOTICE.

GLENFIELD PATENT STARCH is the only STARCH used in HER MAJESTY'S LAUNDRY.

And as some unprincipal Parties are now making and offering for Sale an Imitation of the

GLENFIELD STARCH,

we hereby caution all our Customers to be careful, when purchasing, to see that the word GLENFIELD is on each Packet, to copy which is Felony.

WOTHERSPOON and CO., Glasgow and London.

DINNEFORD'S PURE FLUID MAGNESIA has been, during twenty-five years, emphatically sanctioned by the Medical Profession, and universally accepted by the Public, as the Best Remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a Mild Aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescing Draught, in which its aperient qualities are much increased. During hot seasons and in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD and CO., 172 New Bond street, London; and sold by all respectable chemists throughout the Empire.

NO MORE PILLS OR ANY other Physic.—For *Constipation*, Indigestion (Dyspepsia), Palpitation, Nervous, Bilious, and Liver Complaints, Debility, Dropsy, Epilepsy, Paralysis, Cough, Asthma, Consumption, Bronchitis, Sore Throat, Fevers.

DU BARRY'S delicious Health-restoring REVALENTA ARABICA FOOD, which, at a few pence per day, saves fifty times its cost in medicine, and cures without purging or any of the uncertainties, annoyances, and ruinous expenses incurred by medicine, cod liver oil, or visits to distant climates.

Certificate No. 36,418.—We find it the safest remedy Andrew Ure, M.D., F.R.S.; Dr Harvey; Dr Wurzer Dr Shorland; Dr Campbell.

We extract a few out of 56,000 cures:—

Cure No. 1,771.—Lord Stuart de Decies of many years' dyspepsia.——Cure No. 49,832.—"Of fifty years' indescribable agony from dyspepsia, nervousness, asthma, cough, constipation, flatulency, spasms, sickness and vomiting." Campbell, Syderstone Rectory, near Fakenham, Norfolk, of indigestion and liver complaints.——Cure No. 56,814.—Mr Samuel Laxton, Leicester, of two years' diarrhœa.——Cure No. 180.—Mr W. Reeves, 181 Fleet street, London, of 25 years' nervousness, constipation, indigestion, and debility.——Cure No. 4,023. Eight years' dyspepsia, nervousness, debility, with cramps, spasms, and nausea." Rev. John W. Flavel, Ridlington Rectory, Norfolk.——Cure No. 3,906.—"Thirteen years' cough, indigestion, and general debility." James Porter, Athol street, Perth.——Cure No. 58,314.—Miss Elizabeth Yeoman, Gateacre, near Liverpool, of ten years' dyspepsia and all the horrors of nervous irritability."——Cure No. 46,270.—Mr James Roberts, timber merchant, of Frimley, Surrey, of 30 years' diseased lungs, spitting of blood, liver derangement, partial deafness.

Similar testimonials from 56,000 patients who can be referred to.

The food is sold in canisters, 1 lb, 2s 9d; 2 lbs, 4s 6d; 12 lbs, 22s; 24 lbs, 40s. Super-refined quality, 5 lbs, 22s; 10 lbs, 33s. The 10 lb, 12 lb, and 24 lb canisters carriage free, on receipt of post-office order by Barry Du Barry and Co., 77 Regent street, London; Fortnum, Mason, and Co., 182 Piccadilly; also at 60 Gracechurch street, 4 Cheapside, 330 Strand, 63 and 150 Oxford street, London; and all grocers and chemists.

FREE ISSUE.

Notice.—The following invaluable works have just been published, and are now being issued gratis to all who enclose two stamps for postage, to No. 27 Alfred place, Bedford square, London.

DR WATSON'S NEW MEDICAL ESSAYS on Nervous and Physical Debility, with their easy Detection and Self Cure. Lately discovered and now made public by the author, with cases and diagrams, showing the connection between the brain and other organs. Also prescriptions and other appropriate remedies for the self-treatment and cure of those special diseases, and whether acquired in youth, manhood, or old age. By Dr Watson, F.R.A.S., London, Member of the Medical Society of Rouen, the National Academy of Sciences, Paris, and Fellow of the Imperial Institute of France, &c., &c. (vide Diplomas and Medical Directory).

FINE TEA CHEAPER.

STRACHAN & CO.'S justly celebrated DRAWING ROOM TEA is now reduced to 4s per lb. Guaranteed the Finest and Cheapest Tea in the United Kingdom.

26 Cornhill, London, E.C.

DEANE'S TWO-HOLE BLACK PENS which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped

"G. and J. Deane, London bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

ALLSOPP'S PALE OR BITTER ALE.—Messrs S. ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the October Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent; and at the undermentioned Branch Establishments:—

Messrs SAMUEL ALLSOPP & SONS,

LONDON	61 King William st., City.
LIVERPOOL	Cook street.
MANCHESTER	Ducie place.
BIRMINGHAM	Upper Temple street.
DERBY	London road.
WOLVERHAMPTON	Exchange street.
CHESTERFIELD	Low Pavement.
STOKE-UPON-TRENT	Wharf street.
DUDLEY	Burnt Tree.
WORCESTER	The Cross
SOUTH WALES	King street, Bristol.
DUBLIN	Crampton quay.
CORK	Cook street.
EDINBURGH	Union street lane.
GLASGOW	St Vincent street.
PARIS	279 Rue St Honoré.

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Bottles and Casks, and on Draught, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

When in bottle, the genuineness of the lable can be ascertained by its having "ALLSOPP and SONS" written across it upon red and white ground striped.

The Brewery, Burton-on-Trent, April 30, 1860.

JULLIEN FUND.

Committee Room—50 New Bond street.

The Committee of the Jullien Fund, fearing that the subscriptions have been materially checked by the unfortunate death of Mons. Jullien, desire to explain that a widow and others, members of his family, can be protected from want only by the kind aid of those who appreciate the great services rendered by the late lamented maestro to the cause of the musical education of the English people.

The Committee confidently appeal to that benevolence for which their countrymen are so distinguished, for such prompt and liberal additions to the subscription list as shall enable them to do some justice to the memory of M. Jullien, and at the same ime afford adequate relief to his bereaved family.

COMMITTEE for the DISTRIBUTION of the JULLIEN FUND.

Mr John Mitchel	Mr W. Duncan Davison
Mr W. R. Sams	Mr Jules Benedict
Mr Thomas Chappell	Mr A. Blumenthal

HONORARY TREASURERS.

BANKERS

Messrs Coutts and Co., Strand
Heywood, Kennards, and Co., Lombard street
London and County Bank, Havover square

Who, as well as the honorary treasurers, have kindly consented to receive subscriptions.

April, 25th, 1860.

KEATING'S COUGH LOZENGES.—Statistics show that 50,000 persons annually fall victims to Pulmonary Disorders, including Consumption, Diseases of the Chest, and the Respiratory Organs. Prevention is at all times better than cure; be, therefore, prepared, during the wet and wintry season, with a supply of KEATING'S COUGH LOZENGES, which possess the virtue of averting, as well as of curing, a Cough or Cold; they are good alike for the young or for the aged

RESTORATION OF VOICE BY KEATING'S COUGH LOZENGES. Glasgow.

SIR,—I have great pleasure in informing you of the great good your excellent COUGH LOZENGES have done me. In December, 1845, I caught a severe cold from riding two or three miles, one very wet night, which settled in my lungs, and quite took away my voice, so that I could not speak above a whisper from that time until December last. I tried all kinds of medicines, but they were of no avail. I was then advised to try your Lozenges, which I did only to please my friends, but before I had finished a 2s 9d tin, my voice, to my great joy, came back as strong as ever.—I am, Sir, yours respectfully, JAMES MARTIN.

THOMAS KEATING, Esq.

Prepared and Sold in Boxes, 1s 1½d; and Tins, 2s 9d, 4s 6d, and 10s 6d each, by Thomas Keating, chemist, &c., 76 St Paul's churchyard, London. Retail by all Druggists, &c.

TRUSTEES, SOLICITORS, AND OTHERS desiring to meet with a well-secured Investment for Money, yielding a liberal Rate of Interest, the principal sum being withdrawable on short notice, may do so by communicating with THOMAS H. BAYLIS, 429 Strand, London.

AIR-CIRCULATING AND ANTI-GREASE HATS, Patented and Manufactured by MAYHEW and CO., 89 New Bond street.

These hats are waterproof, grease-proof, and ventilating; they are peculiarly soft and easy in wear, and insure a comfortable and complete fit to any formation of head, and are also light and durable.

First quality, 21s; second ditto, 17s, Cash.

MR LEWIS AND SON, 113 Strand.—The Royal Lewisian Systems of Writing, Arithmetic, Bookkeeping, and Shorthand, as taught for upwards of fifty years by Mr Lewis, the real inventor and first teacher of these world-renowned and only infallible systems, insures perfection in any of the above branches after a few easy and interesting lessons Persons unable to take the lessons may obtain the inventor's works for self-instruction at his only institution, 113 Strand.

CHIMNEY-PIECES, TOMBS, MONUMENTS, FONTS, &c.—EDWARDES BROTHERS and BURKE, 17 Newman street, Oxford street, London, W., beg to inform the nobility and gentry that they manufacture at their own establishments, in Italy and Belgium, as well as at the above address, every description of marble work, at the lowest possible prices. Their galleries contain specimens of all foreign and British marble quarried, in Chimney Pieces, from 25s to 300 guineas each; MONUMENTS AND TABLETS, from £5; Head and Foot Stones, from 30s each.—Sole agents to the Invernottie Granite Company.

THE FRENCH AND GERMAN PROTESTANT COLLEGE, Netherton House, Clapham, Surrey, combines the comforts of an English home with the advantages of a Continental Education. The French and German Languages, so indispensable to a good education, are taught by resident masters. They give lessons daily. The course of instruction adopted secures for young gentlemen a sound English, Classical, and Mathematical Education, combined with Drawing, History, Geography, and Modern Science. Pupils prepared for the military, naval, merchant, and civil service examinations. Terms, inclusive, from thirty to fifty guineas per annum, according to age and requirements. A difference will be made for two Pupils from the same family. For references and prospectuses apply to Monsieur A. de Chastelain, as above.

ADOPTED LARGELY BY HER MAJESTY'S GOVERNMENT.

CHEAP, LIGHT AND DURABLE ROOFING.

CROGGON'S PATENT ASPHALTE ROOFING FELT has been extensively used and pronounced efficient and particularly applicable for warm climates

1st. It is a non-conductor.

2nd. It is portable, being packed in rolls, and not liable to damage in carriage.

3rd. It effects a saving of half the timber usually required.

4th. It can easily be applied by any unpractised person.

5th. From its lightness, weighing only about 42 lbs to the square of 100 feet, the cost of carriage is small.

INODOROUS FELT, for damp walls and for damp floors, under carpets and floor cloths; also for lining iron houses, to equalise the temperature.

Price ONE PENNY PER SQUARE FOOT.

EAST INDIAN RAILWAY COMPANY.

The Directors of the East Indian Railway Company are prepared to receive applications for Debentures at par for the remainder of the sum of £1,500,000 required to complete the total amount which the Company has the power to borrow on Debentures not convertible into shares.

The payment of the principal and interest in the meantime, at the rate of 5 per cent. per annum, is guaranteed by the Secretary of State for India in Council.

The bonds will be for five years from the 15th December, 1860, transferable by endorsement under the provisions of the 16 and 17 Victoria, cap. 59, without stamp, and the holders may renew them for a second term of five years, upon giving one year's notice to that effect. Failing such notice, the bonds will be paid off at the expiration of the first five years on presentation at the Bank of England.

Payments may be made in full or by instalments, as may be agreed upon.

Interest will accrue on the respective payments from the dates fixed for the same.

No scrip receipt or bond will be issued for a less sum than £50.—By order of the Board,

D. I. NOAD, Secretary.

East Indian Railway House, Alderman's walk, New Broad street, London, Jan. 22, 1861.

MADRAS RAILWAY COMPANY.—Her Majesty's Secretary of State for India having authorised the Directors of this Company to raise the sum of £1,000,000 on Debentures not convertible into Stock, the Directors are prepared to comply with applications to that extent for Debentures at par, bearing interest at 5 per cent. per annum, payable by coupon, half-yearly, at the Union Bank of London.

The payment of the principal and interest is guaranteed by the Secretary of State for India in Council. The Debentures will be for five years, from the 1st of January, 1861, transferable by endorsement without stamp, and renewable at the option of the holder for a second term of five years, at the same rate of interest.

Debentures will not be issued for any less amount than £50.

The Directors will also receive applications for the amount which remains to be allotted of the previous Debenture Loan of £1,000,000 convertible into Stock of the Company. These Debentures are for five years, or four years, at 5 per cent. per annum, payable by coupon, half-yearly, at the Union Bank of London.

The payment of the principal and interest is guaranteed in like manner by the Secretary of State for India, and the holders of these Debentures have the option at the end of twelve months from their date, and thenceforward, of converting them into Capital Stock of the Company, bearing 5 per cent. interest, guaranteed under the contract entered into with the East India Company.

Forms of application for either or both descriptions of Debentures may be obtained at the Offices of the Company.—By order of the Board,

JAMES WALKER, Managing Director.

No. 33 New Broad street, London,
1st January, 1861.

EAU-DE-VIE.—THIS PURE PALE BRANDY, though only 18s per gallon, is demonstrated, upon analysis, to be peculiarly free from acidity, and very superior to recent importations of veritable Cognac. In French bottles, 38s per dozen; or securely packed in a case for the country, 39s.

HENRY BRETT and CO.,
Old Furnival's Distillery, Holborn.
To be obtained only at their Distillery

POLYTECHNIC INSTITUTION (Limited). Now open with Great Novelties. Mornings, 12 to 5. Evenings, 7 to 10.—Admission 1s. Schools and Children under Ten Years of Age, Half-price.

NEW THEATRE ROYAL ADELPHI. Sole Proprietor and Manager, Mr B. Webster.

Last 18 Nights of THE COLLEEN BAWN in consequence of Mr and Mrs Dion Boucicault's provincial engagements.

On Monday, and during the week, AN UGLY CUSTOMER. Mr J. L. Toole, C. Selby, Miss K. Kelly, and E. Thorne. THE COLLEEN BAWN. Messrs D. Boucicault, D. Fisher, Billington, Falconer, Stevenson, C. J. Smith, Romer; Miss Agnes Robertson, Woolgar, Mrs Billington, Chatterly. And BLUE BEARD FROM A NEW POINT OF HUE. Messrs J. L. Toole, P. Bedford, C. J. Smith; Miss Woolgar, K. Kelly, Laidlaw, and E. Thorne. Commence at 7. Stage Manager, Mr R. Phillips; Acting Manager, Mr W. Smith.

EXTENSIVE SOAP WORKS AND CANDLE MANUFACTORY.

TO BE DISPOSED OF BY TENDER,

the well-known and old-established SOAP BOILING and CANDLE MANUFACTURING BUSINESS, PREMISES, and PLANT, of Messrs COX and SHAW, Marsh Works, St Philip's, and Castle street, Bristol, carried on by them and their predecessors for nearly a century.

THE MARSH SOAP WORKS are FREEHOLD, and consist of a range of commodious water-side premises, about 200 feet in depth, having a frontage to the Kennet and Avon Canal of 344 feet, and being very near the goods station of the Midland Railway, and the lines connected therewith. They are fitted up with all the requisite Plant and Machinery, including an excellent 8 horse power condensing Steam Engine, and well supplied with Gas and Water throughout, no expense having been spared to render the whole complete, and capable of carrying on the manufacture on a very large scale. There is a manager's residence, and 8 workmen's cottages.

The CASTLE STREET PREMISES (also Freehold) comprise a Candle Factory, Counting Houses, and Warehouses; there is also a Retail Department in connection with it, doing a very extensive ready-money trade.

The Plant here includes Steam Boiler and Gear, Patent and other modern Machinery.

Full £20,000 have been laid out on these establishments.

An excellent opportunity presents itself to enterprising individuals of embarking in a first-class concern of high reputation, and in full working order, or of forming a Joint Stock Company. The connection embraces South Wales, South and West of England, and the Midland Counties.

Sealed tenders will be received, addressed to the undersigned, until the 13th March next. A separate offer may be made made for either of the above establishments.

For all particulars application may be made to Messrs Henry Brittan and Son; Smith and Vassall; and Abbot, Lucas, and Leonard, of the city of Bristol, Solicitors; of Mr William Bartram, Accountant, St Leonard's chambers; or of Barnard, Thomas, and Co, Albion chambers, Bristol.

February 27th, 1861.

THE IMPORTANT FREEHOLD and COPYHOLD PREMISES known as the WHITECHAPEL DISTILLERY.

MESSRS FULLER AND HORSEY

are instructed to SELL by AUCTION (unless previously disposed of by private contract), on MONDAY, March 18, at 11 for 12 precisely, on the Premises, in Two Lots, the highly important FREEHOLD and COPYHOLD PROPERTY well known as the WHITECHAPEL DISTILLERY, the property of Messrs Smith and Co. The site occupied is about three acres, covered with buildings of the most substantial character, arranged in the most perfect manner for the purposes of the distillery business, and capable of producing 1,500,000 gallons of spirit per annum. The premises are readily convertible to the purposes of a brewery, or any large manufacturing establishment. The property is situate in Buck's row, a wide thoroughfare in Whitechapel, within a few paces of the London Hospital. The buildings are entirely and securely enclosed by lofty walls. There is a most commodious residence for a principal, finished in the best taste. The manufacturing premises consist of a block of buildings of great extent, occupying the central portion of the yard, accessible by carts or wagons on all sides,—and comprising—1. The Brewhouse: a substantial, lofty, ground-floor building, with basement, brewer's room, men's room, sitting room for revenue officers, and store rooms. 2. The Cooler-house: a lofty building of three floors, strongly timbered on iron columns, with lantern lights in the roof, and folding shutters. 3. The Back Rooms, two in number. 4. Yeast-house. 5. A deep Artesian Well, affording a nearly inexhaustible supply of pure liquor. 6. The Mill, substantially built of brick, of four floors. 7. The Old Mill, a brick building of three floors. 8. Steam-engine House, Boiler-house. 9. The Still-house. Surrounding the main building are various accessory erections, including the spirit store, of one lofty ground floor, with dry basement, loop-hole doors, offices for clerk, &c. A most substantial brick building of three floors, strongly timbered on iron columns, used as a joiners' shop and stores, a steam-engine house, boiler house, bricklayers' shed, piggeries, fire-engine house, and surface well steened; an extensive range of brick-built workshops for carpenter, blacksmith, millwright, and cooper, beer-cellar, small brew house or scalding house, and grain shed. The large and commodious yards are paved throughout with granite. Approached from a separate entrance are the duty-free spirit warehouse, a lofty ground-floor building, store for methylated spirit, a brick building adjoining, of two floors; a paved yard enclosed, containing warehouse of two floors, next Buck's row, and sundry other conveniences: also a very superior range of counting-houses, of two floors and basement, partly fitted as a dwelling-house. —May be viewed, by cards only, which may be had of the Auctioneers. Printed particulars are in course of preparation, and, with plans, may be obtained in due time of Messrs M'Leod, Stenning, and Watney, solicitors, London street, E.C.; of Messrs Tennant and Darley, solicitors, 4 Raymond buildings, W.C.; of Messrs Bockett, Son, and Barton, solicitors, 60 Lincoln's inn fields; of S. Lowell Price, Esq., accountant, 5 Gresham street, E.C.; and of Messrs Fuller and Horsey, Billiter street, E.C.

ALLEN'S PATENT

PORTMANTEAUS and TRAVELLING BAGS with square openings.

LADIES' WARDROBE TRUNKS, DRESSING BAGS, with silver fittings.

Also Allen's Barrack Furniture Catalogue of Portable Bedsteads, Drawers, Easy Chairs, Washhand-stands, Canteens, &c., post free.

J. W. ALLEN, Manufacturer and Patentee, 18 and 22 West Strand, London, W.C.

TO INVESTORS.—

Five per cent. interest allowed on Money, withdrawable at Short notice. Undoubted Security. Particulars furnished on application to THOMAS H. BAYLIS, 429 Strand, London.

TO CORN MERCHANTS.—

Wanted by a young man (a foreigner), a Situation as Clerk in a good house in the Corn Trade. He speaks and corresponds in English, German, and French, and would be able to make himself useful in all other respects. First-rate references. — Apply by letter addressed to D. U., 18 Exeter street, Strand.

TO BANKERS, PUBLIC

COMPANIES, and OTHERS.—A Gentleman, 25 years of age, and of Scottish birth, now, and during the past 5 years, engaged in a leading London Banking House, is desirous to obtain an appointment, either in a confidential capacity or as Cashier or Accountant, in London or the country. High testimonials from present and former employers.—Address, "Scotus," care of Mr Smithers, 100 Leadenhall street, London.

TO CAPITALISTS, GENTLEMEN,

and OTHERS.—A Gentleman, age 49, who has freehold property £26, and leasehold £104, making £130 per annum, is desirous of entering into an arrangement to Receive £320 per annum during the remainder of his life. All the property (on security) will be made over to the party, and will at the decease of the Gentleman become the party's absolutely.—Apply, by letter, post-paid, to X. S., care of J. Radford, Esq., 10 Mortimore road, St John's wood.

BOMBAY.—A GENTLEMAN WHO

is about to proceed to the above place, will be happy to undertake any Commissions that might be intrusted to him. References of undoubted respectability can be given.—Address Alpha, 16 Roseberry villas, Tufnell park west, Upper Holloway, N.

CLERK.—WANTED BY A

Gentleman (26 years of age) who has been some years in a good house of business in the City, a situation as Clerk in a Merchant's Office. Very respectable references can be given.—Address S. M., care of Messrs Davies and Co., 1 Finch lane, Cornhill.

PARTNERSHIP.—

An opportunity presents itself of joining the advertiser either as Active or Sleeping Partner in a long-established, respectable, wholesale iron and ironmongery trade, having a very old and extensive connection in the West of England and the Southern counties. A capital, to pay out a retiring partner, of £8,000 to £10,000 will be required.—Apply by letter to Mr John Moxham, accountant, Bristol.

BANKERS' CLERK.—WANTED

immediately, in a Country Bank in an agricultural district, a Second Clerk, capable of undertaking the general duties of such a situation. A preference will be given to one who has been brought up in a similar establishment, and is conversant with the routine of country business. Age not to be less than 25 years.—Address stating particulars, S. B., care of Messrs Barnett, Hoare, and Co., Lombard street, London.

BOOKKEEPER.—WANTED IN A

Merchant's Office, a Clerk thoroughly competent to take entire charge of the Books. Age not to exceed 26 or 27. References of the highest character will be required.—Apply by letter, with full particulars, stating age, salary, &c., to B., care of John Ball, Esq., Messrs Quilter, Ball, and Co., 3 Moorgate street, City.

MERCANTILE SHIPPING

AGENCY. Established upwards of 80 years.

The mercantile community is respectfully informed that Merchandise of every description is received, forwarded, and insured, agreeably with instructions, to and from all parts of the world, by steam or sailing vessels.

W. J. HALL and CO., Sworn Brokers,
(Successors of Holmes, Hall, and Sons,)
Wharfingers and Bonded Warehouse Keepers, under special security, Custom House and Wool Quays, Lower Thames street, E.C., London.

MERCHANTS HAVING

commissions for Furniture or Carpets of a superior class, are respectfully invited to visit the manufactory and show rooms of Messrs JACKSON and GRAHAM. By the introduction of machinery worked by steam power in various processes, J. and G. have effected a considerable improvement and economy in the manufacture of furniture, and their spacious show rooms afford to purchasers unrivalled facilities for the selection of all requisites, useful and ornamental, in the best taste. Four show rooms, each 120 feet long, are exclusively devoted to the display of Bedsteads and Chamber Furniture. J. and G. are also large importers of Silks, Tapestries, and other Fabrics for Curtains, and their Gallery of Bronzes d'Art is the sole depot for the celebrated productions of F. Barbedienne and Co., of Paris, which they sell at the prices of the Paris catalogue, with 5 per cent. added for expenses of importation.

TRADE S/P MARK.

BROWN AND POLSON'S PATENT CORN FLOUR.

The LANCET states,

"This is superior to anything of the kind known."

FIRST OF THE KIND

Manufactured and Patented in the United Kingdom and France, as explained with Engravings in THE ILLUSTRATED LONDON NEWS, of May 26th, 1860. Prepared without fermentation, it is warranted to keep sweet for years. It is respectfully suggested that the Trade Mark, and name in full should be observed on each Package, as similar articles are sometimes substituted or recommended as "the same" or "as good as Brown and Polson's." BROWN and POLSON, Manufacturers and Purveyors to Her Majesty: Paisley, Manchester, Dublin, and London.

FREDERICK DENT,

Chronometer, Watch, and Clock Maker to the Queen and Prince Consort, and maker of the Great Clock for the Houses of Parliament, 61 Strand, and 34 Royal Exchange.

THE LIVERPOOL AND LONDON FIRE AND LIFE INSURANCE COMPANY.

ESTABLISHED 1836. EMPOWERED BY SPECIAL ACTS OF PARLIAMENT.

This Company has attained a very high position amongst the Insurance Institutions of Great Britain. Its annual revenue exceeds 500,000*l*; its invested funds amount to 1,260,000*l*.

FIRE DEPARTMENT.

The Premiums exceed 310,000*l*, and place it in the first class of Fire Offices; its liberality and promptitude in settling claims have been established in the adjustment of enormous losses; and its influence in determining rates of Premium has uniformly been given to proposals for improving the character of risks that high Premiums may be unnecessary.

LIFE DEPARTMENT.

The Reserve in this Department has been increased by the addition of upwards of £58,000 in the year 1860 alone. The system of Bonuses is simple, involving no possible liability of partnership; liberal, guaranteeing a more than average amount of benefit; satisfying, because known at the date of the Insurance, and therefore free from disappointment, uncertainty, and doubt. The arrangements in other respects are intended to render the Policies of THE LIVERPOOL AND LONDON perfect securities in the hands of third parties. The Annual Premiums exceed 130,000*l*; the accumulated reserve is £707,000.

ANNUITIES.

The payments by the Company exceed £19,000 per annum. Every facility is afforded to persons purchasing Annuities to enable their receipt at such times and places as may be convenient, and the terms and rates will be found satisfactory.

PROGRESS OF THE COMPANY.

The following TABLE exhibits the gradual growth, during TWENTY-FIVE YEARS, and present position of the Company.

Year.	Fire Department. Amount of Premiums.	Fire Department. Amount of Losses.	Capital and Reserved Fund. Amount of each Year's Dividend.	Capital and Reserved Fund. Capital on which Dividend was Paid.	Capital and Reserved Fund. Accumulated Funds.	Life Department. Amount of Premium.	Life Department. Amount of Claims.	Age of Company.

INTERNATIONAL DECIMAL ASSOCIATION.—The Fourth and Last of a Course of Four Lectures on the Metrical System of Weights and Measures, will be delivered at the Society of Arts, John street, Adelphi, on Thursday, March 14, 1861, at 8 p.m., "On the Importance to Education of the Introduction of the Metrical System of Weights and Measures," by JAMES YATES, Esq., M.A., F.R.S. Admittance free to any gentleman on presentation of his card.

MERCHANTS HAVING commissions for Furniture or Carpets of a superior class, are respectfully invited to visit the manufactory and show rooms of Messrs JACKSON and GRAHAM. By the introduction of machinery worked by steam power in various processes, J. and G. have effected a considerable improvement and economy in the manufacture of furniture, and their spacious show rooms afford to purchasers unrivalled facilities for the selection of all requisites, useful and ornamental, in the best taste. Four show rooms, each 120 feet long, are exclusively devoted to the display of Bedsteads and Chamber Furniture. J. and G. are also large importers of Silks, Tapestries, and other Fabrics for Curtains, and their Gallery of Bronzes d'Art is the sole depot for the celebrated productions of F. Barbedienne and Co., of Paris, which they sell at the prices of the Paris catalogue, with 5 per cent. added for expenses of importation.

MERCANTILE SHIPPING AGENCY. Established upwards of 30 years.
The mercantile community is respectfully informed that Merchandise of every description is received, forwarded, and insured, agreeably with instructions, to and from all parts of the world, by steam or sailing vessels.
W. J. HALL and CO., Sworn Brokers,
(Successors of Holmes, Hall, and Sons,)
Wharfingers and Bonded Warehouse Keepers, under special security, Custom House and Wool Quays, Lower Thames street, E.C., London.

UNITED STATES, CANADAS, &c.
S. E. DARLING and CO., 6 Pine street, New York, formerly with Messrs Duncan, Sherman, and Co., Bankers, to whom they have permission to refer, also the Broadway Bank, Peoples' Bank, Bank of the Commonwealth, &c., make Collections of Drafts, Notes, Bonds, Coupons, Dividends, Legacies, &c., in all parts of America, with prompt returns in remittances on London and Westminster Bank. Commissions, one-eighth per cent.
American Stocks and Bonds bought and sold in New York, Philadelphia, Boston, &c. Commissions, one-eighth per cent.
Interest allowed on current accounts.

THE CITY TURKISH BATHS,
5 SOUTH STREET, FINSBURY.
Open daily, Sundays excepted.
The bath, in addition to being a great curative agent is the greatest physical luxury in the world.

SOUTH AUSTRALIAN BANKING COMPANY.—Incorporated by Royal Charter, 1847.—Letters of Credit and Bills issued upon Adelaide, Port Adelaide, Gawler, and Robe. Approved Drafts negotiated and sent for collection.
Every description of Banking business conducted with Victoria and New South Wales, through the Company's Agents. WILLIAM PURDY, Manager.
54 Old Broad street, E.C.

TO MERCHANTS.—A Gentleman having a thorough knowledge of Insurance business (having been 10 years in business on his own account) is open to manage that department in a Merchant's office. The highest testimonials can be given.—Address G S., 65 Moorgate street, City.

TO MERCHANTS, PUBLIC COMPANIES, &c.—A "Total Abstainer," of ten years' standing, of lengthened experience in Banking, Assurance, and General Business, and able to furnish undoubted references as to character and qualifications, is open for an immediate confidential appointment at home or abroad.—Address X., 35A Moorgate street, E.C.

TO MERCHANTS, SHIPBROKERS, and OTHERS.—Wanted, by a Gentleman of twelve years' experience in a Merchant and Shipowner's office, a re-engagement as Shipping Clerk, Collector, or otherwise. Can have the highest testimonials from his present employers, with whom he has been seven years. Reason for leaving—the winding up of the firm.—Address A., 37 Hart street, Bloomsbury square, W.C.

TO MERCHANTS AND BROKERS.—A Young Man, 21 years of age, who has recently left a Merchant's office where he has been employed for the last four years, is anxious to obtain a similar situation. Understands Bookkeeping by double entry, and the duties of an office generally. The highest recommendations as to character and ability can be furnished.—Address E. C., 3 Mall terrace, Kensington, W.

TO WOOLLEN MANUFACTURERS.—To be Sold, a large and important Cloth Manufactory, situated in Austria, near Brünn, between Vienna and Prague, and supplied with water and steam power, together with extensive Plant and all necessary machinery and appliances for carrying on a large manufacturing business. The machinery includes ten spinning assortments of the best Belgian make.—For particulars, apply by letter to A. B., Messrs Good, Moorgate street, London.

A GENTLEMAN, 15 years established in Manchester as Importer of an article extensively used in Lancashire, is disposed to take a Partner with a capital of £4,000 to £5,000, by means of which the business could be considerably and advantageously increased.—Address S. 55, Post Office, Manchester.

A PARTNER WANTED in one of the oldest-established Manufacturing concerns in the Midland Counties. A gentleman of business habits, having £4,000 at command, would find the opening a desirable one. None but principals or their solicitors treated with.—Apply by letter to A. B., care of Messrs Stileman and Neate, solicitors, 26 Orchard street, Portman square, London, W.

WANTED, FOR THE SKIN AND Hide Trade, a Gentleman thoroughly acquainted with the business, able to manage the buying department, must understand rough and raw goods. None but competent persons need apply. Liberal salary will be given to an able person.—Address, with full particulars, with former or present employment, to C. N., Post Office, Fenchurch street, E.C.

ART-UNION OF LONDON.—Subscription, One Guinea.—Prizeholders select from the Public Exhibitions—Every Subscriber has a chance of a Valuable Prize, and in addition receives an impression of a large and important Line Engraving by J. T. WILLMORE, A.R.A., from the original picture by TURNER, in the National Collection, entitled "Italy, Childe Harold's Pilgrimage," now ready for delivery. Subscription closes 30th inst.
GEORGE GODWIN, } Hon.
444 West Strand. LEWIS POCOCK. } Secs.

EAU-DE-VIE.—THIS PURE PALE BRANDY, though only 18s per gallon, is demonstrated, upon analysis, to be peculiarly free from acidity, and very superior to recent importations of veritable Cognac. In French bottles, 38s per dozen; or securely packed in a case for the country, 39s.
HENRY BRETT and CO.,
Old Furnival's Distillery, Holborn.
To be obtained only at their Distillery.

UNITED KINGDOM LIFE ASSURANCE COMPANY,

8 WATERLOO PLACE, PALL MALL, S. W.

THE HON. FRANCIS SCOTT, CHAIRMAN.
CHARLES BERWICK CURTIS, ESQ., DEPUTY-CHAIRMAN.
FOURTH DIVISION OF PROFITS.

SPECIAL NOTICE.—Parties desirous of participating in the fourth division of profits to be declared on policies effected prior to the 31st December, 1861, should make immediate application. There have already been three divisions of profits, and the bonuses divided have averaged nearly 2 per cent. per annum on the sums assured, or from 30 to 100 per cent. on the premiums paid, without the risk of copartnership.

To show more clearly what these bonuses amount to, the three following cases are given as examples:—

Sum Insured.	Bonuses added.	Amount payable up to Dec., 1854.
£	£ s	£ s
5,000	1,987 10	6,987 10
1,000	397 10	1,397 10
100	39 15	139 15

Notwithstanding these large additions, the premiums are on the lowest scale compatible with security; in addition to which advantages, one-half of the premiums may, if desired, for the term of five years, remain unpaid at 5 per cent. interest, without security or deposit of the policy.

The Assets of the Company at the 31st December, 1859, amounted to £690,140 19s, all of which had been invested in Government and other approved securities.

No charge for Volunteer Military Corps whilst serving in the United Kingdom.

Policy Stamps paid by the Office.

For prospectuses, &c., apply to the Resident Director, No. 8 Waterloo place, Pall Mall.

By order, E. L. BOYD, Resident Director.

THE TWENTY-SEVENTH ANNUAL REPORT, ACCOUNTS, and BALANCE SHEET of THE MUTUAL LIFE ASSURANCE SOCIETY for the year 1860 are now published, and may be had by a written or personal application to the Head Office, or to any of the Society's Agents.

CHARLES INGALL, Actuary.

The Mutual Life Assurance Society,
39 King street, Cheapside, E.C. London.

ESTABLISHED 1844.

GREAT BRITAIN MUTUAL LIFE ASSURANCE SOCIETY,

MANAGER OF BERLIN BRANCH,
F. J. Liebmann, Esq., 47 Unter den Linden.

PLAN OF THE GREAT BRITAIN MUTUAL LIFE ASSURANCE SOCIETY.

This Society is established on the tried and approved principle of mutual assurance. The funds are accumulated for the exclusive benefit of the members under their own immediate superintendence and control. The profits are divided annually, and applied in reduction of the current premiums.

The members of this Society consist of two Classes; one class comprising policy-holders who pay the full amount of premium during the first five years, and then become entitled to participate in the profits during the remainder of their respective lives; the other class comprising policy-holders who pay half the amount of premium, only, during the first five years, and thenceforth pay the whole amount during the ensuing five years; after which period they become entitled to participate in the profits equally with other members.

Every member assured for £500 is entitled, after payment of one whole annual premium, to attend and vote at all general meetings. Members assured for larger amounts are entitled to one vote for every £500 assured.

No claim can be litigated or disputed except with the concurrence of the members present at a general meeting, specially convened on the occasion.

The Directors and Auditors consist of members assured to the extent of £1,000. The Auditors and three of the Directors vacate their offices annually, but are eligible for re-election by the members.

Extensive tables of non-participation rates have been constructed for the accommodation of different classes of policy-holders.

Application for agencies may be made, and every requisite information relative to this Society, and the mode of effecting assurances, obtained on application to

C. L. LAWSON, Secretary, London.

METAL FOILS AND CAPSULES.—

METAL FOILS and CAPSULES of every description are now being manufactured and supplied by Wimshurst's Patent Metal Foil and Sheet Metal Company (Limited). Samples and prices forwarded on application.

Offices, 16 Bishopsgate street within, E.C.; Works, Old Ford, Bow, E.

Government Officials.—Reduction in Scale of Premiums.

THE EUROPEAN ASSURANCE SOCIETY

ISSUES POLICIES of GUARANTEE, at reduced rates, for officials in or under the Treasury, Customs, Inland Revenue, Board of Trade, Poor Law Board, Admiralty, and other public departments, and for bank and railway clerks and persons in commercial employments.

Further reductions on the combination of life assurance with guarantee. Annuities granted on favourable terms.

Forms and every information may be obtained at the Chief office, No. 2 Waterloo place, Pall Mall, London.

SUN LIFE ASSURANCE SOCIETY,

Threadneedle street, London.

The Profits of this Society will be divided in future Quinquennially; and Policies will participate at each division, after Three Annual Payments of Premium have been made.

Policies effected now will Participate in Four-fifths, or 80 per cent., of the profits, according to the conditions contained in the Society's Prospectus.

The Premiums required by this Society for insuring young lives are lower than in many other old established Offices, and Insurers are fully protected from all risk by an Ample Guarantee Fund in addition to the accumulated funds derived from the investments of Premiums.

No charge for service in the Militia or in any Yeomanry or Volunteer Corps in the United Kingdom.

Policy stamps paid by the office.

Prospectuses may be obtained at the office in Threadneedle street, London, or of any of the Agents of the Society.

CHARLES HENRY LIDDERDALE, Actuary.

EMPEROR LIFE AND FIRE ASSURANCE SOCIETIES.

78 Cannon street west, and Queen street, London.

TRUSTEES.—J. F. Bontems, Esq.; Ebenezer Clarke, Esq.; Richard Harris, Esq.

Seventy per cent. of the profits given to the assured.

Upwards of 2,500 Life Policies have been issued during the past year.

Quarterly payments for a sum payable at death, or if living at a given age—

	For £20.	£50.	£100.	£500.
	s d	s d	s d	£ s d
Age 21	1 11	4 9	9 6	2 7 6
— 25	2 2	5 3	10 0	2 12 6
— 30	2 5	6 0	11 11	2 19 7

Policies made payable during the lifetime of the assured, without extra premium, in accordance with the reccommendation of the Select Committee of the House of Commons.

Claims paid to the policyholder within 14 days after satisfactory proof of death.

Stamps and medical fees paid by the office.

Loans granted on real and personal security.

Fire Insurance at the usual rates.

EBENEZER CLARK, Jun., Sec.

LONDON LIFE ASSOCIATION,

81 King William street, E.C. Instituted 1806.

PRESIDENT—Charles Franks, Esq.
VICE-PRESIDENT—John Benjamin Heath, Esq.

TRUSTEES.

Francis Hy. Mitchell, Esq. | Robert Hanbury, Esq.
Alfred Head, Esq. | Bonamy Dobree, Esq.

The London Life Association was established more than 50 years ago, on the principle of mutual assurance, the whole of the benefits being shared by the members assured. The surplus is ascertained each year, and appropriated solely to a reduction of the premiums, after seven yearly payments have been made.

If the present rate of reduction be maintained, persons now effecting assurances will be entitled, after seven years, to a reduction of 72½ per cent., whereby each £10 of annual premium will be reduced to £2 15s.

	£
This Society has paid in claims more than ...	4,000,000
And has policies now in force amounting to...	6,440,000
For the payment of which it possesses a capital exceeding.....	2,700,000
And a gross income from premiums and interest of more than.....	335,000

Assurances may be effected for any sum not exceeding £10,000 on the same life.

The Society has no agents and allows no commission.

EDWARD DOCKER, Secretary.

ENGLISH, SCOTTISH, AND AUSTRALIAN CHARTERED BANK.

Capital paid up, 500,000*l.*

LETTERS OF CREDIT ON THE BRANCHES are GRANTED on the most favourable terms. Bills on the Australian Colonies negotiated and sent for collection.—By order of the Court,

73 Cornhill, E.C. HENRY MOULES, Secretary.

LONDON CHARTERED BANK OF AUSTRALIA.

Incorporated by Royal Charter.
Paid-up capital, £700,000.
CHAIRMAN—Duncan Dunbar, Esq.
DEPUTY-CHAIRMAN—William Fane De Salis, Esq.
Offices, 17 Cannon street, E.C.

Letters of Credit and Bills of Exchange are granted on the Branches of this Bank at Sydney, Melbourne, Geelong, Ararat, Ballaarat, Dunolly, and Maryborough.

Drafts on the Australian Colonies negotiated and sent for collection.—By order of the Court,

JAMES STRACHAN, Secretary.

BANK OF VICTORIA,

AUSTRALIA.

Paid-up Capital, £500,000.
London office, 3 Threadneedle street.

The London Board of Directors grant Letters of Credit and Drafts on the Head Office of the Bank at Melbourne, and its Branches at Avoca, Ballaarat, Beechworth, Belfast, Castlemaine, Geelong, Hamilton, Maryborough, Portland, Port Albert, Gipps Land, Raglan, Sale Gipps Land, Sandhurst, Warnambool.

They also purchase approved Bills of Exchange, send Bills for collection, and transact every kind of Banking and Exchange business between this country and the Australian Colonies.

JOHN MATHESON, Managing Director.

BANK OF AUSTRALASIA

(Incorporated by Royal Charter, 1835), No. 4 Threadneedle street, London.

Paid-up Capital £900,000, with power to increase to £1,200,000. Guaranteed Fund £200,000.

LETTERS of CREDIT (payable on demand) and BILLS of EXCHANGE are GRANTED on the undermentioned branch establishments, on favourable terms:—

Sydney	Geelong	Warrnambool
Maitland	Ballarat	Portland
Newcastle	Sandhurst	Hobart Town
Brisbane	Castlemaine	Launceston
Ipswich	Beechworth	Adelaide
Melbourne	Belfast, Port Fairy	
Williamstown		

Bills drawn on Australia are also forwarded for collection.

Applications to be made at the office of the Corporation, No. 4 Threadneedle street, London.—By order of the Court, WILLIAM MILLIKEN, Secretary.

COMMERCIAL BANKING COMPANY of SYDNEY, NEW SOUTH WALES.

Incorporated by Act of the Colonial Legislature.
London Office, No. 33 Cornhill.

LONDON BOARD.

John Gilchrist, Esq. | Frederick Parbury, Esq.
Edwin Brett, Esq.

The London Board of Directors grant Letters of Credit payable on demand, and Bills of Exchange at thirty days' sight, on the Sydney office, and on the following branches of the Bank in the Colony of New South Wales, viz.:—

Albury	Goulburn	Maryborough	Shoalhaven
Cooma	Kiama	Morpeth	Wollongong
Eden	Maitland	Queanbeyan	Yass

They also negotiate approved Drafts on the Australian Colonies, forward Bills for Collection, and transact every description of banking business with Australia, on the most favourable terms, through the above-named establishments of the Bank in New South Wales, and its agents in Victoria, South Australia, and Tasmania.

EDWIN BRETT, Manager.

No. 33 Cornhill, London, E.C., July, 1860.

CHARTERED MERCANTILE BANK

of INDIA, LONDON, and CHINA.

Capital £500,000, of 20,000 shares of £25 each paid up in full. Reserve fund £50,000.

HEAD OFFICE, 52 Threadneedle street.

Agencies and Branches at Bombay, Calcutta, Madras, Colombo, Singapore, Penang, Hong Kong, Shanghai, and Mauritius.

The Bank, at its Head office in London, grants Drafts on its various Agencies and Branches; issues Letters of Credit; purchases approved Bills on India, China, Ceylon, and Mauritius; undertakes the purchase and sale of Indian Government and other Securities, and the collection of Private and Mercantile Bills, at the ports and places at which its Agencies are established; receives Deposits at Interest for Fixed Periods, the terms of which may be ascertained on application; and transacts generally all Indian Banking business, including the receipt of Pay, Pensions, and Dividends on Stock of all kinds.

Office hours, 10 to 3; Saturdays, 10 to 2.

ORIENTAL BANK CORPORATION.

Incorporated by Royal Charter, 30th Aug., 1851.

Paid-up capital, £1,260,000; reserved fund, £252,000.

The Corporation grant Drafts, and negotiate or collect Bills payable at Bombay, Calcutta, Madras, Ceylon, Hongkong, Singapore, Mauritius, Melbourne, Sydney, Auckland, and Wellington, on terms which may be ascertained at their office. They also issue Circular Notes and Letters of Credit for the use of Travellers by the Overland Route. They undertake the agency of parties connected with India, the purchase and sale of Indian Securities, the safe custody of Indian Government Paper, the receipt of Interest, Dividends, Pay, Pensions, &c., and the effecting of remittances between the above-named dependencies.

They also receive deposits of £100 and upwards, repayable on a notice of 10 days, and allow interest thereon at 1 per cent. below the Bank of England minimum rate of discount, not falling below 2 per cent. nor rising above 5 per cent. Deposits subject to longer notices of repayment bear higher rates which may be ascertained at their office.

Office hours 10 to 3. Saturdays, 10 to 2.

Threadneedle street, London, March 23, 1860.

The Political Economist.

EXCHEQUER BILLS.

The remarkable proposals which Mr Gladstone submitted to the House of Commons on Monday last cannot be adequately estimated without some careful consideration of the peculiar circumstances which have affected more or less the value and the *status* of Exchequer bills during the last few years. Their position now is less favourable than it was formerly, and we should comprehend accurately the reason of the change. Unless we see distinctly the origin of the evil, we shall probably fail in all our efforts to cure or modify it.

Two causes have contributed to diminish the popularity of Exchequer bills of late years, one of which is permanent and natural, and the other temporary and casual. The permanent evil influence is the development of competition. Not very many years since Exchequer bills were the only investment the holder of which felt perfectly certain that he would have his principal in a short time. Consols are safe and secure as far as the annual interest is concerned, but they are very insecure as far as respects the invested principal. They are perfectly unsuitable for persons who must have their money by a certain day, for the price at which they must then be sold may be several *per cent.* less than the price at which they were at first purchased. Exchequer bills are to a great extent exempt from such fluctuation; they are twelve months' bills. The holder of Consols can never ask the Government for his money; he has merely purchased a perpetual annuity payable by the State, and as long as he receives this annuity from the State he has all he can require; but the State has undertaken to pay the 'bearer' of an Exchequer bill on a stated day, and come what may, we know that if the 'bearer' wishes it the contract will be kept. Accordingly, as it was always certain that 500*l* could be obtained from the Treasury for a 500*l* Exchequer bill within a few months, they were until recently the favourite and almost the only investment selected by those who required their money within a short space of time.

All persons familiar with the most patent facts of the money market at present, know well how completely this exclusive *prestige* of Exchequer bills has passed away. As a mode of employing money that will soon be wanted, they are inferior, and are known to be inferior, to several other equally familiar modes. A gentleman who has 10,000*l* waiting to complete a purchase, does not invest the money as he once would have done in Exchequer bills in one case out of ten. He takes it to a joint stock bank or to a London bill-broker, and leaves it on deposit at interest. He generally gets more for his money in this way, and he likewise is absolutely secure against loss by the fluctuations of the market. When the deposit note is due,—and it is due after a few days' notice,—the exact sum he deposited will be paid. The holder of Exchequer bills is not *absolutely* so secure. A twelvemonth bill, though it is a bill of the State, is not by any means a thing of invariable value; it varies less than most other securities, still it does vary. It is quoted at a premium or at a discount, as the case may be. As the London joint stock banks are in excellent credit, and the London bill-brokers are not only in excellent credit but also give security, it is not surprising that the exclusive prestige of Exchequer bills is passed away, and that they are not now sought as they once were whenever money which would soon be required, had nevertheless to be invested in an interest-bearing security.

A temporary cause has accelerated the diminution of the popularity of this security. Alderman Salomons justly observed on Monday evening, that the "events of 1853" had given a material blow to its acceptability in the money market. In 1853 Exchequer bills were circulating at a high premium; and, as we remarked at the time, nothing was more really inconsistent with their true character. "The peculiar recommendation of Exchequer bills," we then said, "is, that on a given, and not dis-"tant day, they are payable at the option of "the holder, in a certain and specified sum; so "that, at least, no risk is encountered so far as regards the "principal. But it must be quite obvious that when Ex-"chequer bills are circulating at a high rate of premium, "one of the chief qualities which they possess is de-"stroyed. The premium paid becomes at once a margin "of uncertainty, which, though the real sum repre-"sented by the Exchequer bill is ever so sure of being paid, "leaves the premium subject to fluctuation to the extent it "represents. Exchequer bills purchased at par, are ex-"posed to no risk of fluctuation so far as regards the prin-"cipal:—there is every certainty that at least, and within a "moderate time, the principal sum, with the stipulated "interest, will be received. But when Exchequer bills rise "in the market to 60s or 80s premium, that is, when for "every 100*l* bill there is paid 103*l* or 104*l*, the margin "above par becomes a risk of loss which the purchaser "incurs in the ultimate replacement of his capital. Ex-"chequer bills at a high premium, therefore, are deprived "of one very important element of security as a means of "temporary investments."

Under these circumstances Mr Gladstone boldly, if not wisely, resolved to reduce the rate of interest to 30s a year, and, as might have been anticipated, the premium nearly disappeared. That rate of interest is so low—so very much beneath the common expectations of men of business and the fixed notions of the public at large, that they ceased to

be inclined to invest in it. Accordingly those persons who had bought Exchequer bills at a high premium lost the whole of it or nearly so, and amongst bankers and other large holders the unlooked-for and painful calamity is still bitterly remembered. The idea of security which until then was peculiarly associated with an Exchequer bill received a blow which it will still take some years to recover. It was singularly unfortunate that this casual and temporary circumstance should have happened just when from permanent and lasting causes the reputation of Exchequer bills was already on the decline.

An additional slight circumstance has contributed a little to the comparative unpopularity of Exchequer bills. Some of the accessories of them savour of the age of financial barbarism. The whole process of annual presentation and exchange involves, as all persons practically acquainted with the subject will agree, many cumbersome and inconvenient details, which in the present day seem strangely unfavourable in comparison with the ease and facility with which the interest is annually payable on the debentures of public companies.

It is to these evils that Mr Gladstone is now about, as far as possible, to apply a remedy. The inconvenient technicalities are easily remedied. He is about to provide that it shall be unnecessary to present an Exchequer bill yearly for exchange, and that those who abstain from so doing shall be assumed to intend to hold the old bill for another year. The interest will be payable by coupons at the Bank of England.

The other depressing causes are far more difficult to remedy, and it is not possible perhaps to cure them entirely. They arise out of causes which are too deep-seated to be removed, and the best practical expedients at our disposal are but alternatives and palliatives.

Mr Gladstone proposes first that an additional facility be given for raising the rate of interest. That interest is in future to be payable half-yearly, and in consequence the Chancellor of the Exchequer will be able to alter the interest for periods not exceeding six months. A minimum rate is indeed to be fixed for the whole year, but an addition to it is to be made for less than a whole year if necessary.

2ndly. That every Exchequer bill shall be receivable in payment of duties by the Government during the *last* six months of its currency. This is a return to an ancient practice, though with a modification. Previously to 1838, Exchequer bills were payable for duties during the whole period of their currency. In that year, however, a change was made, and it was enacted that they should be so receivable only after they had been issued for twelve months. This, of course, put an end entirely to their employment in payment for duties, as it was not likely that any one who could have his money for the asking would take the less direct course of using his bill in payment of the revenue. The expedient now proposed is intermediate. The bill is to be receivable within the last six months of its currency, and not during the first; and any bill held over from last year is to be considered for this purpose as if it were a new bill issued in this year—that is to say, a bill issued in March, 1861, and held over March, 1862, would not be receivable during the *first* six of the twelve months immediately succeeding the latter date, but would be receivable during the *last* six.

Of the expediency of the first of these alterations hardly any one will doubt. The nearer the rate of interest on Exchequer bills can be made to conform to the market rate of interest the better; the more likely they are to be kept at par—the more likely they are to escape pernicious fluctuations of value.

As to the second proposal, there is more room for doubt. It will unquestionably be advantageous to the holders of Exchequer bills and to the dealers in them. But we entertain some doubts whether in these days of rapid changes in the value of money, some dangerous use may not, on some occasion hereafter, be made of the power of paying the taxes in Exchequer bills. Mr Gladstone himself believes that these fluctuations in the money market are rather increasing than diminishing. In reality, we conform our rate of interest more rapidly and quickly to the value of capital than we formerly did; perhaps too, owing to the enormous augmentation in our mercantile transactions, the value of capital itself rises and falls more rapidly and more frequently than it once did. At any rate, these changes in the rate of interest are more frequent than they once were; and we are far from believing it to be impossible that on some exceptional occasion the revived privilege of tendering Exchequer bills at the Custom House may be used to a greater extent than is convenient to the Chancellor or advantageous to the public interest. It is true that Exchequer bills are usually held or at least deposited in London; but this circumstance is not very material: if a profit can be made by sending Exchequer bills into the country they will very soon go. On all ordinary occasions the revived privilege will work well, but there might be a rare and extreme contingency in which its operation would be pernicious.

The resolutions which Mr Gladstone moved on Monday last were as follows:—

1. That it is the opinion of this Committee that the principal moneys of Exchequer bills issued under the authority of Parliament, together with the interest thereon, which may become payable from time to time, shall be charged upon and paid out of the Consolidated Fund of the United Kingdom, or the growing produce thereof.
2. That the interest on such Exchequer bills shall, during their currency by law, be payable half-yearly by coupons, and shall be paid at the Bank of England.
3. That an option shall be given at the expiration of each 12 months to the holders of Exchequer bills to be paid the principal moneys of all Exchequer bills held by them, and such principal moneys when paid shall be paid to the holders at the Bank of England; and that all Exchequer bills not so paid off from time to time shall have currency for the next 12 months following the date of such option.
4. That during the last six months of each year during which such bills shall have currency by law, such Exchequer bills shall be receivable for duties granted to Her Majesty.
5. That when such Exchequer bills shall be paid off or received for duties, the Commissioners of Her Majesty's Treasury may issue a like amount of Exchequer bills to replace them.

THE AMERICAN FEDERATIONS.

The inherent and incurable weakness belonging to all federations of States, which has now broken up the great American Republic, became plain at a very early period of their history. Within five years of the establishment of their independence, the want of some stronger bond of union between the several United States made itself so keenly felt, that a convocation was summoned for the express purpose of framing a new Federal system, which should enable the thirteen Provinces to act and to hold together as one State; and the Constitution of 1789, which has lasted till 1861, was the result. The special aim of the cautious and able statesmen who framed that Organic Law, was, while leaving each State free as far as all internal and purely municipal arrangements were concerned, to give the Central Government supreme and unquestionable authority in all *national* and international matters. The problem was a very difficult one, inasmuch as the Union was a purely voluntary one, and the members composing it were all jealous in temper and eminently democratic in principles and habits. The *minimum* degree of power which was supposed requisite for the purpose in view was at length unanimously but reluctantly conceded; but, though the bond was *declared* to be indissoluble and eternal, no provisions were introduced, or perhaps could have been introduced, for making it so;—the authors of the arrangement refused even to entertain or discuss the notion of possible secession, and in consequence no clauses were enacted with a view to meet the emergency which has now arisen.

Accordingly, the right of secession having been now claimed, asserted, and actually carried into effect in so peremptory a manner by several of the Southern States, and it being more and more clear every day that, whatever may be thought of the *right*, the *power* of exercising that right does unquestionably exist, and must ultimately be acquiesced in,—a very formidable question presents itself to the Northern mind. It becomes obvious that if South Carolina, Alabama, and Mississippi are entitled to secede, or if, without being theoretically entitled to do so, they nevertheless do secede, and if the Federal Union is obliged to forego all idea of coercion, and formally to acquiesce in, or practically to connive at, their secession,—

then every other State, North or South, may exercise the same freedom, and the whole Republic may be any day dissolved into its component parts. Not only may the Gulf States form one Confederation, the Atlantic States a second, the North-Western States a third, and the Pacific States a fourth; but each State may declare itself independent, since it is already admitted to be sovereign and autonomic. New York may determine to be a Republic by itself; Pennsylvania may secede, as it has already begun to speak of doing; and Maine may join Canada, as many of her citizens have avowed a wish to do, and as perhaps her real interests may dictate. Nay more: this is a question for the South also, as well as for the North. What is to hold the new "Southern Confederation" together? Why should not the Border States, instead of joining them, form a distinct union among themselves? Why should Texas and Georgia remain bound to one another one hour longer than they like? Is it likely that when the Southern Empire extends to Central America and the Isthmus, Panama will consent to be overruled from Charleston? In short, as soon as the critical questions of divisions of debt, territory, and Federal taxes come to be discussed among the States which are now, or may hereafter become, members of the new Federation, what is to prevent them from falling to pieces like a rope of sand? Clearly, nothing but a sense of their mutual interest: and how long will interest prevail over excited passions, local jealousies, and all the solvent forces of uncontrolled Democracy?

It appears to us that all these probable consequences are likely—to say no more—to flow sooner or later from the completion of the severance and the establishment of the new Confederation. And that it must be considered as established, few who have watched the progress of events or read the remarkable, firm, and temperate speech of Mr Jefferson Davis on his inauguration as Southern President, can, we think, feel much doubt. The tone of nearly all private and commercial correspondence from the South confirms this impression. When we meet with a passage like the following in the business letters of a mercantile house to its customers in this country, we shall not entertain much expectation of a retrocession.

Our Southern Confederation of seven valuable Cotton States whose export of cotton last year to all parts of the world amounted to 4,468,913 bales, has been formed by a Congress composed of some of the ablest men of our country, able in the field and in the Cabinet, and is *now in existence*. Such a Government must command the respect of the world. We have desired peace; but because we conscientiously believe and maintain, and mean to maintain, slavery as an institution recognised by the Scriptures, and as the happiest form of government for the African race, it seems our opponents desire to drive us into war. We shall avoid it if we can, as a civil war of all others the Christian most shrinks from; but if forced on us, we shall meet it like "men who know their rights and dare defend them."

It is true that our letters from the North speak in a different strain,—some writing hopefully of reconciliation even now, some writing menacingly of coercion. But it is evident that they look upon the latter alternative as a very deplorable and doubtful one; and, as to the former, they are unable to define whence conciliation is to come, or what appearance of it can be traced. It is true, we are assured, that Mr Lincoln still announces his determination to collect the Customs duties in the ports [of the Seceding States, though he will neither invade nor coerce; but it is difficult to believe that a policy so irritating and so really useless can be long persevered in. It must almost inevitably bring about a war with a people as fiery and proud as the South Carolinians and Louisianians; and for what?—for little more than 4,000,000 dols; for of the total Customs receipts of the Union, the South only contribute *one-twelfth*; and in 1860, the entire revenue derived from this source was under 50,000,000 dollars.

The disruption of the Union we must, therefore, regard as completed, and ere long certain to be accepted, with all its ultimate consequences, as an inevitable fact. But are those ultimate consequences, formidable as they seem at first sight, really to be so much deprecated when calmly looked at with the eye of reason, in the interests of the peace, progress, and civilisation of humanity at large, or even of Transatlantic humanity *per se*? We question it very much. No doubt, as a matter of pride, it may be more gratifying to belong to a vast Empire than to a small State. No doubt, ambitious politicians will prefer to rule "The Great American Republic" rather than "The Southern Confederation," or "The Atlantic Union." No doubt, lovers of power, and especially lovers of aggression, may feel baulked of their dreams of conquest and dominion. But all these are noxious passions which it is not for the good of the world to have gratified. As far as regards all the objects that good men and unselfish men should have at heart, we do not see why three or four independent Republics, in addition to Canada as a distinct State, will not answer better than one absorbing and overwhelming dominion. We are certain that such an arrangement will be more conducive to the peace of Europe. We can feel little doubt that it will also be more conducive to the civilisation of America. Limitation will produce modesty and caution. Competition and example will produce emulation and improvement. Rivalry will beget respect for the rights of others, and decency in asserting their own. There may be jealousies and quarrels, as there are among contiguous European States; but we are much inclined to think that these, even if they occasionally proceed to bloodshed, will have a far less demoralising influence on all concerned than the conviction of boundless power and unmatched grandeur which now inflates the bosom, disturbs the brain, and damages [the principles and sense of justice of nearly every American citizen. The several Commonwealths will keep each other in order, will set each other wholesome and stimulating examples, will afford each other needed and salutary warnings. One obvious danger we think circumstances will compel them to avoid; we mean the wretched folly of protective and hostile tariffs. With the vast extent of contiguous boundary, and with large territories scantily peopled, and traversed by great navigable rivers, we do not see how discrepant Customs duties can, by possibility, be maintained. That Republic which chose to impose a higher tariff than its neighbours would simply divert the course of trade into its neighbours' ports. Internal smuggling *could* not be checked. Thus the most liberal State would virtually dictate the tariff of all the others. This truth, we apprehend, the Northern States will speedily learn, if they are absurd enough to maintain the "Morrill" scale of duties one month after Secession is established. For these reasons we do not look to the future of divided America with much anxiety or evil foreboding. We fear nothing but a dishonourable compromise, a hollow reconciliation, a temporary truce, or a prolongation of the present condition of uncertainty or unsettlement—a futile attempt, in short, to evade or to postpone the inevitable.

CONSERVATIVE REVOLUTIONS AND THE FUNCTION OF AUSTRIA.

When Lord John Russell asserted so strongly on Thursday night that "Austria is a great, regular, and conservative "power in the middle of Europe that tends to preserve many "of the political and social advantages which Europe enjoys," —and added that it was his earnest wish "*as it should* "*be of every Englishman* that Austria may so reconcile the "various parts of her monarchy as to satisfy the wishes of "her subjects and maintain her place as a great Power in "Europe,"—he indicated a rooted bias, not to say prejudice, which he evidently shares with almost all his colleagues in the Cabinet and all the leading members of the Opposition, which we must say gives reason for anxiety to thinking Liberals. We affirm on the contrary, that England, while she certainly has no reason to deprecate any such result, has no reason to wish for it,—that her true attitude with regard both to the Hungarian movement and to the Polish movement which is now threatening to agitate Poland and the great Eastern province of Prussia, is one of absolutely impartial observation, and that there is no reason not only why she should not abstain from active aid to the Governments thus endangered, but why she should even *wish* to see them succeed in re-embodying under their sway the compound nationalities to which their subjects belong. We regard the mere *wish* of our English Administration on such subjects as of vital importance, if for no other reason, because it certainly does determine the energy or languor of our efforts to impose the law of non-intervention on other Powers. Had not the English Administration in 1849 been

really possessed with the traditions of the Foreign Office with regard to Austria, there can be no doubt that the interference of Russia in Hungary would have been resisted in a very different tone, if not eventually prevented. And now again we fear that should the centre of Europe be again convulsed, our policy might be very different in effect, from that which we have pursued in Italy with so much success,—that it would be a policy, not of energetic and significant hostility to intervention, but of feeble and insignificant protest against it. We believe this would be a signal and grievous dereliction of English duty,—and we are, therefore, anxious to show on how worthless a shred of traditional diplomacy the "fixed idea" that England is interested in maintaining the integrity of the Austrian Empire is based.

It may be at once conceded that England *is* interested in maintaining "a great, regular, and conservative power in "the middle of Europe;" but whence the fatality by which, amidst all the teeming indications that Austria is not and is not likely to be such a power, our statesmen still continue to regard with groundless despair all the possibilities that might spring out of the dissolution of the Empire, and to cling with the tenacity of monomania to the notion that the only mode in which the balance of power was formerly sustained in Europe, is the only mode by which it ever will be maintained in all time to come? Are they, then, really blind to the many indications of the day, that strong and conservative States must in future rest more or less on the principle of national unity? Cannot they see, as almost every body else sees now, that those monarchs, whether despots like Alexander or Napoleon, or constitutionalists like Victoria and Victor Emanuel, and we hope we may add William of Prussia, are alone strong who can interpret the wishes of a united nation,—that even the Czar and the King of Prussia are weak in those of their provinces where they are still only recognised as conquerors,—and that Austria, who rules, or professes to rule, at present, one of the most bewildering compounds of races ever supposed to be incorporated under a single Government since the Roman Empire was dissolved, has in all probability let the time when a true amalgamation was possible (if such a time there ever was) pass by, and is now going hopelessly to pieces on this very rock? We assert with the *Times* in its very able article on Tuesday, that "the most conservative politician "must now be converted in some degree to the doctrine of "nationality,"—that "the strongest impulse which acts upon "European communities is that which urges them to unite "with their own kindred." We affirm this to be a fact which no impartial observer of the political tendencies of the day can dispute. Whether it is a *right* impulse in the moral sense of the term, we need not determine. But, looking at the matter as our statesmen look at it, as a question of mere *policy*, we say it ought to be obvious to the most short-sighted that this question of nationality is one of the main elements in any Government's strength and stability.

And not only is it a matter of moral certainty that Austria cannot be a strong and conservative power, cannot in short be a a safe bulwark against France or Russia while these national heartburnings are ever breaking out anew in Hungary and Croatia and Galicia to invite French or Russian intervention,—but it is a remarkable feature of the recent national movements in Europe that they do promise to result in what may in the best sense be called "conser-"vative" powers,—we do not mean of course powers which fail to consult the feelings of the nation,—but powers conservative for purposes of all foreign policy,—powers opposed to aggression and conquest,—powers that will practically check a restless and ambitious spirit in either France or Russia far more effectually than Austria, paralysed by internal dissensions, can ever do. In this sense, both the Hungarian and Italian, and not improbably even the Polish revolution, if successfully effected, would be likely to result in far more substantial support to conservative principles of foreign policy than ever can the present Austrian Empire. "This country," say the Polish memorialists in their remarkable petition to Alexander, "cannot develop itself "morally or materially as long as its Church, its Legislature, "its public education, and all its social organisation are "without the seal of its national genius and its historical "traditions." Is not this,—in effect the very language in which Italy also has so long pleaded for unity and a national Government,—essentially a conservative form of thought and speech? The Italians have proved that their impulse was really conservative, by the wonderful unanimity and self-restraint with which they have rejected the innovating lead of the Republicans and accepted a King who gives to the movement the sanction of "historical traditions." The Hungarians have done all in their power to show that their revolution, too, was and is truly conservative, for they have resolutely taken their stand on the strict rights which have been historically conceded by former rulers to Hungary, they have followed with singular unanimity their natural leaders, and they have proved as convincingly as the Italians themselves that they support and follow only a "party of "Order."

Now, looking at all these indications of the spirit of the modern revolutions,—looking at the unquestionable fact that no one of the European Powers is now strong except so far as it represents a united national sentiment,—and that the only great European Powers which are both strong and pacific—that is, which as regards foreign policy are conservative—are those which combine popular institutions with this united national sentiment,—how, we ask, can we expect to see Austria "a great, regular, and conservative" power while she is what she is? She cannot be "great" while the national sentiment is hopelessly divided and fractional. She cannot be "regular" when her condition is always suggesting to foreign Powers the possibility of some irregular intervention,—she cannot be "conservative" while she has so much anxiety at home as to have no force at her disposal for resisting aggression abroad. The natural elements into which a dissolution of the Empire would resolve it, would offer, we fearlessly affirm, far more hopes of a solid and conservative centre to Europe, to the eye of any clear-sighted statesman, than the existing Austrian Empire can ever do. It is a mere trick of an extinct diplomacy to suppose that the best hope of establishing a stable equilibrium in Europe, is to keep continually replacing in an upright position a body which can never be placed in any position but one of unstable equilibrium. Statesmen get deceived by the mere *word* 'conservative.' That is truly a conservative policy which tends to prevent the necessity of change in future,—not that which clings hard by an untenable *status quo*, and has to sanction innumerable changes in order to restore the constantly failing balance.

FRENCH FREEDOM OF DEBATE.

When, in the course of last year, the Emperor of the French announced his intention thenceforward to allow and encourage freedom of debate in the Senate and the *Corps Legislatif*, as well as freedom of speech in newspapers, provided that freedom observed decorous limits and abstained from attacking his Dynasty and the Constitution of the Empire, most of our contemporaries were inclined to regard it as a mere illusory promise which was not designed, and which would not be permitted, to bear any practical fruits. We ventured to express a different opinion; and though we believed Louis Napoleon to be aiming at an impossible combination of irreconcileable elements—despotic action and free speech—yet we believed that the project was designed in perfect good faith. The truth was that he had become well aware (no man better) that in these days no Sovereign can govern with success or safety—not even in France, not even if the constitution and the popular vote have made him in theory an absolute Autocrat—unless he has the means of knowing and watching the temporary movements as well as the general tendencies of public opinion;—unless in fact he possesses or can contrive some tolerably skilful plan for feeling the national pulse, and ascertaining when he is running counter to the sentiments of his people and when he is harmonising with them;—some barometer which shall give him warning when he is going to far, and when he is in danger of straining the cord too tight. He was too sagacious and observant not to be conscious that journals entirely under the control of the Minister of Police, and Chambers elected under the manipulation of his Prefects and echoing servilely his known opinions, were wholly useless and worse than useless for this purpose. He was sincerely desirous to know what people thought and felt, so long as they were content to express these thoughts and

feelings in moderate language and with decent reticence; and he fancied that the checks and the degree of supervision which he would always be able to exercise, directly or indirectly, would suffice to ensure this amount of moderation and abstinence from prohibited or dangerous topics. He wished that his policy should be discussed and explained, because he felt convinced that he could so expound and defend it as to make it popular, and thus to ensure it much national support; and he fancied also that he could derive many serviceable hints and warnings from the controversy to which his proceedings would be exposed. He had never the slightest intention, as he distinctly explained it at the time, of allowing hostile criticism or hostile votes to override his supreme will, or modify his determinations, or upset his Cabinets: he, in fact, summoned his Chambers to speak boldly, and openly, and without reserve—*just as a Commander-in-Chief summons his Generals to a council of war*—to have the full benefit of their wisdom, reserving to himself the absolute right afterwards of arriving at whatever decision he may choose, and expecting their acquiescence in it and their assistance in carrying it out. That this was his honest intention we entertain no doubt: how far it can be successfully worked out in practice is a very different matter; but the experiment is a curious one, and well worth watching.

As far as the Press is concerned, the hand of the Central Government is so strong, and its means of repression so many and so prompt, that we do not apprehend that much difficulty will be felt in keeping any opposition or hostility which may show itself within convenient bounds. The Administration intends to allow much greater latitude than heretofore to criticism and controversy; and no doubt antagonistic writers will make use of this latitude, and will go as far as they are permitted; but they can be pulled up at any moment that the Minister of the Interior (who is the sole judge) shall be of opinion that the intended limits have been reached. In the Chambers, there may be more difficulty, especially since their debates are to be published, and will no doubt be eagerly read;—but as long as the Senators are appointed and paid by the Emperor, and the members of the Lower House are elected under such severe Government restrictions and such vigorous Government exertions, the number of real "opposition members" who can make their way into the body must be always small, and their character probably moderate enough. But the exciting debate in the Senate on the address, and especially the speeches of M. de Larochejaquelein and Prince Napoleon, seem to indicate that the discussions will be no tame *sham*, and may create much sensation out of doors. If they do not always show accurately what the Emperor is thinking and wishing, they will at least show on what courses different parties and different politicians are wishing to drive him.

In the present instance the special interest of the debate lies in the light it is supposed to throw on the policy and intentions of the Emperor in reference to Italian affairs. If M. Pietri and Prince Napoleon are to be held as in any way authorised or qualified to speak the Imperial sentiments, there would, indeed, be little doubt as to what line of action we have to look for, and the Italian patriots might well be in the highest spirits. But are these gentlemen at all entitled to be thus regarded? It is questionable to say the least. It is true that M. Pietri was at a critical time the Prefect of Police in Paris, and that he has since been sent as Imperial Commissioner to Italy, before matters there had assumed their present position. He may think that he knows the real wishes and plans of his master; but we cannot suppose that so comparatively unimportant a personage would ever have been chosen as the Imperial mouthpiece; nor are those best acquainted with Louis Napoleon always cognisant of his intimate designs. As to the Prince, though a clever speaker and, as we have seen, a most open one, he is a man of singular indiscretion; he is well known to have long entertained, especially since his marriage, the most advanced views respecting Italian unity and independence; and he has never been supposed to be altogether in unison with his cousin, either in affection or opinion. The very boldness of his language, the frank and decided manner with which he repudiated and condemned the Treaty of Villafranca, and his almost menacing tone as to the future, all appear to us to indicate that he was uttering his own sentiments and no one else's. We do not believe that he would have held his tongue or materially altered his speech, even had he been aware that he was acting contrary to the Emperor's views: we believe he was only anxious to enforce his own policy, not to announce the Emperor's. With M. Pietri, the case is different: no doubt he spoke as he did, believing that he would please the Emperor by doing so.

Probably the real truth is that the Emperor—*not having made up his own mind*—was well pleased to have the matter freely broached in the Senate and in the face of Europe, in order to see the effect produced by the several speakers and the several doctrines,—satisfied that he could disavow them all at pleasure, as soon as he had learned all he wished to learn from the mode of their reception. It may well be that he intends to use the Senate, as he has often used the Press, as an arena whence to send up a number of pilot balloons from time to time, when he is in a state of perplexity or indecision. When, therefore, the speakers adverted to "the "conflict preparing, in which the French and Italian army would "stand side by side," they may only have been expressing their own wishes, or uttering idle rhodomontade, or experimenting on Austrian or European feeling. But when they spoke so consentaneously of the temporal power of the Pope being at an end, and coolly assigned him the small precinct of the Transteverine city of Rome as his sanctuary and the seat of his future spiritual dominion, we can have little doubt that they spoke the Imperial sentiments, since they were doing little more than repeating the celebrated letter of Louis Napoleon to the Holy Father, wherein he exhorted him to be contented thenceforth with "presiding over Basilicas and Ruins." We trust he may remain faithful to this doctrine. Thus and thus only, we believe, can the Papal problem be definitively solved, and the Head of the Church remain at once the Bishop of Rome and an independent Spiritual Chief.

But we confess to sharing the opinions put forth by a writer in the last number of the "Edinburgh Review,"—that such an arrangement would be scarcely feasible and scarcely decent, if Rome is to be chosen as the capital of the new Italian Kingdom, and the seat of its temporal Government. The Pope may well and comfortably install himself in that sort of enlarged "Cathedral close" which extends from the Castle of St Angelo to the gardens of the Vatican, if the rest of Rome is only an ordinary city, with its municipal authorities and its ordinary citizens. But the case would be materially altered, if the Monarch who has dethroned him is to set up his palace and his pomps under his very nose; if the guards and processions of the one are to be visible from the door-step of the other; if the Sovereign that was yesterday and the Sovereign that is to-day—the King *de facto* and the King (as many think) *de jure*—the oldest and the youngest Prince in Christendom—the Sovereign who has gained the crown and the Sovereign who has lost it—are to reign within sight and hearing of each other, with nothing but a muddy ditch between them. Nor can we sympathise with or feel any respect for that fancy of the new Italian people which insists upon setting up their capital in the Eternal City, because it was once mistress of the world It is of ill augury both for the good feeling and the good intentions of the constitutional and emancipated Kingdom, that its citizens should prefer to inaugurate their new creation amid the monuments and the associations of a double despotism, rather than among those of an ancient and illustrious freedom. Everything about Roman history and Roman edifices speaks of power, of conquest, and of tyranny —and of nothing else. Everything at Florence, on the other hand, reminds us of liberty, of literature, and of commerce. Why, then, should Italians, if power is not dearer to them than liberty, insist on centralising themselves in a city which since the Christian era has never known one century —one decade—nay, scarcely one solitary year—of freedom? How may Europe interpret such a childish, or such a mischievous attachment to associations, which, if not inglorious, are at least ominously immoral?

THE BOARD OF TRADE RETURNS FOR JANUARY.

Our readers will see by the returns published in our usual Supplement that the exports for January have considerably fallen off in value, being 8,344,701*l* as against 9,366,497*l* in January, 1860, and 9,593,423*l* in January, 1859. This is attributed in great measure to the long frost, as also may be

the general decline in the *quantities* of goods imported for the month—the imports from some quarters having been of course almost entirely suspended, in consequence of frozen-up harbours—and the arrival of many ships in the Channel from the Atlantic having probably been delayed or prevented by the Easterly winds which prevailed. We can, therefore, attach little weight to the apparently general decline in our exportations and importations for the first month of 1861. We are glad to see that in the accounts of our exportation of cotton goods and yarns to British India, the different Presidencies and to Singapore and Ceylon are in future to be distinguished. Bengal appears to take more than half of the total export of cotton goods and yarns to British India, Singapore, and Ceylon. The chief items of decrease in the value of our exports are in cotton yarns (a decrease of about 380,000*l*), and in woollen and worsted yarns (a decrease of about 110,000*l*), but throughout, and especially in the exports of metals for the month, there is a general decrease.

In the imports of the month also, as we have already intimated, there is a general decline, except in wheat, flour, tea, sugar, and wine. In wheat and flour there is of course a largely increased import from the United States as compared with January last year. In sugar and tea there is also a considerable increase, especially in tea. But the most notable increase is in wine; not only has a very large quantity been entered in the month for home consumption which was waiting for the reduced rate of duty that came into operation in January, 1861, but the quantities imported are very large for the month of January.

	Imported—Month ended January 31.			Entered for Home Consumption.—Month ended January 31.		
	1859.	1860.	1861.	1859.	1860.	1861.
	gals.	gals.	gals.	gals.	gals.	gals.
Wine	136,856	408,718	672,535	607,103	547,131	1,534,003

Of the French wines we observe that a larger proportion is entered at once for home consumption than of the Portuguese and Spanish wines.

The chief interest of these returns is the table of the *value* of the imports for the year. We see by it that we have invested at least two hundred millions sterling of British capital in the import trade during the year, a larger amount than has ever yet been known. The real value of *enumerated* articles for 1860 is 169,131,063*l*. Now, in 1859 the value of the other unenumerated articles was 31,00,000*l* out of a total value of 179,000,000*l*, and in 1857 was 30,000,000*l* out of a total value of 187,000,000*l*. We shall not, therefore, be calculating too much if we take the unenumerated articles as worth 31,000,000*l* at least this year, which will bring our total to upwards of 200,000,000*l*,—a sum at least twelve millions sterling greater than in the "inflated" year of 1857. Of this very large sum, cotton alone makes up more than the sixth part, being valued at 35,756,889*l*; wheat, other grain, meal and flour, make up another 30,000,000*l*; sugar, 11,000,000*l*; wool, 10,000,000*l*; silk, near 10,000,000*l*; timber, 9,000,000l; and tea, near 7,000,000*l*,—so that cotton, corn and flour, sugar, wool, silk, timber, and tea, cost us considerably more than half the total value of our imports; and cotton and corn and meal alone, in a year of deficient harvest, nearly one-third.

Agriculture.

AGRICULTURAL PROSPECTS.

We have arrived at a critical period of the year as regards the produce of the next harvest. The season for sowing spring wheat is rapidly passing away, while the land has latterly not been in a favourable state for sowing. There was a great quantity of rain last week, which not only stopped all work upon the land for some time, but left the soil so beaten down that wheat sowing became difficult. We must found our calculations on a comparatively small breadth of wheat for the present year. Caution and economy must be the farmers' watchwords. In calling the attention of the House of Commons during the past week to the necessity for public economywhich the present state of agricultural matters indicates, Mr Caird well and succinctly stated the untoward weather of the past eighteen months. He said:—"In October, 1859, we were visited by a frost more severe, probably, than any in the memory of persons now living. This not only prevented a large breadth of wheat from being sown, but its effects were felt in the almost total destruction of the green fodder crops. The severe winter caused great suffering to the stock farmers, and the cold wet spring which followed put them to enormous expense in buying fodder and carrying their stock forward to grass. A cold wet summer followed the cold spring, and though there were heavy crops of grass, little progress could be made in getting them in, and very few crops were saved. The same unpropitious weather continued during the harvest, and for thirty-five out of the forty days preceding the end of August rain fell, and the temperature was thirteen degrees below what it had been in the previous season. The few intervals of sunshine did not admit of the crops being harvested to any extent, except in the finest and earliest parts of the country, and in some of the later counties—Derbyshire, Staffordshire, Northumberland, and elsewhere—the crops in some instances remained in the field as late as January. The scarcity produced by such unprecedented difficulty in recovering the corn crop was aggravated by a failure in the potato crop, which, although not of as much importance in this country as in Ireland, nevertheless involved an increased demand for corn. He was sorry to say that the prospects of a future harvest were likewise seriously affected by the unpropitious weather which had lasted through the seedtime, and had rendered it impossible that they could hope, even at the best, for more than an average crop this year." He arrived at the conclusion that the deficiency of last year's harvest amounted to 36 per cent. All the railways found their traffic had fallen off in about the same proportion. Though the wheat harvest of Scotland last year was good, that would not materially affect the general result, as all the wheat grown in Scotland will not supply ten days' consumption of the United Kingdom.

The importations of corn since September have been more than double the average importations of the last five years. It must, however, be stated that the wheat which was sown after the breaking up of the frost and before the heavy rains which have since occurred, was sown in better order than any wheat sown during last autumn. Some of this is already making its appearance, and looks promising. Upon land in good condition, winter wheat was chiefly sown at this period. More recently, spring wheat only has been planted. The general agricultural monthly report of the *Mark Lane Express* estimates that not more than one-third of the wheat of last year's growth is fit for millers' use; but that barley is turning out rather better than was anticipated. Beans and peas have proved rather full crops, but the condition is so bad, that unless kept in stack throughout the summer, there seems no hope of last year's beans proving useful as horse corn.

As regards stock, the winter has been a trying one, for hay has been bad and roots short in quantity. One good has however arisen out of evil, that farmers, compelled to economise roots, have adopted the pulping machine more extensively than heretofore. Sheep have not suffered so extensively from the rot as from the long continued wet of 1860 was expected, though serious losses from this cause have occurred in some localities. Draining has had something to do with this, and a fresh impulse has been given to land drainage by last year's rains. An early spring is anxiously looked for, as, should it be late, provender will certainly fall short of the requirements of our live stock. The lambing season has commenced favourably, and we have not yet heard of many losses.

Literature.

COMMERCIAL LITERATURE.

The Merchant's Bane; or, the Antagonism between the Gold Law and the Bank of England and England's Commerce. London: Effingham Wilson.

If we understand the author of this pamphlet aright, he would abolish all fixed relation between coined gold and raw gold, so that we should no longer know that an ounce of gold represented 3·8875*l*, or what it represented. The price of gold should vary, he tells us, with its demand and supply; for, "no good reason for maintaining a fixed relation between raw gold and coined gold can be assigned, that would not apply to the case of raw silver and copper and the coins of these metals." Again:—

It is said in reply that the price is fixed in order to secure a standard of value; as if, to accomplish this object, it was necessary to maintain the same fixed relations between sovereigns and standard gold, as between a sovereign and a shilling, or between one coin and another. Herein is the delusion; no such relation exists between standard silver and shillings, or between standard copper and pennies. But why? why should not a penny always buy the same quantity of copper? why should this metal fluctuate at times to the extent of 30 per cent. in the space of a few months, while a penny remains the 12th part of a shilling unalterably?

The writer appears to forget that any mere token-coinage that we may have, *not* founded on intrinsic value,—and such is our copper and silver coinage,—is only of use so long as it bears a definite relation to a coinage which *is* founded on intrinsic value. The penny represents the 12th part of a shilling or the 240th part of a pound (though it is not worth intrinsically so much); the shilling, the 20th part of a pound (though it is not worth intrinsically so much); but if the pound again had no fixed intrinsic value at all, nobody would know what our coinage really represented, and our author would himself be entirely unable to answer the celebrated question "what is a pound?" If he wants to have some standard of value which does not vary either with the price of gold, or with that of silver, or any other precious metal, he is in search of a chimera, and is misled by his analogy of the invariable relative value

of the shilling and the penny. In truth, the value of these tokens is not invariable, but only bears an invariable *proportion* to the ounce of gold. But if the pound sterling ceases to bear an invariable proportion to the ounce of gold, neither could the shilling or the penny bear an invariable proportion to the ounce of gold, and would henceforth become the twentieth and 240th part respectively of a quantity the value of which would be unknown. Of the merits of such a proposal we leave our readers to judge. Of course there is a disadvantage in having a coinage based on a metal of variable value, but it is an absolutely inevitable disadvantage;—and the only feasible reform would be to substitute as the standard metal one less liable to intrinsic variations than gold, if such there be;—silver being the only rival whose claims merit much attention. But to argue that because silver and copper do very well as tokens when their relative value to gold is fixed, we might get rid of a coinage of intrinsic value altogether, is like arguing that we should do very well without fixing the measure of any one unit of time (such as the day or the year) by astronomical observation, because we have agreed to call sixty seconds one minute, sixty minutes one hour, and so on. Either our author intends to measure the value of his pound sterling by a given *weight* in gold or silver, or he does not. If he *does*, his argument has no meaning; if he does *not*, his pound sterling has no meaning.

GENERAL LITERATURE.

EDUCATION IN OXFORD: its Method, its Aids, and its Rewards. By JAMES E. THOROLD ROGERS, M.A., Tooke Professor of Economic Science and Statistics, King's College, London; sometime Public Examiner in Oxford; and one of the Delegates of the Oxford Local Examinations. 8vo, pp. 266. Smith, Elder, and Co. 1861.

THIS is a remarkable book, and it appears at a juncture when its statements, its facts, and its doctrines will be of no small public service. The writer is a man entitled to speak with authority on the subject he has chosen. A clergyman of the English Church, a distinguished graduate of Oxford, an examiner in its schools, and a private tutor of established fame—besides holding the first appointment of Professor of Economic Science in King's College—Mr Rogers is not a person likely to place his name at the head of a volume of mere off-hand criticism or hasty ill temper. Living in Oxford and bound up personally and professionally with the well-being of Oxford, the writer of this volume would seem to be under every inducement to temper his opinions with far more than the usual caution, and, except under some strong sense of truth and duty, to avoid scrupulously the expression of severe judgments.

The book will have the greater value in the estimation of the public because it deals openly, boldly, and in plain but perfectly dignified terms, with the defects and failings which still impair the system and administration of a seat of learning which ought to be in the broadest and most emphatic sense the highest National Seminary within these realms—a seminary not imperfectly imparting a one-sided sectarian scholarship to opulent students, but enabling the largest possible numbers of young men to win for themselves the inestimable possession of the highest mental culture.

We can easily understand that the freedom of Mr Rogers's statements will excite displeasure and alarm in many quarters. Persons who have formerly passed through the University will be apt to be offended at so fearless an exposure of the defects of a system which to a young graduate has all the attractions of ancient claims, dignified ease, and acknowledged services. With persons more actively connected with Oxford the book will be still less popular—excepting always a small but we believe a growing circle of those energetic and protesting minds which it has at all times been the glory of Oxford to rear up and nurture within its bosom,—men misjudged and set aside in their own day, but mostly the lights and lawgivers of the generations which came and are to come after them. We have already observed in several quarters a disposition to get rid of the book before us by flippant or evasive criticism, and hence it is the more desirable that journals like ourselves, whose interest in Oxford is wholly and purely an interest identical with that of the public at large, should take some pains to secure a hearing for an author who, at some personal sacrifice, comes forward as an Oxford reformer. Year by year the need in this country for the services of minds of the highest and soundest culture becomes more plain and urgent: and as our civilisation becomes more complex, our enterprise wider, our accumulations of science more vast, the need for men who have been trained in schools where inquiry is the most free and searching, and where success is most surely the recompense of none but great and noble excellencies, will constantly grow upon us, and by warnings, timely or tardy, will compel us to regard our Universities as national institutions entitled to our most vigilant care. It is because Mr Rogers looks at Oxford with these views, and with a mind sensible of the importance of these ends, that his book is of special value. The time has quite passed away when England could afford—we say *could afford*—to permit Oxford to be filled with family successions, exclusive clubs, and vegetating fellowships. And the time has come when Oxford, in common with every other part of our reinvigorated society, must be limited to precisely as much consideration, security, and influence, as it can earn for itself in free and earnest competition with all the world.

Originally Oxford as a University was very different in its constitution to the Oxford with which for more than two centuries the world has been familiar. Since the innovations of Archbishop Laud as embodied in the Laudian statutes of 1630, the University has merged almost entirely in the Colleges. But prior to the Reformation, when, as is well known, Oxford was crowded with students, the administration of the body corporate seems to have corresponded very closely with the descriptive legal title by which it was known, viz., "Chancellor, Masters, and Scholars." These several classes appear to have constituted of themselves a tolerably free republic of letters. It was the policy of Laud to merge the University in the Colleges, and hence the stringent rules which compelled all students to reside within, and all graduates to remain connected with, some college or hall. In other words, the Colleges were placed in possession of a monopoly of teaching, emoluments, and patronage—the continuation of which was secured to them by a close network of some of the most objectionable devices of the old corporation policy.

It was to break through this network of monopoly and irresponsible administration that at length in 1854, after years of discussion, Parliament consented to pass the Oxford University Reform Act. That wise and salutary measure cleared the way at Oxford for more or less rapid improvement in the tone and efficiency of the entire academical system. It is tolerably certain that seven years ago a larger measure of change could not have been effected, but the time is not distant when the innovations of 1854 will have to be multiplied and widened. The Act accomplished virtually three things,—viz., (1) it broke up the cliques, and family parties who, under one plea or another, had monopolised the patronage of the best fellowships, scholarships, professorships, and college livings; (2) it provided for large reforms in the statutes of the colleges, and for a reconsideration on modern principles of a considerable part of the endowments available for education; and (3) it enabled Dissenters to study at Oxford and become Bachelors of Arts, by abolishing the flagrant injustice of requiring subscription to the articles of the Church on matriculation; and by authorising the establishment of halls in which attendance at Church services should not be compulsory.

These were great and beneficent changes not only in the interest of the public, but also in the interest of Oxford itself,—excepting of course the select circles who had converted into a species of private property the revenues and endowments designed to foster the learning and virtue of the whole nation.

But while the Act of 1854 *did* accomplish these three great changes, it *did not* attempt to deal with three other questions scarcely less vital. For example—(1) the measure of 1854 left the colleges in full possession of the power to require conformity to the services and discipline of the Establishment of all students resorting to them,—in other words, the Act left undisturbed the virtual monopoly of members of the Establishment, through the colleges, in the emoluments and offices of the University; (2) the Act made no effectual provision for the admission of Dissenters on fair and equal terms to the University, for it rendered subscription compulsory on taking the master's degree, and it authorised none but *masters* to open halls for dissenting students; and (3) it left almost unmolested the close college monopoly which has grown out of the Laudian usurpations of 230 years ago.

The right administration of the University of Oxford is a far larger question than most persons are sensible of; and with Mr Rogers's lists and summaries before us, it is easy to understand the pertinacious fight of the vested interests to retain command of an aggregate of revenues little short of half a million sterling per annum. Prior to 1854, Mr Rogers (page 217) estimates that there were well nigh "1,200 endowments attached to the colleges, or enjoyed by members of them." Some of these were of considerable value, and the bestowal of them was governed by all kinds of odd specialties and accidents. Reviewing the facts of the present time as they have been modified by the reforms begun in 1854, Mr Rogers (page 231) says, "that no less than a sum of 80,000*l* *per annum* is bestowed on those who deserve, or receive, as the case may be, eleemosynary aid in Oxford as under-graduates. The *annual value* of the fellowships and college headships, buildings included, is at least 140,000*l*. The annual value of the ecclesiastical benefices connected with the colleges is at least 200,000*l*; and the income of the University, including its trust estates, will bring the gross total to not much less than 500,000*l* per annum."

Mr Rogers says further,—"The scholarships, as at present settled, may be considered as *for five* years. It will follow that not less than 80 scholarships will be *annually* available for competition; and, taking these scholarships at the average value of 65*l* per annum, the resources in the hands of the *colleges* for the encouragement of promising students equals 26,000*l* a year, 5,000*l* (one-fifth) of which is annually open to competition *apart* from that which is at least double in amount—viz., the unincorporated and school exhibitions."

We have here a wealth of yearly revenues which may well raise the questions touching their right use and distribution into the rank of topics of imperial policy. Here is the income of a principality specially set aside for the promotion of science, learning, and virtue among a whole people, and it is a national concern of the

first moment to take care that so great a purpose shall not be defeated.

But most men are now agreed that for nearly the whole of the seven generations between Laud and the year 1854, the fabulous annual sum of the Oxford endowments was to a large extent applied to indefensible and pernicious purposes. The nation grew rapidly in numbers, wealth, enterprise, and knowledge, but Oxford stood still. It became a proverbial stronghold of exploded errors. Its sinecures were rich, and its education became so costly as practically to exclude every one who could not spend from one to two thousand pounds in three or four years for the chance of a degree. In the whole history of monopolies, we doubt whether it would be possible to find any illustration more instructive and remarkable than the general decay of Oxford in the close embraces of the Laudian monopoly and the serene possession of an endowment of half a million a year.

Even now, when seven years have elapsed since the commencement of a new era, the annual matriculations are markedly less than they were twenty years ago. The average annual matriculations, for example, of the five years 1855-9 was 385, against 401 for the five years 1840-4.

How can it be otherwise, when the cost of an under-graduate's three or four years' residence at Oxford is seldom less than 1,000*l*, and in the majority of cases considerably more? Apart from college monopolies, and a host of pernicious practices and traditions which have grown out of the perverted customs of the place, there is really no intrinsic reason why an Oxford degree should not be fairly procurable for the moderate outlay which carries every year hundreds of youths through Edinburgh and Glasgow, and through the medical schools of London. Mr Rogers says (page 193), and we believe truly, that there is only one means by which the cost of Oxford education can be effectually and speedily reduced, and that is by enabling students to enter the University without the necessity of residing in any existing college or hall,—but living, of course, within reasonable boundaries, and subject to such discipline as may be required to promote morality and order. In other words, there must be permission accorded to any Master of Arts to reside within the University and open his house for the reception of students; and facilities must be created by law for the acquisition on fair terms, in Oxford, of premises suitable for such places of residence. At present nearly all the property in the town is in the hands or under the control of the colleges, who, in their present temper, are not likely to encourage the location of rivals.

Even with the present restrictions on Dissenters as regards eligibility for the offices and preferments of the University, we believe that the effect of larger and more liberal facilities for study at Oxford would in a short time accomplish most beneficial changes. The great need of Oxford is impetus from without. It has been embalmed so long in wealth and dulness that, like every other body corporate afflicted with the like fatal maladies, it has been as nearly as possible killed with dignity. The evil is now becoming so desperate that it ought to be apparent even to those who take no more than a selfish view of the case, that, unless Oxford can produce more palpable proofs of its usefulness and activity, the time is not far off when public opinion will sanction very summary measures for a better application of the yearly half million of endowments. If so vast a sum can do no more than matriculate 380 youths per annum; confer a pass degree at a cost of 1,000*l*; and barely maintain the reputation of the place against rivals which have neither antiquity, wealth, nor preferment to support them—it requires no gift of prophecy to foresee the early application of decisive remedies.

It must not be supposed that we are hostile to Oxford, or supporters of any scheme for the diversion to other purposes of its vast endowments. On the contrary, we regard the antiquity and pretensions and fame of this glorious seat of learning as among the most valuable of the inheritances of this country,—and so far from desiring to diminish the great revenues it holds in trust for the advancement of knowledge, we would in all prudent ways fortify and increase them. We are no enemies of the English Church, or of any of the institutions which honestly seek its extension. But we desire to see the doctrines and influence of that Church, as of every other school of opinions, maintained not by the blind devices of promissory oaths, irritating monopolies, unfair exclusions of others, and a timid avoidance of the risks of fair and earnest competition.

We desire to see Oxford resume its place as the foremost national seminary of these realms. To accomplish this object, we would make larger concessions to existing interests than on strict gounds of right they are entitled to claim. But whether or not these interests may wisely estimate their own pretensions, it is perfectly manifest that sooner or later the University must be made easily accessible to Churchmen and Dissenters alike,—that the cost of a degree must be reduced to at least a third of the present amount,—that the offices and preferments of the University must also be open in some liberal sense without restriction of creed or party,—and that from the highest functionary to the humblest official of the academical hierarchy, every man must be made to feel that his reputation and his living depends in some intimate degree upon the ability of Oxford to maintain the foremost place among the seats of English education. If any aimable person expects so great a revolution as this to be accomplished by any agency less powerful than the pressure of earnest competition, he may depend upon it that he knows very little of the forces which govern society. It may be true that before such a competition many picturesque peculiarities and dignified devices might summarily disappear. But in place of them we should have a machinery strong, pliable, and perfect in all its parts,—useful, because constantly on the alert for the newest lights,—and enduring, because compelled to conform above all things to experience and facts.

We are the more earnest in these suggestions for the real revival of Oxford into a National University, because it is impossible not to see that one of the evils which threaten the growth of knowledge and manly freedom in this country is the narrow and sectarian culture of large classes of men designed to fulfil the functions of teachers and leaders. Take, for example, the education of ministers of religion of nearly every sect among us. Is it not painfully true that the young men destined for these professions are separated from their companions at an early age, and cloistered up in some special institution which admits only such persons as are intended for the same calling? Against this paralysing and distorting influence of a training so monastic and one-sided, none but minds of the first order can be superior. We have complaints on all sides of the defects of pulpit teaching, and the timidity and feebleness of our modern theology. Men wonder how it is that in a free country the highest and noblest branch of human learning and speculation should have dwindled down into the small demonstrations of tracts and tea parties. But how can it be otherwise when we consign to the educational hothouse the men destined for a profession which, to be a reality and a power, requires above all things that those who follow it should have won their faith manfully in spite of the doubts and temptations which inevitably beset every mind bold and earnest in the pursuit of truth? That there should ever be unity of worship and belief is impossible and undesirable. But that ministers of religion should be something better than weak-minded and decorous nobodies is a matter of national concern; and there can be no more effectual safeguard against such a calamity than the practice of sending young men destined to be ministers to a University largely resorted to by youths of all classes, parties, and beliefs, and intended for all the various avocations of life. Under such a regimen and in the face of such a discipline, religion and truth would gain infinitely by the exclusion from the rank of professed teachers of many of those timid and feeble natures which are sufficiently hard set to manage their own mental difficulties, without being officially charged with the spiritual care of other people.

We repeat that we regard Mr Rogers's book as eminently valuable, and as deserving to become a text-book to large numbers of persons interested for their children in the condition and prospects of Oxford. It is the latest and fullest statement of the facts connected with the entire system of the University, and with the course of instruction pursued there,—and it is a statement put forward by a person writing on the spot and with the best means of information. Mr Rogers does not discuss general theories of education, and he does not mean to say in the smallest degree that high mental culture is only valuable for the money prizes it brings to the student. His book is devoted to the single topic of the "methods, aids, and rewards," of mental culture as they exist at present in his own University; and he has honestly and faithfully exhausted the subject. He will differ, we dare say, from some of the opinions expressed by ourselves, as we in our turn demur to some of the doctrines we find in his book. But we welcome him as a fellow-labourer in a good cause, and as one of those vigorous and sturdy leaders who, somehow or other, have in most generations managed to arrive, even at Oxford, at clear and decided views of the right and the expedient.

THE CORNHILL MAGAZINE. March, 1861. Smith and Elder.
MACMILLAN'S MAGAZINE. March, 1861. Macmillan.
THE TEMPLE BAR MAGAZINE. March, 1861. Temple Bar office, 122 Fleet street.

NEWSPAPERS live by news and politics, and the greater quarterlies by information and politics, but the monthly magazines live by tales, and papers which endeavour to combine amusement with instruction, and on the whole they fulfil their mission very creditably. They almost all of them aim at different ideals. The "Cornhill" is a kind of "Chambers' Journal" for the higher classes of society. It relies for its sale mainly on the fictions it contains, and while Mr Thackeray and Mr Trollope work together it may rely on this very safely; but all the subsidiary articles are well-informed and good of their kind. The verses are generally the verses of cultivated minds. And such excellent papers as that in the present number on the "Emancipation of the Serfs in Russia," are adapted to give the reader who buys the magazine for its tales a good excuse for continuing his amusement on the score that he learns so much useful knowledge from its pages. The new number keeps up the reputation of the magazine.

"Macmillan" relies for its reading public in some measure on a higher class of interests. It contains frequently papers advocating the more important social reforms of the day, and it has consistently represented the broader and deeper school of theology in the English Church. In the present number there is a very interesting

paper by the Rev. F. D. Maurice on the late Baron Bunsen, and the conclusion of Mr Ludlow's able article on Trade Societies. Even the tales in "Macmillan" are usually coloured with a certain tinge of moral purpose. Mr Hughes's admirable story of "Tom Brown at Oxford" is deeply tinged with a manly faith and purpose, without evincing less literary ability than those of more *purely* literary artists. Mr Henry Kingsley in coarser fashion is of the same school. The verses in this review are usually less cultivated and more sentimental than those in the "Cornhill." And its trashy papers are *more* trashy.

Mr Sala's new periodical, if it succeed at all, must succeed, we think, entirely by dint of the editor's own contributions. These have a certain coarse kind of genius,—certainly very great ability if not quite amounting to genius,—of a not very pleasing kind. His tale, called "the Seven Sons of Mammon," rivets the attention, perhaps without deserving to do so. But the substance of the magazine is trashy. There is no purpose in it, such as is betrayed in "Macmillan,"—and no high level of culture like that shown in the "Cornhill." The present number, however, seems an improvement on its predecessors. Possibly it too may in time make good its footing, and deserve that limited share of public attention which is requisite to keep a monthly shilling magazine afloat. It has scarcely yet attained this level.

THE ENGLISH WOMAN'S JOURNAL. Vol. 7. No. 37. March, 1861.

THE opening paper of this number is a letter from Australia, relating the scarcity of educated governesses there, and suggesting some plans to the society "who are now organising a plan for the emigration of educated women." If the surplus members of this overstocked feminine profession could be at the same time comfortably and honourably employed, and a benefit conferred on our colonies, it were "a consummation devoutly to be wished."

Three other articles are worthy of mention. One on the "Lunatic Village" of Gheel, in Belgium, where upwards of 800 lunatics are boarded at large among the peasantry, share in their labours, and in their daily life; a pleasant description of the romantic Island of Handa, off the Sutherlandshire coast; and an essay on figs as the fruit of the season.

(FROM OUR CORRESPONDENTS.)

PARIS, Thursday.

The judicial investigation into M. Mirès' affairs has not made sufficient progress to warrant in the opinion of the Government the publication of any statement as to his position; at all events none has yet been made. The Roman Railway Company, which last week obtained from one of the Courts permission to borrow 2,000,000f on security of its own shares and bonds owing to his failure to fulfil his obligations towards it, yesterday brought a new action before the Tribunal of Commerce to obtain authorisation to raise a further sum of 6,000,000f on similar security, the money it said being imperatively needed to enable it to complete the lines from Bologna to Ancona, and from Rome to Capua, which by contract must be finished by the end of the present year. Count de Germiny, Governor of the Bank of France, in his capacity of provisional administrator of Mirès' affairs, opposed the action on the ground that the shares and bonds which the Roman Company wants to give as security for its loan are not its property, but that of the Caisse Générale des Chemins de Fer. The Court has not yet given judgment. Various questions of a formal character relative to M. Mirès have within the last few days been submitted to the Courts, but the only ones worth mentioning are that he has been declared responsible for the acts which Count de Germiny may do in his name, and that the administration of his private fortune has, in spite of his opposition, been placed in the Count's hands. In the Senate his doings have been made the subject of eloquent animadversion, and Count Simeon, one of his Council of Surveillance, has presented to that body a defence of his conduct in connection with him. In a report to the Emperor published in the *Moniteur*, the Minister of Justice indignantly affirms there is no truth in reports that have been current that it is intended to screen from justice certain persons of influence who are supposed to have been mixed up in his transactions.

In the debate on the address, which for the last few days has occupied the Senate, the commercial treaty with England was brought forward. M. Mimerel, of Prohibitionist renown, remarked that the treaty stipulated that cotton and woollen yarns and tissues should only be admitted into France "from the 1st October, 1861," but that the additional convention fixing the tariffs said that they should come in "not later" than that date. The term "not later," said he, implied that they might be imported before. But he protested against their admission at an earlier period, because he said the manufacturers of France are accustomed to commence their manufacture of winter goods after the 15th March, and to have it completed, and the goods delivered before the 1st October; that this manufacture amounts to more than 1,500,000,000f (60,000,000*l*) annually, of which one-third for raw materials, and the two other thirds for labour, and that consequently one season's labour—in other words, 500,000,000f—would be endangered if English productions were to be allowed admission before the 1st October. M. Magne, a "minister without portfolio," said in reply, that the Government had consulted the Chamber of Commerce on the question whether the date fixed in the treaty should be maintained, or anticipated; and had received contradictory replies; and that therefore "the intention of the Government was to maintain the date fixed, unless a universality of demands should induce it to anticipate the date for the sake of manufacturers themselves." M. Hubert-Delisle, a Senator, expressed the opinion that it would be desirable to anticipate, because, on the one hand, the expectation of the 1st October would cause French manufacturers to slacken their productions and the English to augment theirs; the consequence of which would be that after that date France would be "inundated" (the common phrase) with English articles. M. Heeckeren declared that in Alsace the manufacturers wished the date of the 1st October to be maintained. The Minister of Commerce, M. Rouher, said that the Government had consulted the Chambers of Commerce and the Prefects of departments on the matter; and that the majority of the former had been in favour of the date fixed in the treaty, but a majority of the latter in favour of anticipating it. The Government had requested the Superior Council of Commerce connected with his department to pronounce; but that Council prayed that time might be allowed to see how the tariffs fixed by the treaty and its annexes were regarded by the country. In January he had intended to convoke the Council to obtain a decision, but the American crisis and the augmentation of the rate of discount rendered that measure undesirable. Under these circumstances he had to declare that if from discouragement in France manufactures were to slacken, and if from exaggerated hopes they were to increase in England, "a solution must be suddenly adopted in the interest of French manufacturers themselves, for they would regain activity in presence of English competition, and in his opinion they would triumph." If, on the contrary, he added, they maintained their activity, the date fixed in the treaty would be respected by the Government. M. Lefebvre-Duruflé made a few observations in favour of maintaining the delay. M. Michel Chevalier then spoke:—

"The Government," said he, after a few introductory observations—"the Government will act in this matter according to the appreciation it may make of the general interest, and according to its opinion of what may be best for the manufacturing interest. But there is one circumstance which it is right to make known, and which is relative to the opposition made by a part of the manufacturing interest to the carrying into effect of the treaty before the 1st October. That opposition which has found supporters in a certain number of Chambers of Commerce is not so real as might be supposed. In it there is something fictitious and artificial—something which is manufactured at Paris, and we know in what quarter.....For the space of twenty years there has been maintained an agitation in the country for the purpose of preventing the Government from modifying the Customs tariffs .....There was something which occasioned the Chambers of Commerce to make the objections which have been referred to, and that was a *mot d'ordre* from Paris!.....I will explain what I mean. The Prohibitionist party formed a centre of action, and issued its orders in documents which have been made public. In those documents, which were circulars sent out we know by whom, and published in journals which everybody could read, significant language was addressed to all the Prohibitionist committees of the manufacturing towns. This is what was issued in one of these circulars: 'Take care to prevent the election to the Chambers of Commerce not *only of adversaries, but of doubtful friends!*' Such were the auspices under which were elected the Chambers of Commerce which now protest against the bringing into force of the treaty before the 1st October. It is, therefore, permitted to see in these objections, the hand of the Prohibitionist party The circular which I quote followed one in which there were words of menace addressed to the Government: those menaces were to the effect that if it did not obey the injunctions made to it not to revise the Customs tariff in a liberal spirit, that party would put arms into the hands of its enemies! These observations I wished to make, in order that you might know exactly the importance which must be attached to the objections of a certain number of Chambers of Commerce to the bringing into effect of the treaty of commerce with England before the 1st October."

This speech, which was once or twice interrupted by members of the Prohibitionist faction, made great sensation in the Senate, and has produced still greater among the public. It will cause your readers to entertain the agreeable conviction, that even in France, backward as she has hitherto been in the path of commercial progress, it is only a knot of mischievous, intriguing Prohibitionists who got up and who maintain the clamour against the English treaty, which treaty—to its immortal honour be it said—has

destroyed in France the most monstrous commercial monopolies that ever existed in any country.

The Budget of 1862 has just been presented to the Legislative Body. It estimates the expenses at 1,310,329,412f, and the ways and means at 1,321,910,962f. It thus presents a surplus of 11,581,550f. French budgets generally present surpluses by anticipation, but it almost always happens that credits for unforeseen and extraordinary expenses cause them to disappear. In the total of expenses and receipts above given a sum of 619,119,313f is not counted, inasmuch as it is what the French call an entry *d'ordre*—that is, figures for the sake of regularity in accounts, both in receipts and expenses. It is to be remarked that the Budget of 1862 comprises the additions both to expenses and receipts occasioned by the annexation of Nice and Savoy.

The Great Russia Railway Company makes a call of 62 roubles 50c per share, to be paid from the 6th to the 15th April; but the Credit Mobilier, which is to receive the money, announces that it will advance half of the call on deposit of shares, and at 5 per cent. interest.

The Bourse has been very inactive during the week. The following are the quotations;—

The shares of Mirès' Caisse Générale des Chemins de Fer are to-day at 101f 25c.

Subjoined is an account of the markets:—

FLOUR.—At *Paris*, yesterday, the quotation was from 69f to 73f the sack of 159 kilogs. Four marks declined: the current month and April were 70f to 70f 25c.

WHEAT at *Paris*, yesterday, was 38f to 39f 50c and 40f (the latter for extra quality) the sack of 120 kilogs. In the provinces, 109 markets present a rise of from 13c to 1f 6c the hectolitre, 18 a fall of from 6c to 1f, 22 are reported firm, and 25 without variation.

COTTON.—The sales at *Havre*, in the week ending Friday, were 10,129 bales, and the arrivals 39,00f. The closing prices were 1f to 2f higher than those of the preceding week for very low and low qualities; and 2f for very ordinary and other sorts. Low New Orleans was consequently 94f the 50 kilogs; and very ordinary ditto, 101f. This week, business has been active, and yesterday low New Orleans was 94f to 95f.

SUGAR.—Business at *Havre*, in the week ending Friday, was unimportant: 213 casks French West India disposable at 46f 75c to 47f 50c duty paid; and 160 Havana, 33f 25c in bond. The arrivals were 1,115 casks French West India, 31,000 bales Reunion and Mauritius, and some smaller lots. This week, business has not been active: French West India, 48f 50c to 49f; Havana, 34f. At *Nantes*, last week, as many as 21,902 sacks Reunion went at 59f 75c; 223 sacks ditto gros grain, 56f; 1,800 sacks and some smaller lots Java, 56f; 113 casks Havana, 53f. The arrivals were 38,668 casks. This week, various lots of Reunion have been sold, and some ditto of gros grain at 53f. At *Bordeaux*, last week, about 3,000 bales Reunion went at 48f to (for gros grain) 56f 53c; 4,120 bales Mauritius, 51f 25c; and a small lot of Guadeloupe, 45f 50c. The stock was 22,200 bales Reunion, 17,000 Mauritius, 940 casks French West India. This week, only a small lot of Cayenne has been taken. At *Marseilles*, last week, only a small lot of French West India was sold.

COFFEE.—At *Havre*, in the week ending Friday, business was very animated, and prices firm. 2,360 sacks Hayti Port-au-Prince disposable went at 78f to 80f the 50 kilogs in bond; 2,450 ditto Jacmel and Jeremie for delivery, 78f; 1,000 Cape for delivery, 80f 50c; 2,162 Gonaives disposable, 81f 50c; 62 Santos, 78f; 48 Bahia, 70f; 2,000 Ceylon for delivery, 107f to 112f duty paid; and a large lot ditto expected at prices kept secret. In addition, some lots of damaged Haiti and Brazil were sold. The arrivals exceeded 4,000 sacks. The stock on the 1st March was 100,061 sacks; at the corresponding date of last year it was only 49,720. This week, there have been numerous sales: Hayti, 78f 50c; ditto Cape, 80f to 81f; Java, 110f duty paid; Guadeloupe, 135f. The reports from *Nantes* of last week record the sale of 167 sacks Port-au-Prince, and the arrival of some small lots. This week, some Reunion "feve pointue" has been sold at 126f, and some Manilla at 106f. At *Bordeaux*, last week, 1,300 sacks Rio washed went at 87f to 90f; 370 ditto not washed, 72f; 500 sacks Guayra; 100 Java, 119f; a small lot of Ceylon plantation, 111f to 118f; 80 bales Reunion, 131f; 30 sacks Mysore, 112f; 205 casks Guadeloupe, 135f to 145f. This week, some Rio not washed has been taken at 75f to 76f; and some Mysore at prices not mentioned. At *Marseilles*, last week, various large lots of Hayti sold readily at 80f in bond, and a considerable quantity of damaged Rio was also disposed of.

INDIGO.—An auction took place at *Havre* in the week ending Friday, but of 37 cases Manilla offered, only 16 were taken at 5f 40c to 7f 40c the half-kilogramme. Subsequently 2 cases were sold at 7f 20c to 7f 40c. The other transactions were at 4f 80c to 5f 40; 18 Bengal and 5 Java at prices kept secret. The arrivals were insignificant. Nothing has been done this week. At *Bordeaux*, last week, Bengal was at 2f 40c to 2f 60c above the estimates, and Kurpah was in demand at 20c to 40c above the quotations of last week. No transactions of importance have taken place this week.

HIDES.—At *Havre*, in the week ending Friday, business was calm. 666 La Plata dry went at 120f to 132f 50c the 50 kilogs; and 1,000 New Orleans salted, at 46f 50c. The arrivals were about 8,000. This week, Buenos Ayres horse, salted, have been 90f the 100 kilogs.

WOOL.—In the week ending Friday, at *Havre*, business was somewhat active: 240 bales Buenos Ayres unwashed went at 1f 40c to 1f 90c the kilog; 53 ditto "pelade," 2f; 13 bales sheepskin La Plata unwashed, 1f 80c; and 7 ditto lamb, 1f 30c. The arrivals were about 400 bales. This week, Buenos Ayres unwashed has been 212f 50c to 227f 50c the 100 kilogs; "pelades" ditto, 1f 60c the kilog; Portugal unwashed, 1f 30c.

TALLOW.—No sales were made at *Havre* last week; the arrivals were 182 pipes 88 casks. This week, 142 casks Buenos Ayres for delivery have been sold at 68f. At *Paris*, yesterday, the 100 kilogs were 153f.

SPIRITS.—At *Paris*, yesterday, 3-6 of 90 degrees, first quality, was 100f to 101f the hectolitre; Montpellier, of 89 degrees, 130f. At *Bordeaux*, the day before yesterday, 3-6 Languedoc was 127f 50c, and beetroot 104f.

BRUSSELS, March 7.

The Chamber of Representatives has just adopted, in spite of the opposition of the Government, a Bill for giving French gold coin legal currency in this country.

COMMERCIAL AND MISCELLANEOUS NEWS.

The annexed commercial advices are dated Bombay, Feb. 12:—Since our last advices some little business has been done in our export market. Owing, however, to favourable accounts received from England by the last mail, which arrived on the 10th instant, our import market for cotton has become very animated, and prices for the staple are steadily on the rise. We now quote for Dhollerah, old, rupees 130 to 135; new, rupees 155; Broach, new, rupees 160 to 162; and Oomrawuttee, old, rupees 117; new, rupees 147. Freights to Liverpool, 2*l* 17s 6d; London, 2*l* 15s; and China, 13 to 14 rupees per candy. The money market is tight. The following is a list of quotations:—London (credit) 6 months' sight, 2s 1½d; do. documents, six months' sight, 2s 1 13-16d; do. Bank rates, six months' sight, 2s 1 9-16d; Calcutta, 3 days' sight, 91 dols per cent. prem.; Madras, 30 days' sight, 97 dols per cent. prem.; China, 60 days' sight, 215r per 100 dols.

The following extract from a despatch from the British Consul at Savannah has been received at Loyd's from the Board of Trade. It notifies an important change in the port regulations of Savannah, ordered by the Convention of the State of Georgia since the secession:—Savannah, U.S., January 31, 1861.—By the Act of Congress, 3rd March, 1817, cap. 118, every master of a foreign vessel is required, under a penalty not exceeding 2,000 dollars, to deposit with the consul of the nation to which the vessel belongs the register of said vessel, and before being admitted to entry to produce to the collector a certificate from the consul that the necessary papers had been so deposited; and sec. 2 of the said Act enacts that it shall not be lawful for any foreign consul to deliver to the master of any foreign vessel the register and other papers deposited with him, until such master shall produce a clearance in due form from the collector of the port where such vessel has been entered. This beneficial law has been declared by the convention assembled at Millegeville to be invalid and of no force within the State of Georgia. I have, therefore no longer control over the register or other papers of British vessels entering this port, all of which documents, by the new ordinance passed yesterday, are required to be lodged with the collector.

The following return shows the state of the note circulation of the United Kingdom during the four weeks ending January 12, 1861, compared with the previous month:—

	Dec. 15, 1860.	Jan. 12, 1861.	Increase.	Decrease.
	£	£	£	£
Bank of England	20106690	20076998	...	29692
Private Banks	3339084	3320794	...	18290
Joint Stock Banks	2974091	2939985	...	34106
Total in England	26419865	26337777	...	82088
Scotland	4688839	4303285	...	385554
Ireland	7047600	6912819	...	134781
United Kingdom	38156304	37553881	...	602423

And, as compared with the month ending the 14th of January, 1860, the above return shows a decrease of 1,459,100*l* in the circulation of notes in England, and a decrease of 1,894,299*l* in the circulation of the United Kingdom. On comparing the above with the fixed issues of the several banks, the following is the state of the circulation:—The English private banks are below their fixed issue 1,084,141*l*, the English joint stock banks are below their fixed issue 362,372*l*,—total below fixed issue in England 1,446,513*l*; the Scotch banks are above their fixed issue 1,554,014*l*, the Irish banks are above their fixed issue 558,325*l*. The average stock of bullion held by the Bank of England in both departments during the month ending the 9th of January was 12,739,404*l*, being a decrease of 843,166*l* as compared with the previous month, and a decrease of 3,884,783*l* when compared with the same period last year. The following are the amounts of specie held by the Scotch and Irish banks during the month ending the 12th of Jan.:—Gold and silver held by the Scotch banks, 2,581,348*l*; gold and silver held by the Irish banks, 2,571,855*l*; total, 5,153,203*l*; being a decrease of 14,073*l* as compared with the previous return, and a decrease of 198,207*l* when compared with the corresponding period last year

COTTON.

NEW YORK, February 19.

The following is a statement of the week's sales here and at the chief Southern ports, at latest telegraphic dates, with the closing prices f.o.b., with freight in sterling at current exchange:—

	Sales.	Closing.		Middling.		Freight.		F.o.b.
New Orleans...Feb. 18	66000	⅛c higher	...	11⅛c	...	⅛d equal to		6.91d
Mobile 18	14000	⅛c —	...	10⅛c	...	⅛d	—	6.70d
Charleston 18	6000	⅛c lower	...	11c	...	⅛d	—	6.48d
Savannah 16	7000	unchanged	...	10⅞c	...	⅛d	—	6.45d
New York 19	9000	unchanged	...Upl.	11⅛c	...	⅛d	—	6.63d
Total.....	102000 bales					Average		6.63d

There is now a decrease in receipts of 645,000 bales from last year, when the crop reached 4,675,000, and of 110,000 bales from 1858-9 (crop 3,851,000).

New York Market.—In this market business has been very quiet throughout the week, the news from Liverpool and from the South being of a character to check any disposition to operate. Holders have found it difficult to realise, and further concessions have been needed to effect sales. The demand continues to be limited chiefly to the home trade, and the week's sales reach about 9,000 bales. Prices are unchanged—middling Uplands being now worth 11⅛c to 11¼c. Transit cottons continue very quiet, and prices are nominal.

The following is a statement of the movements of cotton for the last week, and since 1st September last, compared with the five preceding years:—

	Receipts. Week's Receipts. bales	Since 1st Sept. bales	Exports for the Week. To Great Britain. bales	To France. bales	To other For. Pts. bales
1860-61.....	148000	 2642000	 80000	 16000	 9000
1859-60.....	166000	 3287000	 53000	 12000	 12000
1858-59.....	125000	 2752000	 31000	 9000	 20000
1857-58.....	119000	 1726000	 83000	 22000	 10000
1856-57.....	99000	 2207000	 40000	 15000	 17000
1855-56.....	117000	 2215000	 41000	 16000	 18000

	Exports since First September. To Great Britain. bales	To France. bales	To other For. Pts. bales	Total. bales	Stock. bales
1860-61.....	1221000	 317000	 182000	 1721000	 766000
1859-60.....	1360000	 381000	 214000	 1955000	1118000
1858-59.....	837000	 319000	 254000	 1410000	1003000
1857-58.....	632000	 221000	 142000	 995000	 670000
1856-57.....	638000	 251000	 176000	 1065000	 746000
1855-56.....	877000	 296000	 255000	 1428000	 566000

Thus the receipts show a decrease of 645,000 bales from those of last year, and a decrease of 110,000 from 1858-9, and the exports exhibit the following results:—

	To G. Britain.	To France.	To other F.P.	Total.	Stock.
Compared with last year.....	Dec. 139000	...Dec. 64000	...Dec. 32000	...Dec. 234000	...Dec. 352000
Compared with 1858-9.....	Inc. 384000	...Dec. 2000	...Dec. 72000	...Inc. 311000	...Dec. 287000

Southern Markets by Telegraph.—A moderate business has been done at the South this week, but under the continued dull advices from Liverpool, prices have been irregular. The large receipts at New Orleans have supplied that market freely, and the week's sales reach 66,000 bales. At the opening of the week prices were easier, but became firm again at the close, middling being quoted 11c to 11¼c. The Mobile market has been quiet, but with little cotton offering, owing to light receipts; holders have realised ⅛c advance, middling at the close being quoted 10c. At Charleston, 6,000 bales have changed hands, while prices have receded ⅛c; and at Savannah there is little change. Freights are unchanged at New Orleans, but at Mobile the rate to Liverpool has declined to ⅛ to ¾d. Sterling exchange has fallen to low rates again.

Receipts.—There is no change to note in receipts this week. The weekly deliveries continue on a large scale, and for the present week amount to 148,000 bales at all ports, against 166,000 same week last year. The total received since 1st September is now 2,642,000 bales, against 3,287,000 last year. The decrease, as compared with 1858-9, is rapidly disappearing, being already reduced from 241,000 bales a month ago down to 110,000 bales. At the Atlantic ports they are well supported by mail dates.

Exports.—The exports continue to be well supported, and for the present week amount to 106,000 bales to all ports, against 77,000 last year, and 60,000 the year before. Of this, Great Britain will get 80,000 bales; and the total thither now amounts to 1,221,000 bales, against 1,360,000 to same date last year, a deficiency of 139,000 bales. By telegraph for the following week the clearances from the Gulf ports amount to 55,000 bales.—*From Messrs Neill Bros. and Co.'s Circular, forwarded by Mr Ollerenshaw, of Manchester.*

NEW YORK, Feb. 23.—There has prevailed an increased demand for this staple during the past three days, based upon the reports from the South of an unexpected falling off in the receipts at the Gulf ports, and prices have advanced ¼ of a cent per lb. The sales aggregate 11,000 bales, including 2,000 in transit. We quote:—

NEW YORK CLASSIFICATION.

	Upland.	Florida.	Mobile.	New Orleans and Texas.
	c	c	c	c
Ordinary	9¼	9¼	9¼	9¼
Good ordinary...	11	11	11	11⅛
Middling	11⅛	12⅛	12⅛	12⅜
Good middling...	12¼	12⅜	13⅛	13⅜
Middling fair.....	13⅛	13⅛	13⅛	14⅛

The arrivals have been from New Orleans, 560 bales; Florida, 1,285; Georgia, 1,680; South Carolina, 1,049; North Carolina, 3,237; Virginia, 816—total, 8,787. Total import since 1st inst., 56,732 bales; total import since 1st September, 304,589 bales. Export from 1st to 19th February, 24,024 bales, against 12,707 in 1860.

During the greater part of the past week the cotton market was very animated, large operations were entered into by speculators and exporters, but the trade, acting more cautiously, purchased barely their average consumption. Prices were decidedly firmer, and most of the week's business was done at an advance of fully ⅛d per lb. Towards the close, however, the market has become weaker, and it is difficult to raise our quotations to the above extent. Egyptians have not improved in price. Brazil are without change. East India are, like American, slightly dearer. The sales to-day are 8,000 bales. The market is quiet, and prices easy. The reported exports amount to 19,260 bales, consisting of 15,200 American, 60 Brazil, and 4,000 East India.

MARKETS IN THE MANUFACTURING DISTRICTS.

There has been a decidedly better feeling in most of the manufacturing districts held this week. Increased quantities of goods have changed hands, both for home use and export, but at low, or the late decline in, prices. On the whole, the stocks are not to say heavy. The iron trade is still very dull. Coals have given way in price to some extent.

MANCHESTER, March 7.—This market showed decided improvement on Monday, owing to telegrams from Calcutta to 10th Feb. reporting a fair amount of clearances from the Bazaar. Since Tuesday the tone has been quieter, though taking the week in all, a larger amount has probably been done than in any week for some time. The Germans have been ready buyers of yarns at fully the rates of last week; manufacturers, from the fact of the Blackburn weavers being again at work, have also bought fully their requirements; and some of the India houses have been operating in mule. But the difficulty of discounting long-dated paper has been a serious obstacle to extended transactions in the Eastern trade, and in cloths for that and other markets. Nothing better can now be reported than merely a temporary relief to manufacturers' hands.

BRADFORD.—The wool market is again in a very quiescent state. Transactions have not been abundant, though perhaps not so rare as a week ago. Prices are very irregular, and depend of course very much on the circumstances of the seller. The yarn market is almost a blank. Neither buyers nor sellers manifest any anxiety to operate. The market for pieces has been very flat.

LEEDS.—There are only few buyers in the town, and they operate very cautiously. The manufacturing districts are now producing much less cloth than was the case three months ago, a state of things which is forced upon them by the inactivity of the demand. There is a moderate inquiry for flax. Spinners, however, do not get clear of their yarns so rapidly as they did, manufacturers holding back under the impression that some concession in rates ought to be made.

ROCHDALE.—There was but a moderate attendance at the market on Monday, and though the proportion of buyers was

about an average, they limited their proceedings to making inquiries; trade must, therefore, be again pronounced flat.

HUDDERSFIELD.—There was a slight, although but slight, improvement in Tuesday's market, induced partly perhaps by a relaxation of terms in nearly all departments.

BELFAST.—The market for goods ready for the warehouse has been generally depressed. In a few instances sales have been effected for the local trades, but these cases can only be taken as incidental. In the general trade, considerable difficulty is felt in making sales; and, although independent holders maintain the full rate of recent quotations, those who are obliged to push linens into the market must submit to the terms imposed by the buyers under such circumstances.

WOLVERHAMPTON.—Current prices of Pig Iron:—Staffordshire cold blast, 4*l* 5s; Old Windmill End Mine, No. 1, 2, and 3 melters, made with Lord Ward's thick coal warm air, 4*l*; Old Windmill End Mine forge pig iron, made with Lord Ward's thick coal, 3*l* 12s 6d; best native hydrate pigs, 3*l* 10s to 4*l*; first-class All Mine grey forge pigs, 3*l* 5s to 3*l* 10s; good mine pigs, with a modicum of flue cinder, 2*l* 10s to 2*l* 15s; mine pigs, deteriorated by cinder, 2*l* 7s 6d to 2*l* 12s 6d; Cleator Moor hæmatites, 3*l* 7s 6d to 3*l* 10s; Barrow hæmatites, 3*l* 7s 6d to 3*l* 10s; Workington hæmatites, 3*l* 7s 6d to 3*l* 8s 9d; Kirkless Hall hæmatites, 3*l* 6s 3d to 3*l* 8s 9d; grey forge cinder pig iron, 2*l* 5s to 2*l* 10s; white forge cinder pigs, 2*l* 2s to 2*l* 7s 6d; ordinary melters, Nos. 1, 2, and 3, 2*l* 12s 6d to 2*l* 17s 6d; superior makes of mine melting iron, 3*l* 2s 6d to 3*l* 15s, according to make and quality. The above prices are all delivered on to the wharfs at the South Staffordshire manufactories. Favourite Shropshire and Forest of Dean brands, 4*l* 5s delivered; Northern hæmatites from 3*l* 5s to 3*l* 10s, according to brand or quality.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Feb. 23.—Under the continued favourable tenor of the European advices the market for State and Western flour remains firm, though the demand is light, being confined mostly to the wants of the local and Eastern trade. The firmness in freights continues to check the inquiry for export, and the business for the three days has been very moderate, comprising 22,000 brls, of which 4,500 changed owners yesterday, at our quotations. Canada flour is steady and unchanged, with sales to the extent of 1,300 brls, including 150 yesterday. Southern flour is steady, with a fair demand, at full prices. The sales since Tuesday aggregate 3,500 brls, of which 500 brls changed hands yesterday. Rye flour is quiet, with only small sales.

EXPORT, from 1st to 19th February.

	1861 barrels	1860 barrels
Wheat Flour	123,874	29,987

The demand for wheat continues fair, both for local milling and export, and previous rates are fully supported. The export business has been restricted by the firmness of freights, and though holders have offered freely, purchasers do not seem to buy very largely at current rates. There was no 'Change yesterday, and business was accordingly small. The transactions for the three days comprise 110,000 bushels, of which 21,800 changed owners yesterday, including 6,000 Chicago spring, at 1.21 dol; 8,000 Milwaukee, 1.25 dol delivered; 4,000 winter red Western, 1.35 dol; 350 white Western, 1.45 dol; and 3,500 white California, on private terms. Corn is in fair request for consumption and export, and prices are a shade firmer; the sales comprise 105,000 bushels, including 18,000 yesterday, at 68c to 78c for Southern white, 64c to 70c for ditto yellow, 65c to 71c for round yellow, 68c to 69c for mixed Western, and 62c to 67c for unsound.

EXPORT from 1st to 19th February.

	1861 bushels.	1860 bushels.
Wheat	672,576	59,299
Corn	345,028	19,817

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Most of the provincial markets held since we last wrote, have been scantily supplied with home-grown wheat, in, for the most part, poor condition. Good and fine samples have commanded a steady sale, and, in some instances, the quotations have had an upward tendency. Low and damp qualities, however, have moved off slowly, at irregular currencies. At the outports, foreign wheats have changed hands freely, at quite late rates. Both English and foreign flour has, however, moved off slowly, at barely stationary prices. There has been much less activity in the barley trade, and inferior descriptions of barley have gone rather lower in price, although the supplies have not increased. In the value of malt, very little change has taken place. The trade has continued restricted to small parcels for immediate consumption. Oats have realised full prices, with a good demand. Both beans and peas have produced quite late rates; but the demand for them has been by no means active.

Throughout the Continent, wheat, barley, and oats have sold freely, at full quotations. All other kinds of produce have commanded very little attention. The latest advices from New York state that both wheat and flour were in but moderate request for export purposes. Prices, however, ruled firm.

The Scotch markets have ruled firm for wheat, barley, and oats, several sales of which have been effected for shipment to the South. Other kinds of produce have commanded very little attention.

In Ireland, wheat has ruled about stationary; but the demand for it has been very moderate. Fine barley and oats have commanded very full prices, but inferior kinds have ruled in favour of buyers. Indian corn, beans, and peas have ruled at previous rates.

The supply of English wheat at Mark lane, was very small. Good and fine dry samples were in somewhat improved request, at fully Monday's currency; but all inferior parcels ruled dull. On the whole, there was a decidedly better feeling in the trade. For foreign wheat, the demand ruled steady, but very little was taken beyond actual wants, and the quotations were well supported. With the exception of the finest qualities, barley was very dull, and sales could only be effected by submitting to lower prices. Malt changed hands to a limited extent, at previous rates. Oats were in fair request at extreme currencies. Beans and peas moved off slowly, on former terms. The inquiry for flour was very moderate, yet no change took place in its value.

Mr. Ed. Rainford thus reports the state of the floating trade:—Since the 1st instant 16 vessels have arrived off coast for orders, consisting of 9 cargoes of wheat, 3 maize, 3 barley, 1 beans, viz.:—Wheat, 2 from Venice, 1 Santander, 2 Odessa, 1 San Antonio, 1 Marseilles, 1 Constantinople, 1 Varna; maize, 2 New York, 1 Ibraila; barley, 2 Ibraila, 1 Alexandria; beans, 1 Alexandria. Of the preceding, 3 cargoes had previously changed owners. The demand for cargoes afloat continues inactive. The following are the prices paid since this day week:—Wheat, arrived, per 492lbs, Marianople, at 54s 6d and 54s; Berdianski, not quite perfect, 54s 9d; Taganrog Ghirka (fine quality) at 53s; Odessa Ghirka, imperfect, 51s 3d tale quale; Austrian (via Trieste) 59s 6d; per 480 lbs, Sandomirka, 62s; Polish Odessa, 53s and (fine quality) 57s; Galatz, 47s; Wallachian, 42s 6d; Roumelian (for Continent) 44s 6d; Danubian, equal to 42s; Milwaukee Club, equal to 59s; per Imperial quarter, Saide 42s and 41s. Maize, arrived, per 480 lbs, Ibraila, 40s 3d; Mixed American, 2 cargoes at 38s, B L quantity; Mazagan, equal to 40s 7d, and a cargo, not quite perfect, at 40s; on passage, Ibraila, 39s, tale quale. Barley, arrived, per 400 lbs, Odessa, 26s 6d, and equal to 26s 7½d; Ibraila 26s 6d, and 2 cargoes at 27s 6d.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 6th day of March, 1861.

ISSUE DEPARTMENT.

	£		£
Notes issued	25,626,755	Government Debt	11,015 100
		Other Securities	3,459,900
		Gold Coin and Bullion	16,503,393
		Silver Bullion	848,362
	25,626.755		25,626,755

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities(including Dead Weight Annuity)	8,954,776
Rest	3,803,199	Other Securities	20,537,999
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	5 906,487	Notes	6,333,785
		Gold and Silver Coin	908,028
Other Deposits	11,848,778		
Seven Day and other Bills	623,124		
	36,734,588		36,734,588

Dated the 7th March, 1861. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	19,916,094	Securities	29,414,775
Public Deposits	5,906,487	Coin and Bullion	12,059,783
Private Deposits	11,848,778		
	37,671,359		41,474,558

The balance of Assets above Liabilities being 3,803,199*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£188,495
An INCREASE of Public Deposits of	85,617
A DECREASE of Other Deposits of	261,003
An INCREASE of Government Securities of	184,000
A DECREASE of Other Securities of	31,959
A DECREASE of Bullion of	148,938
An INCREASE of Rest of	366,984
An INCREASE of Reserve of	76,202

The above return is comparatively favourable. The decrease in the bullion is less than might have been expected, but since making up this account further sums have been withdrawn for shipment to America. There has been a falling off in the "other" deposits, which last week showed an augmentation of 656,000*l*.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851:—

At corresponding dates with the present week	1851.	1858.	1859.	1860.	1861.
Circulation, including bank post bills	£ 20,053,294	£ 20,389,652	£ 21,212,716	£ 21,366,807	£ 19,916,094
Public deposits	8,016,287	5,977,542	8,741,162	8,341.365	5,906,487
Other deposits	9,363,092	13.900,771	13,440,220	12,836,611	11,848,778
Government securities	14,145,696	9,202 450	10,696,147	10,171,190	8,954,776
Other securities	13,030,554	16,619 633	16,474,750	20,953,897	20,537,999
Reserve of notes & coin	9,429,630	12,690,737	13,990,012	9,025,838	7,241,813
Coin and bullion	14,423,685	17,713,242	19,951,022	15,220,193	12,059,783
Bank rate of discount	3 p. c.	3 p. c.	2½ p. c.	4 p. c.	8 p. c.
Price of Consols	96⅛	97	96⅛	94⅛	92⅛
Average price of wheat	36s 9d	45s 6d	40s 5d	44s 9d	54s 2d
Exchange on Paris(shrt)	25 0 5	25 5 12½	25 7½ 12½	25 7½ 12½	25 37½ 47½
— Amsterdam ditto	11 15½ 16	11 14	11 15½ 15¾	11 13 13½	11 18½ 19½
— Hamburg(3months)	13 7¼ 7¾	13 6	13 5¼ 6	13 4¼ 5¼	13 9¾ 10¼

In the corresponding week of 1851, the Houses of Parliament were chiefly occupied with Ministerial explanations consequent on the late crisis. The Conservatives having failed to form a Ministry, Lord John Russell's Cabinet had resumed office. News had just arrived of the outbreak of another Caffre war. As regards foreign events, the dispute between the Austrian Government and the Porte relative to the Hungarian refugees at Kutayeh had been terminated. The Russian Government had made a large claim on the Porte for the expenses of the occupation of the Danubian Principalities.

In 1858, there was a difficulty between the English and French Governments with reference to the Conspiracy Bill. Under the influence of the agitation, the signal for which was held out by the French Government, general uneasiness was occasioned. The issue of officially inspired pamphlets had commenced at Paris. The Bank of England minimum was 3 per cent., but the best bills were taken in Lombard street at 2½.

In 1859, Prince Napoleon, who was regarded as the representative of the war party, had resigned his seat in the French Cabinet, and a pacific article had been inserted in the *Moniteur;* but the effect of these manifestations was marred by the enormous preparations for war which were still actively continued by France, Austria, and Sardinia. Extreme discouragement prevailed in the financial and commercial circles at Paris.

In 1860, important news had just been received from India; the credit of the Government was rapidly improving, and Indian securities were rising on the Calcutta markets. The Volunteer movement was exercising an important effect upon politics by mitigating in some degree the distrust caused by the annexation of Savoy to the French Empire.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 3,667,462*l*; in 1858, a deficiency of 2,718,862*l*; in 1859, a deficiency of 3,034,530*l*; and in 1860, a deficiency of 8,117,286*l*. In 1861, the deficiency is 8,689,221*l*.

DISCOUNT AND MONEY MARKET.—The demand for money this week has been more active, and a larger portion than usual of the discount business being taken to the Bank, the applications there have been on an extensive scale. There is still, however, an absence of pressure, and the rate in the open market, which during the greater part of the week was equal to the Bank, has to-day been 7¾ per cent. for the best short paper, transactions occasionally taking place even lower. On the Stock Exchange, the Consol settlement caused a strong demand yesterday, and loans on Government securities were charged 6 to 7 per cent. for short periods, and 7 to 8 till the next account. This afternoon, however, the supply has been more abundant, and money from day to day could be obtained at 5 to 6 per cent.

The Bank have notified that they will make their usual quarterly advances during the shutting of the transfer books on Government securities and approved commercial bills having not more than six months to run. The rate will be 8 per cent., or the existing minimum, and the period will extend to the 10tn April.

The following are the rates of interest on the principal Continental exchanges:—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	7	4½
Amsterdam	3	3
Berlin	3	3
Hamburg	...	2½
Frankfort	...	1⅝
Brussels	4	4

The Bank of St Petersburg have reduced their rate of discount from 7 to 7½ to 6½ to 7 per cent. for the current fortnight.

ENGLISH FUNDS.—The monthly settlement in the funds took place this week, and owing to a supply of stock, partly of Consols and partly New 3 per Cents., for immediate delivery, it is believed on banking account, the price for money declined yesterday to 91⅜ to ½, or a quarter per cent. lower than last Friday. To-day, however, there has been a better feeling, especially during the later hours of business, and a recovery has been established from this fall. The last official quotation of Consols for money was 91½ to ⅝, but there were subsequent transactions at 91⅜ to ¾. For the 10th of April the latest quotation was 92⅛ to ¼. The transfer books are now closed of Reduced and New 3 per Cents.

Notwithstanding the increase in the rate of interest on Exchequer bills to 2d per day, and the contemplated measure for receiving, under certain limitations, those securities for revenue payments, a large amount of the bills falling due this month were sent in for liquidation instead of renewal. The total is believed to be about 1,000,000*l*. The price continues heavy at 6s to 2s discount.

The scrip of the New Indian loan, which left off last week at 100¼ to ½, receded to 100⅛ to ⅜ yesterday, and rallied this morning to the former price.

FOREIGN FUNDS.—The transactions this week have not been extensive, and prices have generally been well maintained. Mexican has shown the chief fluctuation, and after declining to 23⅜, improved to-day to 23⅞ to 24⅛ on a statement from the New York *Times* that the Juarez Govern- There have been a few inquiries for Spanish, notwithstandment are steadily consolidating their authority over the country. ing the difficulty respecting the new coupon sheets, but no material change has taken place. The dullest stocks con-

tinue to be Russian, which remain with a decidedly drooping tendency. Turkish Six per Cents. have improved, especially the 1858 stock.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and to-day :—

Railways and other Shares.—The operations in railway stocks are mainly confined to orders from the provinces, and the daily changes have arisen according as the speculation in Manchester and Liverpool has been for the rise or fall. Latterly the feeling there was adverse, and sales were pressed on the expectation of a falling off on traffic from the dulness of trade. Within the last day or two, however, the continuance of good traffic returns has caused a more favourable view, and prices have risen from purchases to close previous operations for a decline. Midland and Lancashire and Yorkshire are the stocks mostly dealt in.

Colonial descriptions are generally steady. Great Western of Canada shares have barely maintained their late advance, but close higher than at one period. In the foreign market the principal movement is a rise in Great Luxembourg. Illinois Central and New York and Erie shares are slightly firmer on the week.

United States Five per Cents. have fallen to 78 to 80 (exchange 4s 6d).

Red Sea Telegraph shares are quoted 18 to 19, showing no alteration, although the final settlement respecting the Government guarantee has transpired.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and this day :—

Bullion.—Annexed is the weekly circular of Messrs Haggard and Co., giving an account of the movements in bullion during the week to last evening :—

The principal feature of interest this week has again been the further shipments of gold to America. The imports, which have not been very large, comprise the Norman, from the Cape of Good Hope, with 4,260*l*; the Tagus, from Lisbon, with 640*l*; the Leda, from Oporto, with 2,500*l*; the Ocean Chief, from Melbourne, with 93,028*l*; and some moderate amounts of gold and silver from the Continent. The exports include the Atrato, to the West Indies, with 6,688*l* gold and 1,000*l* silver; the Ceylon, to Calcutta and China, with 167,417*l*, of which 160,156*l* silver and 7,261*l* gold; the Arabia, with 259,189*l*, the Vigo, with 248,540*l*; the Teutonia, with 31,000*l*, and the Arago, with 20,000*l* —all to New York; the Tagus, to Lisbon, with 20,000*l* (sovereigns); and some small amounts of gold to Spain. The amount of gold sold to the Bank of England is 56,000*l*; but on the other hand there have been large withdrawals of sovereigns for shipment to New York. Small amounts of gold continue to be received daily from the Continent. Silver has been in moderate demand at 61d, at which price that by the Seine has been sold; but there is still a good supply in the market. Mexican dollars are exceedingly dull, and the late arrival will probably be sold at a further reduction. The following gold ships are known to be at sea :—Thames, with 69,907*l*; Ydale, with 3,450*l*; Monarch, with 90,748*l*. Quotations for bullion :—Gold—Bar gold, 77s 9d; ditto refinable, 77s 10½d; French gold coin, 76s 1½d to 2d; South American doubloons, 74s, dull; Spanish ditto, 76s 6d to 9d; Brazilian new gold coin, 77s 7d. Silver—Fine or cake silver, 5s 5½d; bar silver, 5s 1d; ditto with gold above 5 grains per lb, 5s 1¼d; five-franc pieces, 4s 11½d, nominal; Spanish pillar dollars, Carolus, 6s 6d; ditto ditto Ferdinand, 5s 1½d, nominal; Crusades, 4s 11⅝d, last price, dull.

About 48,000*l* in gold was taken to the Bank, a large portion being in French coin, while 50,000 sovereigns were withdrawn for shipment to New York by the Liverpool steamer to-morrow.

The out-going packet to Brazil will take 17,678*l*, nearly all silver.

The Mexican dollars by the West India steamer Seine were sold to-day at 59¼d per oz, being a decline of ⅜d compared with the last arrival.

Foreign Exchanges.—The rates continue to show increased firmness, and in most cases a slight advance has taken place.

Failures.—The suspension has been announced of M. Javier de Bustamante, commission merchant, of London. His business was in connection with Spain, Vera Cruz, and Cuba, and it is understood that some failures at the latter place have caused the disaster.

Mr Stephen Reggio, in the Levant trade, has also stopped payment, with liabilities of about 40,000*l*, and assets consisting chiefly of sums due from Constantinople, expected to realise nearly the same amount.

Messrs Pietroni and Draper have suspended, with liabilities estimated at about 20,000*l*. The firm was engaged in the Mediterranean trade, and under the title of Draper, Pietroni and Co., stopped in 1857.

The bills of Mr J. Crichton, Baltic merchant, have been returned, but there is little doubt that eventually no loss will be experienced. The principal part of the debts, 90,000*l*, are secured, the unsecured liabilities being very moderate.

According to a New Orleans correspondent of the Boston *Traveller*, Messrs W. and D. Urquhart, a firm in the commission business at that city, have just failed for 200,000*l*. In the crisis of 1857, this house was considered the most solid in that part of the Union.

From California the news has arrived of the failure at San Francisco of Messrs Taafe, McCahill, and Co, for 260,000*l*; S. H. Bohn and Co. for 240,000*l*; and Thomas Brady for 180,000*l*. In the first two cases the assets are reported to be bad, while the third will probably effect a compromise. It is stated that some of the loss will fall on Manchester and Bradford.

Two meetings of creditors were held to-day, that of Messrs Bello Brothers, in the Greek trade, and of Mr M. Adutt, commission merchant. In the former case the balance sheet was very favourable, the assets being 105,508*l*, and the liabilities 93,510*l*, showing a surplus of nearly 12,000*l*. Since making up the account also it has been ascertained that the whole of the 73,127*l* book debts will be realised. There have been no losses on the trading, and at the commencement of last month the house was considered to have a capital of 30,000*l*. It was resolved to accept an offer of 20s in the pound, payable in instalments extending over twenty-one months. Mr Adutt's meeting was adjourned for further information. The transactions here have been very small, the principal business being carried on by the

Vienna house, also failed, of which the London establishment was little more than a branch. The statement of affairs showed liabilities 14,056*l*, and assets 11,224*l*, exclusive of claims for 9,685*l* from foreign correspondents, but which was subject to the payment in full of Mr Adutt's acceptances.

PUBLIC COMPANIES.—The first meeting of the Universal Marine Insurance Company was held on Thursday, Mr Harvey Lewis in the chair, when the report was adopted after a short discussion, and a dividend declared at the proposed rate of 5 per cent. The Chairman detailed at length the proceedings connected with the starting of the concern, and its subsequent success in business, which he attributed chiefly to the exertions of Mr Rutherford the underwriter, and of the staff generally. With regard to the 9,393,206*l* risks outstanding at the close of last year, more than half are actually known to have since arrived, and altogether it is calculated that only about 3,500,000*l* are still remaining. To show that the business has been conducted on a safe system, it was mentioned that each policy issued in 1860 averaged little more than 1,000*l*., and that there is a standing rule against insuring more than a fixed amount upon a single vessel. The Directors have not confined themselves to one class of shipping, but have extended their business over all branches of commerce. The total income from the investments of the Company is now nearly 9,500*l*, the amount actually received up to the 31st of December last year being 5,736*l*. The paid-up capital of 100,000*l* is placed in Reduced and New Three per Cents.

THE WINE TRADE.—A large and influential meeting of the wine and spirit trade took place yesterday, to consider the new mode of levying differential duties on wine by alcoholic strength. The system came into operation on the 1st January, and has proved unjust, unequal, and vexatious in the highest degree. Last year, when Mr Gladstone proposed this plan, the trade held a meeting and protested against it, and correspondence has since taken place between some of the leading merchants and the Chancellor of the Exchequer, but without producing any result. The alcoholic test has turned out as unfair as it had been previously predicted to be. There is a total want of uniformity, the same wine giving different rates of strength according to the temperature of the atmosphere and the skill of the officer making the test. It has frequently happened that not only pipes of the same wine have been placed by the Customs in separate classes, but that quantities drawn from the same pipe have actually been charged different duties. Merchants have constantly had to remonstrate against the inaccuracy of the tests, and it is said that the Customs are themselves so far doubtful of their correctness as not to permit importers to be present at the operation, although this has always been allowed in the case of spirits. It was also mentioned that the process of testing is, according to scientific men, one of great delicacy, and requiring an amount of time which, from the extensive character of the trade in wine, cannot be afforded. Another complaint was that the different rates of duty are made a plea for the withdrawal of the drawback. Hence merchants importing wine in cask, for subsequent exportation in bottle, are obliged to conduct the whole process in the docks where the wine is in bond, and where it is impossible the work can be performed with equal efficiency as in private warehouses. The principal motive of the Government in fixing the principle of differential duties according to the strength of spirit, appears to have been the prevention of the import and sale of some spurious mixture of wine and spirit which might be openly retailed to the injury of the revenue from British spirits. It was contended, however, that the Excise possessed ample power to stop any proceedings of the sort, and that there is no necessity on this ground to adopt a plan which is most vexatious to the regular trader in wine. Owing to the remonstrances of the French Government, an alteration in the original rates of strength is said to be contemplated, the alcoholic test having in the first instance been calculated differently by the two Governments. To show the comparative inutility of the low duty, it was mentioned that of the wine consumed since the 1st of January, barely one-tenth has been of the quality charged 1s, although wine of this description, not being able to keep, must have paid the duty immediately. What the trade require is simply an uniform rate; they do not pretend to fix how high or low it should be. After some discussion the following resolution was carried unanimously, and it was determined to memorialise the Treasury on the subject:—"That the present mode of levying the duty on wine by alcoholic test has proved, since its introduction, most vexatious and troublesome to the trade, and in many instances unjust, unequal, and inaccurate in its character."

FRENCH TREASURY BILLS.—The interest on French Treasury bills has been raised by the Minister of France to 3½ per cent. and 4 per cent. for those of short periods, and 4½ with a year to run. Six months ago the rates were as low as 1¾ to 2 per cent.

DOUBLE INCOME TAX.—A petition against the imposition of the double income tax on Indian securities is lying at the Oriental and Agra Banks, and has already received numerous signatures. It is believed that although the claim of double tax has been abandoned in one form, it is liable to be raised in another. The petition will be presented by Mr Crawford, the member for the City.

AMERICA.—The commercial advices from New York state that money is rapidly accumulating there, and that short bills are readily discounted at 6 to 7 per cent. They report the same degree of uncertainty respecting future trade as by the previous mails. The new Federal loan of 1,600,000*l* in Treasury Six per Cent. Bonds had all been taken at an average price of about 91. The rate of exchange has improved to 106.

MEXICO.—The following is from the Committee of Mexican bondholders:—"The Committee have received a letter from Mr Whitehead, dated Mexico, the 4th February. He had then, as yet, not been able to obtain an interview with the new Minister of Finance, but had an appointment for one on the following day, when he would be able to ascertain Mr Prieto's intentions relative to the claims of the bondholders, and also urge on him the despatch of a conducta to Vera Cruz, respecting which he had likewise written to the papers. The mercantile houses were all very anxious for Government to order a conducta. Mr Matthew had written to the new Government from Jalopa, on the necessity of arranging the outrage and robbery of the 660,000 dols, and the new Minister of Foreign Affairs had replied on the 31st January that the persons concerned had been sent before the Tribunals, and their property would be sequestered. Two days afterwards, four members of the last Government were arrested. In Mexico, the public take for granted that the British Government will demand the extradition of Miramon, wherever he may be. Mejia, after defeating and capturing Escondo in Rio Verde, shot him and fourteen of his officers. Of the three candidates for the Presidency, Sr Leido continued to have the best chance.

In consequence of the irregularities in the new coupon sheets issued by the Spanish Government to the holders of the Three per Cent. Exterior Debt, the Committee of the Stock Exchange have adopted the following resolutions:—"The intervention of the Committee having been claimed in relation to the new sheets of dividend coupons now in course of issue by the Spanish Finance Commission, to accompany the bonds of the Three per Cent. Exterior Debt of December, 1841, it was unanimously resolved:—'That the document now in the course of delivery to the holders of the bonds of the Three per Cent. Spanish Exterior Debt, being provided with eighteen dividend coupons only, is at variance with the bond itself, by which the Spanish Government expressly engages to deliver 40 new dividend coupons, and also with the purport of the advertisement of the 1st day of February, issued by the Spanish Finance Commission, calling upon the bondholders to apply for the new dividend coupon sheets. That the clause in the said document requiring that when the 18 dividend coupons shall have expired, 'the corresponding bond shall be presented, for the purpose of being exchanged for the new documents to bearer of the Three per Cent. Consolidated Rente, which the Spanish Government will then issue, to insure the uniformity of the whole debt, as determined by the law of the 1st of August, 1851,' is a violation of the rights of the bondholders, inasmuch as such exchange of bonds will deprive them of the security afforded by the signature of the English agents, and of the power, stipulated in the bond, of receiving pay-

ment of the dividend at a fixed exchange in London and Paris, as well as at Madrid. That no alteration can legally be made by any Government in the conditions and engagements contained in their original bonds, without the special sanction and assent of the holders of such bonds.' That a copy of the above resolutions be forwarded to the Spanish Ambassador, and that he be respectfully requested to bring them under the consideration of his Government, with a view to the adoption of prompt measures for the protection of the undoubted rights of the bondholders."

MISCELLANEOUS.—It has been officially announced that the Government of New Granada have accepted the terms proposed by the bondholders for the adjustment of the foreign debt. About six months ago, the Granadian Adminstration forwarded to England a scheme for the consideration of the bondholders, which was submitted to a meeting and rejected. This offer provided for the consolidation of the entire debt, comprising the active bonds representing 3,241,425*l*, the deferred, at the rate of 50 per cent. of their nominal amount, equal to 1,604,489*l*, and the overdue dividends of 713,086*l*, into one stock of 5,559,000*l*, bearing 2 per cent. per annum for 57 years, during which period the Republic guarantee to repay the capital and interest. This payment was to commence at 40,000*l* annually from 1861 to 1864, 60,000*l* from 1864 to 1868, and so on, increasing every four years according to a specified schedule. None of this appropriation, however, was to be devoted to the payment of interest, except on the bonds periodically drawn for redemption, and hence the present offer was deemed inadmissible. The bondholders in their turn made a counter-proposition, which has just been accepted with slight modifications by New Granada. According to the terms of this agreement, 25 per cent. of the import duties of the Confederation up to 1867 and 37½ afterwards are to be applied to the liquidation of the debt, one-tenth towards redemption, six-tenths for dividend on the active stock, and three-tenths for the deferred, with the proviso that the dividends are not to exceed 3 and 1½ per cent. respectively, any surplus being devoted to the redemption fund. The latter is also to be increased by the payments to the Government on account of the Panama Railway, and it is stipulated that the bonds are to be exchangeable for waste lands under the law of the 1st May, 1859.

The Select Committee of the House of Commons on the Red Sea and India Telegraph Bill held another meeting on Monday. Further evidence was given showing the undoubted fact of the original guarantee having been unconditional; and it was resolved that a clause be prepared by Mr Freshfield and the law officers of the Crown fully recognising the obligation, and to be framed in such a manner as to prevent further difficulty. The chairman of the committee, Mr Frederick Peel, had in the first instance submitted a clause of his own; but, as it was simply permissive, it was declined by the Company on the ground—1. "That it purported to substitute a permission for a binding obligation which already existed in the contract to pay the guarantee. 2. That it was entirely inconsistent with the frame of the Bill and the evidence taken in support of it. 3. That it fell far short of the promise made by the Government through the hon. chairman, when he communicated the views of the Cabinet upon the subject. And 4. That it left matters entirely where they were, and admitted of the validity of the guarantee being questioned by any future Government." Yesterday, a second meeting of the Committee took place, when, after some discussion, the advisers of the Company agreed to accept the following clauses:—"1. It is hereby declared that the guarantee contained in the said agreement was not intended to be, and is not, conditional on the line of telegraph of this Company being in working order. 2. This Act, and the Red Sea and India Telegraph Act, 1859, shall be construed together as one Act." All impediment is now removed to the payment of the dividend.

The annual meeting of the North British Insurance Company was held at Edinburgh on Monday. The report shows an increase of 7,968*l* 0s 11d in the fire premiums, which now amount to 43,300*l* 11s 4d annually. In the life department 741 new policies have been issued, assuring 475,649*l*, and producing 14,070*l* 17s 7d in new premiums. The total annual revenue is now stated to be 193,740*l* 4s 4d, and the accumulated fund 1,090,730*l* 4s 10d.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 3 per mille premium, and the short exchange on London is 25.37½ per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 5-10ths per cent. dearer in London than in Paris.

By advices from Hamburg the price of gold is 427 per mark, and the short exchange on London is 13.7¼ per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 6-10ths per cent. dearer in London than in Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is quoted at 105 to 105½ per cent. for first-class bills. Although this shows the exchange to be against England, the high rate of interest in both countries, and the loss of time before the gold is received back from the American mints, render it doubtful if any profit can be made at the present rates by sending gold to the United States.

Imports of the week ..... 224,287 qrs.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

There was very little English wheat on show at Mark lane, to-day. Good and fine samples moved off steadily, at full quotations; but inferior kinds were very dull. Foreign wheat—in which a fair average business was passing—was firm in price. In the value of spring corn and flour, no change took place. This week's imports from abroad are 14,200 quarters of wheat, 29,460 barley; 2,520 oats; 40 sacks and 5,100 barrels of flour.

The present month's imports of produce are expected to be large, as we understand that there are still 400 vessels on passage to England laden with grain, linseed, &c.

At Liverpool, this morning, the demand for most kinds of produce was somewhat inactive, at Tuesday's quotations.

Messrs Briggs and Co., writing from Alexandria on the 27th ult., state that wheat had slightly declined in value, but that beans were scarce, and that their value had an upward tendency. Saide wheat was selling at from 34s to 35s; Beheireh ditto, 33s to 34s; Saide beans, 29s 6dt to 30s; Indian corn, 25s 6d to 26s 6d barley, 21s to 22s; and lenils at 26s to 27s per quarter, free on board.

At the commencement of the present week, in consequence of news received from America which was regarded as favourable for holders of cotton, there was a very active demand in the Liverpool market, which has been maintained throughout the week, and has resulted in total sales of 82,000 bales, including 47,000 bales to spinners, 16,000 bales on speculation, and 19,000 bales for export; quotations are without change since Friday last, holders, however, are firmer than in the last week. Market closes to-day very firm, with sales of 8,000 bales.

"The delivery of the cotton crop continues uninterrupted," write Messrs Neill and Co., of New York, "and the receipts are supported on a large scale. The rivers are up, prices are remunerative, and planters have been anxious to market their cotton before the approach of spring. Thus the deliveries of the past six weeks have equalled the large receipts of last year, and the total decrease has been kept in check, while by telegraph the receipts at New Orleans continue even in excess of 1859-60, all of which tend to increase confidence in the higher estimates. At Mobile, however, the falling off in receipts has not favoured the larger figures. The general opinion here does not vary materially from four million bales, to reach which figure the receipts from this out must about equal last year's. From some parts of thel South we learn there is less cotton remaining in the country thana at this time last year, while in other places the yield has been decidedly larger."

Although the demand for tea has been by no means active, prices generally are well supported. The show of samples does not increase. Good and fine raw sugars have moved off steadily, and in some instances the quotations have advanced 6d per cwt. Low and damp parcels, however, have commanded very little attention. Refined goods have changed hands on easier terms. The stock of tea in London is 58,079,690 lbs, against 51,020,154 lbs last year.

Plantation coffee has continued in fair request, at full prices. Other kinds have sold slowly, on former terms.

Messrs Trueman and Rouse furnish the following statistics in reference to sugar and coffee:—

IMPORTS and STOCKS of SUGAR and COFFEE at the PRINCIPAL EUROPEAN PORTS, for the Month ending 31st January, 1860 and 1861.

Rice is still very dull, at about stationary prices. There has been a slight improvement in the inquiry for fruit this week.

Writing with reference to the fruit trade, Messrs Witherby and Son observe:—"The total crop of currants is now ascertained to have been 36,000 tons in the Morea, and 13,000 in the islands, in all 49,000 tons. The crop has been disposed of as follows.—

	tons.
London and Liverpool (all arrived)	31,000
Bristol, Hull, and outports	1,000
North of Europe	6,100
Trieste	7,400
United States.....	900
Afloat	1,000
Left in Greece 800 tons Left in island 800 tons	1,600
	49,000

The London duty-paid clearances in February were 766 tons, against 63 in February, 1860 (while the duty question was unsettled), and 560 in February, 1859. The bonded deliveries were 205 tons; 81 to Colonies, 68 to Continent, and 56 coastwise, making total clearances in February 971 tons. The stock of currants in bond in the United Kingdom on 31st December, 1860, was 14,861 tons, against 14,187 tons on 31st December, 1859. The arrivals of raisins in February were about 130 tons Valentias from the United States, and a like quantity of Turkey fruit by a steamer. Notwithstanding this small addition to our comparatively low stock, and that clearances have proceeded on an extensive scale, there has been a marked determination in importers to realise Turkey fruit, week after week developing increased weakness in the market. We consequently quote red raisins 5s to 6s lower than in January last, which prices are lower than they have been since the spring of 1855."

Saltpetre is again offered on easier terms, with a heavy demand. Hemp and flax have commanded very little attention, at late rates.

COMPARATIVE STATEMENT of HEMP and FLAX on hand in London, on the 1st of March, 1860 and 1861, Dealers' Stocks included.

Messrs Hunt and King have issued the following in reference to the silk market:—"In China silk the arrivals have been large, but the proportion of good useful silk is small; for best Tsatlees and fine silk there is scarcely any reduction upon our last quotations, but low Tsatlees and Taysaams have declined about 1s per lb. Japan silk has been influenced in a similar manner according to its relative classes—the deliveries for the month are 5,377 bales. In Bengal silk there has been a fair business in the best qualities, but other sorts are neglected. In Italian silk there is nothing to remark."

STATE OF THE WAREHOUSES IN LONDON, ending Feb. 28, 1860, and 1861.

	Sold Stock. 1860. bales.	Sold Stock. 1861. bales.	Unsold Stock. 1860. bales.	Unsold Stock. 1861. bales.	Delivered in February. 1860. bales.	Delivered in February. 1861. bales.

* Including about 700 Korat and common sorts.

The following are the weights of silk conditioned during the year 1860 at the principal condition houses on the Continent as there stated; to which are added those of London and Manchester, the only establishments of this kind hitherto formed in England. The amount of silk imported last year was upwards of 9,000,000 lbs; the amount conditioned about 3,000,000 lbs.

	bales.	kilos.	lbs.

Zurich	7,176	410,624	905,375

The iron market continues in a most unsatisfactory state. Tin has fallen 2*l* to 4*l* per ton. The shipments of iron from Scotland during the first two months of this year were 61,257 tons, against 57,730 tons in the corresponding period in 1860. The arrivals of tin at this port during February were 6,491 slabs Straits, making the importation since the 1st of January as follows:—

	1861 slabs	1860 slabs	1859 slabs	1858 slabs
Banca	...	1665	1850	6985
Straits	11792	14346	5963	329
Total	11792	16011	7813	7314

The present stock of tin in warehouse here is estimated at 610 tons, against 403 tons last month, and 375 tons the month before.

Messrs Churchill and Sim have issued the annexed statement showing the comparative stock of timber at the public docks on 1st March:—

		1861.	1860.	1859.
Foreign deals	pieces	1,713,000	1,371,000	1,297,000
Battens, boards, and ends		908,000	807,000	482,000
Fir timber	loads	66,600	57,700	31,400
Colonial pine deals & battens	pieces	1,091,000	597,000	932,000
Spruce ditto		930,000	855,000	707,000
Pine timber	loads	12,400	10,500	9,400
United States pitch pine timber		950	2,600	2,800
East Indian teake		3,100	4,900	17,200

Messrs Powell and Co. thus report the state of the leather market during the past month:—"The transactions in leathe present little room for remark. The demand has been steady and of a general character, equal, in most articles, to the supply, so that little or no increase of stock has occurred. The variations in prices are very slight, and it is seldom that so few alterations have to be made in our price current. In raw goods an average amount of business has been done without any material change in prices. The imports of Australian hides are large, but of other articles they are moderate. The few Buenos Ayres hides that have arrived are from Havre, denoting that the English market is at present rather higher than that of France. The demand for East India kips for exportation has been large."

Linseed oil has been selling at from 28*l* to 28*l* 5*s* per ton. Foreign refined and other oils are inactive.

The tallow market is still very firm as to price; but the business doing in it is limited. To-day, P. Y. C., on the spot, is quoted at 60*s*; all the month, 59*s* 6*d*; April to June, 58*s* 9*d*; October to December, 56*s*. Town tallow is 58*s* net cash.

"The state of the money market," observes the New York *Shipping List* of the 23d ult., "is but a reflex of its predominant feature for several weeks past. Rates of discount are without variation. For prime short-dated paper the market is easy enough, but other grades are subjected to the closest scrunity.

	Per cent. per annum.
Loans on call, stock securities	5½ to 6½

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS, SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—At the close of last week and the commencement of the present one, the refiners appeared more desirous to buy at the recent decline, and the market was decidedly firmer. It has since, however, become quiet again, and up to yesterday no material change in prices was perceptible, excepting that some of the Havana went on moderate terms. Fine crystallised sorts are steady, and Barbadoes sold readily

on Tuesday at 38s to 43s per cwt. Including 225 casks of this description by auction, the transactions in West India during the three days reached 1,365 casks. The total deliveries last week were 4,975 tons, and the decrease for home consumption since the beginning of the year, contrasted with the previous one, now amounts to 2,800 tons. Present stock is 50,350 tons, against 51,050 tons last year. The total stock of raw sugar at the principal Continental ports is returned at 112,000 tons, against 130,000 tons last year, and 120,000 tons in 1859 at the same date.

Mauritius.—The sales on Tuesday passed off with more spirit, some of the refining sorts being rather dearer, and 6,825 bags chiefly sold, besides a few parcels by private contract previously: brown, 30s 6d to 36s; grey and yellow, 36s to 40s; grainy and crystallised, 37s to 43s 6d; fine crystallised, 44s to 45s per cwt. On Wednesday, 3,165 bags crystallised descriptions were partly bought in above the market value. A floating cargo has sold for the United Kingdom at 39s per cwt, equal to No. 13.

Bengal.—198 bags sold at 43s to 43s 6d per cwt for middling white Benares.

Madras.—3,000 bags native have sold at 29s 6d to 32s 6d per cwt.

Penang.—3,100 bags sold as follows: grainy yellow, 39s 6d to 41s; soft brown and yellow, 33s to 38s 6d per cwt.

Foreign.—Of 6,282 boxes Havana in public sale, about three-fourths sold, at and afterwards: brown and yellow, 34s 6d to 41s (16s duty); florettes, 43s 6d to 44s 6d. 164 casks Cuba muscovado, of indirect import, sold at 34s to 38s. 2,137 bags China partly found purchasers at 35s 6d to 36s for soft dingy greyish yellow. A floating cargo of Havana, No. 9 to 9½, has sold for the United Kingdom at 23s 6d, and one of brown Pernambuco for a near port at 21s 6d. On the spot, several parcels of Havana changed hands, and 650 baskets Java, the latter at 35s to 36s 3d per cwt.

Refined.—The market is still unsettled, and the supply of dry goods has rather increased. Common descriptions offer at 49s per cwt. Other articles, including crushed, are about the same as before.

Molasses.—470 casks clayed Cuba, offered by auction, were bought in at 16s; also 54 casks melado at 25s. 50 puns Barbadoes molasses have sold at 19s per cwt.

Rum.—A steady business has been done in West India: Leewards, 1s 9½d to 1s 10d; Demerara, 1s 11d to 2s proof; common to good Jamaica at 3s 2d to 3s 9d. A parcel of Penang has brought 1s 8½d, and upwards of 400 puns Cuba 1s 9d per proof gallon.

Cocoa.—No transactions are reported in West India or foreign.

Tea.—The principal feature to notice in the market this week has been the public sales. On Tuesday, 6,850 packages chiefly sold, including a considerable quantity of green from the recent arrivals, which obtained extreme rates. Nothing of importance has taken place privately.

Coffee.—There have been very limited supplies brought forward; therefore, notwithstanding the dull tone pervading the market, prices differ slightly from those of last week. The Netherland Trading Company's sale, fixed for the 17th proximo, will contain 462,327 bags. 132 casks 184 bags Courtallam offered here realised 66s to 68s 6d, and 67 casks 81 barrels and bags plantation Ceylon 70s 6d to 72s 6d for middling descriptions. Two floating cargoes of Rio have been sold for near ports at 50s to 51s 6d per cwt.

Rice.—12,500 bags common old Moulmein, offered by auction, were taken in at 10s, and since sold at 9s 3d to 9s 6d. Transactions in other kinds by private contract have been limited. Good Ballam has sold at 10s 3d per cwt.

Imports and Deliveries of Rice to March 2, with Stocks on hand.

	1861.	1860.	1859.	1857.
	tons	tons	tons	tons
Imports	8700	5615	4560	20700

Stock	30200	64450	82800	75700

* The deliveries of duty-free goods for export are not given now, and the total will be shown under the head of home consumption.

Spices.—No change of importance has occurred in the market during this week, and prices generally are steady. 471 bags pimento partly sold at 2¾d to 3d. 956 bags Penang pepper: dusty grey and brown went at 3⅝d to 3⅞d. White has been disposed of privately at 5⅝d to 5⅞d. 120 cases brown nutmegs sold at full prices, from 1s 1d to 1s 9d for ordinary to good, and 3s 7d to 3s 8d for fine. 31 cases mace, 10d to 1s 5d per lb. Pimento is less readily taken, and 471 bags were partly sold at 2¾d to 3d per lb. 708 cases Cochin ginger were bought in or withdrawn. 50 boxes first pile cassia liguea realised 90s, one lot 91s per cwt.

Sago Flour.—A small parcel, of indirect import, sold at 15s 6d per cwt.

Saltpetre.—A limited business has been done by private contract, and of 1,951 bags Bengal offered in public sale, a portion only sold, at and afterwards, at 6d to 1s decline: refraction 10¼ to 3¼, 35s 3d to 37s 6d per cwt. 100 bags French manufactured, refracting 4, partly realised 36s per cwt.

Imports and Deliveries of Saltpetre to March 2, with Stocks on hand.

	1861.	1860.	1859.	1858.
	tons	tons	tons	tons

Deliveries	2640	2800	2790	2135
Stock	9690	8675	8420	8720

Other Dyestuffs.—Safflower has been sold upon lower terms, and the market is now dull. 125 bales Bengal, by auction, went at 4*l* to 5*l* 2s 6d for ordinary to middling quality. Cutch sells slowly at 25s to 25s 6d; and Gambier has been in limited demand at 16s 6d to 17s 6d, according to quality. Turmeric is rather dearer, Bengal obtaining 13s to 13s 6d per cwt.

Sapan Wood.—97 tons Manilla sold at 5*l* 17s 6d to 6*l* 5s per ton.

Metals.—Several kinds have sold upon lower terms, and the market is still depressed. The smelters have reduced their prices of tin 4s, viz., common blocks, 124s. Within the past few days, Straits sold at 118s per cwt, being a corresponding fall. Iron has continued dull at the quotations. Scotch pig was last sold at 47s 6d to 48s per ton for mixed numbers. The spelter market is very unsettled, and 18*l* to 18*l* 5s per ton the present quotation on the spot. Stock, on the 1st inst., 4,100 tons, against 3,250 tons in 1860.

Hemp.—Russian is steady, and clean Petersburg quoted 31*l* 10s to 32*l*. The stock of the latter amounts to 3,850 tons, against 4,150 tons last year. Of 2,220 bales Manilla by auction, a small portion sold at 23*l* to 23*l* 7s 6d per ton for fair roping, the remainder being taken in above the value.

Jute.—The public sales on Wednesday, comprising 4,950 bales, went off flatly, but prices were not quotably lower, and a limited proportion sold at 13*l* 15s to 21*l* 12s 6d per ton. The present stock is 10,500 tons, against 11,700 tons last year.

Linseed. — Arrivals have been large, and prices rule slightly lower than last week: Calcutta, 51s to 52s; Bombay, 55s. Floating cargoes of Black Sea and Azoff off the coast are offered at 51s to 51s 6d for the United Kingdom.,

Turpentine.—1,300 barrels rough have sold at 9s. A large business has been done in American drawn spirits at 31s 6d to 32s per cwt.

Oils.—Common qualities of olive are lower, 52*l* being accepted for Mogadore. Messina and Gallipoli offer at 58*l* and 61*l* respectively. The stock of common fish oils is chiefly in second hands, and prices remain steady. Sperm cannot be obtained under 104*l* per tun. Linseed oil is in good supply at 28s to 28s 3d. Sales of considerable magnitude have been effected at lower rates: foreign refined, 39s 6d; brown, 36s 6d to 37s. Stocks are now much reduced, and the holders require 6d more. Cocoanut is firm: Cochin, 51s to 51s 6d; Ceylon, 50s to 50s 6d. Low to middling grades of palm are steady, but fine remains firm at 46s per cwt.

Tallow.—The market was steady until the middle of the week, when it became dull, and prices of foreign close about 6d lower in all positions. 1st sort Petersburg Y.C., 59s 6d to 60s; April to June, 58s to 58s 6d; and the last three months, 55s 6d per cwt.

Particulars of Tallow.—Monday, March 4.

POSTSCRIPT. Friday Evening.

Sugar.—The market was quiet to-day, but the public sales, comprising 181 casks Demerara and 14,936 bags Mauritius, went off at about previous quotations. 4,000 bags clayed Manilla by private contract brought 34s to 34s 6d, and 1,970 casks West India have sold for the week.

Coffee.—No further sales were held to-day.

Rice.—7,615 bags Necrancie Arracan were bought in at 11s per cwt.

Cassia Lignea.—356 casks pile 2 were taken at 92s per cwt.

Saltpetre.—1,185 bags Bombay, refraction 56¼ to 28½, brought 32s to 32s 6d per cwt.

Cochineal.—122 bags sold at previous rates for Honduras; 2s 8d to 2s 9d for Mexican silver, and 3s per lb for black.

Safflower.—92 bales Bengal sold more readily: common at 4*l* to 4*l* 17s 6d per cwt.

Gambier.—380 bales sold at 16s 9d to 17s 3d per cwt.

Cutch was chiefly bought in at 25s, a portion selling thereat.

Oil.—830 casks cocoa-nut, by auction, went as follows: Cochin, 49s 9d to 51s 6d. Ceylon, 49s 3d to 50s 6d. 420 casks palm part sold at 43s to 46s per cwt. 42 tons Colonial sperm, 104*l* to 104*l* 5s per ton.

Tallow.—Y.C., 59s 6d; April to June, 58s to 58s 6d; last three months, 55s 6d to 56s. 220 casks Australian, by auction, were bought in. 154 casks South American part sold at 50s to 57s; 274 casks Odessa, 55s 9d to 57s 6d; 80 casks North American, 52s to 55s. Several parcels East India part sold at 56s to 57s per cwt.

ADDITIONAL NOTICES.

Refined Sugar.—The home market for refined sugar continues very quiet. Dry goods neglected. Treacle in moderate demand, the middling qualities scarce. Nothing doing for export. Some sales of Dutch crushed have been made at 32s to 32s 2d for B. & H. 1 and O. V.; also S. & T. superfine at 32s 6d, all in barrels, f.o.b. in Holland.

Green Fruit.—Market depressed, country and town trade feeling the ill effects of the commercial crisis, which usually affects articles of luxury. Some cargoes of oranges from St Michael, sold by Keeling and Hunt at public sale, went at a reduction of 1s to 2s per package. Lemons, Seville and Palermo sours, together with nuts of all kinds are offering at lower terms, with little disposition on the part of the buyers to take.

Dry Fruit.—The fruit trade has shown sundry signs of improvement this week. In currants, sales have been made from 25s for the lowest sorts to 32s for finest Gulf. Chesme and Eleme show a small improvement in prices; whereas Sultanas are again lower, and seem likely to be at a greater discount, as the low price of currants interfere with the sale.

English Wool.—The English wool trade continues in a very dull condition, and prices gradually decline.

COLONIAL WOOL.—The sales progress without alteration.

FLAX unaltered.

HEMP.—Market very dull, scarcely any business to report this week.

COTTON.—Sales of cotton, from Friday, 1st March, to Thursday, 7th, inclusive. 1,600 bales Surat at 4⅜d to 4⅞d for very middling to middling fair Oomrawatty; 4⅞d to 5½d, middling to good Dhollera; 4⅞d, fully fair Mangarole; 4¾d, good fair Compta: 1,200 bales Tinnevelly, 5⅜d to 5⅞d, good; 300 Western Madras, 4⅝d, fully fair. Total 3,100 bales. There has been an improved demand this week, and a fair amount of business has been transacted at an advance of ⅛d per lb for Surat and Western Madras, whilst Tinnevelly may be quoted ⅛d per lb lower. Market quiet to-day. Sales, 150 fair Western at 4½d; 100 middling fair Dhollera, 5d.

TOBACCO.—The market remains unchanged, and sales chiefly of a limited character, with the exception of about 50 tons taken for the navy.

METALS.—Nothing of moment has occurred in metals during this week, excepting a further decline of 4*l* per ton in the price of tin. In copper the quantity changing hands is very small, especially of foreign, and such of English as finds buyers is sold at a reduction from quotations. Iron continues to be greatly depressed; indeed, the market is even worse than before, on account of the proposed prohibitive scale of import duties in the United States. Spelter is lower in price, and neglected by buyers. Lead keeps steady. Tin plates show no improvement.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	30	3
Fat by ditto	3	1½
Yellow Russian	61	6
Melted stuff	40	6
Rough ditto	24	6
Greaves	18	0
Good dregs	7	0

PROVISIONS.

The bacon market is firmer this week, with a consequent reduction in stock. Anything fine in butter fetches a high figure. Friesland very scarce at 140s and upwards.

METROPOLITAN CATTLE MARKET.

MONDAY, March 4.—The total imports of foreign stock into London, last week, amounted to 2,636 head. In the corresponding period in 1860, we received 2,513; in 1859, 3,255; in 1858, 266; in 1857, 2,529; in 1856, 629; and in 1855, 308 head.

We were moderately supplied with each kind of foreign stock in to-day's market; but, on the whole, the condition of the supply was good. From our own grazing districts the receipts of beasts were seasonably good as to number, and in full average condition; indeed, the Norfolk supplies are of finer quality than during several previous seasons. All breeds met a slow inquiry, and, some instances prices declined 2d per 8lbs. A few superior Scots and crosses sold at 5s; but the general top figure for beef was 4s 10d per 8 lbs. The arrivals from Norfolk, Sufolk, Essex, and Cambridgeshire amounted to 1,900 Scots, Shorthorns, and crosses; from other parts of England, 800 various breeds; and from Scotland, 200 Scots and crosses. The show of all breeds of sheep was limited, and the quality of the stock was by no means first-rate. The mutton trade ruled firm at last Monday's currency. The best Downs in the wool sold at 6s, out of the wool 5s per 8 lbs. The few lambs on offer met a dull inquiry at late rates, viz., from 6s 4d to 7s 4d per 8 lbs. Although the supply of calves was rather limited, the veal trade ruled rather slow at last week's currency. The best veal was worth 5s 4d per 8 lbs.

SUPPLIES

	March 5, 1860.	March 4. 1861.
Beasts	3460	3640
Sheep	17970	15400
Calves	59	84
Pigs	310	360

THURSDAY, March 7.—To-day's market was very moderately supplied with beasts, and all kinds moved off steadily, at fully Monday's currency. The show of sheep was rather limited. Prime Downs and half-breds commanded a ready sale at full quotations; but inferior breeds were inactive at late rates. The few lambs on offer realised an advance of 8d per 8 lbs, the prices being 7s to 8s per 8 lbs. There was a fair demand for calves at previous currencies, but pigs and milch cows commanded very little attention.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	2	3	6	Prime Southdown sheep	5	10	6	2
Second quality ditto	3	8	4	0	Large coarse calves	4	8	5	8
Prime large oxen	4	2	4	6	Prime small ditto	5	4	5	6
Prime Scots, &c.	4	8	4	10	Large hogs	4	0	4	6
Coarse and inferior sheep	3	8	4	0	Small porkers	4	8	4	10
Second quality ditto	4	2	4	6	Suckling calves.....each	19	0	22	0
Prime coarse-woolled do.	4	10	5	0	Quarter old store pigs	22	0	29	0

Total supply—Beasts, 950; sheep and lambs, 3,800; calves, 100; pigs, 290.
Foreign supply—Beasts, 190; sheep, 640; calves, 87.

HOP MARKET.

BOROUGH, Monday, March 4.—There is no improvement in the character of our trade, which, notwithstanding the considerable reduction in prices, remains heavy and inactive. Our currency is as follows:—Mid and Easts Kents, 80s, 140s, 200s; Weald of Kents, 60s, 120s, 168s; Sussex, 60s, 80s, 126s; Yearlings, 80s, 120s, 170s.

BOROUGH, Friday, March 8.—Our market continues very dull, and sales are effected with difficulty even at lower, prices. The quotations, consequently, must be considered nominal.

POTATO MARKET.

SOUTHWARK WATERSIDE, Monday, March 4.—During the past week the arrivals coastwise and by rail have been very large, and far more than equal to the demand, and a further reduction in price has been the consequence. The following are this day's quotations:—Yorkshire Flukes, 150s to 160s; Lincolnshire Regents, 100s to 110s; Dunbar red soil do, 150s to 160s; ditto, ditto, reds, 105s to 110s; North Berwick Regents, 120s to 125s; Perth, Forfar, and Fife do, 90s to 105s; ditto, ditto, ditto, Rocks, 90 to 95s; ditto, ditto, ditto, Reds, 80s to 90s; French Whites, 60s to 90s; Belgian ditto, 60s to 80s; Dutch ditto, 60s to 80s per ton.

THURSDAY, March 7.—The arrivals of home produce coastwise and by rail continue plentiful for the time of year, and trade is still very dull at the subjoined rates:—York Flukes, 140s to 150s; Scotch Regents, 95s to 105s; ditto Cups, 80s to 100s; ditto Rocks, 90s to 100s; Dunbars, 160s to 180s per ton.

HAY MARKETS.—THURSDAY,

SMITHFIELD.—Meadow hay, 2*l* 0s to 5*l* 5s; clover, 3*l* 0s to 5*l* 15s; and straw, 1*l* 10s to 1*l* 18s per load. A fair demand.

CUMBERLAND.—Meadow hay, 2*l* 0s to 5*l* 8s; clover, 3*l* 0s to 5*l* 15s; and straw, 1*l* 10s to 2*l* 0s per load. Trade steady.

WHITECHAPEL.—Meadow hay, 2*l* 0s to 5*l* 5s; clover, 3*l* 0s to 5*l* 15s; and straw, 1*l* 10s to 1*l* 18s per load. Trade slow.

COAL MARKET.

FRIDAY, March 8.—Walls End Hetton, 20s—Walls End Lambton, 19s 6d—Walls End Haswell, 20s—Walls End Stewarts, 20s—Walls End Tees, 19s 6d—Walls End Hartlepool, 19s 6d—Walls End Braddyls Hetton, 18s 9d—Walls End Russell Hettons, 18s 9d—Walls End Wharncliffe, 19s 6d—Walls End Kelloe, 19s 6d—Pensher, 17s 6d—Walls End Harton, 18s—Powell's Duffryn Steam, 21s—West Hartley, 15s 6d—Bebside Hartley, 15s 6d—Davidson's Hartley, 15s 6d—Hastings Hartley, 15s 6d—lambert's Hartley, 15s. Ships at market, 123.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, March 8.—The transactions continue on a limited scale for positive wants only, but prices remain pretty steady, as the stocks of all useful descriptions are very light.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, March 8.—The general tone of the corn market remains unchanged from Tuesday last.

METALS.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, March 8.—For manufactured iron there still exists but a limited demand, with a declining tendency in prices. In Scotch pig iron there have been but few transactions during the past week, with little fluctuation in price. Copper is comparatively quite neglected. Lead is also little inquired for. Most other metals remain unaltered.

The Gazette.

TUESDAY, March 5.

BANKRUPTCY ANNULLED.

R. Paddy, Amelia place, Brompton, draper.

BANKRUPTS.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic returns of railways in the United Kingdom for the week ending the 23rd of February amounted to 470,025*l*, and for the corresponding week of last year to 443,990*l*, showing an increase of 26,035*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 200,996*l*, and for the corresponding week of 1860 to 192,713*l*, showing an increase of 8,283*l*.

GLASGOW AND SOUTH-WESTERN.—The directors of this company recommend the shareholders to declare a dividend at the rate of 5½ per cent. per annum on the ordinary stock of the company for the half-year ending January 31.

SCOTTISH NORTH-EASTERN.—The proposed dividend on the Aberdeen ordinary stock of this company is at the rate of 10s per cent. per annum, and on the Scottish Midland ordinary stock of this company at the rate of 4¼ per cent. per annum, for the past half-year ending January 31.

GREAT WESTERN OF CANADA.—It appears that the directors of this company intend to propose a dividend at the rate of 3 per cent. per annum for the half-year ending the 31st of January last.

EASTERN UNION.—The report of the directors states that, after deducting interest on loans, guaranteed stocks, and rents, amounting to 37,945*l*, there would remain 10,000*l* available for dividends upon the unguaranteed stocks, and the directors recommend a dividend at the rate of 2*l* 10s per cent. per annum on the A stock and of 1*l* 13s 4d per cent. per annum on the B stock for the past half-year.

RAILWAY AND MINING SHARE MARKET.

LONDON.

MONDAY, March 4.—The railway market was rather heavy in the morning, but subsequently improved, from pruchases, chiefly on provincial orders, to cover previous speculative sales. Compared with Saturday, the closing prices of the principal stocks showed an advance of ¼ to ½ per cent., South-Eastern and Sheffield being the highest. In American railway securities a decline took place in Illinois Central shares to 27¼ to 27 dis. Mines were dull, and occasionally lower. United Mexican, however, advanced. In joint stock banks, London and Westminster and Union of London shares were firmer. Miscellaneous descriptions left off about the same as Saturday.

TUESDAY, March 5.—The railway market showed increased firmness today, although a rise that at one period had taken place was not fully maintained to the close. The final quotations, however, exhibited an advance of ¼ per cent. in North British, ⅜ in Great Western, and ¼ to ½ in most of the other leading stocks. South-Eastern was exceptionally rather flat. In colonial stocks, Indian guaranteed were firmer. Grand Trunk of Canada receded to 21½ to 22, and Great Western shares to 11⅛ to ⅜. In the foreign market, Great Luxembourg improved to 6⅞ to 7⅛, while Lombardo-Venetian remained at 1½ to 1⅝ dis. Cape of Good Hope debentures were higher. The only movement in American securities was another decline in Illinois Central. Mines were in moderate demand and occasionally lower.

WEDNESDAY, March 6.—The continuance of favourable traffic returns caused a general improvement in the railway market. Midland, Lancashire Yorkshire, Great Western, and Sheffield, were chiefly bought, and left off ½ to ¾ per cent. higher. Great Northern and York and North Midland also advanced ½ per cent, and other stocks ¼ to ⅜. London and North-Western remain comparatively flat at 96½ to ¾. Foreign descriptions were inactive, and Lombardo-Venetian showed increased heaviness. Great Luxembourg steadily maintain their late advance. In American securities, Illinois Central shares slightly improved. Mines were again flat. Joint stock banks closed about the same as yesterday. In miscellaneous descriptions, Madras Irrigation shares were quoted an eighth lower.

THURSDAY, March 6.—The railway market opened buoyantly this morning, but soon experienced a decline, and remained heavy during the greater part of the day. Towards the close, however, a partial recovery took place. Compared with yesterday, South-Eastern receded ⅜ per cent., and most of the other leading stocks ¼ to ⅜. York and North Midland exceptionally improved. No general movement occurred in the colonial market, but some of the Indian guaranteed stocks were quoted better. In foreign descriptions, Paris and Lyons and Pernambuco were flat. American securities were also depressed, especially United States Five per Cents. and Illinois Central shares. New York Central bonds, however, were firm. The transactions in mines were unimportant, and in several cases prices declined.

FRIDAY, March 8.—The railway share market to-day was quiet, but steady. With the exception of a decline of ¼ per cent. in Caledonian stock, there was scarcely any variation from the 4 o'clock quotations of yesterday, Lombardo-Venetian Railway shares were steady, at 1¼ to 1⅛ dis. Indian, Canadian, and foreign railway stocks met with scarcely any business. Mining shares were quiet, but without quotable change in value.

The Economist's Railway and Mining Share List.

SAUCES.—CONNOISEURS have Pronounced LEA and PERRINS' "WORCESTERSHIRE SAUCE" one of the best additions to Soup, Fish, Joints, and Game. The large and increasing demand has caused unprincipled traders to manufacture a spurious article; but the "GENUINE" all bear Lea and Perrins' name on Bottle, Label, and Stopper.
Sold by Crosse and Blackwell, London, and all respectable Oilmen and Grocers. Sole manufacturers—Lea and Perrins, Worcester.

DR ROBERT ROWE ON INDIGESTION.
This day is published, price 2s 6d, the fifteenth edition,
NERVOUS DISEASES, Liver and Stomach Complaints, Low Spirits, General Debility, and Diseases of Warm Climates; the Result of Thirty Years' Practice.
By G. ROBERT ROWE, M.D.
"Dr Rowe claims with justice a pricrity of authorship, while he yields to none in his treatment. The value of this work is enhanced by its practical nature."—LANCET.
"We have no hesitation in placing this work among the first ranks. We entertain a high opinion of its value."—MEDICAL TIMES.
"This is a clever and useful work; contains much that is worthy of attention, and should be read by all martyrs to indigestion and other ills"—TIMES.
Also by the same Author, 2nd edition, price 4s 6d, On some of the Important Diseases of Women and Children.
London: J. Churchill. and to be had of all booksellers.

Just published, 71st thousand, price 1s, post free for 13 stamps. Sold by Mann, 39 Cornhill, or direct from the Author.
DR LA'MERT ON THE CURE of Nervous and Physical Debility, resulting from pernicious habits or excess. With cases and engravings from life.
CONTENTS:—The Physiology of the Generative Organs—Puberty—Manhood—True and False Morality—Marriage, in its Moral and Physical Relations—Youthful Abuse—The Secret Cause of Nervous Debility, Impotence and Sterility—Spermatorrhœa, or Chronic Impotence: its History, Causes, and Moral Consequences.
Dr LA'MERT, M.D., L.S.A., &c., is the only legally qualified practitioner on the Medical Register who, for 20 years, has devoted his studies to the treatment of these disorders.
37 Bedford square, London.

VALUABLE INFORMATION.—GRATUITOUS EDITIONS of the following LECTURES, delivered at the Royal Institute of Anatomy, Science, and Medicine, 369 Oxford street, London, by W. B. MARSTON, the Principal, are being issued, with plain directions for SELF-TREATMENT and CURE in each of them.
No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.
No II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.
No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.
No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.
Each Lecture, neatly printed and bound, will be sent GRATIS, on receipt of two stamps to prepay postage, or THE WHOLE FOUR, BOUND TOGETHER, with numerous additions, and full directions for SELF-TREATMENT and CURE, 160 pages, 8vo, post free, for Six Stamps. Address, Treasurer, Royal Institute, 369 Oxford street, London.

DR DE JONGH'S

LIGHT-BROWN COD LIVER OIL, Prescribed by the most Eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for
CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,
Is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.
Dr JONATHAN PEREIRA, F.R.S.—"It was fitting that the author of the best analysis and investigations into the properties of this oil should himself be the purveyor of this important medicine. I am satisfied that for medicinal purposes no finer Oil can be procured."
Dr GRANVILLE, F.R.S.—"Dr Granville has found that Dr de Jongh's Light Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."
Dr BARLOW, Physician to Guy's Hospital.—"I have been well satisfied with the effects of Dr de Jongh's Oil, and believe it to be a very pure Oil, well fitted for those cases in which the use of that substance is indicated."
Dr BANKS, King's Professor of the Practice of Medicine at the University of Dublin.—"I have in the course of my practice extensively employed Dr de Jongh's Light Brown Cod Liver Oil, and I have no hesitation in stating that I consider it the best of all the specimens of Oil which have ever come under my notice."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists.
SOLE AGENTS,
ANSAR, HARFORD, and CO., 77, STRAND, London, W.C.
CAUTION.—Beware of Proposed Substitutions.

DR CURTIS'S MEDICAL WORK, "MANHOOD."
An Essay on Nervous and Generative Diseases.
The 140th thousand, with numerous plates, in a sealed envelope, price 1s, or post paid, by the Author, for twelve stamps.
MANHOOD: THE CAUSE AND CURE of PREMATURE DECLINE in MAN, with Plain Directions for Perfect Restoration to Health and Vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, the result of twenty-five years' successful practice. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London. Consultations, Ten till Three and Six till Eight.
REVIEWS OF THE WORK.
"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a parent, preceptor, or clergyman."—SUN, evening paper.
"Dr Curtis has conferred a great boon by publishing this little work, in which is described the sources of these diseases which produce decline in youth, or more frequently premature old age."—DAILY TELEGRAPH, March 27, 1858.
N.B. The Author of the above Medical Treatise may be consulted as usual, either by letter or personally, at his residence. The efficacy and harmless nature of the remedies employed by Dr Curtis, having been demonstrated by the most complete success during a practice extending over a period of 20 years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.
Published by Allen, 20 Warwick lane, Paternoster row; Mann, 39 Cornhill; and free from the Author for 12 stamps.

RUPTURES—BY ROYAL LETTERS PATENT.
WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.
Mr WHITE, 228 Piccadilly, London.
Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.
ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price from 7s 6d to 16s each; postage, 6d.
WHITE, MANUFACTURER, 228 Piccadilly, London.

A BOON TO NERVOUS SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions, by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Burton crescent, Tavistock square, London, W.C.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

ADULTERATIONS.—Several Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Another White Zinc has been now introduced containing impurities from the mode of manufacture which retard the drying. Whether these are sold under the name of "Improved Zinc Paint," or as the Number Two or Three qualities, no workman can produce good work with such material. Workmen who have once used the Patent Zinc Paint will never willingly use any other Paint for their best work.

To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"Among other tests to which it has been subjected, has been that of painting the hold of a sugar vessel, which after a voyage to St Kitt's and back, was found, after washing, to be as white as the first day the paint was applied."—JOHN BULL, September 14, 1850.

FORD'S EUREKA SHIRTS

are made with that rigid adherence to details in manufacturing, which alone can ensure a good and comfortable shirt. A box of six excellent shirts for 33s. Illustrated catalogues, mode of self-measurement, price list, &c., post free.

RICHARD FORD, 38 Poultry, London.

SALE OF LAMPS, CHANDELIERS AND GAS FITTINGS.

TUCKER and SON having purchased of Messrs Pearce and Son (of Ludgate hill) their entire stock of Lamps, Gas Chandeliers, &c., (on their relinquishing that branch of their business to devote exclusive attention to the China and Glass Trade) have distributed it among their three Show Rooms as under; and being goods of first-rate quality, and offered to the public at a reduction of one-third from their usual price, to insure their immediate realisation, they must command the attention of purchasers.

City Show Rooms, 36 King William street (4 doors from London Bridge); Central do., 190 Strand (opposite St Clement's church, and near Temple Bar).

TUCKER and SON—Established 43 years.

Manufactory, Essex Works, W.C.—November, 1860.

DUTY OFF MODERATOR LAMPS.

—J. Schlossmacher's celebrated Manufacture. Burner of every Lamp stamped J. S. The duty being now off, and J. S. being enabled by machinery to reduce the prices of his Lamps to the charges of other makers for their commonest qualities, the full benefit of both reductions is given to the public through his London Agents, TUCKER and SON, at their Establishments, as under:—

Central Show Rooms, 190 Strand (near Temple Bar); City Show Rooms, 36 King William street (4 doors from London Bridge). Established 43 years.

Engravings free by Post.

VOLUNTEER PIPE.—

RIFLE BORE.—The most delightful, economical, and permanent medium for the enjoyment of tobacco ever invented. This new pipe only to be had of the patentee. Sample pipe in case sent post free for 23 stamps.—EDWARD PILLINER, 53 Great Queen street, London, W.C.

66 Queen street, London, 23rd August, 1860.

MESSRS R. WOTHERSPOON and CO., 46 Dunlop street, Glasgow,

DEAR SIRS,—I have, as requested, to-day visited the Royal Laundry, with reference to the advertisement of the Nottingham firm, who state that their starch has been used for many years in the Royal Laundry, and have been assured by Mr Thompson, the superintendent, that none but yourselves have any right to state that they supply starch to Her Majesty's Laundry, as no other starch is there used, nor has been used for some years, but the Glenfield Patent Starch. I have been further assured that your starch continues to give complete satisfaction, and that though trial has been made of samples of various starches, none of these have been found nearly equal in quality to the Glenfield.—I am, dear Sirs, your obedient servant. WM. BLACK.

KEATING'S COD LIVER OIL.

Just Imported. The Pale from Newfoundland, and he Light Brown from Norway. The supplies of the present season have never been surpassed, the fish being unusually fine, and the oil nearly tasteless. Professors Taylor and Thompson, of Guy's and St Thomas's Hospitals, have analysed, and pronounced the PALE NEWFOUNDLAND OIL the best and most desirable for invalids of very delicate constitution. The Light Brown being more economical in price, is brought within he reach of all classes. NO HIGHER PRICE NEED BE PAID than the following:—Light Brown, 1s 8d per pint, or 3s per quart. Pale, 1s 6d half-pints, 2s 6d pints, 4s 6d quarts, or in five-pint bottles, 10s 6d, imperial measure, at 79 St Paul's Churchyard.

HEALTH AND HAPPINESS

for the NERVOUS and DEBILITATED.—The proprietors of the Birmingham Institute of Anatomy desire to make known an infallible means of self-cure for the nervous, debilitated, &c., and will forward the same gratuitously on receipt of a stamped directed envelope.—Address "To the Secretary, Institute of Anatomy, Birmingham."

Second Edition, price 2s 6d, post free for 30 stamps,

TOOTH-ACHE: ITS CAUSES,

and a New Painless Method of Cure (with as much certainty as water quenches thirst). Teeth cured by this Method will never ache again, and thus prevent the necessity of the painful operation of extraction. By THOMAS HOWARD, Surgeon Dentist to His Grace the Archbishop of Canterbury, 17 George street, Hanover quare, London.

IMPORTANT NOTICE.

GLENFIELD PATENT STARCH

is the only STARCH used in HER MAJESTY'S LAUNDRY.

And as some unprincipal Parties are now making and offering for Sale an Imitation of the

GLENFIELD STARCH,

we hereby caution all our Customers to be careful, when purchasing, to see that the word GLENFIELD is on each Packet, to copy which is Felony.

WOTHERSPOON and CO., Glasgow and London.

DINNEFORD'S PURE FLUID

MAGNESIA has been, during twenty-five years, emphatically sanctioned by the Medical Profession, and universally accepted by the Public, as the Best Remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a Mild Aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescing Draught, in which its aperient qualities are much increased. During hot seasons and in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD and CO., 172 New Bond street, London; and *sold* by all respectable chemists throughout the Empire.

NO MORE PILLS OR ANY

other Physic.—For Constipation, Indigestion (Dyspepsia), Palpitation, Nervous, Bilious, and Liver Complaints, Debility, Dropsy, Epilepsy, Paralysis, Cough, Asthma, Consumption, Bronchitis, Sore Throat, Fevers.

DU BARRY'S delicious Health-restoring REVALENTA ARABICA FOOD, which, at a few pence per day, saves fifty times its cost in medicine, and cures without purging or any of the uncertainties, annoyances, and ruinous expenses incurred by medicine, cod liver oil, or visits to distant climates.

Certificate No. 36,418.—We find it the safest remedy Andrew Ure, M.D., F.R.S.; Dr Harvey; Dr Wurer Dr Shorland; Dr Campbell.

We extract a few out of 56,000 cures:—

Cure No. 1,771.—Lord Stuart de Decies of many years' dyspepsia.——Cure No. 49,832.—"Of fifty years' indescribable agony from dyspepsia, nervousness, asthma, cough, constipation, flatulency, spasms, sickness and vomiting." Maria Joly, of Lynn, Norfolk.——Cure No. 47,121.—Miss Elizabeth Jacobs, of extreme nervousness, indigestion, gatherings, low spirits, and nervous fancies. ——Cure No. 54,816.—The Rev. James T. Campbell, Syderstone Rectory, near Fakenham, Norfolk, of indigestion and liver complaints.——Cure No. 56,814.—Mr Samuel Laxton, Leicester, of two years' diarrhœa.—— Cure No. 180.—Mr W. Reeves, 181 Fleet street, London, of 25 years' nervousness, constipation, indigestion, and debility.——Cure No. 4,028. Eight years' dyspepsia, nervousness, debility, with cramps, spasms, and nausea." Rev. John W. Flavel, Ridlington Rectory, Norfolk.——Cure No. 3,906.—"Thirteen years' cough, indigestion, and general debility." James Porter, Athol street, Perth.——Cure No. 58,314.—Miss Elizabeth Yeoman, Gateacre, near Liverpool, of ten years' dyspepsia and all the horrors of nervous irritability."——Cure No. 46,270.—Mr James Roberts, timber merchant, of Frimley, Surrey, of 30 years' diseased lungs, spitting of blood, liver derangement, partial deafness.

Similar testimonials from 56,000 patients who can be referred to.

The food is sold in canisters, 1 lb, 2s 9d; 2 lbs, 4s 6d; 12 lbs, 22s; 24 lbs, 40s. Super-refined quality, 5 lbs, 22s; 10 lbs, 33s. The 10 lb, 12 lb, and 24 lb canisters carriage free, on receipt of post-office order by Barry Du Barry and Co., 77 Regent street, London; Fortnum, Mason, and Co., 182 Piccadilly; also at 60 Gracechurch street, 4 Cheapside, 330 Strand, 68 and 150 Oxford street, London; and all grocers and chemists.

FREE ISSUE.

Notice.—The following invaluable works have just been published, and are now being issued gratis to all who enclose two stamps for postage, to No. 27 Alfred place, Bedford square, London.

DR WATSON'S NEW MEDICAL

ESSAYS on Nervous and Physical Debility, with their easy Detection and Self Cure. Lately discovered and now made public by the author, with cases and diagrams, showing the connection between the brain and other organs. Also prescriptions and other appropriate remedies for the self-treatment and cure of those special diseases, and whether acquired in youth, manhood, or old age. By Dr Watson, F.R.A.S., London, Member of the Medical Society of Rouen, the National Academy of Sciences, Paris, and Fellow of the Imperial Institute of France, &c., &c. (vide Diplomas and Medical Directory).

MR LEWIS AND SON,

113 Strand.—The Royal Lewisian Systems of Writing, Arithmetic, Bookkeeping, and Shorthand, as taught for upwards of fifty years by Mr Lewis, the real inventor and first teacher of these world-renowned and only infallible systems, insures perfection in any of the above branches after a few easy and interesting lessons Persons unable to take the lessons may obtain the inventor's works for self-instruction at his only institution, 113 Strand.

DEANE'S TWO-HOLE BLACK PENS

which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped

"G. and J. Deane, London bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

ALLSOPP'S PALE OR BITTER

ALE.—Messrs S. ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the October Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent; and at the undermentioned Branch Establishments:—

Messrs SAMUEL ALLSOPP & SONS.

CHESTERFIELD	Low Pavement.
STOKE-UPON-TRENT	Wharf street.
DUDLEY	Burnt Tree.
WORCESTER	The Cross.
SOUTH WALES	King street, Bristol.
DUBLIN	Crampton quay.
CORK	Cook street.
EDINBURGH	Union street lane.
GLASGOW	St Vincent street.
PARIS	279 Rue St Honoré.

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Bottles and Casks, and on Draught, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

When in bottle, the genuineness of the lable can be ascertained by its having "ALLSOPP and SONS" written across it upon red and white ground striped.

The Brewery, Burton-on-Trent, April 30, 1860.

JULLIEN FUND.

Committee Room—50 New Bond street.

The Committee of the Jullien Fund, fearing that the subscriptions have been materially checked by the unfortunate death of Mons. Jullien, desire to explain that a widow and others, members of his family, can be protected from want only by the kind aid of those who appreciate the great services rendered by the late lamented maestro to the cause of the musical education of the English people.

The Committee confidently appeal to that benevolence for which their countrymen are so distinguished, for such prompt and liberal additions to the subscription list as shall enable them to do some justice to the memory of M. Jullien, and at the same ime afford adequate relief to his bereaved family.

COMMITTEE for the DISTRIBUTION of the JULLIEN FUND.

Mr John Mitchel	Mr W. Duncan Davison
Mr W. R. Sams	Mr Jules Benedict
Mr Thomas Chappell	Mr A. Blumenthal

HONORARY TREASURERS.

Mr John Mitchell, 33 Old Bond street
Mr T. Chappell, 50 New Bond street
Mr W. R. Sams, 1 St James's street

BANKERS

Messrs Coutts and Co., Strand
Heywood, Kennards, and Co., Lombard street
London and County Bank, Havover square

Who, as well as the honorary treasurers, have kindly consented to receive subscriptions.

April, 25th, 1860.

KEATING'S COUGH LOZENGES.—

Statistics show that 50,000 persons annually fall victims to Pulmonary Disorders, including Consumption, Diseases of the Chest, and the Respiratory Organs. Prevention is at all times better than cure; be, therefore, prepared, during the wet and wintry season, with a supply of KEATING'S COUGH LOZENGES, which possess the virtue of averting, as well as of curing, a Cough or Cold; they are good alike for the young or for the aged

RESTORATION OF VOICE BY KEATING'S COUGH LOZENGES. Glasgow.

SIR,—I have great pleasure in informing you of the great good your excellent COUGH LOZENGES have done me. In December, 1845, I caught a severe cold from riding two or three miles, one very wet night, which settled in my lungs, and quite took away my voice, so that I could not speak above a whisper from that time until December last. I tried all kinds of medicines, but they were of no avail. I was then advised to try your Lozenges, which I did only to please my friends, but before I had finished a 2s 9d tin, my voice, to my great joy, came back as strong as ever.—I am, Sir, yours respectfully, JAMES MARTIN.

THOMAS KEATING, Esq.

Prepared and Sold in Boxes, 1s 1½d; and Tins, 2s 9d, 4s 6d, and 10s 6d each, by Thomas Keating, chemist, &c., 76 St Paul's churchyard, London. Retail by all Druggists, &c.

TO INVESTORS.—

Five per cent. interest allowed on Money, withdrawable at Short notice. Undoubted Security. Particulars furnished on application to THOMAS H. BAYLIS, 429 Strand, London.

COLLARD AND COLLARD'S NEW

FREDERICK DENT,

Chronometer, Watch, and Clock Maker to the Queen and Prince Consort, and maker of the Great Clock for the Houses of Parliament, 61 Strand, and 34 Royal Exchange.

CHUBB'S PATENT SAFES

—the most secure against Fire and Thieves.—CHUBB'S FIRE-PROOF STRONG ROOM DOORS. CHUBB'S PATENT DETECTOR and STREET-DOOR LATCHES. CHUBB'S CASH and DEED BOXES. Illustrated Price-list gratis and post free.

CHUBB and SON, 57 St Paul's churchyard, London 28 Lord street, Liverpool; 16 Market street, Manchester and Wolverhampton.

TELEGRAPH TO MALTA

(via Sicily) and to CORFU (via Otranto—new line).

Through charges for telegrams from London (Submarine and Magnetic Offices), central office, 58 Threadneedle street, to

	20 words.	Extra 10.
Malta via Sicily	17s 6d	8s 9d
Corfu via Otranto	18s 0d	9s 0d

From other stations (Magnetic) in the United Kingdom, 1s extra.—By order,

HENRY C. ORTON, Secretary.

Mediterranean Extension Telegraph Company (Limited), Gresham House. Old Broad street, Feb. 25, 1861.

CHIMNEY-PIECES, TOMBS,

MONUMENTS, FONTS, &c.—EDWARDES BROTHERS and BURKE, 17 Newman street, Oxford street, London, W., beg to inform the nobility and gentry that they manufacture at their own establishments, in Italy and Belgium, as well as at the above address, every description of marble work, at the lowest possible prices. Their galleries contain specimens of all foreign and British marble quarried, in Chimney Pieces, from 25s to 300 guineas each; MONUMENTS AND TABLETS, from £5; Head and Foot Stones, from 30s each.—Sole agents to the Invernettie Granite Company.

TRADE MARK.

BROWN AND POLSON'S PATENT CORN FLOUR.

The LANCET states,

"'This is superior to anything of the kind known."

FIRST OF THE KIND

Manufactured and Patented in the United Kingdom and France, as explained with Engravings in THE ILLUSTRATED LONDON NEWS, of May 26th, 1860. Prepared without fermentation, it is warranted to keep sweet for years. It is respectfully suggested that the Trade Mark and name in full should be observed on each Package, as similar articles are sometimes substituted or recommended as "the same" or "as good as Brown and Polson's." BROWN and POLSON, Manufacturers and Purveyors to Her Majesty: Paisley, Manchester, Dublin, and London.

EDUCATION.—

International.—The Royal Continental Collegiate Institute (limited to 20 young gentlemen), on Bushey heath, three miles from Harrow station and two from Watford. Principal, Dr Vellère, late of the Harrow Preparatory School. This school is highly recommended for three reasons—first, for very excellent board, liberal supply, judicious treatment, great success in education, and, above all, as preferable to going abroad with regard to acquiring the French language perfectly; secondly, for very moderate and strictly inclusive terms, within the reach of nearly every one; and, thirdly, that no case of illness has ever occurred since the school has been established in 1857, a fact which has never been heard of in any other school, not even those excepted at the seaside. From the great attention incessantly paid by the principal to his pupils' comfort, happiness, and future welfare, he trusts that he will be patronised by a discriminating public. Travelling expenses beyond 25 miles are entirely paid by him. The quarter or half-quarter is dated from the day of the arrival of the pupil. Terms from 30 guineas upwards. Address, stating age and requirements, Dr Vellère, Bushey heath, Watford.

AT HAMBLY HOUSE ACADEMY,

Streatham Common, Surrey, Young Gentlemen are carefully Educated for the Public Schools, Military Colleges, Professions, or Commerce, by Mr R. S. TROUSDALE, L.C.P., aided by highly qualified assistant masters.

The domestic arrangements are on the most liberal scale; and the house is very delightfully situated. The terms for pupils under ten years of age, 30 guineas per annum; ten and under fourteen, 35 guineas per annum; fourteen, 40 guineas per annum. The above amount includes board and instruction in the Latin, Greek, French, and English Languages, Writing, Arithmetic, Merchants' Accounts, History, Geography, the Use of the Globes, Astronomy, Geometry, Algebra, and the other branches of the Mathematics. A library is devoted to the instruction and amusement of the pupils during their leisure hours. Religious works are provided for Sunday perusal; and lectures on various popular subjects are occasionally delivered. German Drawing, Dancing, and Music, on the usual terms. Washing, half-a-guinea per quarter. Drilling during the summer months, at a trifling charge; and board during a vacation, four guineas. All accounts are expected to be settled quarterly. Excellent accommodation for foreigners or gentlemen of neglected education. A quarter's notice of removal is required.

POLYTECHNIC INSTITUTION

(Limited). Now open with Great Novelties. Mornings, 12 to 5. Evenings, 7 to 10.—Admission 1s. Schools and Children under Ten Years of Age, Half-price.

CONTRACT FOR ROUND TOWELS

for the ROYAL MARINES.

Department of the Comptroller for Victualling and Transport Services,

Somerset place, 23rd February, 1861.

The Commissioners for executing the Office of Lord High Admiral of the United Kingdom of Great Britain and Ireland do hereby give notice, that on Thursday, the 14th March next, at Half-past One o'clock, they will be ready to treat with such persons as may be willing to contract for supplying and delivering into Her Majesty's Victualling Stores at Deptford, all such quantities of ROUND TOWELS for the use of the ROYAL MARINES as may be from time to time demanded, under a contract for twelve months certain, and further until the expiration of three months' warning.

A pattern towel may be seen at the Royal Marine office, New street, Spring Gardens, between the hours of 11 and 2 o'clock.

No tender will be received unless made on the printed form provided for the purpose, and which may be obtained on application at the said office.

Particular attention is called to the recent modification of the conditions of the contracts, which may be seen at the said office.

No tender will be received after half-past one o'clock on the day of treaty; and it will not be required that the party tendering, or an agent on his behalf, should attend at the office on the day of contract, as the result of the offer received from each person will be communicated to him and his proposed sureties in writing.

Every tender must be addressed to the Secretary of the Admiralty, and bear in the left-hand corner the words "Tender for Round Towels," and must also be delivered at Somerset place, and signed by two responsible persons, engaging to become with the person tendering, in the sum of £100, for the due performance of the contract.

A GENTLEMAN'S WARDROBE

may be Completely, Expeditiously, Fashionably, and Economically Furnished at the Establishments of

PRACTICAL OBSERVATIONS

on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.

AND

Just published, second edition, price 1s 6d,

CASES and OBSERVATIONS illustrative of the beneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings. By SAMUEL HARE, F.R.C.S., &c.

"Mr Hare may take credit to himself for having effected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.

"Mr Hare is, we think, a sound and successful practitioner."—MEDICAL CIRCULAR.

London: John Churchill; and may be had of al booksellers

HOLLOWAY'S PILLS AND

OINTMENT.—DEBILITY.—CONSUMPTION.—In no diseases are the results of the alterative and tonic influence of these invaluable remedies more apparent or more gratifying than in that feeble condition of the body which precedes consumption; a change for the better is remarked ere this treatment has been followed for a week, and the improvement steadily progresses: the melancholy emaciation soon gives place to health, strength, and cheerfulness; all the threatening symptoms, which had hitherto resisted medical skil, yield with facility before the magical influence of this rational treatment. The appetite returns, the prespirations diminish, the shortness of breath ceases, and the cough altogether vanishes

FREEDOM FROM COUGH IN

TEN MINUTES is insured by Dr LOCOCK'S PULMONIC WAFERS.—"Sir,—Will you be so good as send by David Miller one 11s box of Locock's Pulmonic Wafers. You need not send any smaller ones, for many spoons in one dish soon consume the contents. God bless Dr Locock for his invaluable medicine." The above true copy from J. Staley, a collier in Greenburn, was sent to me, J. Freeland, Druggist, Bathgate. DR LOCOCK'S PULMONIC WAFERS give instant relief and a rapid cure of asthma, coughs, and all disorders of the breath and lungs. To singers and public speakers they are invaluable for clearing and strengthening the voice. They have a pleasant taste. Price 1s 1½d, 2s 9d, and 11s per box. Sold by all druggists.

BOROUGH OF BIRMINGHAM.

THE CORPORATION IS DESIROUS

of receiving TENDERS for a LOAN of £8 500, in sums not less than £1,000, on security of the Borough Rate; and such Tenders may be addressed to the Town Clerk.—By order of the Finance Committee,

THOMAS STANDBRIDGE, Town Clerk.

Temple street, Birmingham, March 6, 1861.

INVESTMENTS IN BRITISH

MINES.—Mr MURCHISON'S REVIEW of BRITISH MINING, for the Quarter and the Year ending 31st December, 1860, with particulars of some of the principal Dividend and Progressive Mines, and Table of the Dividends Paid in the Past Six Years, is now ready, price 1s, at 117 Bishopgate street within, E C.

Reliable information and advice will at any time be given on application.

"This is a very useful and intelligently compiled work. It is also intelligibly arranged, with a view to facility of reference. It comprises full particulars of the position and prospects of the chief dividend and progressive mines."—DAILY NEWS.

"All who have invested, or who intend to invest, in mines, should peruse this able work."—GLASGOW EXAMINER.

"Mr Murchison takes sound views upon the important subject of his book."—MORNING HERALD.

THE LANDS IMPROVEMENT

COMPANY (incorporated by Special Act of Parliament in 1853), 2 Old Palace yard, Westminster, S.W.—To Landowners, the Clergy, Estate Agents, Surveyors, &c., in England and Wales, and in Scotland.—The Company advances money, unlimited in amount, for the following works of agricultural improvement, the whole outlay and expense in all cases being liquidated by a rent-charge for 25 years:—

1. Drainage, irrigation, and warping, embanking, enclosing, clearing, reclamation, planting for any beneficial purpose, engines or machinery for drainage or irrigation.

2. Farm roads, tramways, and railroads for agricultural or farming purposes.

3. Jetties or landing places on the sea-coast or on the banks of navigable rivers or lakes.

4. The erection of farmhouses, labourers' cottages, and other buildings required for farm purposes, and the improvement of and additions to farmhouses and other buildings for farm purposes.

Landowners assessed under the provisions of any Act of Parliament, Royal Charter, or Commission, in respect of any public or general works of drainage or other improvements, may borrow their proportionate share of the cost, and charge the same with the expenses of the lands improved.

No investigation of title is required, and the Company, being of a strictly financial character, do not interfere with the plans and execution of the works, which are controlled only by the Government Enclosure Commissioners.

For further information and for forms of application apply to the Hon. William Napier, Managing Director, 2 Old Palace yard, Westminster, S.W,

THE SOUTH DARREN MINING

COMPANY, Limited.

In 6,000 shares of £3 10s each; £2 5s paid.

This mine is situate in the well-known rich mineral district of Cardiganshire, and adjoins East Darren and Cwm Erfin, two dividend-paying mines. Others in the immediate neighbourhood have also yielded large profits.

The shaft is sunk 70 fms., and a large quantity of silver-lead ore has been raised from the upper levels. At the 60 fms. level the run of ore ground passed through is upwards of 80 fms. in length. The 70 is driven East and West altogether about 70 fms., and the lode is found there better in character and productiveness than in the 60.

There are parallel lodes North and South, to which cross-cuts are being driven, and they cannot now be far from intersecting them. The lode to the North is considered to be the East Darren one, and the lode to the South has been opened on at surface and has a most promising appearance. These cross-cuts have every prospect of soon leading to discoveries that will greatly enhance the value of the property.

Upwards of £6,000 was given for the mine, and in the last four years about £6,000 of capital has been expended, and about 500 tons of silver-lead ore have been sold for £10,000, or an average of £20 per ton, besides about £300 worth of copper ore. A new 60-ft. pumping wheel, and a second crusher, have been erected, and the whole plant and machinery have been thoroughly repaired, and are now in excellent order and condition.

The mine is now being worked with more spirit, and is, therefore, likely to be brought into a paying state all the sooner. Already two of the new points lately begun have improved, being worth respectively 8 cwts of rich silver-lead ore per fm., and likely to be still better. The 70 East is also worth ½ ton per fm., and the different stopes in the back of this level average ½ ton per fm. Preparations are being made to sink to an 80 fms. level. There are ten men working on a tribute of £12 per ton, including all cost (the ore being worth £20 per ton).

There are monthly sales of ore, which already meet a large proportion of the costs, and the former are almost certain to gradually increase till profits are made. The rich and profitable mines of the Cardiganshire district are well known, while two of them adjoin South Darren.

A limited interest in this mine can now be sold at the rate of 21s per share (£2½ paid), application for which may be made, on or before the 16th inst, to J. H. Murchison, Esq., 117 Bishopsgate street within, or to Messrs Webb and Geach, 8 Finch lane, and Stock Exchange, London; from whom also plans of the underround workings can be obtained, showing the very large quantity of ore the mine has already yielded, and that it evidently only requires to open out new ground with sufficient spirit to have a good paying mine.

wi

CEYLON RAILWAY COMPANY.—

Notice is hereby given, that the Fifteenth Half-yearly General Meeting of the Shareholders of the Ceylon Railway Company will be held at the offices of the Company, 9 Broad street buildings, London, on Monday, the 25th day of March instant, at two o'clock in the afternoon precisely.

The transfer books will be closed from the 18th March inclusive, until immediately after the meeting.—By order of the Board, G. E. COOPER, Secretary.

9 Broad street buildings, London, E.C., March 7, 1861.

EAST INDIAN RAILWAY

COMPANY.

The Directors of the East Indian Railway Company are prepared to receive applications for Debentures at par for the remainder of the sum of £1,500,000 required to complete the total amount which the Company has the power to borrow on Debentures not convertible into shares.

The payment of the principal and interest in the meantime, at the rate of 5 per cent. per annum, is guaranteed by the Secretary of State for India in Council.

The bonds will be for five years from the 15th December, 1860, transferable by endorsement under the provisions of the 16 and 17 Victoria, cap. 59, without stamp, and the holders may renew them for a second term of five years, upon giving one year's notice to that effect. Failing such notice, the bonds will be paid off at the expiration of the first five years on presentation at the Bank of England.

Payments may be made in full or by instalments, as may be agreed upon.

Interest will accrue on the respective payments from the dates fixed for the same.

No scrip receipt or bond will be issued for a less sum than £50.—By order of the Board,

D. I. NOAD, Secretary.

East Indian Railway House, Alderman's walk, New Broad street, London, Jan. 22, 1861.

MADRAS RAILWAY COMPANY.

—Her Majesty's Secretary of State for India having authorised the Directors of this Company to raise the sum of £1,000,000 on Debentures not convertible into Stock, the Directors are prepared to comply with applications to that extent for Debentures at par, bearing interest at 5 per cent. per annum, payable by coupon, half-yearly, at the Union Bank of London.

The payment of the principal and interest is guaranteed by the Secretary of State for India in Council. The Debentures will be for five years, from the 1st of January, 1861, transferable by endorsement without stamp, and renewable at the option of the holder for a second term of five years, at the same rate of interest.

Debentures will not be issued for any less amount than £50.

The Directors will also receive applications for the amount which remains to be allotted of the previous Debenture Loan of £1,000,000 convertible into Stock of the Company. These Debentures are for five years, or four years, at 5 per cent. per annum, payable by coupon, half-yearly, at the Union Bank of London.

The payment of the principal and interest is guaranteed in like manner by the Secretary of State for India, and the holders of these Debentures have the option at the end of twelve months from their date, and thenceforward, of converting them into Capital Stock of the Company, bearing 5 per cent. interest, guaranteed under the contract entered into with the East India Company.

Forms of application for either or both descriptions of Debentures may be obtained at the Offices of the Company.—By order of the Board,

JAMES WALKER, Managing Director.

No. 33 New Broad street, London, 1st January, 1861.

OUDE RAILWAY COMPANY.—

At the Third General Meeting of the Shareholders of the Oude Railway Company, held at the London Tavern on Thursday, March 7, the following resolutions were passed:—

Proposed by Sir Macdonald Stephenson, Chairman; seconded by John C. Marshman, Esq., Deputy-Chairman; and carried unanimously:

1. That the report and accounts be approved and adopted.

Proposed by J. W. Deacon, Esq.; seconded by Captain Henderson; and carried unanimously:

2. That the sum of £11,083 15s be applied to the repayment of 5s per share upon the scrip and shares of the Company.

Proposed by G. G. Macpherson, Esq.; seconded by J Allan, Esq.; and carried unanimously:

3. That the thanks of the shareholders are due to the Directors of this Company for their exertions, and that of the amount now at the disposal of this meeting, the sum of £630 be offered to them as an acknowledgment of their services for two years and a half, from the formation of the Company to the middle of 1859, and from the spring of 1860 to the present time.

Proposed by J. Certhorn, Esq.; seconded by J. Franklin, Esq.; and carried unanimously:—

4. That the balance be applied, in the discretion of the Directors, to the maintenance of the Company on a moderate scale of expenditure (but not to exceed the amount in hand), and that the Directors be requested to communicate with the Local Committee which has been formed in Oude, and to continue their negotiations with the Company for carrying out the original object of the Company, so soon as the more advanced state of the principal Trunk Lines and the improved condition of the money market shall admit of it.

Proposed by the Chairman; seconded by the Deputy-Chairman, and carried unanimously:—

5. That the cordial thanks of the shareholders be conveyed to Mr Charles Freshfield for the valuable services rendered by him to the cause of Indian Railways.

A unanimous vote of thanks to the Chairman terminated the proceedings.

CHARLES TWIGG, Secretary.

Oude Railway Company, 8 Moorgate street.

TRUSTEES, SOLICITORS, AND

OTHERS desiring to meet with a well-secured Investment for Money, yielding a liberal Rate of Interest, the principal sum being withdrawable on short notice, may do so by communicating with THOMAS H. BAYLIS, 429 Strand, London.

He will be prepared to undertake the custody and delivery of deeds and other documents; the acceptance of powers of attorney; the collection in the colonies and remittance of rents, interest, dividends, pensions, and other moneys; the taking out of letters patent under seal; the sale, management, and supervision of house property and landed estate; and other agency business requiring careful attention and a guarantee of good faith.

The fullest particulars as to rates of Commission, &c., will be furnished on application at the Company's offices.—By order, JAMES HORA, General Manager.

31 St Swithin's lane, London, E.C., March 1, 1861.

CANADA LANDED CREDIT

COMPANY.

Incorporated by Act of the Parliament of Canada.

Capital, £200,000.

PRESIDENT—Lewis Moffatt, Esq.

VICE-PRESIDENT—W. P. Howland, Esq., M.P.P.

DIRECTORS.

The Hon. G. W. Allan, M.L.C.
R. D. Chatterton, Esq.
The Hon. Malcolm Cameron, M.L.C.
Richard L. Denison, Esq.
Charles Donaldson, Esq.
W. P. Howland, Esq., M.P.P., President of Board of Trade.
Thomas D. Harris, Esq., Vice-President Board of Trade.
Lewis Moffat, Esq., Director Bank British North America.
William McMaster, Esq., (McMaster and Nephews.)
Samuel Spreull, Esq.
Mr Sheriff Smith, Collingwood.
E. W. Thomson, Esq., President of the Board of Agriculture.

BANKERS—Messrs Smith, Payne, and Smiths, London.

The Company are prepared to receive loans against their debentures of £50, £100, £500, and £1,000 sterling, for periods of five, seven, or ten years, bearing interest at 6 per cent. per annum, both principal and interest being made payable in London.

The amount received is invested in and secured by mortgages of freehold land in Canada West of ample value.

The Company by its charter is always first mortgagee.

The evils, uncertainties, and delays of the old mortgage system are avoided by the lender.

He has no care or anxiety as to the character of the borrower, or the value of the land mortgaged.

The Company assumes all responsibilities, and guarantees the payment of interest to the day, viz., 1st January and 1st July; at their bankers in London, and the same can be received through any of the country banks.

Investors incur no risk as in a railway or similar undertaking; the Company's profits beforehand being well ascertained and sure.

The half-yearly returns of business done, made to the Government of Canada, prospectuses, annual report, and further information, may be had of the Company's stockbrokers and agents,

BRUNTON and SON,

Auction Mart chambers, Bartholomew lane, London.

THE FRENCH AND GERMAN

PROTESTANT COLLEGE, Netherton House, Clapham, Surrey, combines the comforts of an English home with the advantages of a Continental Education. The French and German Languages, so indispensable to a good education, are taught by resident masters. They give lessons daily. The course of instruction adopted secures for young gentlemen a sound English, Classical, and Mathematical Education, combined with Drawing, History, Geography, and Modern Science. Pupils prepared for the military, naval, merchant, and civil service examinations. Terms, inclusive, from thirty to fifty guineas per annum, according to age and requirements. A difference will be made for two Pupils from the same family. For references and prospectuses apply to Monsieur A. de Chastelain, as above.

In boards, Two Shillings and Sixpence,
NOW READY,

THE MEMOIR OF THE
RIGHT HONOURABLE JAMES WILSON,
BY HIS SON-IN-LAW, WALTER BAGEHOT, ESQ.
(Republished from the *ECONOMIST* for November 17, 1860.)

The publication of the Miscellaneous Writings, of the appearance of which notice has been given, is unavoidably postponed for a few months.

MR COBDEN AND THE FRENCH TREATY.

The following brief letter from the pen of Mr Cobden has been received by Mr Cassell (of the firm of Cassell, Petter, and Galpin), in acknowledgment of a work just published by them, entitled, "The French Treaty and Tariff of 1860." Though but short, it is interesting; and the last paragraph is full of hope for commercial men:—

"Algiers, 1 March, 1861.

"MY DEAR MR CASSELL,

"I am much obliged to you for the copy of the volume on the French Treaty. The value of such a work depends entirely on its accuracy, and I am therefore glad that you have placed this beyond a doubt by securing the services, as editor, of the intelligent Secretary of the Commissioners, to whose conscientious exactness and diligence I can bear willing testimony.

"The Tables and other matter appended to the new French Tariff are to me of exceeding interest and value; as they afford a DATUM LINE for measuring the future growth of the commerce between the two countries.—Believe me, yours truly,

"R. COBDEN.

"John Cassell, Esq."

The work to which this letter refers contains the complete Tariff in French and English, an interesting table of Articles not included in the Tariff, an Historical Sketch of the past Commercial Legislation of France, and other data referred to by Mr Cobden, of the greatest value. Price, cloth boards, 5s.

JUST PUBLISHED,
SECOND EDITION, Price 5s.

CAPITAL, CURRENCY, and BANKING; being a Series of Articles on the Bank Act of 1844.

With an Appendix, containing the Evidence of the Governor of the Bank of England, the Weekly Accounts of the Bank of England, and the Monthly Accounts of the Circulation of the United Kingdom; showing also the Minimum Rate of Discount of the Bank of England from time to time.

PROSPECTUS.

This Company has been formed for the purchase and working of a very valuable Slate Grant and Quarry, extending under several farms and lands, known as Mynyddydnyfed and Brach-y-Saint, situated in the parish of Criccoth, in the county of Carnarvon.

This quarry possesses advantages scarcely to be equalled by any in the Principality, not only from the great depth and magnitude of the slate beds, but also from the judicious manner in which the workings have been laid out; and, from their present forward state, as will be seen from the reports annexed, the Directors confidently anticipate that, within two months from the time of commencing operations at the quarry, a return of slate can be made, and a highly satisfactory dividend declared upon the first year's working.

The quarry is only one mile from the shipping port of Criccoth, to which the produce can be conveyed at the low charge of 2s per ton.

The demand for slate far exceeds the supply, and it is well known that all the principal quarries in North Wales are generally far behind in the execution of the orders on hand; in fact, it may be said that the sale of slate has been for some time past, and is likely to continue to be, practically unlimited.

With a capital of £10,000 it is estimated that from 5,000 to 6,000 tons of slate can be made during the first year of the Company's operations, which, at the present selling value, will give a return of £12,600; this, after deducting working expenses, and making ample allowance for all costs of management, may be expected to leave a surplus sufficient to pay from 30 to 35 per cent. upon the capital invested.

By increasing the amount employed in working the Quarry, this return of profits can be proportionably enlarged.

To those who are unacquainted with the extraordinary profitable nature of Slate Quarries, this statement may appear incredible; but its accuracy is fully borne out by the following extract from the "Mining Journal" of September 10th, 1859, which fully demonstrates the large profits made by Slate Quarrying:—

"PENRHYN QUARRIES.—Owner, the Hon. Colonel Pennant; established fifty years; employs 2,500 men; returns an annual net profit of upwards of £100,000.

"LLANBERIS QUARRIES.—Owners, the representatives of the late Assheton Smith, Esq., of Tedworth; employs 2,000 men; returns an annual net profit of about £70,000.

"WELSH SLATE COMPANY.—Owners, Lord Palmerston and a few others; employs 400 men; returns an annual net profit of about £25,000.

"RHEWBRYFDIR SLATE COMPANY.—Employs about 350 men, and returns a net annual profit of £13,000, or 50 per cent. upon the original capital.

"Of the remaining quarries in this district, Messrs Holland, employing 300 men; Messrs Greaves, 250 men; Messrs Cassons, &c., it may be stated they are making like returns of profits in proportion to their production."

The Mynyddydnyfed Quarry is held under a grant for twenty-three years, from the 1st of January, 1861, under very favourable conditions, and subject only to the limited royalty of one-fourteenth of the net produce and a dead rent of £5. An agreement has been entered into for the purchase of the Quarry for the sum of £8,800, of which the vendor has agreed to receive £4,500 in paid-up shares.

Shareholders can at their option pay up the whole amount of their shares; in all such cases interest at the rate of 6 per cent. per annum will be allowed upon the amounts so paid up, beyond the calls made for the time being.

In order to prevent the possibility of failure and loss, arising from carrying on the Company's operations with a deficient capital, all deposits will be returned in full, unless a sufficient amount of capital is subscribed to enable the Directors not only to purchase the quarry, but to carry on the working operations with the requisite vigour.

No special Articles of Association exist; the Company being managed under the provisions of Table B of the Joint Stock Companies Acts, all matters of general importance will be decided by the shareholders at meetings summoned specially for this purpose.

Full prospectuses, with reports upon the Quarry, and forms of application for shares, can be obtained from the brokers, or the Secretary at the Company's offices.

NORTH BRITISH INSURANCE COMPANY.

INCORPORATED BY ROYAL CHARTER AND ACT OF PARLIAMENT.

ANNUAL REPORT, 1861.

The Fifty-first Annual General Meeting of the North British Insurance Company was held within the Company's Offices, 64 Princes's street, Edinburgh, on Monday, 4th March, 1861, in terms of the Constitution of the Company:—

A Report by the Directors was read, in which the following results were communicated:—

	£	s	d
FIRE DEPARTMENT.			
The PREMIUMS received during the year 1860, amounted, deducting Re-insurances, to.....	43,300	11	4
Being £7,968 0s 11d above the Receipts of last year.			
LIFE DEPARTMENT.			
741 NEW POLICIES had been issued, Assuring the sum of	475,649	0	0
And Paying of ANNUAL PREMIUMS.....	14,070	17	7
Being a considerable increase above any former year.			
The amount of CLAIMS under Life Policies was	73,665	9	2
In the ANNUITY BUSINESS, 34 Bonds had been granted, for which was received the sum of	10,489	6	11
The ACCUMULATED FUNDS now amount to	1,090,730	4	10
And the ANNUAL REVENUE is.....	193,740	4	4

The Directors had the satisfaction of being able to report an increase in both departments of the business, thus:—

IN THE FIRE DEPARTMENT			
The Premiums received in the year 1858 amounted to.....	30,345	16	5
— — 1859 amounted to.....	35,332	10	5
While last year the Premiums received, after deducting Re-insurances, amounted to	43,300	11	4
IN THE LIFE DEPARTMENT			
The number of New Policies issued in 1857 was 325, assuring.....	276,931	0	0
— — — 1858 was 455, assuring.....	377,425	0	0
— — — 1859 was 605, assuring.....	449,913	0	0
While last year, 1860, 741 New Policies were issued, assuring.....	475,649	0	0

The Claims in both Departments were moderate. The usual Dividend of £8 per cent. on the paid-up Capital of the Company was declared.

The Extraordinary and Ordinary Directors were then elected, and the thanks of the Meeting were voted to the Chairman.

FOR SALE.—A SHARE IN A Slate Quarry in South Wales for about £3,000. The present proprietors are gentlemen of position and responsibility, the Quarry is in full work, and the profits will be considerable. The highest references given and required.—Address, with real name, to A. B., care of Messrs Slater and Ressiter, 17 Abchurch lane, E.C.

WINE TRADE—TO BE DISPOSED of, an Old-established Wine Merchant's Business in a Midland county, embracing connections in ten of the surrounding counties. The business is good and capable of much extension, and, being of undoubted respectability, offers an excellent opening to any person with capital desirous of entering the Wholesale Wine Trade. Every information may be obtained by applying in the first instance, by letter only, to A. W., care of Messrs Nissen and Parker, 43 Mark lane, E.C.

MERCHANTS HAVING commissions for Furniture or Carpets of a superior class, are respectfully invited to visit the manufactory and show rooms of Messrs JACKSON and GRAHAM. By the introduction of machinery worked by steam power in various processes, J. and G. have effected a considerable improvement and economy in the manufacture of furniture, and their spacious show rooms afford to purchasers unrivalled facilities for the selection of all requisites, useful and ornamental, in the best taste. Four show rooms, each 120 feet long, are exclusively devoted to the display of Bedsteads and Chamber Furniture. J. and G. are also large importers of Silks, Tapestries, and other Fabrics for Curtains, and their Gallery of Bronzes d'Art is the sole depot for the celebrated productions of F. Barbedienne and Co., of Paris, which they sell at the prices of the Paris catalogue, with 5 per cent. added for expenses of importation.

MERCANTILE SHIPPING AGENCY. Established upwards of 80 years.
The mercantile community is respectfully informed that Merchandise of every description is received, forwarded, and insured, agreeably with instructions, to and from all parts of the world, by steam or sailing vessels.
W. J. HALL and CO., Sworn Brokers,
(Successors of Holmes, Hall, and Sons,)
Wharfingers and Bonded Warehouse Keepers, under special security, Custom House and Wool Quays, Lower Thames street, E.C., London.

UNITED STATES, CANADAS, &c.
S. E. DARLING and CO., 6 Pine street, New York, formerly with Messrs Duncan, Sherman, and Co., Bankers, to whom they have permission to refer, also the Broadway Bank, Peoples' Bank, Bank of the Commonwealth, &c., make Collections of Drafts, Notes, Bonds, Coupons, Dividends, Legacies, &c., in all parts of America, with prompt returns in remittances on London and Westminster Bank. Commissions, one-eighth per cent.
American Stocks and Bonds bought and sold in New York, Philadelphia, Boston, &c. Commissions, one-eighth per cent.
Interest allowed on current accounts.

EAU-DE-VIE.—THIS PURE PALE BRANDY, though only 18s per gallon, is demonstrated, upon analysis, to be peculiarly free from acidity, and very superior to recent importations of veritable Cognac. In French bottles 38s per dozen; or securely packed in a case for the country, 39s.
HENRY BRETT and CO.,
Old Farnival's Distillery, Holborn.
To be obtained only at their Distillery.

TO WOOLLEN MANUFACTURERS.—To be Sold, a large and important Cloth Manufactory, situated in Austria, near Brünn, between Vienna and Prague, and supplied with water and steam power, together with extensive Plant and all necessary machinery and appliances for carrying on a large manufacturing business. The machinery includes ten spinning assortments of the best Belgian make.—For particulars, apply by letter to A. B., Messrs Good, Moorgate street, London.

A GENTLEMAN, 15 years established in Manchester as Importer of an article extensively used in Lancashire, is disposed to take a Partner with a capital of £4,000 to £5,000, by means of which the business could be considerably and advantageously increased.—Address S. 55, Post Office, Manchester.

BOOKKEEPER & ACCOUNTANT.—A Gentleman of considerable experience in the Australian Colonies, is desirous of obtaining an appointment in a Mercantile office in the above capacity. Highest references given.—Apply to C. M., 18 Exeter street, Strand.

WANTED, BY AN ENGLISH Gentleman, 40 years of age, a situation of trust and responsibility, either in this country or abroad, for which his experience of many years as manager of cotton-spinning and copper-smelting works have fully qualified him. He speaks and can correspond in French and Italian, and can have most satisfactory testimonials to his ability, energy, and probity.—Apply to Joseph Trueman, Esq., 130 Fenchurch street, City.

ANGLO-PERUVIAN DEBT.—The Dividend on the Three per Cent. Deferred Bonds, becoming due on the 1st of April next, will be paid on that or any following day by Messrs Antony Gibbs and Sons, between the hours of 11 and 2.
Lists may be had on application on and after the 20th inst., and the coupons must be left three clear days for examination,
15 Bishopsgate street within, London,
15th March, 1861.

ROYAL ITALIAN OPERA, COVENT GARDEN.
Mr GYE has the honour to announce that the Opera Season of 1861 will commence on Tuesday, April 2. On the opening night will be performed Meyerbeer's Grand Opera, LE PROPHETE.
The programme with full particulars may be had at the Box Office under the portico of the theatre.

PLAN OF THE GREAT BRITAIN MUTUAL LIFE ASSURANCE SOCIETY.

This Society is established on the tried and approved principle of mutual assurance. The funds are accumulated for the exclusive benefit of the members under their own immediate superintendence and control. The profits are divided annually, and applied in reduction of the current premiums.

The members of this Society consist of two Classes; one class comprising policy-holders who pay the full amount of premium during the first five years, and then become entitled to participate in the profits during the remainder of their respective lives; the other class comprising policy-holders who pay half the amount of premium, only, during the first five years, and thenceforth pay the whole amount during the ensuing five years; after which period they become entitled to participate in the profits equally with other members.

Every member assured for £500 is entitled, after payment of one whole annual premium, to attend and vote at all general meetings. Members assured for larger amounts are entitled to one vote for every £500 assured.

No claim can be litigated or disputed except with the concurrence of the members present at a general meeting, specially convened on the occasion.

The Directors and Auditors consist of members assured to the extent of £1,000. The Auditors and three of the Directors vacate their offices annually, but are eligible for re-election by the members.

Extensive tables of non participation rates have been constructed for the accommodation of different classes of policy-holders.

Application for agencies may be made, and every requisite information relative to this Society, and the mode of effecting assurances, obtained on application to

C. L. LAWSON, Secretary, London.

Life Assurances are granted under an extensive variety of forms, with, or without participation, and at moderate premiums; the rates for the Younger Ages being lower than those of many of the older, and most respectable offices.

Actual Service Risk within the United Kingdom in Volunteer Rifle and Artillery Corps, and in the Militia, is covered by the Company's Policies.

Fire Assurances both at home and abroad are accepted at very moderate premiums.

The Assured participate in the Fire Profits in respect of Policies in force for five complete years. The return for the past Quinquennial period is in course of distribution.

FRANCIS A. ENGELBACH, Actuary and Secretary.

Notice.—The usual fifteen days allowed for payment of Fire Premiums falling due at Lady-day will expire on 9th April.

Fire and Life Assurance may be effected with this Corporation on advantageous terms.

In the Life Department, assurances are granted with participation in Profits, or, at lower Premiums, without such participation.

The Reversionary Bonus on British Policies has averaged nearly 2 per cent. per annum on the sum assured

Equivalent reductions have been made in the Premiums payable by persons who preferred that form of Bonus.

The divisions of Profit take place every Five years.

Any sum not exceeding £15,000 may be insured on one Life.

This Corporation affords to the Assured

Liberal participation in Profits,—with exemption from the liabilities of partnership.

A rate of Bonus equal to the average returns of Mutual Societies,—with the guarantee of a large invested Capital Stock.

The advantages of modern practice,—with the security of an Office whose resources have been tested by the experience of nearly a CENTURY AND A HALF.

The Corporation has always allowed the Assured to serve in the Militia, Yeomanry, or Volunteer Corps within the United Kingdom, free of charge.

ROYAL EXCHANGE, LONDON.
ROBT. P. STEELE, Secretary.

ACCIDENTS OF ALL KINDS,

and from Any Cause, may be provided against by an Annual payment of £3 to the RAILWAY PASSENGERS ASSURANCE COMPANY, which secures £1,000 at death by Accident, or £6 weekly for Injury.

No Extra Premium for Volunteers.

One Person in every Twelve insured is injured yearly by Accident.

£75,000 has been already paid as Compensation.

For further information apply to the Provincial Agents, the Railway Stations, or at the Head office, 64 Cornhill (late 3 Old Broad street).

Annual Income, £40,000.
Capital, One Million.
W. J. VIAN, Secretary.

64 Cornhill, E.C., January, 1860.

BONUS DIVISION.

GLOBE INSURANCE,

Cornhill and Charing cross, London.

Established 1803.

William Chapman, Esq., Chairman.
Sheffield Neave, Esq., Deputy-Chairman.
George Carr Glyn, Esq., M.P., Treasurer.

Boyce Combe, Esq.

AUDITORS.

Lieut-Col. William Elsey. | Alex. Mackenzie, Esq.

The Cash Payment under the division of Profits recently declared on Participating Life Policies, is equal at most ages to considerably more than a Whole Year's Premium on Policies of six years' standing.

All classes of Fire, Life, and Annuity business transacted.—Rates of Premium very Economical.—No charge for Volunteer, Rifle, and Militia Service within the United Kingdom.

WILLIAM NEWMARCH, Secretary.

THE IMPORTANT FREEHOLD and COPYHOLD PREMISES known as the WHITECHAPEL DISTILLERY.

MESSRS FULLER AND HORSEY

are instructed to SELL by AUCTION (unless previously disposed of by private contract), on MONDAY, March 18, at 11 for 12 precisely, on the Premises, in Two Lots, the highly important FREEHOLD and COPYHOLD PROPERTY well known as the WHITECHAPEL DISTILLERY, the property of Messrs Smith and Co. The site occupied is about three acres, covered with buildings of the most substantial character, arranged in the most perfect manner for the purposes of the distillery business, and capable of producing 1,500,000 gallons of spirit per annum. The premises are readily convertible to the purposes of a brewery, or any large manufacturing establishment. The property is situate in Buck's row, a wide thoroughfare in Whitechapel, within a few paces of the London Hospital. The buildings are entirely and securely enclosed by lofty walls. There is a most commodious residence for a principal, finished in the best taste. The manufacturing premises consist of a block of buildings of great extent, occupying the central portion of the yard, accessible by carts or waggons on all sides, and comprising—1. The Brewhouse: a substantial, lofty, ground-floor building, with basement, brewer's room, men's room, sitting room for revenue officers, and store rooms. 2. The Cooler-house: a lofty building of three floors, strongly timbered on iron columns, with lantern lights in the roof, and folding shutters. 3. The Back Rooms, two in number. 4. Yeast-house. 5. A deep Artesian Well, affording a nearly inexhaustible supply of pure liquor. 6. The Mill, substantially built of brick, of four floors. 7. The Old Mill, a brick building of three floors. 8. Steam-engine House, Boiler-house. 9. The Still-house. Surrounding the main building are various accessory erections, including the spirit store, of one lofty ground floor, with dry basement, loop-hole doors, offices for clerk, &c. A most substantial brick building of three floors, strongly timbered on iron columns, used as a joiners' shop and stores, a steam-engine house, boiler house, bricklayers' shed, piggeries, fire-engine house, and surface well steened; an extensive range of brick-built workshops for carpenter, blacksmith, millwright, and cooper, beer-cellar, small brew house or scalding house, and grain shed. The large and commodious yards are paved throughout with granite. Approached from a separate entrance are the duty-free spirit warehouse, a lofty ground-floor building, store for methylated spirit, a brick building adjoining; of two floors; a paved yard enclosed, containing warehouse of two floors, next Buck's row, and sundry other conveniences: also a very superior range of counting-houses, of two floors and basement, partly fitted as a dwelling-house. —May be viewed, by cards only, which may be had of the Auctioneers. Printed particulars are in course of preparation, and, with plans, may be obtained in due time of Messrs M'Leod, Stenning, and Watney, solicitors, London street, E.C.; of Messrs' Tennant and Darley, solicitors, 4 Raymond buildings, W.C.; of Messrs Bockett, Son, and Barton, solicitors, 60 Lincoln's inn fields; of S. Lowell Price, Esq., accountant, 5 Gresham street, E.C.; and of Messrs Fuller and Horsey, Billiter street, E.C.

ALLEN'S PATENT

PORTMANTEAUS and TRAVELLING BAGS with square openings.

LADIES' WARDROBE TRUNKS, DRESSING BAGS, with silver fittings.

DESPATCH BOXES, WRITING and DRESSING CASES, and 500 other articles for home or continental travelling. Illustrated catalogues post free.

Also Allen's Barrack Furniture Catalogue of Portable Bedsteads, Drawers, Easy Chairs, Washhand-stands, Canteens, &c., post free.

J. W. ALLEN, Manufacturer and Patentee, 18 and 22 West Strand, London, W.C.

The Political Economist.

The Editor of the ECONOMIST *intends to publish a Supplement half-yearly, giving* IN A COMPACT FORM *the Balance Sheets and Directors' Reports of* ALL *the Joint Stock Banks in the United Kingdom, as far as the same are made public, with some account of the most important Meetings of Shareholders.*

THE COMPARATIVE *MONEYED* POWER OF THE SLAVE STATES AND OF THE FREE.

THE present state of America suggests many questions which before now no one ever dreamed of considering, and consequently gives many collections of statistics a significance and value which were not anticipated by those who amassed them. We are now constantly discussing the relative power of the Free States and the Slave States,—we are continually estimating what the relative force of each will be in time of war, and what its capacity for commerce in time of peace. The vagueness of such speculations makes any accurate and systematic data very valuable, and it fortunately happens that we have one nearly complete set of figures which are exactly fitted to aid our understandings. In whatever respect America is defective, it is not defective in banking statistics. The Democratic Government of the United States has exacted from the banks throughout its territory a degree of minute information which no despotism can exceed, and which seems the maximum of inquisitorial tyranny to an English banker.

These statistics will now be of use to us. The moneyed wealth of a State is a reasonably approximate index both of its efficiency in war and its capacity in peace. And of its moneyed wealth the deposits in its banks are a fair comparative test. These deposits represent the floating capital which it is able to embark in any pursuit it pleases: they are the *sinews* which it can apply as well to the task of creation as to that of destruction. If a nation is poor in these accumulated resources, its efforts, whether military or pacific, will probably be weak. If a nation is rich in these, we may reasonably expect that its exertions will be effective and powerful abroad both in war and commerce. What, then, is the comparative strength of the Slave States and of the Free when estimated by this significant and searching test?

The aggregate deposits of the *whole* American Union are a little more than 57,000,000*l*, and of this a very little more than one-fourth belongs to the Slave States. The enumeration is as follows*:—

	Deposits. £
Alabama	1,091,509
Delaware	219,650
Florida	29,141
Georgia	1,066,115
Kentucky	1,274,150
Louisiana	4,450,008
Maryland	1,996,690
Missouri	755,364
North Carolina	334,636
South Carolina	937,263
Tennessee	975,079
Virginia	1,739,172
	14,866,777
Kansas Territory	606
	14,867,383

* These figures are made up according to the return received nearest to 1st of Jan. 1860, the last date up to which the whole of them have been made public.

All the remainder of the floating capital of America belongs to the Free States. The deposits in the banks of the latter are as follows:—

	£
Connecticut	1,254,352
Illinois	156,833
Indiana	382,607
Iowa	118,659
Maine	542,479
Massachusetts	6,256,056
Michigan	84,464
New Hampshire	267,297
New Jersey	1,291,829
New York	23,415,811
Ohio	908,912
Pennsylvania	5,887,764
Rhode Island	799,448
Vermont	177,262
Wisconsin	694,307
	42,238,080

Not a very magnificent list of "deposits" according to the notions of an English banker, but indicative of far greater wealth than those of the Slave States.

There are no returns from Arkansas, Mississippi, or Texas, where the banking system seems to be very rudimentary and imperfect. California likewise is not included.

Nor does this comparison, instructive though it is, give us by itself an adequate impression of the exact nature of the unequal rivalry which has at length arisen between the North and the South. The most expressive parallel is to contrast the great Free State of New York with the Slave State of South Carolina, which already anticipates that its capital (Charleston) will be the "New York of the South." The figures are these—

	Deposits. £
New York	23,415,811
South Carolina	937,263

A very hopeless comparison for the novel and boastful aspirant.

We arrive at the same result if we compare the accommodation given to trade in the South and in the North. The loans and discounts of the four Free States which had lent the most were as follows:—

	Loans and Discount. £
New York	45,079,050
Massachusetts	24,168,897
Pennsylvania	11,323,610
Connecticut	6,267,776

And of the four Slave States which had lent the most:—

	Loans and Discount. £
Louisiana	7,965,361
South Carolina	6,255,430
Kentucky	5,689,036
Virginia	5,619,553

The accommodation given by the whole four not being nearly equal to that given by the single Free State of New York.

There are two very important reflections which these statistics will at once suggest at the present moment to the mind of every Englishman. The first is, that the portion of America which will be injuriously affected by the highly stringent provisions of the new protective tariff is far richer than the part which will not be so affected. Our wealthiest customers are in the Free States, and, with an absurd infatuation, those States are endeavouring to exclude the commodities they could best purchase from us, and are fostering a costly system of unhealthy protection within their own boundaries. It is not likely that they will be successful. It is not likely that the great grain-growing States of the interior will be content to be taxed for the exclusive benefit of the manufacturing and mining interests of their Eastern neighbours. It is not likely, as we have elsewhere observed, that they will be able to establish a line of custom houses over a great tract of country where such an institution is unknown. Still, for a time the infatuated effort may have a pernicious effect, and we cannot fail to observe with regret that it will tend to impair our profitable intercourse with our richest Transatlantic neighbours.

The second remark is of a different kind. The poorness of the Southern States in loanable capital will tend to attract that capital from hence. Already has this happened to some extent, and "cotton bills" have even now been discounted in Lombard street, which in former times would never, by any chance, have found their way there. We may expect that this call for our capital will largely augment. Cotton will still be grown in the Southern States, probably for many years in enormous and augmenting quantities, and, as capital is scarce there, and the difficulty of getting it at the North must for some time be greater than it has been, we may confidently expect that it will be sought after here. This emigration of capital is natural and inevitable, and if it were not for the peculiar structure of society in the Southern States of America it would not be a subject for regret. It is natural and proper that the capital of old and accumulating countries should be transmitted to assist the industry of young and rising communities. Raw cotton is the most pressing requisite of our manufacturing industry, and wherever it is to be raised probably English capital must go to raise it. Such an interchange of benefits between new countries and old is a principal instrument of commercial civilisation, and if we are wise we should rather seek for its increase than desire its diminution. But the present social and industrial system of the Southern States of America is too inseparably bound up with slavery to make it possible for us to rejoice at an increased connection with them. We do not mean that there is any reason for apprehending a slave outbreak in consequence of present events; indeed we do not believe that an abrupt termination to American slavery is very likely to happen speedily from any cause. But with such a basis as slavery, every social system must be unstable and unsatisfactory; and it must be with regret that we contemplate the evident probabilities of a new tie between us and any industrial system resting upon an essentially false and dangerous foundation.

THE USE OF THE FRENCH DEBATES TO THE EMPEROR.

We do not think the debates either in the Senate or the *Corps Legislatif* can be quite pleasant to the Emperor. To hear himself denounced as the enemy of the Church and the tool of England must be far from agreeable. To hear it said that he has lost all hold over the Italian movement and weakly permitted France to be entirely surrounded by kingdoms of the first order, cannot be agreeable to any Frenchman, least of all to a Napoleon. But we think there are several counterbalancing advantages which so shrewd a politician as the Emperor will not be slow to discern. And these we will attempt to point out.

In the first place, then, it will do much to set him right with the other Governments of Europe—to exonerate him from the charge of having stimulated a selfish and greedy spirit in the French people. It is only candid to admit that the more we hear of the true political aspirations of the French people, the more highly we appreciate the difficulties of the French Government, and the more credit we are disposed to give it for the generally liberal course it has taken in Italian affairs. It would certainly seem, not only that the Emperor was driven on by the public opinion of France in the annexation of Savoy and Nice, for that we knew before, but that it exerted a great pressure upon him to carry out a thoroughly French policy in Italy,—that it would have obliged him, if it could have done so, to force the Villafranca treaty on the people of Italy, to defeat the plans of Garibaldi, to take an active part in the defence of the King of Naples, and to maintain by French arms the temporal authority of the Pope. All this, as we learn by the divisions and debates in the French Chambers, would have been a highly popular policy in France,—would have gained for the Emperor the enthusiastic support of all the women and all the priests, and, in consequence, the active if not the enthusiastic support of a very considerable number of the men. We cannot deny, in the face of the strong opposition which has manifested itself in both Chambers, that the Emperor has at least represented a policy of a more moderate, a more statesmanlike, and a far more liberal cast, than that which would have gained him the greatest popularity at home. Nor is it difficult to imagine that in acting as he did about Savoy and Nice,—nay, even in breaking, as he did, his pledge to give Chablais and Faucigny to Switzerland, he might have been carried away by a selfish tide of public opinion which he thought too strong to resist. Certainly, from the three most discreditable features of the French Opposition,—the dread of a United Italy, the hatred of England, and the subserviency to the Papal See,—the Emperor's policy has shown itself far more free than the opinions of the nation at large would appear to be. In foreign policy at least, there has been far less divergence between the actual diplomacy of the Empire and the views of such men as M. Jules Favre, than between the recommendations of the latter and those of the party represented by M. Plichon, or M. Keller. If the debates, then, were of no other use to the Emperor, they would at least do much to explain the difficulties under which he has laboured in attempting to reconcile the wishes of France and Italy. We do not suppose that it was disagreeable to him to annex Savoy and Nice, nor that he was glad to see the terms of the Villafranca treaty cast to the winds,—but we do now know that if such *had* been his feelings, he could scarcely have dared to express them openly and without *finesse* in the present condition of French opinion. There is so large a mass of that opinion far more illiberal than that of the Emperor's Government, that the actual policy of his Government seems benignant and wise in the comparison. Already the fruits of this debate are telling on the English Press, and papers that have been for years pleading for the stifled opinion of France against the tyranny of the Empire, are now,—not certainly deploring the new freedom,—but devoting all their strength to defending the policy of the Empire against the opinion of France. A French Opposition that openly declares for war with England, cannot but in some measure gain over English opinion to the side of the French Government.

Another advantage resulting from this new freedom of invective will be, that it must soon evoke an unofficial party in defence of the more liberal acts of the French Government within the nation as well as outside; and nothing, we know, would strengthen the Imperial Government so much as some really independent support. Previously the true Liberals were too anxious for a still more liberal policy in Italy,—were too anxious for a still closer co-operation with England, to appear as advocates of the French Government,—and they were, moreover, too much disgusted with the restrictive interior policy of the Emperor for such a step. But it is of the essence of a violent Opposition to condense the ranks of the supporters of Government, and the French Liberals cannot help giving far warmer support to the foreign policy of the Empire than they have ever been disposed to give to its policy before, in the face of such assaults. No doubt, too, this advocacy of its foreign policy will to a certain extent induce the Go-

vernment to concede something to the same party in domestic policy, so that little by little the Emperor may gain a band of really independent supporters, if the Papal and anti-English party are foolish enough to persevere in their invectives.

Again, it will be, we think, a very great advantage to the ministerial officials of the Empire that they should be obliged to plead the cause of the Government before a vehement French Opposition. Hitherto no Cabinet in Europe has been more contemptible than the so-called French Cabinet, which was indeed a mere staff of secretaries. Often perhaps they have had no views of their own. Sometimes their views have been known to be at issue with those of their master. They have regarded themselves, and consequently have been regarded, as the mere tools of his will. This can scarcely remain the same,—or at least can scarcely remain so much so as before,—if once the Ministers acquire the habit of identifying themselves with the Government in an assembly where free discussion is permitted. The result is, and must be, to imbue them far more thoroughly with the policy they defend, than any of their purely official duties can be conceived to do. In the warmth of such argument a certain amount of genuine conviction is generated, even where it did not exist before,—and we are sure that the debates in the French Chambers will result in giving Louis Napoleon a better and more coherent-minded Cabinet, if he choose to use it, than he ever had before.

THE AMERICAN TARIFF.

THERE can, we fear, be no doubt that the "Morill" Tariff has by this time become law in the United States—or at least in what remains of them. The Northern and Southern Federations seem to be running a race of selfish greed and short-sighted folly. They are vying with each other to try which can most speedily and most completely alienate the sympathies and incur the condemnation of their best friends in the old world. They are rousing in us many uncomfortable feelings, but it cannot be denied that they are at the same time teaching us many valuable lessons. Assuredly if we are not politically wise, and wise at a very cheap rate, it will be our own fault; for we are having all our political experiments tried for us at other people's expense—across the Channel and across the ocean. Those among us who, in moments of impatient weakness or of reckless dreaming, have sighed for the facilities of despotism or aspired after the "unchartered freedom" of universal suffrage, need only to look at America and France, to recoil in mingled alarm, gratitude, and shame.

Certainly, the most uncontrolled democracy, it is obvious, offers no security whatever to any nation, either for the sagacious perception or for the steady pursuit of its own interests, any more than for respect for the rights and interests of others, or for the simplest principles of morality or justice. The narrowest oligarchy, the most arbitrary autocrat, could scarcely have acted with harder or more unblushing class-selfishness, could scarcely have committed a shallower blunder, could scarcely have displayed greater ignorance and disregard of all economic laws, than have been manifested, in the matter of the new Protective Tariff, by the educated, commercial, ochlocratic republic which has been accustomed to hold itself up to the world as an object of supreme envy, admiration, and almost worship. That much temporary evil will result from such a scheme of commercial policy, we cannot doubt; but grievous as such effective folly is, we confess that astonishment is our predominant sentiment on the occasion. Let us give a glance at only a few of the considerations which ought to have withheld *any* class of politicians, even American rowdies and electioneerers, from so amazing and suicidal a mistake.

The Tariff is avowedly and exclusively framed for the purposes of Protection. The North, or rather the North-Eastern States, goaded into action apparently by the threatened loss of the Southern markets, and taking advantage of the retirement of the Southern senators, employed their accidental majority to enact a law with the object of securing to their own manufactures the monopoly at least of what remained—that is, of the Atlantic and the North-Western States. They resolved to shut out all competing British produce—British cutlery, British cottons, British woollens. Tea and coffee, which they do not grow, they, on mature consideration, exempted from the high Customs duties which they levy on nearly every other foreign article;—but whatever they could make at home, they were determined should not be interfered with from abroad.

Now, in the first place, in attempting this, they have committed themselves to a conflict with nature and to the achievement of the impossible. The manufacturing States, which are chiefly the New England ones, are no doubt in a somewhat unsatisfactory position. Their soil is for the most part poor, though their population is industrious, intelligent, and comparatively dense. They grow scarcely any exportable agricultural produce. The *ice* of Maine is almost the only spontaneous and natural product of *their own* which they send abroad. The cotton, rice, tobacco, and corn, which constitute the principal portion of the enormous exports of America, is not originally from the Atlantic States:—the cotton is from the Gulf States, the rice from Carolina, the tobacco from Virginia, and the wheat from Ohio and Michigan. The Atlantic or North-Eastern States are, therefore, almost of necessity, manufacturing and commercial; and it is natural and right that they should endeavour to foster and promote their manufacturing industry, but not to *force* its productions upon others. This last, which however is the course they are pursuing, is unwise, first, because it is a hopeless attempt, and secondly, because, if successful, it must starve and dwarf their commerce. That the attempt is hopeless, a glance at the map, one would fancy, was enough to show. A Custom House *cordon*, round a frontier like theirs, is a sheer impossibility. To effect their object they must guard the whole Canadian frontier formed by the St Lawrence and the Lakes—that is, by Nature's very highway of commerce—and extending a thousand miles. Next, they must guard the whole Southern frontier, from the Chesapeake to St Louis, over twelve degrees of longitude. Lastly, they must guard the Western boundary, where in many parts they have neither officers nor population; and, more than all, they must exercise the most ceaseless severity of vigilance over the Ohio, the Missouri, and the Mississippi; and in doing so they must interfere with navigation and with that unchecked individual liberty which has become the ingrained habit of every American. In short, no staff of *Douaniers* could do the work; and no Anglo-Saxon race would tolerate the restrictions by means of which only it could be done.

In the second place, even if it could be done, it would have to be done at the cost of the entire Customs revenue,—which have hitherto defrayed nearly the whole expenses of the Federal Government. For not only would the duties fall off just in proportion as the scheme succeeded, till the sixty-four millions of dollars dwindled away to less than twenty, but the whole of this would be absorbed by keeping up the vast army of coast-guard officials which would be needed to enforce so unnatural and unpopular an enactment. The inevitable consequence of the attempt will certainly be, that nearly the same amount of British productions will, after a while, find its way into America, but *scarcely any of it will pass through the Custom Houses of the Northern Union*:—instead of paying a moderate duty at Boston and New York, it will filter in by the St Lawrence, the Lakes, the Mississippi, and the Ohio, *paying no duty at all*:—and the baffled and foolish democratic economists will have to raise their necessary revenue by direct taxation.

In the third place,—supposing the scheme to be successful, what would become of the commerce and shipping of New York and Boston? When the twenty-three millions of European imports were reduced to three or to three times three,—where would the thousand vessels now employed in bringing these goods, and in carrying back the produce now exchanged for them, find occupation? For we must remember that if the Protectionists succeed in *keeping out* twenty millions of foreign articles, they will also *keep in* nearly as large a value of American produce. How can they expect us to go on buying their corn, if they will not let us pay them in hosiery, and calico, and hardware? If they kill their imports, they will kill their exports likewise;—and kill at the same time the vast mercantile marine now occupied in exchanging the one against the other. A more notable contrivance for impoverishing at once the revenue and the citizen, could not have been devised by the wit of man.

But, in the fourth place, how in the name of wonder do

these sagacious democratic politicians conceive that what remains of the Union can be held together, if such a tariff as this is to be enforced? The separation of the South has brought home to every mind, as we showed last week, that the bond between the several States is purely voluntary, and therefore precarious. Is it likely that the North-Western States, Ohio, Michigan, Wisconsin, Indiana, and Illinois, with all their splendid soil and their rapidly increasing power, will remain in the Union one year if they are to be sacrificed to the manufacturers of Massachusetts and Pennsylvania? Will they be content to have their enormous and profitable grain trade with Europe interfered with, merely in order that they may be clothed with dear New-England woollens, and may clear their forests with bad Pennsylvanian axes? Will they bear to see the Canadians cut them out of the British market, simply because the Canadians have a liberal, and they are trampled on by a protective, tariff? If this law continues we may look for a third, or *North-Western* Federation, within a year,—or it may be a junction with British North America. But speculation may go even further than this, and yet in no way trench on the improbable. Will New York remain in a Federation whose first act is to strike a fatal blow at her prosperity? And if New York *State* would submit to this, what will New York *City* do? How long will her merchants be willing to have their profits curtailed, their expenses increased, their taxes doubled, and their commercial enterprise hampered, dwarfed, distanced in the race, without one single equivalent advantage being offered them in compensation? Finally, what will the Border States say or do—those States whom it is so peculiarly desirable for the North to retain in their Union, and whose allegiance is at the present moment so precarious. The decision of Kentucky and Virginia is just trembling in the balance: are they likely to be conciliated by a proposal that the cost of clothing their slaves shall be increased and impediments thrown in the way of the entrance of the articles by which they are to be paid for their tobacco?

It is impossible to believe that so absurd and mischievous a measure, even if it has not been vetoed by the outgoing President, can remain long on the Statute Book or be suffered to come into general operation. When the new President and the new Cabinet are made aware that this mad tariff cannot really ever be enforced; that the mere endeavour to enforce it will empty their exchequer, will disgust and drive away the grain States and the Border States, and will divert commerce from New York to Canada; and that if it could by any possibility be enforced and maintained, it would cramp their trade, impoverish their customers, and reduce their shipping to inaction and decay,—it will surely be repealed by common acclamation.

We add the tariff in the shape in which it has finally passed Congress so far as it affects cotton, woollen, linen, and silk manufactures:—

COTTON MANUFACTURES.

COTTONS—When not bleached and not exceeding 100 threads to square inch, counting the warp or filling, and exceeding in weight 5 oz per square yard—1 cent per square yard
Finer or lighter goods not exceeding 140 threads to square inch, counting warp and filling—2 cents per square yard
When between 140 and 200 threads to square inch, counting warp and filling—3 cents per square yard
When exceeding 200 threads to square inch, counting warp and filling—4 cents per square yard
If bleached, there is also an additional duty of ½ cent per square yard
And if printed, painted, or coloured also (besides all the foregoing)—10 per cent. ad valorem
All other cotton goods exceeding 16 cents per square yard pay 25 per cent. ad valorem
SPOOL and other cotton thread—30 per cent. ad valorem
SHIRTS AND DRAWERS—Wholly of cotton or cotton velvet—25 per cent. ad valorem
Cotton manufactures not otherwise provided for—30 per cent. ad valorem

FLAX MANUFACTURES.

LINENS, canvas, paddings, &c., and all jute, hemp, or flax manufactures, valued at less than 30 cents per square yard—25 per cent. ad valorem
Linens, canvas, paddings, &c., and all jute, hemp, or flax manufactures, valued above 30 cents per square yard—30 per cent. ad valorem
Flax or linen threads, and all other linen manufactures not otherwise provided for—30 per cent. ad valorem
Cotton bagging, whether composed of hemp, jute, or flax, if valued under 10 cents per square yard—1½ cent per lb
Cotton bagging, whether composed of hemp, jute, or flax, if valued over 10 cents per square yard—2 cents per lb
Sail duck—25 per cent. ad valorem
Russia sheetings, brown and white—25 per cent. ad valorem
On all other hemp manufactures—20 per cent. ad valorem
On grass cloth—25 per cent. ad valorem
On jute goods—15 per cent. ad valorem
On all others—20 per cent. ad valorem

SILK MANUFACTURES.

SILK in the gum, not more advanced in manufacture than singles, tram or organzine—15 per cent. ad valorem
All silks at or under 1 dollar per square yard—20 per cent. ad valorem
All silks over 1 dollar per square yard—30 per cent. ad valorem
Silk velvets at or under 3 dollars per square yard—25 per cent ad valorem
Silk velvets over 3 dollars per square yard—30 per cent. ad valorem
Other silks (ribbons, &c.) not otherwise provided for—30 per cent. ad valorem

WOOLLENS AND WOOL.

CARPETS—Wilton, Saxony, Aubusson, Axminster patent velvet, Tournay velvet, and Brussels wrought by the Jacquard machine—if under 1.25 dol per square yard, 40 cents per square yard; if above 1.25 dol per square yard, 50 cents per square yard; but none to pay less than 25 per cent. ad valorem
Brussels and tapestry Brussels, printed on the warp—30 cents per square yard
Treble ingrain and worsted chain Venetian carpets—25 cents per square yard
Hemp or jute carpeting—4 cents per square yard
Druggets and felt carpets, printed, coloured, &c.—20 cents per square yard
All other kinds, wool or cotton or mixed—30 per cent. ad valorem
CLOTHS (Woollen)—Shawls and wool manufactures—*16 cents per lb, together with 20 per cent. ad valorem; *12 cents per lb, together with 25 per cent. ad valorem
Endless belts for paper, and blanketing for printing machines—25 per cent. ad valorem
FLANNELS—When valued at or under 30 cents per square yard—25 per cent. ad valorem
Valued above 30 cents per square yard, or coloured, printed, and mixed with silk—30 per cent. ad valorem
On hats of wool—20 per cent. ad valorem
YARNS—Woollen and worsted yarn valued at 50 cents and not over a dollar per lb—12 cents per lb, together with 15 per cent. ad valorem
Woollen yarns valued over a dollar per lb—12 cents per lb, together with 25 per cent. ad valorem
Or yarns for carpets valued under 50 cents per lb, and not exceeding in fineness No. 14—25 per cent. ad valorem
If exceeding in fineness No. 14—then 30 per cent. ad valorem
READY-MADE CLOTHING—When wholly or in part of wool—12 cents per lb, together with 25 per cent. ad valorem
BLANKETS—When valued at or under 28 cents per lb—6 cents per lb, together with 10 per cent. ad valorem
When valued between 28 cents and 40 cents per lb—6 cents per lb, together with 25 per cent. ad valorem
When valued above 40 cents per lb—12 cents per lb, together with 25 per cent. ad valorem
WORSTED FABRICS—Delaines and all grey and uncoloured goods of similar description—25 per cent. ad valorem
Coloured and other partially woollen fabrics not specially mentioned—30 per cent. ad valorem
RAW WOOL—Valued at last port under 18 cents per lb—5 per cent. ad valorem by §12, free by §23.*
Valued at last port between 18 cents and 24 cents per lb—3 cents per lb
Valued at last port above 24 cents per lb—9 cents per lb
* Both these rates of duty are given in the same tariff under different headings in this carefully prepared measure!

It will be seen by the above that in two places different rates of duty are assigned in different parts of this slovenly and disgraceful tariff to the very same goods. Indeed, two successive clauses referring to the duties on warehousing goods absolutely contradict each other as follows:—

SEC. 25. And be it further enacted, that all goods, wares, and merchandise which may be in the public stores on the day and year aforesaid, shall be subject to *no other duty upon the entry thereof than if the same were imported respectively after that day.*

SEC. 24. And be it further enacted, that all goods, wares, and merchandise actually on shipboard and bound to the United States, within fifteen days after the passage of this Act, and all goods, wares, and merchandise in deposit in warehouse or public store on the first day of April, eighteen hundred and sixty-one, shall be subject *to pay such duties as provided by law before and at the time of the passage of this Act;* and all goods in warehouse at the time this Act takes effect, on which the duties are lessened by its provisions, may be withdrawn on payment of the duties herein provided.

Such is the legislation by which the Republicans tell us they really hope to fill their exchequer. In the debate on the tariff this obnoxious measure was forced on by its supporters on the express ground that the Government had no money and must get it!

In the meantime the Confederated States of the South have adopted the moderate United States tariff, which the Republicans are abandoning—the tariff of 1857, with, we understand, several important modifications. But as these have not yet come to hand, we may recall the principal items of the Southern tariff to our readers' minds. It is not a free-trade tariff, but it has at least a moderate amount of worldly wisdom in it.

THE LAWS OF MARITIME WARFARE.

ON an early day Mr Horsfall is to bring before the House of Commons a subject which is less understood and less appreciated by the English people and English statesmen than almost any other which is of equal importance. It is to be hoped that he will succeed in attracting serious attention to the most substantial grievance of our shipowners, and that he

will not be met on the part of the Government by inapplicable truisms and conventional replies.

There is a particular reason why the English public have a great difficulty in comprehending the importance of the danger which just now menaces their mercantile navy, and why our most conspicuous statesmen have a still greater difficulty. *Our present interest is at variance with our traditional interest.* In former times we contended for rights of the belligerent as against neutrals; we spent time, trouble, and treasure in maintaining power which we then thought conducive to our interest, if not essential to our safety. Our argument was in substance this: 'It is desirable to make 'maritime war by all imaginable regulations as short and 'brief as possible, and the only way to make it brief is to 'make it effectual. For this purpose it is desirable to give 'the stronger Power the largest rights; it is desirable that 'the power which has the supremacy of the sea should be 'permitted to annoy in all ways the enemy's ports; to prevent 'his sending forth his usual exports, prevent his receiving 'the usual imports; to confiscate his goods at sea, wherever 'or on board whatever vessel they may be found; to stop his 'commerce as a whole; in a word, to inflict upon him every 'conceivable and imaginable hardship (consistent with ordi-'nary humanity), in the hope that, by thus aggravating his 'extremity, you will force him to surrender, and so termi-'nate the misery of the war.' It was tacitly approved by those who used this argument that England would be in almost all cases the Power which was supreme upon the sea, and it was believed that the principles which we advocated were in accordance, not only with cosmopolitan philanthropy, but with the far dearer and closer instincts of national patriotism. Up to the Crimean war our advocacy of these principles was consistent and intelligible. But in that way we found by actual experience that in the present state of the commercial world they had become impracticable. We were compelled, not from choice but by mere necessity, to recognise the rights of neutrals. We permitted Danish and Prussian vessels to carry Russian goods to England, and English goods to Russia, notwithstanding the war, and notwithstanding the traditions of our national policy (cases of blockaded ports and of goods contraband of war always excepted). At the peace, the Conference of Paris distinctly recognised this right; it declared:—

1. Privateering is and remains abolished.
2. The neutral flag covers enemies' goods, with the exception of contraband of war.
3. Neutral goods, with the exception of contraband of war, are not liable to capture under the enemy's flag.
4. Blockades in order to be binding must be effectual,—that is to say, maintained by a force sufficient really to prevent access to the coasts of the enemy.

We have, therefore, certainly and conclusively abandoned our ancient policy. It is impossible any longer to hope to put an end to a war by slaying an enemy's commerce. So long as there are neutral vessels to take it, that commerce will be certain to continue; and in the present state of the world, whoever the belligerents may be, neutral ships are not likely to be wanting. The growth of the mercantile navy is happily not confined to a single country, but has become increasingly rapid in very many. We have ceased, therefore, to war with the enemy's *commerce*, but perversely enough we still war with his *ships*. We say to our enemy,—to France for example: 'You shall have what trade, you 'you shall receive what imports, you shall transmit what 'exports you please, but you shall not do so in French 'ships: we cannot permit that, you must find the ships of 'some other nation, and with their aid you can trade as 'much as you like.' The effects of this is unquestionably injurious to the enemy's shipowners. They may very likely be ruined. But it is not very disastrous to the mass of the hostile nation. They will pay a little dearer for the imported commodities they require; they will have an additional expense in exporting the articles they raise or manufacture, as the rate of freight will probably be raised by the exclusion of a whole nation's ships from the trade in which they are habitually engaged, and those who have to pay that additional rate will be burdened and inconvenienced. But a slight additional evil of this sort does not terminate a war. It may even have the very contrary effect. It is precisely one of these irritating minutiæ which fan animosity and which do not cause despondency. At any rate, it is not one of these sharp and searching evils, one of those unbearable calamities which wear out a nation's life and heart, and force them into an unwilling and premature peace. It is a small piece of pure harm, and nothing worse can be said of anything.

Nor is the existing state of maritime law less pernicious to England than reprehensible in itself. We permit trade in the ships of a neutral, but not trade in the ships of a belligerent. The inference is obvious. So much the worse for the belligerent which has the most ships. A nation with a large commerce of export and import carried on in foreign vessels would not be injured by this rule at all; a nation which has a large carrying trade to her own ports will certainly be injured very much. England has the largest trade of that sort which the world has ever seen, and consequently she will be injured the most.

It is certain that the inevitable tendency of our present regulations will be to throw the trade of India and the bullion trade of Australia into foreign hands during the next Continental war. We shall probably take part in it; and at any rate we shall always be likely to take part in it; we shall always be in a state of chronic discussion whether we will take part in it or not. At the other side of the world there will be no certainty that we shall not take part in it; and, in consequence, valuable cargoes from a great distance will probably be sent in other vessels than ours: very likely in American vessels,—at any rate in the vessels of the nation which is most likely to be neutral. *We* shall be injured by our rule if any one ever will be; and this would have been long ago perceived if the public had not been blinded by a mistaken adherence to a traditional policy, and if our most important statesmen had not in their youth become so attached and wedded to that policy that they are no longer able to perceive that all the elements of the question have changed around them, and that they are contending for a rule which would be injurious to their country without being advantageous to the world.

THR POLICE AUTHORITIES AND FOREIGN GOVERNMENTS.

It appears most probable, from the replies given by Lord John Russell on Tuesday week to Mr White, and by Sir G. C. Lewis last Thursday night to Mr Duncombe, that our police authorities did in fact 'get up' the Hungarian Note case against Kossuth for the Austrian Ambassador on which we commented a fortnight ago. We do not believe that the Government in any way authorised that proceeding. It is not at all likely that they were concerned in the matter until it was laid before them by the Austrian Ambassador and Sir R. Mayne on the 5th February. But it does seem most likely that the Austrian Ambassador, having heard some rumour of a manufacture of Hungarian notes, applied to Sir R. Mayne to assist him, as any Englishman would apply to the police in case he suspected some illegal proceeding injurious to himself,—and that he obtained that aid, and got hold of the specimen note in some way through the help of the police. Everything seems to indicate that this was so. It was on the same day, 5th February, that an application was, apparently simultaneously, made to the Home and Foreign Office, by Sir R. Mayne, and the Austrian Ambassador respectively, the former actually producing to Sir G. C. Lewis the Hungarian note. Sir G. C. Lewis, when questioned on Thursday how the note was obtained, replied that "he could only say "it was laid before him by Sir R. Mayne," and that he did not believe at all that a detective had been employed to assume any false disguise in order to obtain it. Possibly Sir G. C. Lewis does not himself know how it was obtained; possibly it is not etiquette to ask how a police officer comes by his evidence of an act that is, or is thought to be, illegal. No doubt the ways by which such information is attained are not always of the most creditable kind. But it can scarcely be doubted that the Austrian Ambassador and the police authorities were acting in concert, when the one went to Lord John Russell and the other to Sir G. C. Lewis with evidence of this anomalous note-manufacture.

The real question at issue, as to how the note was obtained, does not, we imagine, in the least affect the Government, for, no doubt, Sir R. Mayne acted at the instance of the Austrian Ambassador exactly as he might have acted at the instance of any English subject who should have gone to him with an account of a suspected illegal practice of any kind. But the question for the country is, whether or not it is desirable that our police should place themselves at the disposal of foreign Powers to investigate suspected political offences at all. If we are bent upon giving political refugees a *bonâ fide* asylum in England, we ought, if possible, to protect them from the inconvenience of being exposed to a strict police *surveillance* whenever the agent of their own Government chooses to suspect them of any kind of conspiracy recognised by English law. It is no doubt extremely objectionable to place all such foreigners at the mercy of the combined efforts of their own Government and our police authorities to convict them of any such offence. And if on such occasions as this the country utters no protest, there is no doubt that the cases may multiply and may cause much injustice. Foreigners in England are peculiarly defenceless, from their general ignorance of our laws and institutions; and they might be subjected to much unpleasant harassing if there is to be no limit to the initiative of the police whenever a foreign Government chooses to announce its suspicions.

At the same time the Kossuth note case itself proves that the matter is not so simple as might at first appear. It is at least possible that the Austrian Government on the first rumour really believed that some forgery of Austrian notes was going on; and it is exceedingly probable that they induced our police authorities to believe this. Very likely the preliminary exertions of our police were put forth under the impression that a real *fraud* on the Austrain Government was hatching. If so, their interference would have seemed to most people legitimate enough. Yet it has turned out that it was no forgery or fraud, but a mere preparation for revolution. We must then run some risk of restricting the initiative action of the police in cases where a non-political crime is suspected, if we are to restrict it in all cases of a political nature. Nor can this conclusion be avoided. If it is,—and we think it is,—highly objectionable to let our police-administration act as the spies and agents of a foreign Government's political suspicions, we can only do so by laying down some general rule,—and some general rule which might to a certain extent hamper them in interfering to investigate cases where fraud only, and no political design, was suspected. But even this would not be nearly so objectionable as the practice of permitting our police to be the instrument of all the fears or fancies of a foreign Government,—to furnish it, in fact, with a staff of trained detectives for discovering the practices of any refugees it might suspect. And this is to be feared if no limit is put on their present action. It would, we think, be no hardship, or a very trifling hardship at most, if the initiative of our police were always refused in the case of any suspected crime against a foreign Government, until some *primâ facie* case had been established before an English magistrate or Court of Law. There is real danger that otherwise our highly organised police-administration may lend themselves a good deal too much to the views of foreign Governments, so that our boasted right of asylum may become more a name than a reality.

It is not in our Courts of Law, which are always quite sufficiently open to the influence of public opinion, that any such influence is to be feared. No English Court of Law, we are sure, will trespass in the least beyond the strict limits of legality from any political motives. In the present instance the probability is,—at least this is the opinion of all who know much on the subject, including apparently Sir G. C. Lewis himself,—that there is no really good legal case against the Kossuth notes; and if so, even Vice-Chancellor Sir J. Stuart must dissolve the *ex parte* injunction which he had granted when the case comes on next week, for no English judge would admit, we are sure, the bias of political prejudice to sway his decision. But an irresponsible and in great measure secret service like the police service, is really little influenced either by the laws of abstract justice, or by the tendencies of public opinion,—and there is reason to scrutinise far more jealously the powers we accord to it than those conceded to any other department of the administrative Government.

THE NEGOTIATION OF ACCOMMODATION PAPER A CRIMINAL OFFENCE.

The following observations of Mr Commissioner Holroyd, in his judgment in the case of Messrs Streatfeild and Co., are so very important to bankers and to all commercial men, that we think it desirable to reprint the more important portions of them :—

There cannot be a doubt but that the methods used to deceive banks into making advances upon accommodation paper are nothing else but commercial swindling—that is, obtaining money on false pretences. No doubt it may be said that a bank has it in its power to question its customers as to the character of their bills, and that they are themselves to blame for discounting bills with too great facility. But to ask a respectable customer if he deals in accommodation paper is much the same thing as to ask a gentlemen if he were in the habit of cheating. Nothing can more clearly demonstrate to any person of sound and unbiassed mind that dealing in accommodation paper is dishonourable, than the fact that a respectable customer of a bank would consider it as little less than an insult to be thought capable of doing such a thing. It is a vain idea to suppose that a bank can investigate the character of every bill presented to it for discount; they must in general trust to the respectability of their customers, and it will probably be found that when a man has a deep-laid design to pass off accommodation paper on his banker, he begins by endeavouring to acquire an excellent character for means and regularity, so as to ward off suspicion from the banker's mind, and when he has once resorted to the thing he is not likely to be deterred from any verbal misrepresentation to complete the deception. It is easy to show how much more dangerous it is for a bank to discount accommodation paper than real paper. If A gets ten of his friends to accommodate him with their names, and discounts these bills at his bankers', it is A's duty to provide funds to meet every one of those bills at maturity. If the bills were real, it would be the duty of the ten acceptors to provide funds to meet them, and the bank would have ten real principal debtors, nor would the bank hesitate to press any one of them who failed in his engagement. As all these accommodation acceptors were most probably induced to lend their names to A on his promise to provide funds to protect them, they in all probability took no pains to provide any funds to meet them, as few persons would put their names on an accommodation bill if they really thought they would have to pay it, and they are most probably ignorant of each other's transactions. In the case of real bills, then, the bank would have ten persons who would each take care to be in a position to meet his own engagement. In the case of accommodation paper there is only one person to meet the engagements of ten. Furthermore, if one of ten real acceptors fails in his engagement, the banker can safely press the drawer, but if the drawer of the accommodation bills fails to meet any one of the ten acceptances, and the bank suddenly discovers that it is an accommodation bill, and they are under large advances to the drawer, they dare not for their own safety press the acceptor, because he will of course have immediate recourse against his debtor, and the whole fabric will probably tumble down like a house of cards. Hence the chances of disaster are much greater when there is only one person to meet so many engagements than when there are so many bound each to meet his own. We see then that the real danger to a bank in being led into discounting accommodation paper is, that the position of principal and surety is reversed. They are deceived as to who the real debtor is, and who are the real sureties, being precisely the reverse to what they appear to be, which makes a very great difference in the security to the holders of the bills. To advance money by way of cash credit, or by loan with security, is quite a different affair, because then the bank knows exactly what it is doing, and as soon as anything occurs amiss it knows the remedy to be adopted. Moreover, it never permits the advance to exceed a certain definite limit, but it never can tell into what length it may be inveigled into discounting accommodation paper until some commercia reverse happens, when it may discover that its customer has been carrying on some great speculative operation with capital borrowed from it alone. Next as to fraudulent misrepresentation and concealment in procuring the discount of bills. I would first observe with regard to discounting a bill of exchange, that it is the same thing as buying a bill; if the bill be not endorsed by the party transferring it, it is a transaction of pure sale, but if endorsed by him, then it is a sale with a reservation of the remedy on the bill against the party transferring. In the one case there is a sale without warranty, and in the other, a sale with warranty.—See "Emly v. Lye," 15 "East," 12; in "Holroyd J. Thompson v. Giles," 2 "B. and Cr.," 329; "Gompertz v. Bartlett," 2 "El. and Bl.," 854; and "Gurney v. Womersley," 4 "El. and Bl.," 143. Then every bill of exchange imports two things—value received and an engagement to pay the amount on certain specified terms, and although the words "value received," when expressed on the face of a bill, express only what the law must imply from the nature of the instrument, and the relation of the parties apparent upon it (see "Hatch v. Trayes," 11 "Ad. and

El." 709), still I think these words may form one of several circumstances intended to denote the character of the bill, and that a valuable consideration was given for it. In "Grant v. Da *Costa*," 3 "*M. and S.*," *353*, Mr Justice Bayley said, "The object of inserting the words 'value received' is to show that it is not an accommodation bill, but made on a valuable consideration." A person who takes a bill of exchange, unless he agree to take it without recourse to any particular party, takes it upon the credit of all the persons whose names appear upon the bill, each of whom, either as drawer, acceptor, or endorser, guarantees the due payment of the bill, and, as Lord Ellenborough said in "Bass v. Clive," 4, "M. and S." 15, a person taking a bill is warranted in taking it according to the ordinary import of its terms, and in treating it so, and it would introduce vast inconvenience if it were otherwise. If a person, for the purpose of inducing another to enter into a contract with him, make a statement which he knows to be false, and upon the faith of that statement the contract is entered into by the other party, generally speaking such a contract would be deemed to be fraudulently obtained, but it must be clearly established that the false statement gave rise to, and was the very ground upon which the contract was effected. General dishonesty of purpose, or intention to overreach, is not enough, unless shown to be connected with the particular transaction. The misrepresentation may be as well by deeds or acts as by words, and the fraud may consist as well in the intentional suppression of what is true as in the representation of what is false, that is, if the non-disclosure be of circumstances known to one contracting party which ought in good faith to be made known to the other. In "Addison on Contracts" (fourth edition), p. 152, it is said:—"So if a man go into the money market with a bill of exchange, or a promissory note, and gets it discounted without putting his own name on the back of it, he is not bound to refund the money he receives if the parties to the bill or note become insolvent, and the bill is dishonoured; but if it is not the bill or note of the parties whose names appear upon it, if it is a spurious document or a forgery, then the money received in exchange for it cannot lawfully be retained. If the party who negotiates it does not endorse it, he does not subject himself to that responsibility which the endorsement would bring on him; but his declining to endorse the bill does not rid him of that responsibility which attaches on him for putting off an instrument of a certain description which turns out not to be such as it is represented to be. In "Gompertz v. Bartlett," 2 "El and Bl." 854, Lord Campbell says, "The law is, I think, accurately laid down in the passage cited from 'Addison on Contracts.'" Wherever, therefore, a bill of exchange answers the description by which it is sold, and it turns out that there is a latent defect, the vendee, in the absence of fraud and warranty, must take it with all faults. In such a case, the maxim "*caveat emptor*" applies; and in "Jones v. Ryde," 5 "Taunt," 488, and "Gurney v. Womersley," 4 "El. and Bl.," 133. But in all cases if bills are transferred as valid when the transferrer knows they are good for nothing, the suppression of the truth is a fraud. "If," said Mr Justice Bayley, in "Camidge v. Allenby," 6 "B. and Cr.," 373, A could show fraud or knowledge of the maker's insolvency in the payer, then it would be wholly immaterial whether the notes were taken at the time of sale or afterwards. In "Byles on Bills," 139; "Fern v. Harrison," 3; "T. E.," 459; and in "Budd v. Fairmaner," 8; "Bingh. 52," per Tindal, Ch. J. Where a warranty is given which is untrue, it is fraudulent in contemplation of law, whether there was knowledge or want of knowledge on the part of the person making it. If then the drawer of a bill endorse the bill, he is bound to see that it is a bill of good quality, for by endorsing it he warrants the solvency of the drawee, and if he procure the discount of the bill, knowing or suspecting at the time that the drawee is insolvent, or not of sufficient ability to pay the bill, and conceals that fact, or, in other words, gives a warranty which he knows to be false, and the banker or party discounting the bill sustains damage, I think in that case it would be both a legal and moral fraud. It is true the drawer may intend to pay the bill, or to find funds for the purpose, but I think the banker has a right to presume that the drawer has no reason to doubt the responsibility of the drawee, upon whose credit he has taken the bill as well as upon that of the drawer, and if the drawer knows that the drawee (the acceptor) is not of sufficient ability to pay the bill, the bill becomes virtually no more than the promissory note of the drawee, and without giving the banker the opportunity of electing whether he will be content with an irresponsible acceptor, and be willing to rely solely upon the security of the drawer. I may here remark that I think it would be well, and it would certainly save much time and trouble in any judicial inquiry respecting a discount account, and would facilitate the ends of justice, if banking companies were more particular in opening or contracting a discount account. A printed form of the terms upon which the account is to be opened, and bills discounted, with some questions to elicit such information as the bankers deem to be material, might be useful, and there might be cross discount tickets, signed by the parties, containing not only the amount of the discount and commission, &c., but the other terms upon which the bills are discounted. At the same time, when a discount account has been opened by a banker (and it may be on his own solicitation) with a merchant in high credit, and the banker honestly reposes confidence in the merchant, no *laches* can, I think, be imputed to the banker for not proceeding to test the truth of representations made to him by the merchant. Generally speaking, no person has a right to complain that too much faith has been put in his own assertions. It should be remembered, too, that a banking company can seldom have better or more regular information concerning the conduct and circumstances of its debtors with whom it has had previous dealings than what its own books afford it.

Agriculture.

TEACHING BY EXAMPLE.

We have on various occasions referred to the large improvements of a costly and permanent character which are made by tenant-farmers in Scotland under the stimulus to adventure and the sense of security afforded by long leases. And this in a general way is admitted, but still we find the example afforded by the success of long leases in Scotland has but little influence on English proprietors, who, for the most part, are satisfied to go on with the thriftless and depressing system of yearly tenancies. Special cases afford the best illustrations of the benefits derived from leases. A Scotch farmer of Selkirkshire, Mr Walter Elliot of Newhall, has recently died, of whose agricultural career the *North British Agriculturist* affords the following particulars. He was originally a shepherd boy, and he followed that occupation until his manhood, when he commenced dealing in sheep and cattle. Having saved a little money, at the age of thirty-four he hired on lease the upland farm of Newhall, situated in the district of Caddonwater, close to the birth-place of the striving man. At that time this district was exclusively pastoral. He at once commenced his improvements. He soon converted the waste and rough pastures into highly-cultivated land, and his success induced the neighbouring farmers to follow his example. Those who know the district now are aware of its productive character. But Mr Elliot's enterprising mind was not content with the improvement of his original farm. He sought, in the true commercial spirit, to render the resources, which his successful improvement of Newhall had placed within his reach, available for further and similar successes. He soon obtained a lease of the pastoral farm of Crosslee Hill, in the same county. Here he commenced the work of reclamation with great energy. In a few years, and at his own cost, unaided by the proprietor, he enclosed, reclaimed, and drained upwards of 500 acres of land. This is an undertaking from which the landlord would probably have shrunk. "At this time," says the memoir we have referred to, "his means must have been almost inadequate to his outlay, but his firm faith in a remunerative soil made him face and overcome difficulties from which the majority of farmers would have recoiled. He practically acted on the system that the produce of one field went to assist in reclaiming another; nor was he disappointed, for his efforts were to successful that he soon leased other reclaimable farms. During the last twenty years, Mr Eliot has reclaimed, almost solely at his own expense, 1,500 acres of land—the expense of reclaiming which could not be short of 15,000*l.*" Now what enabled this enterprising Scotch farmer to accomplish such results? First, there were the long leases by which the possession of each of the farms he improved was secured to him for nineteen or twenty years. And, secondly, there is the Scotch system of bank credits by which bankers, by advances to improving farmers, so materially promote the improvement of landed property and the prosperity of agricultural tenants. From such advantages landowners in England debar themselves by their suspicious system of yearly tenancies. It will be said that English farms do not require such expensive improvements, and do not offer the same beneficial results to a tenant as the unreclaimed hills of Selkirkshire present to their Scotch brethren. But this is quite a mistake as far as we except light land and improved English farms. To drain, to clear the superfluous timber, to remove the unnecessary and injurious hedgerows so as to render the fields of reasonable and profitable extent, to erect proper accommodation for stock and the like, all which things are required on most English farms, will require the same sort of enterprise, and in most instances little less cost, than the ten pounds per acre invested by Mr Elliot in his reclamations. There would be the same necessity for security of tenure as in Scotland, and if English farmers were well protected by rational leases they would have no more difficulty in obtaining the pecuniary accommodation they might require than is experienced by the Scotch farmers. It is mentioned that Mr Elliot was a man of decision and judgment, and was capable of great bodily exertion,—so that he kept a constant and vigilant superintendence over all his undertakings whether near to or remote from his own residence. "His tact, too, in directing his labourers well qualified him to be a reclaimer of land, and enabled him to execute even extensive operations at a comparatively trifling cost." And are not farmers in England capable of all these things if landowners would give them opportunities? Have not railway contractors sprung up in every part of the country? And what is wanted to elicit the enterprise dormant in the English agricultural mind but

analogous prospects of advantage? It is said:—"On the whole, although Mr Elliot devised no new system of husbandry, was a member of no agricultural society, nor an exhibitor at any agricultural show, yet what was greater than any or all of these, he opened up fresh avenues for labour, he increased the produce of land under his possession an hundredfold, and the many cultivated fields and hill slopes of Caddonwater are fitting memorials of his skill as an agriculturist." We have farmers who might well deserve such eulogy, but where can they find farms South of the Tweed?

OUR RIDING HORSES.

THEIR FAILINGS AND DEFICIENCIES.

No domestic animal contributes so constantly to the pleasure of its owner as a good riding horse. If a hunter, equal to carry weight, it becomes an animal of great value, while a clever hackney is, to the man whose business or amusements lead him to be much on horseback, a constant source of enjoyment.

Now, the hunter, either for the heavy man or for a moderate weight, and the hack must alike have a good deal of blood, but all must have what few thorough-breds, save the most valuable, possess, power and substance as well as blood. Racing stock, though it furnishes the means of breeding hunters and hackneys of the highest classes, will not furnish directly any great supply of riding horses. It seems that there are in England about 2,050 thorough-bred brood mares of the highest pedigree, which produced in 1860 as many as 1,450 thorough-bred foals. Of these comparatively few turn out valuable racers, the rest being commonly sold at from two to four years old for very small prices. Some of them make hackneys, and a few may become hunters for light weights, but the majority being deficient in knee action are fit only for cabs and butchers' carts. The shoulders and forelegs of our thorough-breds are often their weak points, and horses with these defects, though often speedy in their gallop, are really worthless for the saddle. It is plain we cannot rely on the breeders of thorough-bred horses for our hunters and hacks, although the breeders of horses will resort to the racing studs for the crosses of blood they require for their own purposes. The great difficulty in the way of breeding riding horses is the long time they require to be kept before they can be sold to any advantage. Until four years old, and more frequently until five, the breeder of riding horses cannot expect to sell his young stock; and, if he keeps two or three brood mares which breed pretty regularly, he will find himself with a large number of the most troublesome and expensive young stock it is possible to have on a farm, and which require much patience, care, and outlay to render them marketable. This, however, is no reason a farmer should not breed riding horses, but it shows that he he should not breed too many, so as to allow himself to become overstocked with young horses at unsaleable ages, and should be especially careful to breed only from good mares. The value of most riding horses depends mainly on the goodness of the dam; and, as the rearing a colt must of necessity involve considerable cost, no man ought to think of breeding from any mare unless there is a reasonable expectation of her producing, by a good sire, a colt which at five years old will be a horse of considerable value—for our experience tells us that less than 80*l* for a five-year-old will not pay the cost and trouble of breeding it, and even at that sum sheep or cattle would probably have made a better return with far less trouble. We can point to not a few damaged gates and broken fences as the work of some seven or eight well-bred young horses.

We have been led into these remarks by a sensible paper in the just published number of the "Royal Agricultural Society's Journal," the "Report on the Riding Horses and Ponies shown at Canterbury, with Remarks on the present Breed of Riding Horses, by J. Earl Welby, one of the Judges." Mr Welby says, that having watched the class "for thorough-bred stallions for getting hunters, &c.," at the Society's meetings, he is satisfied that it is worthy of the patronage of the Society in all districts. It gives variety, it attracts many people who care little for sheep or cattle—for what Englishman is not attracted by a good horse?—and may be be made to ensure an entry of valuable horses "available for general use in the field and on the road." But he thinks that the class should not be limited to "thorough-bred stallions," as there are horses with a stain in their pedigrees which are really more adapted for hunter sires than a large proportion of thorough-breds, though he would allow pedigree to be taken into the consideration of the judges when awarding prizes. This is quite just. Suppose two competing horses be so equally matched in size, form, substance, action, &c., that in those particulars one could scarcely be deemed superior to the other, it is probably that, if the one were thorough-bred and the other not, the greater security pure blood affords of like producing like would induce the judges to decide in favour of the thorough-bred one. Perhaps even greater credit might be given to pure blood than in the case we have supposed. But there is no reason why the competition should be *confined* to thorough-breds. Mr Welby says there are two sons of "Mundig" at this time in Lincolnshire, the "Red Cross Knight," and the "Grey Prince," which are out of quite half-bred mares, and yet their stock "possess great power and endurance, and have realised very high prices." And he mentions several other horses as illustrations of the same point.

He also says that there should be some limit as to the fee at which the prize horses cover. For instance, at the Middlesborough (Yorkshire) show the first prize of 100*l* was gained by *Voltigeur*, the second by the *Curé*, two crack racing sires. Now, *Voltigeur's* fee is 50 guineas and the *Curé's* 25 guineas' for each mare, so that practically neither of them is ever likely to be used as a hunter sire. He suggests that the same prize for 100*l* should be offered for the best stallion for getting hunters, available for a fee of 5 guineas for mares not thorough-bred. This is a point of great importance, and ought to be brought before the Council of the Society. It is quite true that we do not want a Derby or a St Leger winner as a hunter sire, but "the stout wearing plate horse—one that combines constitution and stoutness with good knee action and power. Such animals are rare among the present thorough-breds, and therefore require encouragement. The chief faults of the common run of race horses lie before the saddle. How many of these have thin withers and straight shoulders, are pinned in their elbows, and—worst fault perhaps of all—have upright pasterns, to which may be added a great want of power and constitution. They have so long been bred for speed and taught from yearlings to go on their shoulders, that they have well nigh lost the springy level action which is so essential to form a perfect riding horse."

It is also perfectly true that "of the large class of riding men by far the greater part know little and care less about racing and race horses; they do not want to see the racing cracks, but they do want to see an assemblage of hunting stallions up to 12 or 15 stone, and such may now be shut out, whilst a "Voltigeur" or a "Curé," who confer no benefit on any but the racing public, carry all before them. As like begets like, is it not reasonable to suppose that a horse that has shown great jumping powers and lasting qualities over the country will hand down those especial qualities to his offspring, and therefore be a more certain card to rely on than the racing sire who has been educated for several generations to go on his shoulders?"

Amongst our thorough-breds, the "Birdcatcher" and "Sir Hercules" lines are, Mr Welby thinks, best calculated to improve our riding horses, as "they all possess action, and may be known by the general airiness of their forehands, and the good setting on of their necks, shoulders, and forelegs." The "Touchstone" line produces horses of great power in the back and loins, though somewhat faulty in their shoulders, which, judiciously crossed, may be available for hunting stock. He deprecates any cross with Cleveland blood, as producing soft, flashy dealer's horses, only fit for carriage work.

For brood mares Mr Welby would offer high prizes, for, he says, "I am more inclined to rely on finding in the progeny those good qualities which they would naturally inherit from the dam's side than from that of the horse.....I should like to see two 50*l* prizes given—one for the best hunting mare, and one for the best hackney mare; I would not debar the same animal from entering in both classes, because I think it possible that *one* mare may have such a frame and quality as would enable her to fulfil either purpose. I can instance one mare exhibited in the hackney class which gained the prize there, and was so superior to any shown in the hunting class that she ought to have carried that off as well."

Let country gentlemen and farmers bear in mind that in breeding horses beyond all other things, it is worth while to breed good ones if they breed at all, for there is certain to be much cost and trouble, and unless really good colts are reared, horse-breeding is alike unprofitable and unsatisfactory.

Literature.

COMMERCIAL LITERATURE.

THE ISLAND OF SARDINIA: with Remarks on its Resources and its Relations to British Interests in the Mediterranean; being a Preface to the Second Edition of Rambles in the Islands of Corsica and Sardinia, with Notices of their History, Antiquity, and Present Condition. By THOMAS FORESTER. Longman.

It would usually be absurd to notice separately the preface to a new edition of a work of which the original has never reached us. But as this preface purports to be a summary of the commercial condition and prospects of the Island of Sardinia, considered especially with a view to the suspected designs of France upon it, it is not without an independent interest of its own. Mr Forester gives us in this pamphlet many interesting and striking extracts from Lord Nelson's correspondence, showing the inestimable value he attached to the Island of Sardinia, and especially the harbour of Maddalena, as a naval station in case of any war with France. The emphatic warning, written in 1804, that if Sardinia should fall into the hands of France it would be a greater loss to the country than "a hundred Maltas," reads with curious significance at the present day. But it is not with this aspect of the subject we are now concerned. It is with the commercial value of the trade and productive power of the *Island* of Sardinia that this little pamphlet is chiefly concerned.

Mr Forester states, in an account evidently taken in great measure from "M'Culloch's Geographical Dictionary," that the

present population of the Island of Sardinia is upwards of half a million, and that about 800,000 acres are devoted to the growth of corn. In the time of the Romans the population, he says, reached more than four times its present limits, *i.e.*, about one inhabitant to every three acres in the island; and the great fertility of the soil would again admit under good laws of a dense population and a very considerable commerce. In favourable years we find by our blue-book that the Island of Sardinia has exported grain to the value of 200,000*l*, and wine to the value of 180,000*l*. We do not find Mr Forester's account of the imports and exports of Sardinia very correct. They are to some extent self-contradictory, and are certainly not drawn from our blue-book containing the account of the Island of Sardinia, which is we conclude the safest authority. Thus, Mr Forester tells us the whole imports of the island are valued, "according to late returns," at 8½ millions of francs, the exports slightly exceeding these. This must have referred to some year previous to 1853. But at p. 22 we are told, in a quotation from the report of our Consul at Cagliari, that in 1855 "the imports from France [alone] were of the value of 18,801,152f, and the exports to France 10,597,334f, of which wine formed an item of 3 million francs." These accounts of course are quite inconsistent if referring to the same subject. Probably the latter refers only to merchandise passing through the port of Cagliari, whether destined for the Island of Sardinia or not. Referring to the blue-book, the commerce of the Island of Sardinia appears to be represented by the following figures:—

ISLAND OF SARDINIA.

	Value of Imports.		Value of Exports.	
	f	£	f	£
1856.....	14,695,379	= 587,815	 11,501,745	= 460,070

Of this, France appears to send about 20 per cent. of the imports, and to receive 15 per cent. of the exports, while Great Britain and her Colonies furnish about seven per cent. of the imports, and receive about four per cent. of the exports. The chief exports of Sardinia, besides grain and wine, are cheese, salt fish, and skins. It is stated that the French are diligently cultivating their relations with Sardinia, and have obtained extensive contracts for cutting cork wood and timber in the Sardinian forests.

FIERY FACTS; or, the City Coal Tax Exposed! By CHARLES COLWELL. *Effingham Wilson.*

THIS pamphlet is a vigorous onslaught on the City coal tax, by a gentleman who has already appeared in print on similiar subjects. The author traces the origin and continuance of the tax under various forms, from the time of James I. to the present day, and quotes several statutes and other evidence to show how the receipts have been diverted, as he alleges, from their proper object. Unfortunately Mr Colwell gets so warm in his work that he vents his indignation upon the City authorities in the most unmeasured terms,—charges of gross covetousness, deception, self-aggrandisement, &c., being freely imputed. Apart from these disfigurements, however, the pamphlet gives a tolerably clear view of the question. Mr Colwell's conclusions point to the abolition of the present tax of 1s 1d levied by the City Corporation, and to the substitution of a tax of 1d per ton on all coals raised, which is estimated to produce about 300,000*l* a year. Of this sum he would appropriate 100,000*l* as ample compensation for the share of the 1s 1d the City are, in his opinion, fairly entitled to, the remainder to be applied to the payment of mine inspectors, establishment of schools, the building and endowment of alms-houses, and rewards for improved plans of ventilation.

GENERAL LITERATURE.

THE RUSSIANS AT HOME: Unpolitical Sketches, showing what Newspapers they read; what Theatres they frequent; and how they Eat, Drink, and Enjoy Themselves; with other Matter relating chiefly to Literature and Music, and to Places of Historical and Religious Interest in and about Moscow: comprising also Four Russian Designs (on Stone). By SUTHERLAND EDWARDS. London: W. H. Allen and Co., Leadenhall market. 1861.

ALL reliable information concerning the internal condition of Russia is peculiarly welcome at the present time, when some of the noblest experiments in history are in the course of being there worked out. Mr Sutherland Edwards' volume is somewhat slight and desultory, and not quite free from the charge of book-making, but it has every appearance of being conscientious and veracious as far as it goes, and great part of it is extremely interesting. The first seven chapters, with the addition of chaps. 13, 21, and 22, are devoted to politics and literature, the deprecatory heading of "Unpolitical Sketches" being almost as great a misnomer as was the title of the witty "Unpolitische Lieder" which appeared in Prussia some twenty years ago. The 11th, 14th, 23rd, and 24th chapters are descriptive of Moscow and St Petersburg, with incidental passages of the author's travelling experiences; and the intermediate chapters touch on a variety of miscellaneous topics, such as "Eating and Drinking," "Winter," "Clubs, Assemblies, and Balls," "Operatic and other Music," "The Russian Gipsies," &c. Of course the most interesting portions of the book are those which relate to the intellectual and social progress which has now been going on in Russia for many years, and which has been so remarkably increased in range and freedom since the accession of the present Emperor. The chapter on "Journalism" with which Mr Edwards' book opens, contains a variety of facts which will probably be no less new than welcome to most English readers. Our author tells us that of Russian *newspapers*, properly so called, there are but few; "it is the magazines and reviews that form the strength of what is called 'journalism' in Russia": but these reviews have all been started by men of letters, and reflect the independent thoughts of the best intellect of the country on the topics of the day, whether political or literary. As illustrating the subject-matter of these journals, Mr Edwards gives the lists of contents of some of the numbers, among which we find reviews of Grote's "Greece," Motley's "Rise of the Netherlands," and Montalembert's "Political Future of England,"—divers tales and reviews relating to Russian history (many of them by noted Russian liberals), besides articles on science and education, and a notice of a recent Russian translation of "Antigone." All these appeared in January, 1857. The magazine of which Mr Edwards speaks at most length is the "Russian Messenger," which was started just after the accession of Alexander II. This journal appears every fortnight; and each number contains 384 pages of nearly the same size as the "Cornhill Magazine." The subscription to it is "15 roubles a year—2*l* 10s, or about 2s a copy." In this journal appeared some "Provincial Sketches" by Shchedrin, which treat of the abuses of officialism, "and which soon gained for the author the reputation of being one of the most just, and therefore one of the severest satirists who had appeared in Russia." These papers, says our author, "mark the change which has taken place in Russian journalism since the accession of the present Emperor."

Mr Edwards thinks "it is evident that England is the country especially studied by the reform party in Russia;" and certainly the interest which they seem to take in English writers and in English politics appears to justify this impression. "Adam Bede," Mrs Gaskell's "North and South," the works of Dickens and Thackeray, are all translated into Russian (as are also Mrs Stowe's tales), while Crabbe, Sheridan, and Sir Robert Peel are made the subjects of dissertation and criticism. Thackeray, indeed, seems to be an especial favourite. Not only were his chief novels translated into Russian as they appeared, but the old numbers of English magazines were ransacked for his early papers, which were reprinted in Russia before the "Miscellanies" were collected here. One of the editors of the Russian "Contemporary," the poet Panaeff, "wrote an excellent article on the 'Snob Papers,' which he concluded by pointing out certain Russian snobs, who were only waiting to be dissected." Soon after, he commenced a series of "Experiments with Russian Snobs," which, however, "are not imitated even as to form," from Thackeray. ("Our readers," adds Mr Edwards, "will not be able to pronounce it, but they may feel interested in *seeing* that the Russian word for 'snob' is *khlishch*.") Besides these facts, our author communicates some which are still more unexpected.

All the chief reviews and journals of Russia publish accounts of the proceedings in our Houses of Parliament, and in one of the numbers of the "Russian Messenger" we find a full report of the great debate which preceded the overthrow of the Derby Cabinet, translated literally from the *Times*, and occupying 80 pages of the review. The writer, in a series of notes, gives political and biographical particulars respecting the various speakers.....We may also mention that the trial of Montalembert, the whole of the Orsini affair, and especially the acquittal of Dr Bernard, were treated from what we might almost call the English point of view, and scarcely a number of the "Russian Messenger" now appears without some article in which the writer takes occasion to laud the principle of self-government, and to expose the viciousness of the French system of centralisation supported by military force.

Nevertheless, the censorship still exists; but during the present reign it has been exercised with far less rigour than formerly; and an anecdote related by our author seems to show that different measures of freedom are regarded as allowable in different quarters. The "Russian Invalid" having attacked the "Russian Messenger" for the harshness of some of its anti-Austrian articles, the "Messenger," in defending itself, laid much stress on the different degrees of courtesy due to a foreign Government from official and from non-official journals. "Both are submitted to the censorship, but in the latter, the writers express their own personal opinions freely, 'and under no other conditions,' says the author of the article, 'would we consent to discuss politics at all.'"

We must refer our readers to the chapters on "Illustrated Papers and Caricatures," "Political Comedies," and "Kriloff and the Russian Fabulists," for further illustrations of the social satire which seems so prevalent in Russia. (The descriptions of the caricatures which appeared during the Crimean war are particularly amusing.) The chapters on the Censorship and "Secret Literature" give the more tragic and serious side of the same subject. Under the latter head, our author speaks at considerable length of the writings of Alexander Herzen, who now writes "entirely in Russian, and exclusively for Russian readers," his works being published in England, but chiefly circulated in his own country, where, says Mr Edwards, they are "purchased by two or three thousand, and read by tens of thousands." There is a considerable difference in the impression conveyed of M. Herzen's writings in different parts of the work before us, but the general drift is to the effect that in spite of much unwisdom and occasional injustice, they are, on the whole, a power for good.

In the valuable chapter on "Serfdom, its Origin and its Abolition," Mr Edwards traces the history of the institution from its beginning. The first steps that he records as being taken for the amelioration of the condition of the serfs proceeded from the Emperor Nicholas, who in an *oukas* issued in 1842 enabled the serf to make contracts and to hold property, forbade masters to separate families, and permitted them to liberate serfs on certain conditions. This oukas was followed by others tending in the same direction, and Alexander II. carried on the work of preparation still further, till at length he issued an Imperial rescript "which set forth that, 'in order to improve the condition of the peasants, it was necessary to free them from serfdom.'" A correspondent of M. Herzen's journal, the *Kolokol* (i.e., the "Bell"), giving an account of this rescript, and the still fuller Ministerial circular which followed it three days later, says:—

All the peasants heard of this, and repaid the Government for it beforehand by a love and an ardent confidence which it is not the privilege of every Government to awaken. The Emperor had given his word publicly and solemnly to all, and the effort was felt in the most distant parts of the Empire.

With respect to the serfs themselves, it is evident that there are among them individuals of very different degrees of education and of independence. Many seem to be mere ignorant drudges, who, if tolerably well used, are quite content in their servile state. Others have been well educated, and have attained eminence as singers, artists, &c. Mr Edwards mentions a proprietor who owns seven musicians, who "are far superior to their masters, and infinitely so to those who are considered their equals—the other serfs." Others, again, are in trade, and our author says that,

As many of the rich merchants of Moscow and St Petersburg are, at the present moment, either serfs who have purchased their own liberty, or actual serfs paying almost a nominal *obrok*, or poll-tax, to their proprietors, it may be inferred that one effect of the emancipation will be to add considerably to the numbers of the middle or trading class. This effect is, indeed, being already discounted. Witness the vast speculations that are being organised throughout Russia, and which are all based upon the hypothesis of an enormous increase in the commercial activity of the country.

One passage we must extract from an interesting letter received by our author from a Russian serf-owner, giving an account of the effect produced on the serfs by the news of their coming freedom:—

"There are different masters and different serfs, he says. The serfs who are oppressed wait impatiently for their freedom, and repeat to one another,—'The time is passed for our masters to reign over us; we shall soon be equal to them, and they will no longer ill treat us.' But, also, very touching scenes occur when the serfs have been treated with kindness. Some are so attached to their masters that they begin to weep when they are told that they will have to leave them.....To myself a woman said, 'Is it true the Emperor wishes we should be free?' I replied to her that the peasants would certainly be free in ten or twelve years. 'Oh, no!' she said, 'that will never be, they will talk of it a little, and then they will forget.' But that same day the circular appeared, showing on what conditions the peasants would be emancipated, and I was obliged to tell her; she was so anxious about it, and asked with such eagerness, that I had to explain it all from beginning to end."

This volume abounds with anecdotes illustrating the liberal disposition of the present Emperor on a variety of subjects. His preceptor was Joukovsky, the translator of Homer, and an intimate friend of all the eminent writers of his time; and Alexander II. has had literary sympathies from his youth. Through his intercession, Tourgéneff, the most popular Russian writer of the present day, was saved from exile during the reign of Nicholas By a new law (apparently enacted in 1856), the price of a foreign passport is fixed at 30*s* once and for all, instead of 40*l* or 50*l* a year. Many writers consequently start for foreign countries, and send home to the Russian magazines accounts of what they see and hear abroad, by which the native horizon must be not a little enlarged. Three other changes we must mention:—the permission to smoke in the streets of St Petersburg; the abolition of the barbarous instrument known as the knout, which now only exists as a relic (the whip which has taken its place being only used in cases of murder and arson); and the restoration of the Polish language in all the official transactions of Russian Poland. What proportion the Imperial purposes and popular energies may bear to the mass of obstacles which impede the free national development of Russia and her dependencies, it is of course impossible for a stranger to estimate accurately, nor does our author attempt it. But that the Czar and the most enlightened of his subjects are honestly bent on accomplishing a very large amount of genuine and wholesome reform, cannot be doubted, and the evidences of this which are here recorded must give cordial pleasure to English readers.

The miscellaneous portions of this book are pleasantly written, and are often very amusing. Several translations from Russian authors are interspersed here and there, ranging from receipts in cookery to tragic poetry,—which add materially to the value of the work. The extracts from Poushkin's poem of the "Gipsies," and the poems on Poland, are especially interesting; and there is a grace and spirit in the English translations which convey the impression of their fidelity. The notices of Russian music seem to imply the existence of a fund of native musical genius, which makes us glad to hear that some of the compositions here mentioned are about to appear in an English form. As for the celebrated Russian horn-bands, in which each performer was restricted to a single note, Mr Edwards could scarcely obtain any information about them, and is inclined to believe that they are almost if not entirely extinct. The chapter on the Russian Gipsies is very curious; so also is the chapter on "Tea-houses." The Russian's delight in tea-drinking is astonishing. No doubt it is a less pernicious habit than the passion for ardent spirits, but there is something irresistibly comic in the extreme to which it is carried.

There is one feature of this book which should not be passed over. We are told in a preliminary advertisement that a portion of the work "is written by an American citizen;" but which that portion is, or who the American citizen may be, we are never informed. There are occasional repetitions in the volume, which look as if different hands had produced it, and we have already mentioned the slight discrepancy in the estimate taken of M. Herzen; but it would have been satisfactory to know exactly how much belongs to the writer who communicates his name, and how much to the citizen who remains anonymous. In conclusion, we should add that the "four Russian designs on stone" are curious illustrations of peasant life, manifesting real humour and pathos in the artist, whose name we should have liked to know.

Foreign Correspondence.

(FROM OUR CORRESPONDENTS.)

PARIS, Thursday.

The Bank of France has this day lowered its discount to 6 per cent.

It seems that certain persons have great interest in casting as much darkness as possible over the affairs of M. Mires, as the most contradictory statements are put forward on the "best authority" with regard to the bills drawn on him by the Ottoman Government, and which have become or are about to become due. I have reason to believe that the real state of the case is this:—The amount of the bills to be paid in the present week is 11,000,000f. In consideration of the great inconvenience which would be occasioned by dishonouring them, an arrangement (not, however, without much difficult negotiation) has been made to this effect:—1, to take a sum of 2,500,000f, which is in Mires' *caisse*; 2, to raise 2,500,000f on certain securities belonging to the Turkish Government and in the hands of its agents here; 3, to obtain a loan of 6,000,000f from Messrs Donon, Aubry, and Co. (the first named is Turkish Consul), or the Credit Industriel, the said loan being guaranteed by the Turkish Government, and to be repaid out of what remains due on the Mires' loan, whether that affair be completed by some other banker, or whether it be stopped at the point at which it now stands,—that is, the subscription of 102,000 bonds at 312f. As the French Government pressed for an arrangement to this effect, MM. Donon, Aubry, and Co. requested its guarantee, and after some hesitation it consented to give what it calls a *moral* one. In virtue of this arrangement, 5,000,000f worth of bills which had come due, and the remaining 6,000,000f, will be paid. This settlement of the affair seems to be considered a satisfactory one for all parties; for the holders and endorsers of the bills; for the Ottoman Government, which would have been placed in an embarrassing position by the non-payment; and for the French Government and public, whose interest clearly is that the effect of the Mires' catastrophe shall be limited as much as possible.

In addition to the said 11,000,000f, Mires, it appears, accepted bills for 12,000,000f more; but the payment of this was provided for by the transfer by him to the Industriel Bank of that amount. Mires, moreover, handed to the Turkish Government good securities for about 4,000,000f. Thus 27,000,000f will have been paid, and that is rather more than the amount which he actually received in calls from the public on account of his loan.

The Roman Railway Company, one of M. Mires' affairs, having (as stated in our last) lately obtained judicial authorisation to raise a loan of 2,000,000f on security of its shares and bonds to continue its works, applied a few days back to the Tribunal of Commerce for authorisation to borrow 6,000,000f on similar security for the same purpose; but the provisional administrator of Mires' Caisse Generale, Count de Germiny, insisted that the application ought not to be granted, because the shares and bonds referred to were really the property of the Caisse. The Tribunal, in a judgment given on Monday, rejected the pretensions of the Company, not, however, on the merits, but for the purely technical reason that the Company being a foreign one, and not having obtained permission under a law of 1857 to enjoy the privileges of a French Company, it could not sue in a French Court.

The Legislative Body has commenced the discussion of the address, but hitherto speakers have confined themselves almost exclusively to the exhausted Italian question, though the financial one is perhaps of equal importance. On the latter, M. Gouin, however, who is a financier of some authority, has delivered a brief speech. After some very true observations on the much-used phrase "equilibrium of the Budget," which he defined to mean, not as French Ministers of Finance of the Imperial regime appear to consider, the balancing of expenses by resources no matter how the latter be obtained, but a *permanent increase* in resources equal to the expenses,—after these observations, he went

on to show that the declaration in the Emperor's speech, that "the Budget of 1862 would be presented in equilibrium without recourse being had to increased taxes or to public credit," was open to very grave objection. In the first place, he said (and in this, by the way, he virtually repeated what was put forth by M. Casimir Perier in his pamphlet a short time back), there are set down in the Budget about 24,000,000f coming from an increase in the tax on alcohols, one of 33,000,000f for an augmentation in the price of tobacco (a Government monopoly), and about 35,000,000f from what is called the *deuxième decime de guerre* (second tenth on certain war taxes) which was established in 1855 for *two years only*, but has since been retained. Here, then, is a decided "increase in taxes"; and as "to recourse to credit" not being had, M. Gouin showed that the operation of the sinking-fund has been suspended, that the fulfilment of certain obligations entered into with railway companies has been postponed, that the funds of what is called the Dotation of the Army have been taken, &c. On the whole, he came to the conclusion that the Budget which the Minister of Finance has presented in equilibrium, nay, with a surplus, should be reduced on the side of receipts by the sum of 200,000,000f, or at least 170,000,000f; because the items composing that sum cannot be considered *permanent* resources; and that the side of expenses ought rightfully to be increased. He remarked, too, the floating debt, already large, will soon have to be augmented by the sum of 40,000,000f, which is to be lent to manufacturers for improving their machinery, by one of 60,000,000f or 70,000,000f for the military expenses of China and Syria, and perhaps by one of 40,000,000f due to the Credit Foncier. He remarked, moreover, that public credit is affected by the existence of a "floating debt" of some 48,000,000f of the city of Paris, of one of about 40,000,000f of the Caisse des Depots et Consignators, and of others of "various great financial establishments." M. Gouin then used this grave language:—

"I think I can safely say that our financial situation is much too strained, that our future has not been sufficiently protected, that all our present resources are exhausted, and that our Budgets can with difficulty suffice for political or financial eventualities."

No doubt, he admitted, the credit of France is still sufficiently good to enable new loans to be made; but that, he said, was a source from which she could not draw indefinitely, and besides it is to be remembered that her debt of late years has enormously increased—from, for example, 175,000,000f in 1847 to 317,000,000f a year. He considered the financial situation as justifying disquietude, and declared that a continuance in it would be "dangerous," and "might become fatal." He, therefore, called for a vigorous reduction in expenses, and for greater care in dealing with resources.

The Director of the Board of Customs makes known in a circular to the chiefs of custom houses that English pitch having lately been introduced into France under different names, the question has arisen what import duty it ought to pay, and that he has decided that it shall be classified as what the French tariff calls "goudron mineral" (coal tar), and pay 5 centimes the 100 kilogs (2 cwts) by English vessels, and 1f by foreign.

The *Siecle* daily newspaper has just declared a dividend of 125f per share for last year. The profits in that year were, it was announced, larger than ever before obtained.

The Bourse has been very tranquil during the week, and the following are the quotations;—

	Thursday, March 7. f c		Thursday, March 14. f c

P.S.—A notification from Count de Germiny, as administrator of the affairs of M. Mires, makes known that by an arrangement between him, M. Court the Turkish Financial agent, the President of the Credit Industriel Bank, and the Director of the Sous-Comptoir du Commerce et de l'Industrie, the bills accepted by Mires on account of the Ottoman loan will be paid to-morrow and on the following days at the Credit Industriel Bank in this city.

The following is an account of the markets:—

FLOUR at *Paris*, yesterday, was 69f to 72f the sack of 159 kilogs; four marks were 69f 50c and 70f for the current month, and 70f for April.

WHEAT at *Paris*, yesterday, was not active: quotations were 37f to 39f and 39f 50c the sack of 120 kilogs. Of the country markets, there has been a rise in 52 of from 9c to 1f the hectolitre; a fall in 40 of from 14c to 90c, and in 35 there has been no change.

COTTON.—The sales at *Havre*, in the week ending Friday, were 11,295 bales, and the arrivals 29,995. Closing prices for New Orleans were 1f higher than on the preceding Friday, but low and very ordinary Georgia were 1f lower, and all other sorts remained unchanged. Low New Orleans was consequently 95f the 50 kilogs, and very ordinary ditto 101f. This week, a fair amount of business without any marked change in prices.

COFFEE.—At *Havre*, in the week ending Friday, business was regular: 635 sacks Hayti Port-au-Prince disposable went at 78f to 80f the 50

kilogs in bond; 300 ditto, for delivery, 78f 50c; 250 sacks Jeremie, in the port, 78f; 950 Cape, for delivery, 81f; 260 Gonaives disposable, 81f to 81f 50c; 300 ditto, for delivery, 82f; 169 sacks Rio, not washed, disposable, 71f; 756 Java, 115f to 118f duty paid; and a small lot of Guadeloupe, 135f. A large lot of damaged Hayti was also sold by auction. The arrivals were about 13,600 sacks, the greater part Rio and Santos. The stock in bond on the 1st of the month was 5,859 tons; on the same date last year it was only 1,859. This week, there have been several sales: Rio, at 68f to 73f; Hayti, 77f 50c; Gonaives, 82f 50c; Java, 114f 50c to 119f: some Porto Rico at prices kept secret. At *Bordeaux*, last week, 1,500 sacks Mysore were taken at 2f 20c to 2f 25c the kilog, duty paid; 800 ditto *non grage*, 88f; 162 sacks Rio, not washed, 75f to 76f. This week, some Rio has been sold, partly at the latter price, part at 75f to 76f. At *Nantes*, last week, 1,140 sacks Manilla went at about 106f; some Reunion *feve pointue*, 126f; some damaged Java was also sold. This week, Java has been sold at 116f to 118f; Reunion *feve pointue*, 130f. At *Marseilles*, last week, a cargo of Rio was sold at 70f; some Hayti, at 80f 50c. Various lots of different sorts of damaged were also disposed of. This week, 1,500 sacks San Domingo have been taken at 80f.

SUGAR.—Business at *Havre*, in the week ending Friday, was not very active. A small lot of French West India went at 47f 50c to 49f; 6,680 bales Reunion, 51f; and some lots of Havana at 33f 50c to 34f. The arrivals were 775 casks French West India, and 6,252 bales Reunion. This week, French West India has been at 46f 50c to 46f 75c; "usine" ditto, 59f 50c; Havana, 34f 50c to 35f 50c. At *Nantes*, last week, as many as 25,477 sacks Reunion were sold at 49f 75c; 3,446 Mayotte, 46f 12½c. This week, Reunion has been at 46f 25c to 50f, Mayotte at 50f. At *Bordeaux*, last week, a small lot of Reunions was taken at 46f 50c. This week, French West India has been at 46f 25c. At *Marseilles*, last week, some Havana was taken at 35f.

HIDES.—Business at *Havre*, in the week ending Friday, was dull: 1,555 dry La Plata went at 120f to 140f the 50 kilogs; 1,200 Monte Video salted cow, 70f; 1,670 horse salted La Plata, 90f to 91f the 100 kilogs. The arrivals exceeded 17,000. This week, New Orleans salted has been at 46f to 47f; Tampico dry, 100f; Buenos Ayres salted, 76f, and 70f for cow; Plata dry, 100f; Buenos Ayres dry, 115f; Rio Janeiro salted, 57f 50c.

WOOL.—At *Havre*, in the week ending Friday, business was active: 49 bales Buenos Ayres, unwashed and "pelade," 1f 60c to 2f 27½c the kilog; 94 bales Portugal, unwashed, 1f 30c; 24 sheepskins La Plata, unwashed, 85c to 1f 55c. The arrivals exceeded 400 bales. This week, Monte Video, unwashed, has been at 260f to 320f the 100 kilogs; La Plata, unwashed 142f 50c.

MADRID, March 10.

The Government some time back promised to present a bill for effecting Customs reforms, but the session of the Cortes is fast wearing away, and none has yet been brought under discussion. This is greatly to be complained of.

COMMERCIAL AND MISCELLANEOUS NEWS.

The latest advices from Rio state that business in coffee had been very limited, a long continuance of dry weather having materially impeded the transmission of supplies from the interior, and the receipts were very moderate, averaging only 5,000 bags per diem throughout the month. The urgent wants for cargoes of chartered vessels caused some movement in the first week of February, and 61,000 bags were sold at unaltered prices, by which stocks were reduced to 40,000 bags, the market closing very firm. From Bahia we learn that, owing to the alterations in the Custom house tariff, which came into effect on the 6th ult., importers had been busily occupied with the despatching of goods the duties on which had been augmented. Small lots of cocoa fetched 4,900 reis per arroba for Valenca, and 4,950 for Ilheos. Sugar continued in brisk demand at 2,300 to 2,400 reis for browns, and 2,700 to 2,900 for whites in cases. Supplies were arriving more plentifully, and stocks on hand amounted to about 3,400 tons, the greater part of which had passed into econd hands.

Statement of business at the United States Assay Office at New York, for the month ending February 28, 1861:—

The demand has been light, and prices are a shade lower. The sales foot up 5,000 bales, closing quiet.

NEW YORK, March 2.—The market was buoyant on Wednesday, when transactions were to a fair extent at full previous prices. The European advices subsequently received were less favourable, however, and buyers refused to operate, except at a material concession, which holders declined to grant. The sales for the three days foot up 4,000 bales, closing very quiet yesterday at the annexed quotations, which may be considered nominal. We quote:—

NEW YORK CLASSIFICATION.

	Upland.	Florida.	Mobile.	New Orleans and Texas.
	c	c	c	c

There has been a fair demand for cotton during most of the week from the trade, but the purchases of all classes of buyers have been pretty much limited to the supply of immediate wants. There is a large supply of American offering, and holders have accepted easy rates, most of the week's business having been done slightly below our last quotations; these, however, we cannot much alter. Egyptian are selling ¼d per lb lower than last week. Brazils are without alteration. East India have not changed much in value, though the buyer has perhaps a slight advantage. The sales to-day are 15,000 bales. There is a good demand, and prices are steady. The reported export amounts to 11,090 bales.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT, pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 13th day of March, 1861.

ISSUE DEPARTMENT.

	£		£
Notes issued	25,918,975	Government Debt	11,015 100
		Other Securities	3 459,900
		Gold Coin and Bullion	10,595,613
		Silver Bullion	848,362
	25,918.975		25,918,975

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	9,479,729
Rest	3,816,784	Other Securities	20,021.017
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	6 638,884	Notes	6,883,645
Other Deposits	11,691,684	Gold and Silver Coin	885,167
Seven Day and other Bills	569,206		
	37,269,558		37,269,558

Dated the 14th March, 1861. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	19,604,536	Securities	29,422,746
Public Deposits	6,638,884	Coin and Bullion	12,329,142
Private Deposits	11,691,684		
	37,935,104		41,751,888

The balance of Assets above Liabilities being 3,816,784*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£311,558
AN INCREASE of Public Deposits of	732,327
A DECREASE of Other Deposits of	157,094
AN INCREASE of Government Securities of	524,953
A DECREASE of Other Securities of	516,982
AN INCREASE of Bullion of	269,359
AN INCREASE of Rest of	13,585
AN INCREASE of Reserve of	526,999

The Bank return this week is satisfactory. Notwithstanding the withdrawals of sovereigns for America, there is a large increase in the bullion, and since making up the account further sums have been received from the Continent and Australia, amounting to 180,000*l*. The increase in the Government deposits partly arises from the payments on account of the Indian loan, and partly from revenue receipts. The reserve shows a considerable augmentation.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851:—

At corresponding dates with the present week	1851.	1858.	1859.	1860.	1861.
Circulation, including bank post bills	£ 19,780,427	£ 20,089,933	£ 21,096,253	£ 21,225,010	£ 19,604,536
Public deposits	8,227,989	6,877,037	8,854.497	9,271.338	6,638,884
Other deposits	9,287,826	13,770,139	13,641,265	13,030,840	11,691,684
Government securities	14,145,250	9,501 993	10,696,147	10,221,190	9,479,729

— Hamburg (3months)	13 7 7½	13 6	13 5½ 6	13 4½ 5	13 9½ 9¾

In 1851, further intelligence had been received respecting the outbreak of the Caffre war, and troops were being sent to the Cape with all despatch. The Governments of the Continent were steadily carrying out their reactionary policy, and it was mentioned as a significant sign of the times that the Austrian Cabinet had taken no notice of the anniversary of the constitution, although it ordered that it should be publicly celebrated in 1850. From America news had arrived of the meeting of the first Californian Legislature.

In 1858, Mr Disraeli announced that the English and French Governments had come to an understanding upon the foreign refugee question. An Indian loan of eight millions was about to be issued. Owing to the rapid increase in the Bank's resources, there was an impression that the rate of discount would be reduced from 3 to 2½ per cent., but it was not realised until some months afterwards. The Bank had just notified that in future they would not discount bills for the discount establishments.

In 1859, attention was directed to the provocations to war which continued to issue from Austria and Sardinia. It was generally believed that Lord Cowley's mission to Vienna had proved perfectly unsuccessful. The East Indian Railway Company had announced a loan of a million in 4½ per cent. debentures, the whole of which were taken up in a few hours, and immediately quoted at 2 premium. In India extreme financial distrust prevailed. At Bombay the Bank rate of discount was 13 per cent.

In 1860, a summary of the financial statement made by Mr Wilson at Calcutta on the 13th of February had just arrived, comprising the proposed new income and other taxes. The annexation to France of Savoy and Nice continued the subject of much debate in Parliament. In Tuscany and Central Italy the votes were being taken on the annexation to Piedmont, and thus far resulted in overwhelming majorities in favour of the step. The Spaniards had commenced their second Moorish campaign.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 3,616,392*l*; in 1858, a deficiency of 2,791,814*l*; in 1859, a deficiency of 3,062,347*l*; and in 1860, a deficiency of 8,785,511*l*. In 1861, the deficiency is 8,329,333*l*.

DISCOUNT AND MONEY MARKET.—The demand for money this week has been generally light, and in several quarters an expectation was entertained that the Bank would have yesterday lowered their rate from 8 to 7 per cent. In the open market the terms for the best bills are 7½ per cent., with exceptional transactions at 7¼. There is still, however, a general indisposition to do much business, and the discount establishments restrict their operations as much as possible. On the Stock Exchange the demand has varied from day to day, the rate for loans on Government securities having been in the early part of the week as low as 5½ per cent., while this morning the brokers were borrowers from the Bank at the existing minimum of 8. In the afternoon there was an increased supply, and the charge for short loans was 6 per cent., and for longer periods 6½.

Notwithstanding the unprecedentedly high value of money, which has now been experienced for a considerable time, the Bank having fixed their rate at 8 per cent. more than a month back, trade remains remarkably sound, and no important case of suspension has occurred. It is, in fact, a subject of general observation that merchants have never held in reserve so large an amount of capital as they do at present.

It is stated that the principal reason for the Bank not putting down its rate yesterday is that a further large number of cotton bills are known to be coming forward from the States, and that there is, therefore, no likelihood of the shipments of specie to America being stopped for some time.

An instalment of 20 per cent. on the new India loan of 3,000,000*l* fell due on Tuesday. The amount of stock paid in full being 900,000*l* the amount that had actually to be provided was 400,000*l*, and the operation exercised little or no influence on the money market.

Notice has been given that the whole of the bills of M. Mires on account of the Turkish Government maturing this week will be met in due course. The amount falling due this day was 280,000*l*, while the total for the week is about 400,000*l*. The Greek interest are thus relieved from a serious cause for anxiety, and it is believed that no more suspensions of any importance need now be apprehended.

The following are the rates of interest on the principal Continental exchanges, by which it will be perceived that they are still considerably below the English money market. The Bank of France reduced their rate yesterday from 7 to 6 per cent.:—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	6	4½
Amsterdam	3	3
Berlin	3	3
Hamburg	...	2½
Frankfort	...	1½
Brussels	...	4

WESTMINSTER BONDS.—A meeting of the holders of these securities was held to-day, when it was resolved to offer the strongest opposition to a bill now before Parliament called the Westminster Improvements Bill, and to collect 4s per cent., or 1*l* on each 500*l* bond, to defray the necessary expenses.

THE ENGLISH FUNDS.—Consols were rather dull in the early part of the week, the news from America being consi-

dered unfavourable; but, owing to some speculative purchases, they have since improved. The stronger position of the Bank, and the less immediate pressure for money have also caused a better tendency. Consols for the 10th of April, which left off last Friday at 92⅛ to ¼, advanced this morning to 92⅜ buyers, and closed at 92¼ to ⅜. For money the final transactions were at 91⅞ to 92. The general business during the week has been more limited than usual. Exchequer bills remain heavy, although 1s higher than last Friday. The present prices are 5s to 1s discount for the bills due in June, and 1s to 5s premium for the recent issue at the increased rate of interest maturing next March. The scrip of the new India loan has been in steady demand for small investments, and the price advanced after official hours this evening to 100⅝ to ⅞. The stock is quoted 100½ to ⅝.

FOREIGN FUNDS.—In foreign stocks, speculation has been mainly confined to Mexican and Turkish Six per Cents., in both of which a good advance has taken place. As regards the former, it is reported that the Juarez Government have determined on making as speedily as possible full restitution for the robbery recently committed on the money belonging to the bondholders in the city of Mexico. More confidence is also created by the substitution of a strong and orderly Government for the anarchy lately prevailing in the Republic. Turkish Six per Cents. of 1858 are higher, on the favourable reception by the Turkish Ambassador of a numerously signed memorial to the Ottoman Government, for the better collection for remittance to this country of the revenue specially guaranteed towards the interest and sinking fund of this stock. The loan of 1854 has also improved. Buenos Ayres bonds have been rather flat. The general transactions have been unimportant.

French Rentes closed this evening at 68f 30c, being ⅛ higher than last Friday.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and today:—

FOREIGN EXCHANGES.—On Tuesday, the rates on Holland and Hamburg advanced, but this afternoon bills were more in demand, and a general though very slight decline has taken place.

RAILWAY AND OTHER SHARES.—In the railway market the principal business this week has been the fortnightly settlement, the arrangement of which showed that the public have been rather buying than selling stock, especially as regards Midland and Great Western. This feature is rather remarkable, since it is noticed, as a general rule, that realisations follow the declaration of the half-yearly dividends. The speculative feeling has again been more favourable, the continuance of good traffic returns causing purchases by provincial dealers, who perceiving the stagnation in the manufacturing districts, had calculated on diminished receipts, and consequently operated for a fall. There are still open, however, some large accounts for a decline. Compared with last week, the prices are generally higher, but there is little business doing.

In Colonial descriptions, Atlantic and St Lawrence shares have fallen heavily on the suspension of the dividend. Grand Trunk of Canada stock and bonds are also depressed. Great Western shares are without change, and Indian guaranteed descriptions remain steady.

In the foreign market, Great Luxembourg shares are firmer. Illinois Central, and New York and Erie, have fluctuated with the varying news from America; but, finally, show an advance, especially the former.

Ottoman Bank shares have improved on the announcement of the proposed dividend to 18 to ½.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and this day:—

BULLION.—Annexed is the weekly circular of Messrs Pixley, Abell and Langley, giving an account of the movements in bullion to last evening, and of the market for Indian rupee paper:—

Gold.—The movements in gold during the past week have been varied, and rather extensive. The imports have been—The Ocean Chief, from Melbourne, with 92,000*l*; the Thames, from Melbourne, with 69,000*l*; the Ydale, from Melbourne, with 23,000*l*; the Magdalena, from Brazils, with 38,950*l*; and the Cleopatra, from Africa, with 7,000*l*. In addition to the above, several large sums have been daily received from the Continent; and, as there is but little demand for export, the Bank has, since our last circular (7th inst.) purchased nearly 500,000*l* of gold; and further amounts will be sent in. The exports have been—The Tagus, to Lisbon, with 20,000*l*; the Delta to Bombay, with 25,000*l*; the Tyne, to Brazils, with 7,678*l*; the Canada, to America, with 176,620*l*; and City of Baltimore, to America, with 81,829*l*. Further amounts of gold are likely to be sent to New York by the steamer leaving on Saturday. The telegram from Australia reports the departure of the following ships for England, viz.:—The Result, with 117,350*l*; the Alliance, with 126,052*l*; the Lightning, with 115,376*l*; the Southampton, with 86,176*l*. Added to the above may be mentioned the Kooria Mooria as loading, which vessel was known to have some gold on board.

Silver.—The price of silver, which was mentioned in our last circular at 61d per ounce standard, has experienced a further fall to 60¾d, and we do not look for much recovery from this rate, as the demand is rather slack. The Delta took 134,540*l* to Bombay; the Tyne 16,172*l* to the Brazils; and the Cleopatra has brought 3,867*l* from Africa.

Mexican Dollars.—The dollars, ex Seine, have been sold at 4s 11¼d per ounce, and we quote this at the present rate, with a rather quiet market.

Exchange on India for Banks' 60 days' sight drafts on Bombay and Calcutta is 1s 11⅞d to 2s 0⅛d, and on Madras 1s 11¾d to 2s.

India Government Loan Notes are without change. We quote them 100 to 101 for 5½ per Cents.; 94 to 95 for 5 per Cents.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, refinable, 77s 10½d per oz std. Silver—Bar silver, 5s 0¾d per oz std, last price; bar silver, containing 5 grs gold, 5s 1d per oz std; fine cake silver, 5s 5¾d per oz; Mexican dollars, 4s 11¼d per oz; Spanish dollars (Carolus), 6s 6d per oz, last price.

About 45,000*l* in refined and other gold was bought by the Bank. No sovereigns were withdrawn from here, but a large quantity are believed to have been taken from the Liverpool branch for America.

FAILURES.—The mercantile house of M. Leon Gochez, at Brussels, has stopped payment, with liabilities estimated at 100,000*l*.

A large failure has also taken place at Moscow, that of M. Barkoff, with outstanding engagements of 250,000*l* to 300,000*l*.

It appears that the liabilities of Mr James Crichton, flax

merchant, of London and Dundee, who suspended last week, are about 80,000*l*, chiefly to London houses, of which a large portion however is said to be covered. The assets are estimated to exceed that amount, and it is hoped that the creditors will not ultimately experience any loss. Up to a recent period Mr Crichton was understood to be possessed of a large capital, which has now been swallowed up, partly by bad debts, and partly by speculations in jute and hemp, of which his stock almost entirely exists.

PUBLIC COMPANIES.—The half-yearly Court of proprietors of the Bank of England was held on Thursday, the Governor, Mr Bonamy Dobree, presiding. The usual statement of the proceedings of the past six months was read, by which it appeared that the profits during that period were 720,215*l*, making the rest on the 28th of February, 3,728,710*l*, out of which a dividend was proposed for the half-year of 5 per cent. free of income tax, leaving the rest at 3,001,060*l*. The discussion opened with an inquiry as to the amount of bullion and reserve of notes, which were stated to exceed twelve millions and seven millions respectively. In answer to further questions, it was explained that the apparent decline in the rest arises from the deduction of the rebate of interest on bills not yet due, which always take place at the end of the financial year. With regard to the publication of the weekly accounts earlier than on Friday night, the Directors have had the question under their consideration, and are desirous of furnishing every information to the public that can be given with propriety. At present, however, no decision on the subject has been come to. A proprietor complained that, with the present high reserve and stock of bullion, the rate of discount should be kept at the extreme rate of 8 per cent., which pressed severely upon commerce generally and the small trader in particular; when it was urged in reply that the discussion of the rate of discount is not desirable at a general meeting. The Directors give the matter their anxious attention, and whenever they think it prudent to reduce the rate will not hesitate to do so. The question that the dividend be at the proposed rate of 5 per cent. was then put and carried unanimously. Mr Bonamy Dobree, the Governor, retires from office on the present occasion, and a special vote of thanks for his valuable services was carried by acclamation. Alderman Salomons, M.P., the mover of the resolution, in the course of his remarks, especially referred to the great and serious responsibility which had been thrown upon the Governors of the Bank by the events of the last three years, and especially eulogised the care and ability with which the affairs of this institution have been managed during that critical period.

The present Deputy-Governor, Mr Alfred Latham, succeeds Mr Dobree as Governor, and the new Deputy-Governor will be Mr Kirkman D. Hodgson.

At a meeting of the Van Diemen's Land Agricultural Company, Mr Brice Pearse in the chair, the report was adopted, and a dividend declared of 5*s* per share free of income tax out of the available balance of over 2,000*l*. Since the last report, the only new letting has been that of the Surrey and Hampshire Hills, and Middlesex Plains at a rental of 400*l*, terminable by 12 months' notice on either side. The first payment will fall due for the current quarter, and will raise the rents to be received in the present year to more than 3,000*l*. The rent of 400*l* above mentioned being manifestly inadequate, this arrangement must be considered to be only temporary, and one capable of considerable modification in future. The explorations for gold have been vigorously prosecuted, but, as far as is at present known, have only resulted in some small discoveries in the Hellyer and other rivers. The Directors having ascertained that a lease granted at a most inadequate rent had been acquiesced in under a misrepresentation of the facts, have filed a bill in Chancery to set the same aside. It appears that the late chief agent leased a property to his brother for fourteen years of nominally 300 acres, but which in reality was 810, alleging that the 510 additional acres were merely waste. The rent charged was 80*l* only, while the property is assessed by Government as worth 550*l* per annum. The amount of money involved in this transaction is thus over 6,000*l*. The Directors being satisfied that the lease was granted by private arrangement, have determined, therefore, to take legal proceedings to protect the interests of the Company.

The Smyrna and Aïdin Railway Company have received a communication from the Turkish Government through the London Embassy, announcing the completion of a supplementary concession by which authority is given to issue 250,000*l* 6 per cent. debentures, and granting a prolongation of three years in the time for finishing the works to Aïdin, the period originally fixed having expired last September.

In consequence of the financial embarrassments of the Grand Trunk of Canada Railway Company, the Directors of that undertaking have notified that the payment of the interest falling due under the guarantee to the shareholders of the Atlantic and St Lawrence must be deferred for the present.

The Committee of the House of Commons, appointed to consider the proposed Act of the United Kingdom Telegraph Company for fresh powers, have determined that the preamble was not proved, as the Act of the Company of 1851 had not been completed within the prescribed period. They stated, however, "that they would have been glad if they could have recommended the going on with the Bill, as they were anxious it should have proceeded." The Directors will forthwith apply to the House for a suspension of the standing orders to enable a second Bill to be introduced immediately.

The report of the Atlantic Telegraph Company, issued preparatory to the meeting on Monday, recommends that in order to retain the valuable privileges originally bestowed upon it, the Company should still be kept in existence. These advantages consist of agreements with American companies and the concessions granted by the Governments of both England and the United States. The Directors express a confident hope that with the improvement in science telegraphic communication will ultimately be established between Ireland and Newfoundland.

FOREIGN ADVICES.—The mercantile advices from the River Plate by the last mail describe an unsatisfactory state of political agitation in the Argentine provinces, and express a fear that the stability of the recent union is threatened by the intrigues of the contending parties. The influence of General Urquiza was said to be exercised in an unconstitutional manner, and it is alleged that to his action the late excesses at San Juan are attributable. The country has been visited with copious rain, and the cattle will therefore shortly improve in their condition. Hides maintain their prices, owing chiefly to large contracts entered into before the beginning of the season by some French houses.

It is stated that, in consequence of the injury to the grain crops from excessive rain, the Portuguese Government contemplate introducing a measure for the permanent import of wheat at a fixed duty of 8*s*. It is probable, that in the event of the present harvest turning out very unfavourably, cereals will for a limited period be admitted free.

The mercantile advices from New York describe the stock markets as heavy, owing to the despatches from Washington being considered unfavourable. Trade was being contracted within the narrowest limits, and the demand for money was consequently moderate. The Southern Confederated States propose to raise a loan of 3,000,000*l*, in 8 per cent. bonds, the interest to be provided by an excise tax of $\frac{1}{8}$ of a cent (a fourth of a farthing, a lb on cotton. The rate of exchange was very firm at 105½ to 106. The Morrill Tariff Bill had been published. The sale of the Adriatic, a steamer constructed at a cost of 240,000*l* for the Collins line, has been completed, the Galway Company being the purchasers for 87,000*l*.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 3 per mille premium, and the short exchange on London is 25.40 per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17*s* 10½*d* per ounce for standard gold, it appears that gold is about 6-10ths per cent. dearer in London than in Paris.

By advices from Hamburg the price of gold is 427 per mark, and the short exchange on London is 13.7½ per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 6-10ths per cent. dearer in London than in Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is 105½ to 106 per cent. for first-class bills. Although this shows the exchange to be against England, the high rate of interest and the loss of time before the gold is received back from the American mints render it doubtful if any profit can be made at the present rates by sending gold to the United States.

The Commercial Times.

Mails for Newfoundland, Canada, and the United States, from Galway.—The contract packet service between Galway and the United States (which has been temporarily suspended) is now about to be resumed. The next packet will be despatched from Galway to Boston, (calling at St John's, Newfoundland,) on Tuesday, the 26th instant, and, following that, a packet will be despatched to New York on Tuesday, the 9th April; and thenceforward the packets will sail from Galway on every alternate Tuesday, proceeding alternately to New York and Boston. The mails will be made up in London on the evening of Monday the 25th instant, and on the evening of every alternate Monday subsequently. Letters, &c., for Nova Scotia, New Brunswick, or Prince Edward Island, to be sent by these packets must be specially addressed via the United States.

Letters for Senegal.—The French Post Office having established a branch packet from St Vincent (Cape de Verds) to Goree (Senegal) in connection with the line of French mail packets leaving Bordeaux for Brazil on the 25th of each month, all letters, as well as newspapers and other printed papers addressed to Senegal, will henceforth be forwarded through France, unless specially directed to be otherwise sent. The postage upon letters may be paid in advance, or they may be forwarded unpaid, at the option of the sender; but the postage upon newspapers and other printed papers must be prepaid. To reach Bordeaux in due time for conveyance by these packets, letters, &c., must be despatched from London at the latest by the morning mail of the 24th of the month. Letters and newspapers for Senegal may also be sent by the West Coast of Africa mail packet leaving Liverpool on the 24th of each month, if specially directed to that effect.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

There was a steady, though by no means active, demand for both English and foreign wheat at Mark lane, to-day, at prices quite equal to those realised on Monday. Fine malting barley was firm; but inferior foreign ruled heavy. Other spring corn moved off slowly; but several rather large parcels of flour were cleared off, at extreme rates. The imports from abroad, this week, have amounted to 6,840 quarters of wheat; 7,230 barley; 15,650 oats; 80 sacks and 9,870 barrels of flour.

At Liverpool, this morning, all kinds of produce were in good request, at very full prices.

The total sales of the present week in the Liverpool cotton market show again a good business. Spinners have taken 37,000 bales, speculators 10,000, and exporters 11,000 bales, making together 58,000 bales. Quotations are very firm, but without change since Friday last. The accounts from America of diminishing receipts and expected early commencement of hostilities between the States have maintained the market during the week, and these reports having rather increased by the latest advices, the market has to-day presented a very animated aspect; the sales have amounted to 20,000 bales, and prices are now fully ⅛d dearer than last week. The hope of a cheaper money market in view has also in some measure assisted to stimulate the demand.

Messrs Neill, Brothers, of New York, thus refer to the cotton trade:—"The course of receipts at this season of the year is usually a controlling influence in crop views. The large deliveries of the past two months have exceeded general expectation, and consequently favoured the higher estimates. Many parties, however, still argue that, owing to the unusual desire to market the crop of late, the receipts must shortly show a sudden falling off. Should this be the case, estimates will again take a lower range; but at present the weekly deliveries approximate very closely to last year by latest telegraph dates, and thus afford little warrant for a reduction in current estimates. The receipts after this date last year consisted of late pickings, and including the overland cotton from Memphis and annual corrections, reached 1,235,000 bales. The receipts henceforward at the seaboard may fall short of last year, but the overland cotton from Memphis, taken chiefly by our Eastern spinners, will show a considerable excess. This years picking has been finished earlier, and the balance of the crop will therefore prove of better quality than the last. Four million bales is considered an outside figure."

The state of the cotton trade at Alexandria to the 27 ult., is thus reported by Messrs Briggs and Co.:—

The continued scarcity of money, and the unfavourable advices received from England by telegraph, produced a dull feeling in our market. On the other hand, the scarcity of all but the lower descriptions of the staple encourages holders to maintain their demands; and we, consequently, quote little or no decline upon the prices noted in our last. The market, at present, is very irregular. The following are the sales since the 17th instant:—1,938 bales ordinary to middling, 7.48d to 8.05d; 218 bales fair to good fair, 8.20d to 8.62d; 490 bales good to fine, 8.77d to 9.73d; total, 2,646 bales. Freights—By steamer, 9-16ths of a penny per lb; by sailing vessel, ⅜d to ½d and 5 per cent.

Although only moderate supplies of sugar have been on offer, this week, the demand for all kinds has ruled heavy, and the currencies have had a drooping tendency.

Comparative Statement of Shipments of Sugar from the Mauritius, from the 1st August to the 31st January of each Crop.

The transactions in the coffee market have been much restricted. However, we have no change to notice in prices.

All kinds of rice have continued heavy, at about previous quotations.

The spirit market has continued in a healthy state, on former terms. Fruit has realised quite last week's prices; but saltpetre has continued heavy. The iron market, generally, is very dull, and Scotch pig has sold at 47s 3d cash mixed numbers.

We have very little alteration to notice in the value of oils. Linseed qualities have realised 28s to 28s 3d per cwt on the spot.

Tallow has continued steady. To-day, P. Y. C. on the spot has sold at 59s 9d; April to June, 59s; July to September, 55s 6d; October to December, 55s 6d per cwt. Town tallow is 57s 9d net cash.

"In money there is no new movement," says the New York *Shipping List* of the 27th ult. "Bankers and capitalists have been devoting their attention mainly to the Government loan, the negotiation of which is the event of the day in the street. In mercantile circles, the demand for money continues extremely

moderate; on prime paper rates of interest may be quoted a trifle easier, but on all other descriptions we must repeat the stereotyped quotations for the month past. On call the brokers are freely supplied, and in many instances below the figures in our table:—

	Per cent. per annum.
Loans on call, stock securities	6 to 6½
Do. other good securities	7 0
Prime endorsed bills, 60 to 90 days	7½ 8
Do. 4 to 6 months	7½ 10
First-class single signatures	9 12
Other good bills	12 15
Names less known	18 24

The weekly statement of the city banks exhibits a further contraction in the loans and discounts, resulting rather from a lack of applications for accommodation, however, than from any positive inclination on the part of the banks themselves to curtail operations. The contraction during the past six weeks amounts to 10,000,000 dols. We annex the usual summary, compared with the showing for the previous week:—

	Feb. 16. dols		Feb. 23. dols			dols
Loans	119,880,374	...	119,236,290	...	Dec.	644,084
Specie	37,119,000	...	38,044,229	...	Inc.	925,229
Circulation	8,273,840	...	8,128,792	...	Dec.	145,048
Deposits	91,547,188	...	91,628,626	...	Inc.	81,438

Symptoms of reviving trade are visible in various directions. The dry goods auctioneers have occasional sales, which bring the commission merchants with a fair sprinkling of country buyers together, but all hands appear to be more anxious to test the state of the market than to buy. A large quantity of dry goods and general merchandise is going forward in the Charleston, Savannah, and New Orleans steamers, with a view to avoid the duties imposed by the tariff of the Montgomery Congress, which takes effect on the 4th of March. The shipments to Europe, likewise, continue active, while the imports, though much below the business of the corresponding season last year, are yet upon a scale sufficiently liberal to show an abiding faith in the certainty of a profitable market for them, sooner or later. We annex the usual Custom House returns for the week and from 1st of January to date, compared with the previous season:—

Imports.	1860. dols		1861. dols

MARKETS IN THE MANUFACTURING DISTRICTS.

The advices at hand this week from the manufacturing districts are mostly to the effect that a moderate business has been passing in goods, both for home use and export; nevertheless that prices have ruled tolerably firm. The iron trade still continues very dull, and the quotations are barely supported. Coals have given way to some extent, owing to the increased supplies on offer.

MANCHESTER, March 14.—This market has continued in a dull and unsatisfactory state, the stringency in discounting long paper preventing anything like the usual flow of business in our most important channels. Thought accounts from Calcutta received to-day report again a certain degree of steadiness there, yet those rom China have a good deal disappointed many of our buyers, who have been expecting ere this to hear of the Chinese rivers having been opened to trade. No great change can be quoted in our prices, but the difficulty of selling has increased. On the one hand, manufacturers contemplate curtailed production; on the other, buyers find no encouragement to operate from their advices, whilst they are also doubtful as to monetary facilities. The operatives at Blackburn continue at work, those at Darwen and Bolton remaining out; but no dependence can be placed on any arrangement for a day.

BRADFORD.—Trade for wool continues in a very unsatisfactory state. Prices, especially of lustre wools, can hardly be quoted firm, but are much the same as last week. From Christmas to the present time the reduction in price does not average more than 1½d per lb. In noils and short wool so few are being made, that there are no stocks, and prices well maintained. The business done in yarns is almost a blank. Present prices range from 3d to 6d per lb reduction during the last two months. The general dulness in pieces has not abated. There has been rather more doing by our home trade merchants in their warehouses during the past week, but the parcels sold are very small compared with what in better times is usual at this period.

LEEDS.—The attendance in the cloth halls has been rather meagre, and business transactions were limited almost to purchases of light fabrics, and generally in small parcels. The quietness which has for some time been noticeable, amounting almost to dulness, still prevails, but happily, though it increases in extension of time, it does not augment much in intensity as to its effects. All things considered, the woollen trade of the West Riding is in a sound condition.

ROCHDALE.—Wools are a little easier to buy, but even with some concession spinners and manufacturers are not free buyers, and purchase little more than to meet immediate wants. Though the demand for flannel and other kindred goods is flat, manufacturers refuse to take orders to any extent at prices below last month's rates. Many of them are working to stock, which is not unusual at this period of the year. Unions and Saxonies are mostly in request just now, but even for them the sale is slow, and Yorkshire goods are much less in demand than they were a short time ago.

LEICESTER.—There is no important change to notice in the hosiery trade, business remaining as quiet as for some time past, without any immediate prospect of amendment. Manufacturers are consequently confining their production to the demand, and keeping stocks low. At Loughborough and Hinckley the hosiery trade is dull. There is not much doing in yarns, at about recent prices. Wools are not in demand.

NOTTINGHAM.—Most branches of the lace trade are unprecedently quiet for the time of year, and, indeed, there has hardly been so much doing this week as last. There is very little doing in plain nets for either the home market or for abroad. There are a few orders for cotton fancies completing, but the trade generally is in a decidedly dull condition. Some kinds of silk goods continue in request. In hosiery for the home market there is a fair amount of business doing, and business generally is becoming more healthy as respects the home demand.

BELFAST.—Exports of white goods fall into narrow compass, not only as relates to the Transatlantic markets, but also to those of Continental States. There has been a little more done with the West India Isles, and considerable parcels have been sent per order to Cuba; still the total takings of all customers fall short of last season or the previous one. Bleachfield operations are pretty actively pushed forward, the extent of ground covered with goods

in process of finish being very large, and in so far causing more extensive additions to stocks of white goods. Home demand has been slightly improved; very fine linens are largely held; prices firm for all regular goods.

WOLVERHAMPTON.—The market is still heavy, and to force sales, lower rates must be submitted to. Current prices of pig iron:—Staffordshire cold blast, 4*l* 5*s*; Old Windmill End Mine, Nos. 1, 2, and 3 melters, made with Lord Ward's thick coal warm air, 4*l*; Old Windmill End Mine forge pig iron, made with Lord Ward's thick coal, 3*l* 12s 6d; best native hydrate pigs, 3*l* 10s to 4*l*; first-class All Mine grey forge pigs, 3*l* 5s to 3*l* 10s; good mine pigs, with a modicum of flue cinder, 2*l* 10s to 2*l* 15s; mine pigs, deteriorated by cinder, 2*l* 7s 6d to 2*l* 12s 6d; Cleator Moor hæmatites, 3*l* 7s 6d to 3*l* 10s; Barrow hæmatites, 3*l* 7s 6d to 3*l* 10s; Workington hæmatites, 3*l* 7s 6d to 3*l* 8s 9d; Kirkless Hall hæmatites, 3*l* 6s to 3*l* 8s 6d; grey forge cinder pig iron, 2*l* 5s to 2*l* 10s; white forge cinder pigs, 2*l* 2s to 2*l* 7s 6d; ordinary melters, Nos. 1, 2, and 3, 2*l* 12s 6d to 2*l* 17s 6d; superior makes of mine melting iron, 3*l* 2s 6d to 3*l* 15s, according to make and quality. The above prices are all delivered on to the wharfs at the South Staffordshire manufactories. Favourite Shropshire and Forest of Dean brands, 4*l* 5s delivered; Northern hæmatites from 3*l* 5s to 3*l* 10s, according to brand or quality.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Feb. 27.—The European advices received since our previous writing have exercised little or no influence on the market, which has remained steady under a moderate inquiry from the local and Eastern trade at prices substantially the same as previously quoted. The firmness in the rates of freight continues to hold in check the demand for export, and the bulk of the sales during the three days have been to meet the wants for consumption. The market was dull yesterday, and the tendency in favour of buyers at the close. The sales for the three days comprise 30,000 bbls, including 8,500 bbls yesterday, closing steady with a moderate demand for export and consumption. Canada flour has met with moderate inquiry, and prices are a shade lower; the sales foot up 1,500 bbls, including 500 bbls yesterday. The demand for Southern flour has been light, and prices have declined 10c to 25c per bbl, with sales to the extent of 3,500 bbls, including 1,000 bbls yesterday, at 5.65 dols to 6.50 dols for Georgetown, 6.25 dols to 7.25 dols for Richmond, and 5.40 dols to 6.50 dols for Baltimore.

EXPORT from 1st to 26th February.

	1861 barrels	1860 barrels
Wheat Flour	177,730	37,402

The market for wheat remains without essential variation. The demand for shipment has been moderate owing to the high rates of freight, while for local milling, only a moderate quantity has been taken. The transactions comprise 140,000 bushels, including, yesterday, 160,000 white California at 1.38 dol to 1.40 dol, and 5,000 at 1.50 dol to 1.52½ dol; 39,000 Milwaukee Club, 1.23 dol to 1.26 dol in store and delivered; 2,000 white Canada, 1.35 dol; 5,300 Canada Club, 1.24 dol, delivered; 6,700 Chicago spring, 1.20 dol, delivered; and 4,500 white Western, 1.40 dol to 1.50 dol, closing steady under a moderate demand for local milling and export. Corn has been in moderate demand, and prices may be written a shade lower; the sales since our last comprise 155,000 bushels, of which 72,000 bushels changed owners yesterday at 62c to 72c for yellow Southern, 62c to 70c for mixed ditto, 64c to 72c for round yellow, 67½c to 69c for mixed Western, and 63c to 66c for unsound.

EXPORT from 1st to 26th February.

	1861 bushels	1860 bushels
Wheat	1,017,635	59,299
Corn	535,630	21,435

NEW YORK, March 2.—The demand for State and Western flour has been light during the three days, and holders have been compelled to accept of lower rates, in order to effect sales to any extent. Canada flour has also been in moderate request, and the lower grades may be quoted 10c per bbl lower. Southern flour is dull and heavy, with moderate transactions at prices showing a depreciation for the three days of 10c to 25c per bbl.

EXPORT from 1st to 28th February.

	1861 barrels	1860 barrels
Wheat Flour	194,906	37,402

The continued firmness in the rates of freight, combined with the more or less unfavourable character of the foreign news recently at hand, have tended to still further depress the market for wheat. The closing rates of yesterday show a slight reduction from our previous quotations. Corn has been in moderate request, and the market heavy at lower rates.

EXPORT from 1st to 28th February.

	1861 bushels	1860 bushels
Wheat	1,060,945	59,299
Corn	603,751	21,435

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Only limited supplies of English wheat, but in somewhat improved condition, have been on offer in the various markets held this week. All kinds have been in steady request, and prices of good and fine samples have advanced from 1s to 2s per quarter. Foreign wheats have commanded more attention, and the best qualities have realised 1s more money. There has been much less doing in barley, as the dealers are now well in stock, and the quotations have had a drooping tendency. Malt, however, still sells more freely on former terms. Good and useful oats have been in request, at late quotations; but low and damp parcels have gone rather cheaper. Both beans and peas have changed hands slowly, on easier terms. The flour trade has ruled steady, at full prices.

Most of the continental markets have been steady for all good and fine wheats, at full quotations. Other kinds have commanded very little attention. The transactions in barley, oats, beans, and peas still continue on a limited scale. The latest advices from New York state that the supplies of breadstuffs on offer were large, and that the demand for them was heavy, on lower terms.

The Scotch markets have continued firm for wheat as well as all other produce, and prices of the former have somewhat advanced, although the supplies have increased.

In Ireland, the transactions in wheat have been on a fair scale, at full quotations to rather more money. Other articles, however, have sold on easier terms.

The supply of wheat at Mark lane, to-day, was very small, but, generally speaking, of improved quality. Although there was less disposition on the part of millers to make purchases, holders were firm in their demands, and Monday's advance in the quotations was fully maintained. For foreign wheat, the trade was in an inactive state, yet all descriptions brought quite previous currencies. Fine barley sold at full prices; otherwise, the demand ruled heavy in the extreme. Malt changed hands to a limited extent, on former terms. Oats were less active, and, in some instances, the quotations were in favour of buyers to the extent of 6d per quarter. Beans and peas moved off slowly, at late rates. The flour trade was firm, and prices were well supported.

Mr. Ed. Rainford thus reports the state of the floating trade:—Since the 7th inst. up to last night 12 arrivals off coast for orders are reported, consisting of 9 wheat and 3 maize, viz.:—Wheat, 2 cargoes from Odessa, 2 San Francisco, 2 New York, 1 Constantinople, 1 Marianople, and 1 Berdianski; maize, 2 New York, and 1 Sulina. Of the above, 2 or 3 cargoes were previously disposed of. The demand for cargoes afloat continues limited, and I have only to record the following sales since this day week to the close of to-day's market:—Wheat, per 492 lbs, Marianople at 56s, Mantua 59s; per 480 lbs, Ibraila, not perfect, at 41s; per imperial quarter, Egyptian at 41s 6d, Saide and Behara, part imperfect, 39s; on passage, per 492 lbs, Mantua at 59s. Maize, arrived, per 480 lbs, Ibraila (slight dry warmth) 39s, perfect 40s; mixed American equal to about 39s 3d; on passage, per 480 lbs, American direct to Londonderry at 38s (B. L. quality), Salonica at 39s; to be shipped in March, Ibraila at equal to 39s per 480 lbs. Barley, arrived, per 400 lbs, Roumelian at 27s, Egyptian 27s 6d. Beans, arrived, per 480 lbs, Egyptian at 37s; another cargo, not perfect, at 37s.

The London averages announced this week are:—

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

For Report of This Day's Markets, see "Postscript."

MINCING LANE, FRIDAY MORNING.

Sugar.—The market continues to be unsettled by the large quantity of Mauritius offering, and last Friday's prices have not been quite maintained in some cases, while the refiners bought less freely than at the commencement of last week. West India has been quiet, transactions to yesterday (Thursday) evening amounting to 1,300 hhds, including the few parcels sold by auction. 212 casks Barbadoes realised 37s 6d to 42s, and a few lots of Jamaica 36s to 37s per cwt for brown and low grey. The week's delivery was 4,365 tons, and 5,460 tons were landed, leaving the stock 51,450 tons, against 51,700 tons in 1860 at the same date.

Mauritius.—On Tuesday, the sales comprised 13,700 bags, which nearly all sold at the previous value to 6d decline: brown, 30s 6d to 35s 6d; low grey to middling yellow, 36s to 38s; crystallised, 41s to 42s 6d; grainy brown to fine pale yellow, 36s to 41s 6d per cwt. The transactions by private treaty have been smaller than usual.

Bengal.—2,120 bags were about one-third sold: grainy, 41s to 43s; syrups, 39s to 41s 6d; low ditto bought in at 37s 6d per cwt.

Madras.—250 bags native sold at 29s 6d to 33s 6d per cwt for brown to good yellow.

Manilla.—Unclayed has sold privately at 30s, and clayed at 34s 6d per cwt.

Other Foreign.—199 casks 44 barrels Porto Rico of the new crop sold on moderate terms, excepting for the better sorts of grocery, at 40s to 44s 6d, these obtaining full rates: brown to middling greyish yellow ranged from 35s to 39s 6d. 109 casks Cuba went at 33s to 37s 6d. 3,570 boxes Havana were only partially disposed of at 35s to 41s for brown to fine yellow, and at 33s 6d to 35s 6d for 12s 8d duty. A few lots at 16s duty went at 42s 6d to 45s.

Refined.—The trade have not extended their purchases, and the market remains quiet at the decline established last week. To-day there is rather more doing.

Molasses.—No sales are reported. By auction 365 casks 51 barrels Cuba were taken in at 15s per cwt.

Rum.—The inquiry has fallen off, and former prices cannot be obtained for large quantities of West India. 150 puns good Penang have sold at 1s 8½d. The aggregate stock is 22,600 puns 4,750 hhds, against 26,220 puns 5,950 hhds last year.

Coffee.—There has not been any improvement in the market, which remains quiet, and native Ceylon is about 6d cheaper. 112 casks 2,013 bags sold by auction went at 62s to 64s 6d for ordinary to good bold picked. 353 casks 105 barrels and bags plantation sold: fine ordinary to middling, 65s to 72s, being the former value. 22 casks 32 barrels Jamaica: middling to fine, 72s to 96s; good ordinary, 64s to 64s 6d. 590 quarter bales Mocha, of indirect import, were bought in at 110s; and 138 bales Alexandria at 95s to 100s. A floating cargo of Rio, good, has been sold, of which the particulars do not transpire.

Cocoa.—The inquiry is still inactive, and 111 bags Grenada by auction sold at 55s to 60s per cwt for grey to middling red. Nothing of interest has transpired by private contract.

Tea.—On Wednesday, the sales comprised 11,493 packages. Of these, 3,986 (including 2,314 boxes) found buyers, 3,741 being offered "without reserve." Some low Canton gunpowders, "with all faults," realised firm prices, but some Tayshan congou, also "with all faults," sold at reasonable rates. About 8,500 packages are advertised for this day, nearly 5,000 of which are to be sold "without reserve." The trade have not extended their purchases by private contract.

Rice.—By auction, 4,521 bags Java about two-thirds sold at 11s 10½d to 14s for middling yellowish broken to good white. 3,960 bags Bengal chiefly sold at 12s to 14s for middling to good white; and 10s 1½d for Ballam. Privately, 11,000 bags have sold, chiefly Arracan: new 10s 4½d to 10s 7½d; old, 10s 3d; Ballam, 10s 3d. Afloat, a cargo of Necrancie Arracan has sold at 10s; and a large business has been done in Ballam, to arrive, at 9s 9d *ex ship*, or 10s per cwt landed.

Imports and Deliveries of Rice to March 9, with Stocks on hand.

	1861.	1860.	1859.	1857.
	tons	tons	tons	tons
Imports	9950	5730	5100	22100
Deliveries for home use	13000	9600	3950	6200
Exported	*	5500	4230	3115
Stock	30120	63500	82100	76000

* The deliveries of duty-free goods for export are not given now, and the total will be shown under the head of home consumption.

Saltpetre.—Several small orders have been executed in Bengal, holders accepting further reduced rates at the close of last week, and the market is still inactive: refraction 8 to 5 has sold at 34s 6d to 36s 9d. 105 bags Bombay, by auction, brought 31s 9d per cwt, refraction 54½ to 37 per cent.

Imports and Deliveries of Saltpetre to March 9, with Stocks on hand.

	1861.	1860.	1859.	1858.
	tons	tons	tons	tons
Imported	3450	3320	3550	1500
Delivered	2200	2700	3600	2950
Stock	5100	4450	2920	4960

Deliveries last week 254 tons.

Cochineal.—530 bags sold at previous rates: Honduras silvers 2s 9d to 3s 2d; black, 3s 3d to 3s 9d: Mexican silvers, 2s 8d to 2s 9d: black, 2s 11d to 3s 3d: Teneriffe, 2s 8d to 2s 10d; black, 2s 11d to 3s 7d per lb.

Other Dye-stuffs.—Bengal safflower is again firmer, 76 bales selling at 3*l* 10s to 5*l* 2s 6d per cwt for ordinary to middling. Gambier and Cutch have been quiet at last week's quotations.

Drugs.—The changes in prices were few and unimportant at the public sales yesterday. Turkey opium partly sold at 17s 6d; and about 1,100 cases castor oil realised firmer prices; straw to good seconds, 4¾d to 5¾d per lb. Holders of camphor are asking higher rates. A parcel was withdrawn at 15*l* per cwt.

Shellac is firm, with few parcels offering for sale. A limited quantity of DC orange has been sold at 10*l* per cwt.

Metals.—The market remains in a quiet state, and prices generally are unsettled. Foreign tin has been unsaleable at the recent decline. Spelter sold during the week at 18*l* 5s per ton for spring shipment to the extent of 50 tons, but no transactions are reported on the spot. Other metals remain dull. Scotch pig iron, 47s 1½d to 47s 3d per cwt. English copper offers under the smelters' prices.

Hemp.—Manilla remains dull, the few orders in the market being at lower prices than current last week.

Jute.—The sales have gone off without spirit, as the advices from Dundee continue unfavourable. On Wednesday, 4,700 bales nearly two-thirds sold, at and afterwards, at 14*l* to 20*l* 5s per ton. Few contracts have been made privately.

Hides.—There were unusually large public sales of East India held yesterday, which, however, met with a good demand, especially the export sorts, full prices being generally obtained.

Linseed.—Several floating cargoes of Black Sea and Azoff have sold at 50s to 51s. East India continues in liberal supply: Calcutta, 50s to 51s 6d; Bombay, 54s per quarter.

Turpentine.—Spirits sell slowly: American drawn at 31s 6d per cwt.

Oils.—The market for olive is quiet, with retail transactions on the spot. 50 tuns of sperm oil have sold during the week at 104*l* per tun. The supply of linseed continues good, and there is a moderate business doing at 28s to 28s 3d. The market for rape has become firmer, owing to the rapidly decreasing stocks: foreign refined, 39s 6d to 40s; brown, 36s 6d to 37s. There is more inquiry for the better grades of palm; fine, 45s to 45s 6d. A large business has been done in cocoa-nut, chiefly for exportation: Cochin, 51s to 51s 6d; Ceylon, 50s to 50s 6d.

Tallow.—The business passing for actual consumption is of the same limited character as for some time past, but the market was firmer this morning. 1st sort Petersburg Y. C. on the spot and for the month, 59s 6d to 60s; April to June, 58s 6d to 59s; for delivery in the last three months, 55s 6d to 56s per cwt.

Particulars of Tallow.—Monday, March 11.

POSTSCRIPT. FRIDAY EVENING.

Sugar.—The market closes with a quiet appearance. Transactions in West India for the week, 2,088 casks. To-day, crystallised Demerara by auction went at 38s to 44s 6d. Of 14,150 bags Mauritius, a fair proportion sold at previous quotations. 550 bags Bengal Cossipore, 42s to 42s 6d. 3,864 bags Manilla, washed and repacked, 32s 6d to 33s 6d. 225 casks 564 barrels soft Demerara of indirect import were part sold at 32s 6d to 36s. 460 casks melado partly found buyers at 28s to 33s 6d per cwt.

Coffee.—156 casks 285 barrels and bags plantation Ceylon and 550 bags native sold at about the former value.

Cocoa.—227 bags Trinidad were taken in at 64s to 68s per cwt.

Rice.—687 bags good white Bengal partly sold at 12s to 12s 6d per cwt. 6,000 bags soft grain sorts were reported by private contract.

Saltpetre.—A parcel of Bengal, refraction 8 per cent., sold at 33s 9d per cwt with short prompt, being again lower.

Tea.—Of 9,066 packages by auction to-day, 5,700 sold, scented teas being lower.

Oil.—Of 500 casks palm by auction, a small portion only sold at 45s. 530 casks cocoa-nut were mostly bought in: Cochin, 51s; Ceylon, 49s to 49s 6d.

Tallow.—Town was reduced to 58s 9d. Foreign unchanged. 506 casks Australian by auction partly sold at 57s to 57s 3d. 40 pipes 80 boxes South American partly sold at 55s 3d to 57s 6d per cwt.

ADDITIONAL NOTICES.

Refined Sugar.—The home market for refined sugar continues quiet. Treacle in moderate demand. For export, some sales of crushed are reported to have been made at 33s in barrels. In Dutch crushed, sales have been made in S. & T. superfine, 32s 3d; in A. S. R., at 31s 8d; and in V. O., at 31s 9d, all in barrels f.o.b. in Holland.

Green Fruit.—Arrivals of a limited character, and prices of oranges improved: some parcels of St Michael, Valencia, and Palermo, sold by Keeling and Hunt at public sale, went at an advance of 1s to 2s per package. Lemons—Seville and Sicily sours further depressed in value. Nuts of all kinds to be had at easier rates.

Dry Fruit.—The fruit market has shown more activity within the last few days than it has done for some months past. Nearly all the lower qualities of currants have been bought up at an advance of about 2s, and these, doubtless, constitute the large clearances now going on. In the meantime attention is being paid to fine sorts, especially Gulf, which are proportionately the lowest priced fruit now on hand, and considerable sales have been made. Cheame raisins show an advance, and a good trade has been done. Valencias neglected. Sultanas lower.

English Wools gradually decrease in value, and are now quoted from 1d to 1½d lower than a few weeks since.

COLONIAL WOOL.—The sales progress without change.

FLAX unaltered.

HEMP.—Market very dull and but little doing.

COTTON.—Sales of cotton from Friday, 8th March, to Thursday, 14th, inclusive: 1,100 bales Surat, 5d to 5 9-16d for middling fair to good sawginned; 5¼d for fair Broach; 5d to 5¼d for middling fair to fair Dhollera; 4⅞d for fair Mangarole: 700 bales Tinnevelly, 5d to 5⅜d for middling to good; 300 bales Western Madras, 4 5-16d to 4½d for middling to fully fair. In the early part of this week the demand was limited, but within the last few days an improved tone has prevailed, and a fair amount of business has been transacted. Surats readily command the extreme prices of last week. Tinnivelly is decidedly dearer, and in some cases ⅛d per lb advance has been paid on last week's sales, whilst prices in Western Madras are barely maintained. Altogether the market closes with great firmness. Market firm, and prices rather higher to-day. Sales—650 Surats, 4d to 5¼d; 105 Western, 4⅝d.

SILK.—Little or no alteration since last week. Again business doing in China. Other descriptions dull. Prices unchanged.

TOBACCO.—The market continues quiet and unchanged in character. The limited sales have been chiefly confined to small selections for immediate consumption.

LEATHER AND HIDES.—Since our last report no change has taken place in the leather trade. A steady general demand continues, and prices are stationary.

METALS.—The position of business has varied but slightly since our last report, although, on the whole, matters appear rather more hopeful. Copper is very flat indeed in manufacturers' and holders' hands, but prices are maintained. Iron is extremely depressed. Tin quiet for all kinds. Lead in small demand only. Spelter drooping again. Tin plates rather firmer.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	58	9
Fat by ditto	3	0½
Yellow Russian	61	6
Melted stuff	39	0
Rough ditto	23	6
Greaves	18	0
Good dregs	7	0

PROVISIONS.

The bacon market is very brisk this week at still higher rate. Any thing of a second quality finds a ready sale at high prices, whilst for fine sizeable Waterford 66s f.o.b. is freely given for next week's shipment, shippers holding out for 2s more to-day; a small arrival of Hamburg making 63s to 64s. Good trade doing in lard, prices ranging from 74s to 76s f.o.b., with a prospect of further advance. By to-day's ship we have an arrival of 1,000 quarter-casks Friesland butter, being an increase of 400 over last week, causing a fall of from 12s to 16s; quality very fine. In other foreign butters we are but moderately supplied, Jersey fetching 120s to 124s, and Bosch, which moves off slowly, 94s to 102s. Irish butter trade at a standstill; stock heavy for time of year. Carlow and other markets closed for the season. Canadian butter, which fills a gap made by the paucity of third-rate butter from Holland, ranges from 80s to 114s.

METROPOLITAN CATTLE MARKET.

MONDAY, March 11.—The total imports of foreign stock into London, last week, amounted to 1,964 head. In the corresponding period in 1860, we received 3,570; in 1859, 1,704; in 1858, 294; in 1857, 1,988; in 1856, 181; and in 1855, 555 head.

There was a fair average supply of foreign stock in our market, to-day; and its general quality was good. Sales progressed heavily, and the quotations had a drooping tendency. The arrivals of home-fed beasts fresh up to our market, this morning, were seasonably good as to nnmbers, and, for the most part, in prime condition, especially the Scots from Norfolk, &c. Generally speaking, the demand for nearly all breeds was less active than on this day se'nnight, and, in some instances, prices declined 2d per 8 lbs. However, the primest Scots sold with difficulty at 4s 10d per 8 lbs. From Norfolk, Suffolk, Essex, and Cambridgeshire, we received 2,200 Scots and Shorthorns; from other parts of England, 800 various breeds; and from Scotland, 260 Scots and crosses. Notwithstanding that the show of sheep was very moderate, the mutton trade was in a sluggish state, at a decline in the quotations of 2d per 8 lbs. A few very superior Downs realised 6s; but the general top figure for them, in the wool, was 5s 10d—out of the wool, 4s 10d per 8 lbs. There were about 5,600 shorn sheep in the market. The quality of the sheep was very middling. The supply of lambs was on the increase. The lamb trade was slow, at from 6s 8d to 7s 8d for low and prime qualities, and 8s for choice Downs. Calves—the supply of which was limited—were in request, at an improvement in value of 2d per 8 lbs. We have to report a very dull sale for pigs, at last week's currency.

SUPPLIES

	March 12, 1860.	March 11, 1861.
Beasts	3980	4130
Sheep	19110	18340
Calves	103	74
Pigs	390	380

THURSDAY, March 14.—Our market to-day was but moderately supplied with beasts; nevertheless, all breeds moved off slowly, at barely Monday's quotations. The general top figure for beef was 4s 8d per 8 lbs. The show of sheep was very moderate, yet the mutton trade was inactive, at Monday's prices. Lambs were in good request, at from 7s to 8s per 8 lbs: about 30 came to hand from the Isle of Wight. Calves were brisk, and 2d per 8 lbs dearer—the top price being 6s per 8 lbs. Pigs supported previous rates, but milch cows were very dull.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	2	3	8	Prime Southdown sheep	5	8	5	10
Second quality ditto	3	10	4	0	Large coarse calves	5	0	5	6
Prime large oxen	4	2	4	6	Prime small ditto	5	8	6	0
Prime Scots, &c.	4	6	4	8	Large hogs	4	0	4	6
Coarse and inferior sheep	3	6	3	10	Small porkers	4	8	4	10
Second quality ditto	4	0	4	4	Suckling calves.....each	18	0	22	0
Prime coarse-woolled do.	4	8	5	6	Quarter old store pigs	22	0	30	0

Total supply—Beasts, 950; sheep and lambs, 3,100; calves, 72; pigs, 330.
Foreign supply—Beasts, 180; sheep, 800; calves, 42.

HOP MARKET.

BOROUGH, Monday, March 11.—The general character of our trade is still heavy and inactive, but the great decline in the value of the new growth has attracted the attention of consumers, and induced a few sales. Mid and East Kents, 80s, 140s, 200s; Weald of Kents, 60s, 120s, 168s; Sussex, 60s, 80s, 126s; Yearlings, 80s, 120s, 170s.

FRIDAY, March 15.—The market continues inactive, and where sales are pressed, lower prices are submitted to. A little speculation going on in 1855 and 1856 hops. Foreign hops find buyers as they arrive.

POTATO MARKET.

BOROUGH AND SPITALFIELDS, Friday, March 15.—The supplies of potatoes on sale here continue large, but comparatively few parcels have come to hand in good condition. All these sell readily, at quite previous rates; otherwise, the trade rules heavy in the extreme, at prices the turn in favor of buyers.

HAY MARKETS.—THURSDAY,

SMITHFIELD.—Meadow hay, 2*l* 0s to 5*l* 5s; clover, 3*l* 0s to 5*l* 15s; and straw, 1*l* 10s to 1*l* 18s per load. Trade dull.

CUMBERLAND.—Meadow hay, 2*l* 0s to 5*l* 8s; clover, 3*l* 0s to 5*l* 12s; and straw, 1*l* 10s to 1*l* 18s per load. A slow demand.

WHITECHAPEL.—Meadow hay, 2*l* 0s to 5*l* 5s; clover, 3*l* 0s to 6*l* 0s; and straw, 1*l* 10s to 1*l* 18s per load. Trade heavy.

COAL MARKET.

FRIDAY, March 15.—Wall's-end Braddyll's Hetton 18s 3d—Russell Hettons 18s 3d—Eden 17s—South Durham 16s 6d—Harton 16s 6d—Acorn Close 17s—Byron 17s 6d—Sheriff Hill 14s 6d—Tanfield Moor 13s—West Hartley 15s 6d—Buddle's Hartley 15s 6d—Bebside Hartley 15s 6d—Davidson's Hartley 15s 6d—Howard's Hartley 15s 6d. 127 ships at market.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, March 15.—Our market continues in the same inanimate state which we have had to report now for some time past; nevertheless, prices are pretty well kept up, owing to the lightness of stocks.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, March 15.—Moderate attendance at to-day's market. Wheat quiet, but firm, at full prices of Tuesday. Flour rather better sale, at extreme rates. Indian corn moderate sale, at 37s 6d for mixed, and 39s 6d to 44s Galatz. Egyptian beans steady, at 40s. Oats and oatmeal without change.

METALS.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, March 15.—There has been a slightly improved demand for some descriptions of manufactured iron during the past week, at about previous rates. In Scotch pig iron there have been but few transactions, prices remaining almost unaltered. Great dulness still characterises the market for both copper and lead, and the business in metals generally has been limited.

The Gazette.

TUESDAY, March 12.

BANKRUPTS.

S. C. Harrison, Ipswich, innkeeper.
J. Bridger, Florence terrace, New Cross road, Deptford, grocer.
H. Clench, High street, Newington butts, milliner.
J. Payne, Milton street, Dorset square, horse dealer.
E. Ingram, Bilston, grocer.
W. Ballinger, Swansea, maltster.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic returns of railways in the United Kingdom for the week ending the 2nd of March amounted to 479,625*l*, and for the corresponding week of last year to 455,703*l*, showing an increase of 23,922*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 204,064*l*, and for the corresponding week of 1860 to 197,426*l*, showing an increase of 6,638*l*.

EDINBURGH, PERTH, AND DUNDEE.—The report of the directors states that the gross revenue for the half-year ending the 31st of January, amounted to 95,134*l*, and the expenditure to 48,773*l*, leaving a balance of 46,361*l* against 48,695*l* in the corresponding period of the preceding year, showing a decrease of 2,334*l*.

EDINBURGH AND GLASGOW.—The directors state in their report that the increase in the receipts for the half-year ending January 31 last amounted to 7,924*l*, of which 1,919*l* was for passengers, 5,414*l* for goods, and 591*l* for parcels. The working expenses, including the increased allowance for maintenance of way, amounted to 64,497*l*, or 38 per cent. as against 59,055*l* last year.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, March 11.—In the railway market there was a general absence of business, and the closing prices were flat, in sympathy with the decline in Consols. The transactions in the colonial market were limited, and no change of importance occurred. In American securities the shares of the Illinois Central improved to 26½ to 26 dis., and the bonds and shares of the New York and Erie were also higher on the rise in New York reported by the present mail. There was scarcely any business in mines, but prices were generally firm. In joint stock banks, Australasian and London and County were quoted lower. Miscellaneous descriptions closed about the same as on Saturday.

TUESDAY, March 12.—The railway market advanced in the morning on a demand for several stocks for the settlement, and late in the afternoon experienced a further rise, owing to the later news from America. The principal operations, however, were re-purchases to close outstanding accounts for the fall. London and North-Western and South-Eastern were the stocks chiefly supplied, while Great Western was rather scarce. The closing prices were slightly below the best point of the day, but showed a rise compared with yesterday of ¼ to 1 per cent., Midland, Lancashire and Yorkshire, and Great Western being the highest. Colonial descriptions were generally steady. Grand Trunk and Great Western of Canada closed at 21½ to 22, and 11¼ to ⅜. East Indian stock was in better demand, at 98¾ to 99¼. In the foreign market, Great Luxembourg continued firm, while Lombardo-Venetian were dull, at 1¼ to 1½ dis. American securities were buoyant, especially after official hours. Illinois Central shares were finally quoted 25 to 24 dis., and New York and Erie 29 to 31. Mines were inactive, at an occasional decline. In joint stock banks, Oriental shares improved. In miscellaneous descriptions a reduction occurred in Van Diemen's Land.

WEDNESDAY, March 13.—The railway market opened buoyantly this morning, and experienced a further improvement, from which a reaction took place on the publication of the later American news by the Kangaroo. The market then remained depressed until near the close, when there was a slight tendency to recovery. The final prices, however, being for the new account, were generally less firm than yesterday. North-Eastern stocks and South-Eastern have exceptionally advanced. No movement of importance occurred in colonial stocks. Great Western of Canada shares remained at 11¼ to ⅜; and Grand Trunk, 21½ to 22. In foreign descriptions, Pernambuco receded, and South Austrian and Lombardo-Venetian were flat at 1⅛ to 1¼ dis. Illinois Central and New York and Erie shares opened at the improved prices of last evening, but afterwards relapsed to 26½ to 25¾ dis, and 28 to 29. The operations in mines were unimportant, and in several cases a decline took place. Joint stock banks and miscellaneous descriptions closed the same as yesterday.

THURSDAY, March 14.—The railway market improved in the morning, but partially relapsed towards the close. In some cases, however, a fractional advance took place, especially in Lancashire and Yorkshire, Great Western, York and North Midland, and Sheffield. Midland was quoted an eighth lower. Apart from the settlement, which was concluded to-day, the general business was unimportant. In the colonial market there was a heavy fall in Atlantic and St Lawrence shares. Foreign descriptions were quiet at about former prices. The transactions in mines were moderate, but in some instances a decline took place.

FRIDAY, March 15.—The railway share market improved to-day, and a rise of ¼ to ⅜ per cent. took place in most of the principal stocks. Midland and Lancashire and Yorkshire were in especial demand, and prices advanced ½ per cent. Lombardo-Venetian railway shares were rather firmer, at 1¼ to 1⅛ dis. Indian and Canadian lines very quiet. Mining shares were steady, at about previous currencies.

AIR-CIRCULATING AND ANTI-GREASE HATS, Patented and Manufactured by MAYHEW and CO., 89 New Bond street.

These hats are waterproof, grease-proof, and ventilating; they are peculiarly soft and easy in wear, and insure a comfortable and complete fit to any formation of head, and are also light and durable.

First quality, 21s; second ditto, 17s, Cash.

DR ROBERT ROWE ON INDIGESTION.

This day is published, price 2s 6d, the fifteenth edition,

NERVOUS DISEASES,

Liver and Stomach Complaints, Low Spirits, General Debility, and Diseases of Warm Climates; the Result of Thirty Years' Practice.

By G. ROBERT ROWE, M.D.

"Dr Rowe claims with justice a priority of authorship, while he yields to none in his treatment. The value of this work is enhanced by its practical nature."—LANCET.

"We have no hesitation in placing this work among the first ranks. We entertain a high opinion of its value."—MEDICAL TIMES.

"This is a clever and useful work; contains much that is worthy of attention, and should be read by all martyrs to indigestion and other ills"—TIMES.

Also by the same Author, 2nd edition, price 4s 6d, On some of the Important Diseases of Women and Children.

London: J. Churchill, and to be had of all booksellers.

Just published, 71st thousand, price 1s, post free for 13 stamps. Sold by Mann, 39 Cornhill, or direct from the Author.

DR LA'MERT ON THE CURE of Nervous and Physical Debility, resulting from pernicious habits or excess. With cases and engravings from life.

CONTENTS:—The Physiology of the Generative Organs—Puberty—Manhood—True and False Morality—Marriage, in its Moral and Physical Relations—Youthful Abuse—The Secret Cause of Nervous Debility, Impotence and Sterility—Spermatorrhœa, or Chronic Impotence: its History, Causes, and Moral Consequences.

Dr LA'MERT, M.D., L.S.A., &c., is the only legally qualified practitioner on the Medical Register who, for 20 years, has devoted his studies to the treatment of these disorders.

37 Bedford square, London.

VALUABLE INFORMATION.—GRATUITOUS EDITIONS of the following LECTURES, delivered at the Royal Institute of Anatomy, Science, and Medicine, 369 Oxford street, London, by W. B. MARSTON, the Principal, are being issued, with plain directions for SELF-TREATMENT and CURE in each of them.

No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.

No. II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.

No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.

No. IV.—THE DISEASES INFLICTED UPON MANKIND BY THE GREAT SOCIAL EVIL. With a simple means of complete Cure without Mercury.

Each Lecture, neatly printed and bound, will be sent GRATIS, on receipt of two stamps to prepay postage, or THE WHOLE FOUR, BOUND TOGETHER, with numerous additions, and full directions for SELF-TREATMENT and CURE, 160 pages, 8vo, post free, for Six Stamps. Address, Treasurer, Royal Institute, 369 Oxford street, London.

DR DE JONGH'S
(Knight of the Order of Leopold of Belgium)

LIGHT-BROWN COD LIVER OIL,

Prescribed by the most Eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for

CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,

Is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.

Dr JONATHAN PEREIRA, F.R.S.—"It was fitting that the author of the best analysis and investigations into the properties of this oil should himself be the purveyor of this important medicine. I am satisfied that for medicinal purposes no finer Oil can be procured."

Dr GRANVILLE, F.R.S.—"Dr Granville has found that Dr de Jongh's Light Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."

Dr BARLOW, Physician to Guy's Hospital.—"I have been well satisfied with the effects of Dr de Jongh's Oil, and believe it to be a very pure Oil, well fitted for those cases in which the use of that substance is indicated."

Dr BANKS, King's Professor of the Practice of Medicine at the University of Dublin.—"I have in the course of my practice extensively employed Dr de Jongh's Light Brown Cod Liver Oil, and I have no hesitation in stating that I consider it the best of all the specimens of Oil which have ever come under my notice."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists.

SOLE AGENTS,
ANSAR, HARFORD, and CO., 77, STRAND, London, W.C.

CAUTION.—Beware of Proposed Substitutions.

DR CURTIS'S MEDICAL WORK, "MANHOOD."

An Essay on Nervous and Generative Diseases.

The 140th thousand, with numerous plates, in a sealed envelope, price 1s, or post paid, by the Author, for twelve stamps.

MANHOOD: THE CAUSE AND CURE of PREMATURE DECLINE in MAN, with Plain Directions for Perfect Restoration to Health and Vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, the result of twenty-five years' successful practice. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London. Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a parent, preceptor, or clergyman."—SUN, evening paper.

"Dr Curtis has conferred a great boon by publishing this little work, in which is described the sources of these diseases which produce decline in youth, or more frequently premature old age."—DAILY TELEGRAPH, March 27, 1858.

N.B. The Author of the above Medical Treatise may be consulted as usual, either by letter or personally, at his residence. The efficacy and harmless nature of the remedies employed by Dr Curtis, having been demonstrated by the most complete success during a practice extending over a period of 20 years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

Published by Allen, 20 Warwick lane, Paternoster row; Mann, 39 Cornhill; and free from the Author for 12 stamps.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price from 7s 6d to 16s each: postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

A BOON TO NERVOUS SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions, by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Burton crescent, Tavistock square, London, W.C.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint *is* cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

ADULTERATIONS.—Several Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Another White Zinc has been now introduced containing impurities from the mode of manufacture which retard the drying. Whether these are sold under the name of "Improved Zinc Paint," or as the Number Two or Three qualities, no workman can produce good work with such material. Workmen who have once used the Patent Zinc Paint will never willingly use any other Paint for their best work.

To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"Among other tests to which it has been subjected, has been that of painting the hold of a sugar vessel, which after a voyage to St Kitt's and back, was found, after washing, to be as white as the first day the paint was applied."—JOHN BULL, September 14, 1850.

FREDERICK DENT, Chronometer, Watch, and Clock Maker to the Queen and Prince Consort, and maker of the Great Clock for the Houses of Parliament, 61 Strand, and 34 Royal Exchange.

FORD'S EUREKA SHIRTS are made with that rigid adherence to details in manufacturing, which alone can ensure a good and comfortable shirt. A box of six excellent shirts for 33s. Illustrated catalogues, mode of self-measurement, price list, &c., post free.

RICHARD FORD, 38 Poultry, London.

ADOPTED LARGELY BY HER MAJESTY'S GOVERNMENT.

CHEAP, LIGHT AND DURABLE ROOFING.

CROGGON'S PATENT ASPHALTE ROOFING FELT has been extensively used and pronounced efficient and particularly applicable for warm climates

1st. It is a non-conductor.

2nd. It is portable, being packed in rolls, and not liable to damage in carriage.

3rd. It effects a saving of half the timber usually required.

4th. It can easily be applied by any unpractised person.

5th. From its lightness, weighing only about 42 lbs to the square of 100 feet, the cost of carriage is small.

INODOROUS FELT, for damp walls and for damp floors, under carpets and floor cloths; also for lining iron houses, to equalise the temperature.

Price ONE PENNY PER SQUARE FOOT.

CROGGON and CO'S PATENT FELTED SHEATHING for Covering Ships' Bottoms, &c., and

DRY HAIR FELT, for Covering Steam Boilers, Pipes, &c., preventing the radiation of Heat, and saving 25 per cent. of Fuel.

Samples, testimonials, and full instruction on application to CROGGON and CO, 2 Dowgate hill, London and at 2 Goree Piazzas, Liverpool.

VOLUNTEER PIPE.—RIFLE BORE.—The most delightful, economical, and permanent medium for the enjoyment of tobacco ever invented. This new pipe only to be had of the patentee. Sample pipe in case sent post free for 23 stamps.—EDWARD PILLINER, 53 Great Queen street, London, W.C.

---

66 Queen street, London, 23rd August, 1860.

MESSRS R. WOTHERSPOON and CO., 46 Dunlop street, Glasgow,

DEAR SIRS,—I have, as requested, to-day visited the Royal Laundry, with reference to the advertisement of the Nottingham firm, who state that their starch has been used for many years in the Royal Laundry, and have been assured by Mr Thompson, the superintendent, that none but yourselves have any right to state that they supply starch to Her Majesty's Laundry, as no other starch is there used, nor has been used for some years, but the Glenfield Patent Starch. I have been further assured that your starch continues to give complete satisfaction, and that though trial has been made of samples of various starches, none of these have been found nearly equal in quality to the Glenfield.—I am, dear Sirs, your obedient servant. WM. BLACK.

KEATING'S COD LIVER OIL. Just Imported. The Pale from Newfoundland, and he Light Brown from Norway. The supplies of the present season have never been surpassed, the fish being unusually fine, and the oil nearly tasteless. Professors Taylor and Thompson, of Guy's and St Thomas's Hospitals, have analysed, and pronounced the PALE NEWFOUNDLAND OIL the best and most desirable for invalids of very delicate consitution. The Light Brown being more economical in price, is brought within he reach of all classes. NO HIGHER PRICE NEED BE PAID than the following:—Light Brown, 1s 8d per pint, or 3s per quart. Pale, 1s 6d half-pints, 2s 6d pints, 4s 6d quarts, or in five-pint bottles, 10s 6d, imperial measure, at 79 St Paul's Churchyard.

HEALTH AND HAPPINESS for the NERVOUS and DEBILITATED.—The proprietors of the Birmingham Institute of Anatomy desire to make known an infallible means of self-cure for the nervous, debilitated, &c., and will forward the same gratuitously on receipt of a stamped directed envelope.—Address "To the Secretary, Institute of Anatomy, Birmingham."

Second Edition, price 2s 6d, post free for 30 stamps,

TOOTH-ACHE: ITS CAUSES, and a New Painless Method of Cure (with as much certainty as water quenches thirst). Teeth cured by this Method will never ache again, and thus prevent the necessity of the painful operation of extraction. By THOMAS HOWARD, Surgeon Dentist to His Grace the Archbishop of Canterbury, 17 George street, Hanover quare, London.

COLLARD AND COLLARD'S NEW WEST-END ESTABLISHMENT, 16 GROSVENOR STREET, BOND STREET, where all communications are to be addressed. Pianofortes of all Classes for Sale and Hire.

CHIMNEY-PIECES, TOMBS, MONUMENTS, FONTS, &c.—EDWARDES BROTHERS and BURKE, 17 Newman street, Oxford street, London, W., beg to inform the nobility and gentry that they manufacture at their own establishments, in Italy and Belgium, as well as at the above address, every description of marble work, at the lowest possible prices. Their galleries contain specimens of all foreign and British marble quarries, in Chimney Pieces, from 25s to 300 guineas each; MONUMENTS AND TABLETS, from £5; Head and Foot Stones, from 30s each.—Sole agents to the Invernettie Granite Company.

IMPORTANT NOTICE.

GLENFIELD PATENT STARCH is the only STARCH used in HER MAJESTY'S LAUNDRY.

And as some unprincipal Parties are now making and offering for Sale an Imitation of the

GLENFIELD STARCH,

we hereby caution all our Customers to be careful, when purchasing, to see that the word GLENFIELD is on each Packet, to copy which is Felony.

WOTHERSPOON and CO., Glasgow and London.

TRADE 8/P MARK.

BROWN AND POLSON'S PATENT CORN FLOUR.

The LANCET states,

"'This is superior to anything of the kind known."

FIRST OF THE KIND Manufactured and Patented in the United Kingdom and France, as explained with Engravings in THE ILLUSTRATED LONDON NEWS, of May 26th, 1860. Prepared without *fermentation*, it is warranted to keep sweet for years. It is respectfully suggested that the Trade Mark, and name in full should be observed on each Package, as similar articles are sometimes substituted or recommended as "the same" or "as good as Brown and Polson's." BROWN and POLSON, Manufacturers and Purveyors to Her Majesty: Paisley, Manchester, Dublin, and London.

DINNEFORD'S PURE FLUID MAGNESIA has been, during twenty-five years, emphatically sanctioned by the Medical Profession, and universally accepted by the Public, as the Best Remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a Mild Aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescing Draught, in which its aperient qualities are much increased. During hot seasons and in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD *and* CO., 172 New Bond street, London; and sold by all respectable chemists throughout the Empire.

HOLLOWAY'S OINTMENT AND PILLS.—Order and Ease.—These remarkable remedies surpass every other medicine for general family use. Their *action* is alterative, anodyne, *tonic*, and healing. The Ointment has only to be perseveringly rubbed twice a day over any afflicted organ to penetrate to it, regulate and soothe it. The tonic properties are obtained though the wholesome influence it exerts when rubbed over the stomach and liver: on both of which it produces the happiest effects by making their secretions abundant and natural. Holloway's purifying Pills should be simultaneously taken. The combined action of these safe yet potent remedies over stomach, liver, bowels, kidneys, muscles, and nerves, is immediate, beneficial, and lasting. Holloway's preparations restore order, ease, strength, and happiness.

FREE ISSUE.

Notice.—The following invaluable works have just been published, and are now being issued gratis to all who enclose two stamps for postage, to No. 27 Alfred place, Bedford square, London.

DR WATSON'S NEW MEDICAL ESSAYS on Nervous and Physical Debility, with their easy Detection and *Self Cure*. Lately *discovered* and now made public by the author, with cases and diagrams, showing the connection between the brain and other organs. Also prescriptions and other appropriate remedies for the self-treatment and cure of those special diseases, and whether acquired in youth, manhood, or old age. By Dr Watson, F.R.A.S., London, Member of the Medical Society of Rouen, the National Academy of Sciences, Paris, and Fellow of the Imperial Institute of France, &c., &c. (vide Diplomas and Medical Directory).

MR LEWIS AND SON, 113 Strand.—The Royal Lewisian Systems of Writing, Arithmetic, Bookkeeping, and *Shorthand*, as taught for upwards of fifty years by Mr Lewis, the real inventor and first teacher of these world-renowned and only infallible systems, insures perfection in any of the above branches after a few easy and interesting lessons Persons unable to take the lessons may obtain the inventor's works for self-instruction at his only institution, 113 Strand

---

THE FRENCH AND GERMAN PROTESTANT COLLEGE, Netherton House, Clapham, Surrey, combines the comforts of an English home with the advantages of a Continental Education. The French and German Languages, so indispensable to a good education, are taught by resident masters. They give lessons daily. The course of instruction adopted secures for young gentlemen a sound English, Classical, and Mathematical Education, combined with Drawing, History, Geography, and Modern Science. Pupils prepared for the military, naval, merchant, and civil service examinations. Terms, inclusive, from thirty to fifty guineas per annum, according to age and requirements. A difference will be made for two Pupils from the same family. For references and prospectuses apply to Monsieur A. de Chastelain, as above.

DEANE'S TWO-HOLE BLACK PENS which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped

"G. and J. Deane, London bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

ALLSOPP'S PALE OR BITTER ALE.—Messrs S. ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the October Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent; and at the undermentioned Branch Establishments:—

Messrs SAMUEL ALLSOPP & SONS,

LONDON	61 King William st., City
LIVERPOOL	Cook street.
MANCHESTER	Ducie place.
BIRMINGHAM	Upper Temple street.
DERBY	London road.
WOLVERHAMPTON	Exchange street.
CHESTERFIELD	Low Pavement.
STOKE-UPON-TRENT	Wharf street.
DUDLEY	Burnt Tree.
WORCESTER	The Cross
SOUTH WALES	King street, Bristol.
DUBLIN	Crampton quay.
CORK	Cook street.
EDINBURGH	Union street lane.
GLASGOW	St Vincent street.
PARIS	279 Rue St Honoré.

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Bottles and Casks, and on Draught, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

When in bottle, the genuineness of the table can be ascertained by its having "ALLSOPP and SONS' written across it upon red and white ground striped.

The Brewery, Burton-on-Trent, April 30, 1860.

FREEDOM FROM COUGH IN TEN MINUTES is ensured by Dr LOCOCK'S PULMONIC WAFERS.—From Mr W. Harrison, Coronation square.—"Sir,—I was troubled with a severe cough for two or three years, which nothing relieved; but by taking one 2s 9d box of Dr Locock's Pulmonic Wafers I have entirely lost it. I shall recommend them to all I know, for they cannot be too highly praised.—W. Harrison." Dr Locock's Wafers give instant relief and a rapid cure of asthma, consumption, coughs, and all disorders of the breath and lungs. They have a most pleasant taste. Price 1s 1½d, 2s 9d, and 11s per box. Sold by all medicine vendors.

KEATING'S COUGH LOZENGES.—Statistics show that 50,000 persons annually fall victims to Pulmonary Disorders, including Consumption, Diseases of the Chest, and the Respiratory Organs. Prevention is at all times better than cure; be, therefore, prepared, during the wet and wintry season, with a supply of KEATING'S COUGH LOZENGES, which possess the virtue of averting, as well as of curing, a Cough or Cold; they are good alike for the young or for the aged

RESTORATION OF VOICE BY KEATING'S COUGH LOZENGES. Glasgow.

SIR,—I have great pleasure in informing you of the great good your excellent COUGH LOZENGES have done me. In December, 1845, I caught a severe cold from riding two or three miles, one very wet night, which settled in my lungs, and quite took away my voice, so that I could not speak above a whisper from that time until December last. I tried all kinds of medicines, but they were of no avail. I was then advised to try your Lozenges, which I did only to please my friends, but before I had finished a 2s 9d tin, my voice, to my great joy, came back as strong as ever.—I am, Sir, yours respectfully, JAMES MARTIN.

THOMAS KEATING, Esq.

Prepared and Sold in Boxes, 1s 1½d; and Tins, 2s 9d, 4s 6d, and 10s 6d each, by Thomas Keating, chemist, &c., 76 St Paul's churchyard, London. Retail by all Druggists, &c.

LURLINE.—C. D'Albert's Quadrilles and Valses from Wallace's popular Opera.

ROBIN HOOD.—C. D'Albert's Quadrilles and Valse from Macfarren's successful Opera.

THE AMBER WITCH.—C. D'Albert's Quadrilles, Valses, and Polka, from Wallace's new and successful Opera.

Cramer, Beale, and Co., 201 Regent street.

CALCUTTA ENGLISHMAN.—The leading daily paper, published in Calcutta possesses a wide and general circulation all over India. The overland edition, "THE ENGLISHMAN'S WEEKLY MAIL," contains the fullest information respecting Commercial, Political, and Military Matters. Subscription, £2 10s per annum, including postages. All communications and advertisements should be forwarded to the London Agent, G Street, British and Colonial Newspaper Office, 30 Cornhill, E. C.

OUDE RAILWAY COMPANY.—Notice is hereby given, that pursuant to the resolution passed at the General Meeting held on March 7th, the shareholders are requested to send in their Scrip Certificates for examination preparatory to the repayment of the sum of 5*s* per share to the holders thereof, and that the same may be lodged at the Company's offices between the hours of 11 and 3.

The Scrip must be accompanied by a statement in writing of the full name and address of the holder to whom the repayment is to be made.—By order of the Board, CHARLES TWIGG, Secretary.

London, 8 Moorgate street, March 14, 1861.

THE EAST INDIAN RAILWAY COMPANY is prepared to receive Tenders for the supply of

100 COMPLETE SETS of APPARATUS for WATER CLOSETS and URINALS.

The Tenders must be accompanied with a Specification and Drawing of the Apparatus proposed to be supplied, and must state the date the contract will be completed. The price must include all charges for packing and for delivery at London or Liverpool. Tenders, endorsed "Tender for Apparatus for Water Closets and Urinals" must be delivered to the Secretary on or before 12 o'clock at noon on Tuesday, the 26th day of March instant. The Company is not bound to accept the lowest or any tender.—By order of the Board,

D. I. NOAD, Secretary.

East Indian Railway House, Alderman's Walk, New Broad street, London, March 12, 1861.

EAST INDIAN RAILWAY COMPANY.

The Directors of the East Indian Railway Company are prepared to receive applications for Debentures at par for the remainder of the sum of £1,500,000 required to complete the total amount which the Company has the power to borrow on Debentures not convertible into shares.

The payment of the principal and interest in the meantime, at the rate of 5 per cent. per annum, is guaranteed by the Secretary of State for India in Council.

The bonds will be for five years from the 15th December, 1860, transferable by endorsement under the provisions of the 16 and 17 Victoria, cap. 59, without stamp, and the holders may renew them for a second term of five years, upon giving one year's notice to that effect. Failing such notice, the bonds will be paid off at the expiration of the first five years on presentation at the Bank of England.

Payments may be made in full or by instalments, as may be agreed upon.

Interest will accrue on the respective payments from the dates fixed for the same.

No scrip receipt or bond will be issued for a less sum than £50.—By order of the Board,

D. I. NOAD, Secretary.

East Indian Railway House, Alderman's walk, New Broad street, London, Jan. 22, 1861.

MADRAS RAILWAY COMPANY.—Her Majesty's Secretary of State for India having authorised the Directors of this Company to raise the sum of £1,000,000 on Debentures not convertible into Stock, the Directors are prepared to comply with applications to that extent for Debentures at par, bearing interest at 5 per cent. per annum, payable by coupon, half-yearly, at the Union Bank of London.

The payment of the principal and interest is guaranteed by the Secretary of State for India in Council. The Debentures will be for five years, from the 1st of January, 1861, transferable by endorsement without stamp, and renewable at the option of the holder for a second term of five years, at the same rate of interest.

Debentures will not be issued for any less amount than £50.

The Directors will also receive applications for the amount which remains to be allotted of the previous Debenture Loan of £1,000,000 convertible into Stock of the Company. These Debentures are for five years, or four years, at 5 per cent. per annum, payable by coupon, half-yearly, at the Union Bank of London.

The payment of the principal and interest is guaranteed in like manner by the Secretary of State for India, and the holders of these Debentures have the option at the end of twelve months from their date, and thenceforward, of converting them into Capital Stock of the Company, bearing 5 per cent. interest, guaranteed under the contract entered into with the East India Company.

Forms of application for either or both descriptions of Debentures may be obtained at the Offices of the Company.—By order of the Board,

JAMES WALKER, Managing Director.

No. 33 New Broad street, London, 1st January, 1861.

NATIONAL DISCOUNT COMPANY (LIMITED), 33 Cornhill, London. Subscribed Capital, £2,000,000. Paid up, £385,345.

Approved mercantile bills discounted for parties properly introduced.

Money received at interest on deposit, repayable on call or at fixed periods.—By order of the Board,

RICHARD PRICE, Secretary.

Cornhill, March, 1861.

William Chapman, Esq., Deputy Chairman.
James Hutchinson, Esq. | William G. Thomson, Esq.
Charles Morrison, Esq. | T. M. Weguelin, Esq.

BANKERS—Messrs Glyn, Mills, and Co.

The Directors are prepared to grant Debentures for loans of sums of £100 and upwards, for periods of 3, 5, 7, or 10 years.

Any information required can be obtained on application to the Secretary. FRED. FEARON, Secretary.

55 Moorgate street, London.

CANADA LANDED CREDIT COMPANY.

Incorporated by Act of the Parliament of Canada.

Capital, £200,000.

PRESIDENT—Lewis Moffatt, Esq.

VICE-PRESIDENT—W. P. Howland, Esq., M.P.P.

DIRECTORS.

The Hon. G. W. Allan, M.L.C.
R. D. Chatterton, Esq.
The Hon. Malcolm Cameron, M.L.C.
Richard L. Denison, Esq.
Charles Donaldson, Esq.
W. P. Howland, Esq., M.P.P., President of Board of Trade.
Thomas D. Harris, Esq., Vice-President Board of Trade.
Lewis Moffat, Esq., Director Bank British North America.
William McMaster, Esq., (McMaster and Nephews.)
Samuel Spreull, Esq.
Mr Sheriff Smith, Collingwood.
E. W. Thomson, Esq., President of the Board of Agriculture.

BANKERS—Messrs Smith, Payne, and Smiths, London.

The Company are prepared to receive loans against their debentures of £50, £100, £500, and £1,000 sterling, for periods of five, seven, or ten years, bearing interest at 6 per cent. per annum, both principal and interest being made payable in London.

The amount received is invested in and secured by mortgages of freehold land in Canada West of ample value.

The Company by its charter is always first mortgagee.

The evils, uncertainties, and delays of the old mortgage system are avoided by the lender.

He has no care or anxiety as to the character of the borrower, or the value of the land mortgaged.

The Company assumes all responsibilities, and guarantees the payment of interest to the day, viz., 1st January and 1st July; at their bankers in London, and the same can be received through any of the country banks.

Investors incur no risk as in a railway or similar undertaking; the Company's profits beforehand being well ascertained and sure.

The half-yearly returns of business done, made to the Government of Canada, prospectuses, annual report, and further information, may be had of the Company's stockbrokers and agents,

The Report then proceeded as follows:—

The year just closed has been a very prosperous one in all respects. A larger amount of new business has been transacted than in any previous year since the Company was established. Excellent investments have been secured for the Company's surplus funds, and the claims by death have been considerably within the calculation.

The large increase of new business, however, is the leading feature in these results, the amount transacted having never previously been reached by any Scotch office, while the gratifying fact presents itself that the average of each policy has been not far in excess of £500 on each life.

But it is not to such a rapid stride as that attained in 1860 that the Directors point with most satisfaction. They have much more pleasure in calling your attention to the steady results from year to year, as shown in the above general statement, and in recording the fact that no office in existence except the Standard can show an average new business of half a million sterling annually during the last fourteen years.

The Directors continue to exercise the greatest caution and to use the utmost circumspection in the management of the Company's affairs. The investment of the funds engages at all times their special attention, and they are happy to state that the large sums intrusted to their charge have been placed on securities of the most satisfactory character. No personal loans are entertained, and the Directors, after mature consideration, have deemed it their wisest course to avoid all securities of a temporary character, and to invest almost entirely on the security of land and in Government securities. A Committee of Directors is about to report on these securities preparatory to the division of profits, and the Directors feel confident that that department of their management will receive the entire approval of the investigators.

The question of "audit" is at all times an important one, and has of late attracted much public attention, in consequence of the frauds which have unfortunately occurred, more especially in England, in connection with public companies; and it might be well if the practice of employing professional accountants to conduct such audits obtained in England more than it does. This Company have always considered the office of auditor of great importance, and it has been the practice of the Directors, for many years, to submit his report, as has been done to-day, to the annual general meeting. The Manager has instituted various modes of checking the accounts, and the auditor is most particular in his examination of all details, so that the proprietors may repose every confidence in the attention paid by the Directors to that part of their duty; and they think it not out of place, while making so satisfactory a report as to the state of the Company's affairs, to show that in times so prosperous, as at all times, they are not negligent of those checks necessary in all well-managed public institutions.

The proprietors are aware that the sixth investigation of the Company's affairs, with reference to a further division of profits, was appointed to be made as at the 15th of November, 1860. The books have been balanced as at that date, and the balance sheet, certified as usual by three Directors and the auditor, is now on the table; but it will require a few weeks more to finish the laborious calculations necessary to ascertain the exact amount of the surplus fund. The meeting now addressed will therefore adjourn till the end of April or beginning of May, when a full statement and valuation will be submitted.

The Chairman then addressed the meeting in the following terms:—I have now to propose that the report and statements be approved of, and I make this motion with very great pleasure, as these reports and statements contain so much that is gratifying. I am certain it is impossible for you to have heard the statements contained in that report without being satisfied as to the progress which this Company is making, and as to the success that has attended it. The year which has just come to a close is the last of the quinquennial period which, according to our constitution, precedes a general investigation of the Company's affairs and a division of profits. That investigation is now being actively proceeded with; but, from the vast extent of the transactions investigated, and the strict scrutiny employed, the report will not be ready for some weeks. You shall be called together to consider that report when made; and it will be the duty of the chairman at that meeting, more than it is mine at present, to enter upon details with reference to the state of the business. At the same time I may observe that during this last year we have accomplished the result of having transacted a greater amount of assurance business than has been effected by any other office, whether in England or Scotland, in the same period of time. Further, I can confidently affirm that we have effected this amount of assurance without having in the slightest degree relaxed that caution which the Directors of this Company have always manifested in the selection of assured lives; and I think the table which has been brought before you, contrasting the amount assured with the amount proposed for assurance, will have satisfied you that I am correct in that statement. I may also mention that we ourselves have, in no previous year, effected an amount of assurance at all equal to that which we have transacted during this last year, and when contrasted with the last bonus year (1855), we are very largely in excess of the amount which we were then able to assure: while we have accomplished this satisfactory result without in any degree relaxing the strictness with which we investigate proposals of assurance, we have done so also without stimulating assurance, as is done in many cases, by holding out the prospect of personal loans in connection with assurances, without accepting any but first-class lives, and without having any agencies beyond England, Scotland, and Ireland. We have not, therefore, achieved this result otherwise than according to a sound and proper mode of conducting business; and I think it right that you should all be aware that that is so. Gentlemen, the results which have been stated I think sufficiently establish that the reputation and character of the Standard is not diminished, and that we still maintain—and I trust shall long continue to maintain—the very high position which we have fortunately attained to. The extent of the increase of the revenue during the past year has been already stated to you, also the extent of the assurances effected, and of the invested capital—the revenue exceeding £300,000, and the realised capital amounting to £1,805,000—and all in a state of active progress. The amount of loss also in the year, as you will perceive, is much within the calculation. I think there is ample ground for congratulating all who are interested in the Company on its continued success, while we have the best ground for expecting that the result the investigation will be exceedingly beneficial to all parties. I may mention further, gentlemen, that while our business in Scotland and Ireland has been fully maintained, a marked increase has arisen in our English business, for which we are much indebted to the successful exertions of your Directors in London. The Company have during the last year sustained a loss by the decease of the Earl of Aberdeen, a nobleman who held the office of chairman of the London Board, and to the influence of whose respected name the Company have been much indebted; and I am sure we all desire to express our regret and sympathy with his family. I have now only to move that the report be approved of.

The motion was agreed to.

In accordance with the Acts of Parliament under which the Company is constituted, three Directors retire by rotation:—*H. Maxwell Inglis*, Esq., P.C.S.; Anthony Trail, Esq., W.S.; and John Scott, Esq., London. The following gentlemen were elected in their place:—James Hay, Esq., merchant, Leith; George Moir, Esq., Advocate, Sheriff of Stirlingshire; and Lestock Robert Reid, Esq., Westbourne terrace, London.

On the motion of B. H. Blyth, Esq., C.E., a vote of thanks was presented to the Manager and other office bearers, after which the meeting separated.

By order of the Directors,
WILL. THOS. THOMSON, Manager,
H. JONES WILLIAMS, Resident Secretary.

ESTABLISHMENT OF THE COMPANY.

Governor.—His Grace the Duke of Buccleuch and Queensberry.

Deputy-Governor.—The Right Hon. the Earl of Elgin and Kincardine.

FOR SALE.—A SHARE IN A SLATE QUARRY in North Wales for about £3,000. The present proprietors are gentlemen of position and responsibility, the Quarry is in full work, and the profits will be considerable. The highest references given and required.—Address, with real name, to A. B., care of Messrs Salter and Rossiter, 17 Abchurch lane, E.C.

MERCHANTS HAVING commissions for Furniture or Carpets of a superior class, are respectfully invited to visit the manufactory and show rooms of Messrs JACKSON and GRAHAM. By the introduction of machinery worked by steam power in various processes, J. and G. have effected a considerable improvement and economy in the manufacture of furniture, and their spacious show rooms afford to purchasers unrivalled facilities for the selection of all requisites, useful and ornamental, in the best taste. Four show rooms, each 120 feet long, are exclusively devoted to the display of Bedsteads and Chamber Furniture. J. and G. are also large importers of Silks, Tapestries, and other Fabrics for Curtains, and their Gallery of Bronzes d'Art is the sole depot for the celebrated productions of F. Barbedienne and Co., of Paris, which they sell at the prices of the Paris catalogue, with 5 per cent. added for expenses of importation.

CLARET ONE SHILLING PER BOTTLE, 12s per Dozen.
HENRY BRETT and CO., Importers, Holborn Bars, E.C.

EAU-DE-VIE.—THIS PURE PALE BRANDY, though only 18s per gallon, is demonstrated, upon analysis, to be peculiarly free from acidity, and very superior to recent importations of veritable Cognac. In French bottles, 38s per dozen; or securely packed in a case for the country, 39s.
HENRY BRETT and CO.,
Old Furnival's Distillery, Holborn.
To be obtained only at their Distillery.

A GENTLEMAN, aged 26, who has been for ten years in a first-class English House in Brazil, is desirous of a re-engagement either at home or abroad; has a thorough knowledge of bookkeeping and the Portuguese language.—Address, W. N., Messrs Pike, Leake, and Co., 6 Wellington street, Borough.

A GENTLEMAN, 15 years established in Manchester as Importer of an article extensively used in Lancashire, is disposed to take a Partner with a capital of £4,000 to £5,000, by means of which the business could be considerably and advantageously increased.—Address S. 55, Post Office, Manchester.

TO MERCHANTS AND SHIPBROKERS.—A Young Man, age 21 years, respectably connected, Offers his Services to a Merchant or Shipbroker. He has passed his examination for the mercantile marine, and possesses a good knowledge of the shipping interest. Not having been before engaged in an office, a small progressive salary would suffice.—Address T. B., 120 Bayham street, Camden town, N.W

TO WOOLLEN MANUFACTURERS.—To be Sold, a large and important Cloth Manufactory, situated in Austria, near Brünn, between Vienna and Prague, and supplied with water and steam power, together with extensive Plant and all necessary machinery and appliances for carrying on a large manufacturing business. The machinery includes ten spinning assortments of the best Belgian make.—For particulars, apply by letter to A. B., Messrs Good, Moorgate street, London.

WANTED, A GENTLEMAN, about 30 years of age, competent to undertake the Management of a Branch Bank in China. Mercantile experience and a good address indispensable. Salary liberal.—Address, D. 30, care of Messrs Wm. Brown and Co., 40 Old Broad street, E.C.

WANTED, BY A YOUNG Gentleman, 19 years of age, a situation as Junior or Second Clerk in a banker's, merchant's, or colonial broker's office. Has been three years in a banking house in Prussia. Understands and writes German thoroughly, and also English and French. Is very respectably connected, and can give the highest testimonials and references as to character and moral habits. A moderate salary at first would be accepted, as employment is his chief object.—Address G. L., at Letts', Royal Exchange.

EDUCATION IN GERMANY.—There are a few vacancies for Young Gentlemen in a celebrated Professional and Commercial Institution at Frankfort-on-the-Maine. The highest references. Terms moderate.—For particulars apply to Mr Geo. L. Wingate, Jun., 9 Copthall court, E.C.

MERCANTILE SHIPPING AGENCY. Established upwards of 80 years.
The mercantile community is respectfully informed that Merchandise of every description is received, forwarded, and insured, agreeably with instructions, to and from all parts of the world, by steam or sailing vessels.

Open daily, Sundays excepted.
The bath, in addition to being a great curative agent is the greatest physical luxury in the world.

UNITED KINGDOM LIFE ASSURANCE COMPANY,

8 WATERLOO PLACE, PALL MALL, S. W.

THE HON. FRANCIS SCOTT, CHAIRMAN.
CHARLES BERWICK CURTIS, ESQ., DEPUTY-CHAIRMAN.

FOURTH DIVISION OF PROFITS.

SPECIAL NOTICE.—Parties desirous of participating in the fourth division of profits to be declared on policies effected prior to the 31st December, 1861, should make immediate application. There have already been three divisions of profits, and the bonuses divided have averaged nearly 2 per cent. per annum on the sums assured, or from 30 to 100 per cent. on the premiums paid, without the risk of copartnership.

To show more clearly what these bonuses amount to, the three following cases are given as examples:—

Sum Insured.	Bonuses added.	Amount payable up to Dec., 1854.
£	£ s	£ s
5,000	1,987 10	6,987 10
1,000	397 10	1,397 10
100	39 15	139 15

Notwithstanding these large additions, the premiums are on the lowest scale compatible with security; in addition to which advantages, one-half of the premiums may, if desired, for the term of five years, remain unpaid at 5 per cent. interest, without security or deposit of the policy.

The Assets of the Company at the 31st December, 1859, amounted to £690,140 19s, all of which had been invested in Government and other approved securities.

No charge for Volunteer Military Corps whilst serving in the United Kingdom.

Policy Stamps paid by the Office.

For prospectuses, &c., apply to the Resident Director, No. 8 Waterloo place, Pall Mall.

By order, E. L. BOYD, Resident Director.

NORWICH UNION FIRE INSURANCE SOCIETY.

NOTICE.—LADY-DAY RENEWALS.—Losses by fire occurring during the fifteen days of grace are made good to the assured.

The business of the Company exceeds £68,000,000.

The duty paid to Government for the year 1860 was £81,332 9s 9d, and the amount insured on farming stock £9,988,368.

A bonus of three-fifths of the profits periodically made to parties insuring, who have thus from time to time received sums amounting in the aggregate to £400,000.

A further sum is applicable for a bonus upon policies renewed in 1861.

The rates of premium are in no case higher than those charged by other principal offices making no returns to their insurers.

For prospectuses apply at the Society's offices, Surrey street, Norwich, and 6 Crescent, New Bridge street, Blackfriars, E.C.

MANAGER OF BERLIN BRANCH,
F. J. Liebmann, Esq., 47 Unter den Linden.

PLAN OF THE GREAT BRITAIN MUTUAL LIFE ASSURANCE SOCIETY.

This Society is established on the tried and approved principle of mutual assurance. The funds are accumulated for the exclusive benefit of the members under their own immediate superintendence and control. The profits are divided annually, and applied in reduction of the current premiums.

The members of this Society consist of two Classes; one class comprising policy-holders who pay the full amount of premium during the first five years, and then become entitled to participate in the profits during the remainder of their respective lives; the other class comprising policy-holders who pay half the amount of premium, only, during the first five years, and thenceforth pay the whole amount during the ensuing five years; after which period they become entitled to participate in the profits equally with other members.

Every member assured for £500 is entitled, after payment of one whole annual premium, to attend and vote at all general meetings. Members assured for larger amounts are entitled to one vote for every £500 assured.

No claim can be litigated or disputed except with the concurrence of the members present at a general meeting, specially convened on the occasion.

The Directors and Auditors consist of members assured to the extent of £1,000. The Auditors and three of the Directors vacate their offices annually, but are eligible for re-election by the members.

Extensive tables of non-participation rates have been constructed for the accommodation of different classes of policy-holders.

Application for agencies may be made, and every requisite information relative to this Society, and the mode of effecting assurances, obtained on application to

C. L. LAWSON, Secretary, London.

Government Officials.—Reduction in Scale of Premiums.

THE EUROPEAN ASSURANCE SOCIETY ISSUES POLICIES of GUARANTEE,

at reduced rates, for officials in or under the Treasury, Customs, Inland Revenue, Board of Trade, Poor Law Board, Admiralty, and other public departments, and for bank and railway clerks and persons in commercial employments.

Further reductions on the combination of life assurance with guarantee. Annuities granted on favourable terms.

Forms and every information may be obtained at the Chief office, No. 2 Waterloo place, Pall Mall, London.

Instituted in the Reign of Queen Anne, A.D. 1714.

UNION ASSURANCE SOCIETY,

FIRE and LIFE.

OFFICES—81 Cornhill, and 70 Baker street, London; and in Bristol, Liverpool, Edinburgh, Dublin, Hamburg, Berlin, and Berne.

Fire Insurances due at Lady-day should be paid on the 25th March, or within 15 days after.

The next Septennial calculation of Life Profits will be made in the year 1862, and all policies effected prior to 31st December, in this year, will participate in the Bonus subsequently to be declared.

This Company combine the advantage of a large accumulated capital, every modern system of insurance, and the experience of 150 years.

WM. B. LEWIS, Secretary.

SUN LIFE ASSURANCE SOCIETY,

Threadneedle street, London.

The Profits of this Society will be divided in future Quinquennially; and Policies will participate at each division, after Three Annual Payments of Premium have been made.

Policies effected now will Participate in Four-fifths, or 80 per cent., of the profits, according to the conditions contained in the Society's Prospectus.

The Premiums required by this Society for insuring young lives are lower than in many other old established Offices, and Insurers are fully protected from all risk by an Ample Guarantee Fund in addition to the accumulated funds derived from the investments of Premiums.

No charge for service in the Militia or in any Yeomanry or Volunteer Corps in the United Kingdom.

Policy stamps paid by the office.

Prospectuses may be obtained at the office in Threadneedle street, London, or of any of the Agents of the Society.

CHARLES HENRY LIDDERDALE, Actuary.

ALLIANCE BRITISH AND FOREIGN LIFE and FIRE ASSURANCE COMPANY.

Bartholomew lane, London, E.C.

Established 1824.

(Branch Offices: Edinburgh, Ipswich, and Bury St Edmunds.)

Capital, FIVE MILLIONS Sterling.

PRESIDENT.

Sir Moses Montefiore, Bart.

DIRECTORS.

James Alexander, Esq.	Sampson Lucas, Esq.
Charles G. Barnett, Esq.	Elliot Macnaghten, Esq.
George H. Barnett, Esq.	Thomas Masterman, Esq.
Benjamin Cohen, Esq.	Jos. M. Montefiore, Esq.
James Fletcher, Esq.	Sir A. N. de Rothschild, Bt.
William Gladstone, Esq.	Lionel N. de Rothschild, Esq., M.P.
Samuel Gurney, Esq., M.P.	Oswald Smith, Esq.
James Helme, Esq.	Thomas Chas. Smith, Esq.
John Irving, Esq.	

Life Assurances are granted under an extensive variety of forms, with, or without participation, and at moderate premiums; the rates for the Younger Ages being lower than those of many of the older, and most respectable offices.

Actual Service Risk within the United Kingdom in Volunteer Rifle and Artillery Corps, and in the Militia, is covered by the Company's Policies.

Fire Assurances both at home and abroad are accepted at very moderate premiums.

The Assured participate in the Fire Profits in respect of Policies in force for five complete years. The return for the past Quinquennial period is in course of distribution.

FRANCIS A. ENGELBACH, Actuary and Secretary.

*** The Receipts for the Renewal Premiums due at Lady-day are ready for delivery in town and throughout the country.

SPECIAL NOTICE.

PELICAN LIFE INSURANCE OFFICE, Established in 1797,

No. 70 Lombard street, E.C., and 57 Charing cross, S.W.

DIRECTORS.

Octavius E. Coope, Esq.	Henry Lancelot Holland, Esq.
William Cotton, Esq., D.C.L., F.R.S.	Wm. James Lancaster, Esq.
John Davis, Esq.	John Lubbock, Esq., F.R.S.
James A. Gordon, Esq., M.D., F.R.S.	Benjamin Shaw, Esq.
Edwd. Hawkins, Jun., Esq.	Matthew Whiting, Esq.
K. D. Hodgson, Esq., M.P.	Marmaduke Wyvill, Jun., Esq., M.P.

Robert Tucker, Secretary and Actuary.

BONUS.

All Policies effected on the Return System, and existing on the 1st July, 1861, will participate in the next division of profits, subject to such of them as have not then been in force for five years, being continued until the completion of that period.

LOANS

On Life Interests in possession or reversion: also upon other approved security in connection with Life Assurance.

*** For Prospectuses, Forms of Proposal, &c., apply at the Offices as above, or to any of the Company's Agents.

THE STANDARD LIFE ASSURANCE COMPANY.

Established 1825.

LONDON—82 King William street.
EDINBURGH—3 George street (Head office).
DUBLIN—66 Upper Sackville street.

ANNUAL REPORT, 1861.

The Thirty-fifth Annual General Meeting of the STANDARD LIFE ASSURANCE COMPANY was held at Edinburgh, on Monday, the 25th of February. The following results were communicated in the Report by the Directors, showing the operations of the Company during the year 1860:—

	£	s	d
Amount proposed for assurance during the year, contained in 1,384 proposals	807,747	0	0
Amount of assurances accepted, and for which policies were issued, contained in 1,207 policies	705,897	0	0
Annual premiums on new policies	22,565	4	6
Claims by death during the year, exclusive of bonus additions	104,326	14	8
Annual revenue at 15th November, 1860	304,161	13	7
Arising from premiums.. £227,595 4 1			
From interest on the invested funds 76,568 9 6			
	304,161	13	7
Accumulated fund, invested in Government securities, in land, mortgages, &c.	1,805,982	13	6

Average amount of new assurances annually for the last 14 years, Half a Million sterling, being the largest amount of business transacted in that period by any Insurance Company.

WILL. THOS. THOMSON, Manager.
H. JONES WILLIAMS, Resident Secretary.

NOTE.—An Adjourned Meeting will be held early in May, to receive the Report on the Division of Profits for the past Quinquennial period.

GUARDIAN FIRE AND LIFE ASSURANCE COMPANY, No. 11 Lombard street, London, E.C. Established 1821.

DIRECTORS.

Henry Vigne, Esq., Chairman.
Sir Minto T. Farquhar, Bart., M.P., Deputy-Chairman.

Henry Hulse Berens, Esq.	Stewart Marjoribanks, Esq.
Chas. Wm. Curtis, Esq.	John Martin, Esq.
Charles F. Devas, Esq.	Rowland Mitchell, Esq.
Francis Hart Dyke, Esq.	James Morris, Esq.
Sir Walter R. Farquhar, Bt.	Henry Norman, Esq.
Thomson Hankey, Esq, M.P.	Henry R. Reynolds, Esq.
John Harvey, Esq.	Sir Godfrey J. Thomas, Bart.
John G. Hubbard, Esq., M.P.	John Thornton, Esq.
John Labouchere, Esq.	James Tulloch, Esq.

AUDITORS.

Lewis Loyd, Esq.	Henry Sykes Thornton, Esq.
John Henry Smith, Esq.	Cornelius Paine, Jun., Esq.

Thos. Tallemach, Esq., Secretary.
Samuel Brown, Esq., Actuary.

Life Department.—Under the Provisions of an Act of Parliament, this Company now offers to new insurers Eighty per Cent. of the Profits, at Quinquennial Divisions, or a Low Rate of Premium without participation of profits.

Since the establishment of the Company in 1821, the amount of profits allotted to the assured has exceeded in cash value £660,000, which represents equivalent reversionary bonuses of £1,058,000.

After the division of profits at Christmas 1859, the life assurances in force, with existing bonuses thereon, amounted to upwards of £4,730,000, the income from the life branch £207,000 per annum, and the life assurance fund exceeded £1,618,000.

Local Militia and Volunteer Corps.—No extra premium is required for service therein.

Invalid Lives assured at corresponding extra premiums.

Loans granted on life policies to the extent of their values, if such value be not less than £50.

Assignment of Policies.—Written notices of, received and registered.

Medical Fees paid by the Company, and no charge for policy stamps.

Notice is hereby given, that Fire Policies which expire at Lady-day must be renewed within fifteen days at this office, or with Mr Sams, No. 1 St James's street, corner of Pall Mall; or with the Company's Agents throughout the Kingdom, otherwise they become void.

Losses, caused by explosion of gas are admitted by this Company.

The Political Economist.

On Saturday, April 6, will be published a Special Supplement to the ECONOMIST, *price 6d, giving,* IN A COMPACT FORM, *the Balance Sheets and Directors' Reports of* ALL *the Joint Stock Banks in the United Kingdom, as far as the same are made public, with a short account of some of the more important meetings of shareholders.*

THE IMMEDIATE FUTURE OF THE MONEY MARKET.

THE reduction in the Bank rate of discount will be satisfactory to all classes—to the sanguine and enterprising classes who were momentarily annoyed at the recent rise, and to the more cautious and anxious persons who have, like ourselves, consistently approved of the policy of the Bank. *That policy has done its work*:—capital has been brought into the country from many quarters—the drain to America, notwithstanding many untoward circumstances which no one could have anticipated five weeks since, has greatly diminished—the Bank has gained strength steadily and constantly. It is easy to say this would have been the case if the Bank had adopted a different policy. But who can *prove* that it would have been so? Who can show with the least approach to certainty that we should not now have been commenting on very different events—who can say that the drain to America might not have been undiminished—that the foreign capital we have gained might not still have stayed in its own country—that the Bank of England might not have suffered during several critical weeks a serious diminution in its reserve? No one can tell what would have been, and it is idle to speculate upon it. What we can tell with confidence is that the tendency of the Bank measures was strictly right—that the effect of them was immediate both on the foreign exchanges and elsewhere—that the Directors did not wait, as in some former cases, till the mischief was done—that they have used timely precaution, and that they must be prepared to suffer the usual penalty of those who preserve the unwary from danger—they must expect to be told that the danger was imaginary and chimerical.

The rule which has evidently guided the Bank, both in raising the rate and in lowering it, is that of conforming as perfectly as possible to the natural value of capital. The course of the Directors was plain and simple. They had to consider their present liabilities, their present reserve, the probable future demands on the latter, and then, as prudent men, make their decision. Like men of business, they were to estimate both their existing resources and the impending demands on them, and take the responsibility of doing what they thought best. In the present case, we believe they will be rewarded by the approbation—we might say by the gratitude—of the most prudent traders and bankers in the country.

The figures of the last Bank return prove that this policy has been sufficiently effectual to be no longer necessary:—

	£
On the 13th of February the reserve in the Banking Department was	6,356,000
Bullion	11,571,332
On the 20th of March the reserve in the Banking Department was	8,325,000
Bullion	12,701,000

showing an increase of two millions in the reserve, and of more than one million in the bullion.

What, then, are we to say of the future? Are we to look for cheap money soon, for progressive reductions in the rate of interest following rapidly one upon another? Some persons who are guided perhaps rather by precedent than by principle, imagine that we shall. They say, 'After 1847 and '1859, the only occasions when the Bank rate had risen to 'similar points, those rates fell very rapidly indeed. Why, 'then, may we not expect the same now?' The answer is, that the circumstances are different now from what they were on either of those occasions. In 1847 and 1859 we had a panic, and we have had no such calamity now. The effect of a panic is well understood. After a period of great activity, terror, always hitherto caused by the low state of the Bank reserve, paralyses transactions. There is a collapse: trade is at a stand: no one does anything: capital is plentiful, and consequently cheap. The rate of interest which has always been very high just before the panic, in consequence of its inevitable effects declines rapidly to a very low point. But we have had no collapse now—no period of terror—no instantaneous cessation of business. We have not even expected any thing of the kind. As this powerful cause has not been in operation, we must not expect to experience its effects. It is true that trade is not nearly as active as it was; that the enhanced scarcity of capital and consequent high value of money has had a depressing effect which is not likely to pass away; that the state of America is as serious as it is possible for it to be—far more serious than even *we* anticipated, and that this tends and must tend to check business in many quarters. It is true that this slackness of employment inevitably tends to depress the value of money; but it is a slow, chronic, and not invincible cause. It tends to reduce the rate of interest silently and imperceptibly; but it takes time for its operation. It is not to be compared to the sudden irresistible efficacy of a panic and a collapse.

There are, we must not forget, great causes in operation which have raised the value of capital to its present high

point, and which will tend to keep it there. We have imported large quantities of many commodities:—

	£ 1859.	£ 1860.
Wheat	8,713,532	16,554,083
Cotton	34,559,636	35,756,889
Barley	2,274,000	3,356,903
Oats	1,739,917	2,624,158
Tea	5,612,545	6,944,042
Timber	3,686,280	4,352,559
Wool	9,556,116	10,704,922
Wine	2,781,040	4,201,434
Butter	2,080,143	4,078,017
Cheese	1,039,180	1,597,569
	72,242,389	90,170,576

showing an augmentation of more than 17 millions in the import of these articles only.

It is idle to suppose that this immense investment will not produce a great effect on the money market for a considerable period.

It is to be remembered, too, that we shall have no supplies of gold from America for some time. Even if it should appear that the drain of gold *to* America is stopped, it seems clear she will send us none. A country in confusion has a curiously absorbing power over the precious metals. Paper currency at such times, if not in discredit, is at least not specially and remarkably favoured. Every one in the vague view of impending calamities hoards a little money, and he will hoard, where he can, in specie, for reasons which are obvious, and which need not be explained. How far America will exemplify this tendency, we cannot say beforehand, but she is certain to do so to some extent. It is from another form of the same secret influence that the banks throughout the Union are "keeping strong." They do not know what may be coming, but they are endeavouring to be prepared if they can. It is, therefore, probable that the usual importations of bullion from the United States, which amounted

	£
In 1859 to	9,672,981
In 1860	4,792,582

will for some months be discontinued.

It is, therefore, we think, unlikely that money will very rapidly fall in value. We are far from presuming to prophesy in a matter so complicated and so difficult, but still the reason we have given seems to us to warrant considerable confidence in the conclusion we have drawn.

It is true that the example of the Bank of France may be quoted against us, for the managers have rapidly lowered the rate of interest from 7, first to 6, and again to 5. But it is very dubious whether the Bank of France are acting wisely. They were very slow in raising the rate of interest; when they did so, the effect was instantaneous and immediate; but it is possible that the same powerful influences which made them so unwilling to take the right course may now be exerted to prevent their adhering to it. It is possible that the financial necessities of the Government may have had some influence as well as considerations of pure banking. But, be this as it may, the causes which we have enumerated are of a nature to operate more powerfully in England than in France, or in any other country upon the Continent; and it is from the operation of these that we are inclined to expect a continuance of a high value of money in Lombard street for a considerable period.

AMERICAN AFFAIRS.

The inaugural speech of the Republican President, cautiously worded as it was, seemed at first to be generally construed to mean coercion and civil war. The later accounts from Washington, however, by no means seem to support this conclusion. On a very careful perusal and analysis, it seems to reserve the right of the United States to use compulsion if it should prove that a policy of gentle compulsion would end in a peaceful solution, but otherwise to indicate an intention of waiving it. This is the view taken of the inaugural address by President Lincoln's old rival, Senator Douglas, of Illinois, who has given his cordial support to the Administration under existing circumstances, and expressed his belief that the speech does not threaten coercion. In the face of it, North Carolina has decided against holding a Convention, and it is stated that had she decided in favour of a Convention, the deputies elected were two to one in favour of Union. The Virginia Convention, closely canvassed, appears to yield a certain majority in favour of Union, though no vote has yet taken place. Very strong Unionist speeches have been made in the Virginia Convention,—and the right of the President even to coerce the seceders so far as he can effectually do so has been openly maintained there. Arkansas, the most Southerly of the non-seceded States, has elected Unionist officers in her Convention,—and as far as we read the signs of the times, we should say that the feeling against secession is increasing decidedly among all the Northern Slave States,—all, indeed, except the actually seceded Gulf States.

But it will require the greatest prudence on the part of the Administration if it is to keep the Northern Slave States in the Union,—as it evidently desires and intends to do. The extreme Republican and Anti-slavery party are already denouncing Mr Lincoln's Administration for this desire and intention. It is their wish,—and we are far from saying it might not be the wisest policy of the North,—to seize the present occasion for wiping out the blot of slavery altogether, and founding a Union that should be devoted wholly to the interests of political freedom. Nor could we regret the result. But it must be remembered that there are higher interests at stake than any merely ambitious attachments to the traditions of American greatness, in the attempt to retain the Slave States, or a large portion of them. The first enterprise of the Southern Federation, once fairly afloat, would be a war with Mexico for the spread of slavery Southward. This would be the greatest calamity that the anti-slavery cause had yet suffered,—and could not but end in the renewal of the Slave Trade between Africa and the South. It may well be argued, then, by the Republican leaders, that to restore the Union—if that were still possible without ignominious compromise—or, if that be hopeless, to keep in the Northern Union an overwhelming superiority of force, so as to exercise a powerful check on Southern ambition, is a policy worthy some temporary sacrifice.

And it is certain that if the stream of secession could now be effectually checked, and the remaining States secured to the North, the Southern Confederation would be, comparatively speaking, weak, poor, and helpless; not so populous as Piedmont before its recent accessions of territory,—containing less than 5,000,000 inhabitants altogether, and nearly half of these, slaves. The revenue of the seven Gulf States in the year preceding secession was not, from all sources and for all purposes, including school revenues, so much as 2,000,000*l*, and we all know how little in the way of an effective standing army—to say nothing of an army of 50,000 men, for which the Southern Confederation, it is reported, has passed a Bill—can be done with such a revenue as that,—including, as it does, land sales, which cannot be a permanent, and are never a safe source of revenue in depressed times. On the other hand, the two Northern tiers of Slave States—namely, North Carolina, Tennessee, and Arkansas, which would border the Southern Confederation, and Virginia, Kentucky, and Missouri, which would border the Free States, without counting Maryland and Delaware, have together a population of above 6,500,000, of whom barely 1,500,000 are slaves, so that they are clearly not unlikely to modify their institutions in the direction of the Northern wishes, if the Union could be retained or confirmed. Of these, the two States in which by far the greatest proportion of slaves to total population is found, are Virginia and North Carolina, where the proportion is about one in three. But of these, Virginia, being a border State, and having a worked-out soil, is never likely to join the South, if she refrain now. But if all these States can be retained, the North would not lose a sixth part of its total population, and not a ninth part of its free population by the secession, and would, if governed by a strong Administration, be able as an external power to check far more effectually the ambitious and aggressive designs of the small Southern Confederation, than they have ever been able to do hitherto with a divided Representative Chamber and thoroughly Southern Senates and Executives.

We think, therefore, that it is worth Mr Lincoln's while,—even in the interests of the great cause which the Republican party has adopted,—to retain the remaining Slave States in the Union, if he can do so without any sacrifice of principle to the South. In this respect his inaugural address is as satisfactory as his previous speeches. He has always declared his resolve to abide by the Chicago platform, and to hold to the right of Congress to rule in the Territories. He

adds distinctly enough in his address that though the Supreme Court in the United States has absolute power to declare the meaning of the Constitution, it is idle to assert that the Congress has not, in a constitutional way, the power to alter that Constitution;—an assertion which no doubt points to constitutional steps for restoring the power of Congress in the Territories, in case the Dred Scott decision be not overruled by the same court in future. We are glad to see that the Chief Justice Taney, who is, we believe, above eighty years of age, and can scarcely be expected to retain office during the whole of Mr Lincoln's Administration, had not resigned, as it was stated that he intended to do, in order to make room for a younger Southern politician before Mr Buchanan's term of office expired. The vacancy, when it occurs, will probably soon be filled up by some lawyer less subservient to Southern interests than the judge who decided the Dred Scott case.

On the whole, we see great reason to hope that the President's speech does not mean civil war, but a tentative policy, of which an attempt to collect revenues and reinforce garrisons might form an element, in case there were no reason to fear that it would lead to an open strife. This is the view deliberately taken, as we have said, by Mr Douglas, who drew especial attention to these words in the inaugural address:—"The course here indicated will be followed, "unless the current of events and experience shall show a "modification or change to be proper, and in every case or "exigency my best discretion will be exercised, according to "the circumstances usually existing, and with a view and a "hope of a peaceful solution of the national troubles and the "restoration of fraternal sympathies and affections." And he argues from them that the President means to reoccupy the forts of the United States, or not to do so, according as circumstances lead him to the conclusion that this course is or is not compatible with peace. Nor is the alternative suggested really without a meaning. We have seen that North Caroline has now gone in favour of Union; but a month or two ago she was seizing on United States property and forts with as little scruple as the sister States. Here, then, we have a State with a strongly divided feeling,—with a majority that was recently believed to be only a large minority in favour of Union. The same thing may happen, of course, in any of the other doubtful States; and the President may think it judicious and safe to use his power in re-occupying in any such case as this, where he knows that he will have the support of a very large section of the State itself, when he may not think it wise to do so in a case where it is obvious that such a proceeding would issue in immediate civil war.

On the whole, the prospects of political affairs in America are certainly less gloomy than they were supposed to be when the President's inaugural address was first received. Mr Lincoln is impressing the American public with a considerable sense of his shrewdness, reticence, and caution,—of his desire to feel his way very carefully before he takes any strong step,—and of his deep wish to avoid the horrors of a fruitless civil war.

THE TWO INCOME TAXES.

It is very satisfactory that Mr Crawford did not succeed in augmenting the work of the Committee on the Equalisation of the Income Tax, by referring to it the totally distinct question whether the possessor of an income derived from India should pay the Indian income tax as well as the English. The Committee has already a task quite sufficiently difficult. It has to consider the various schemes, which are sure to be numerous, for equalising the pressure of the income tax on all the different sections of the community. It has to hear the grievances of the mercantile and professional classes, who say that their precarious income is unjustly taxed as if it were permanent and certain,—it has to hear the grievance of the landowner, who says that it is unjust that he should pay on a gross income, subject to large deductions, exactly the same rate which the fundholder pays on a net income, subject to no deductions, and entirely applicable to expenditure,—it has to hear the philosophical argument that some of these apparent hardships are the perfection of real justice,—it has to hear the familiar official argument that these evils are essential to the efficiency of the impost, and that magnify them as we may, they are less than would exist under any other searching system of direct taxation. This accumulation of complicated difficulties is quite enough for a single Committee, without adding to them another question of a totally different nature, depending on entirely different considerations, and requiring for its decision a distinct set of facts and arguments.

Moreover, the question which Mr Crawford suggested, though very important, is not one which requires the investigation of a Select Committee. It is essentially a simple question: it has no ramifications which it is desirable to trace, and no latent details which it is needful to elucidate and explain. The House of Commons heard on Tuesday evening nearly everything which could usefully be said upon it.

It is alleged by the opponents of the existing practice, that the imposition of the two income taxes on the same income is an evident injustice, that the two together are more than the single income will bear, and that in the present state of Indian finance it is not desirable to impose so startling a burden upon Indian securities; and at first sight there seems to be some force in these arguments. It seems as if an exceptional and peculiar burden were placed on a particular kind of property from which all other kinds are exempt; it seems as if one man was taxed twice while all other persons were taxed only once. A little examination, however, will entirely remove this impression.

No exceptional burden is, in fact, imposed at present upon Indian incomes. A person who lives in India pays the income tax in India; he enjoys the protection and derives the benefit of the Indian Government, and, as a matter of course, he must expect to pay for it. If it were not for the Indian Government he would have *no* Indian income; whether he is a fundholder, or a merchant, or an annuitant, the protection of the Indian Government is essential to him; and as long as he enjoys the benefit, he must not hope to escape the charge. A Canadian pays to the Government of Canada, an inhabitant of Demerara to the Government of Demerara, if not in the form of an income tax, then in some other mode, and the residents in India must do the same.

How, then, is the case altered when the possessor of the Indian income comes over to England to enjoy it here? The truth of what has been said is not altered at all. He still enjoys the benefit of the Indian Government. His property is still protected by it; he still subsists upon an income which would cease if the Indian Government ceased, which is liable to all the chances of a half civilised Oriental country, which is exposed to all the accidents and contingencies that may impair or endanger our Indian Empire. For this he should pay as before. He has no more right to enjoy his income from India without paying the Indian charges on it, than a Canadian to enjoy his colonial income without paying the colonial charges upon it. *Where* he enjoys it, does not matter. So long as he enjoys the results of our Indian rule, he should in fairness and in justice contribute to its maintenance.

But when an Anglo-Indian comes over to England, he enjoys the benefits of the English Government likewise. He derives the same advantages and blessings from it as all other Englishmen. As a matter of course, he should pay for it to the same extent and in the same way. He spends his income here with all the comforts and appliances of our complicated civilisation, and to the necessary expense of that civilisation we have a right to claim that he shall contribute. He ought not to enjoy it gratuitously; if he did so, some one else would have to be unjustly taxed because he was unjustly exempted. It is just, therefore, that he should pay the English income tax to the English Government, which enables him to enjoy his income; and it is just that he should pay the Indian income tax to the Indian Government, which maintains and preserves his property, which ensures his having an income at all.

It is, indeed, said that India and England are substantially a single country—that the two Governments are in fact one—that the formal distinction between the two is no reason why the same person should pay two taxes. But this argument rests upon a patent fallacy. The two Governments are not really one, for their systems of taxation are not identical. If the revenue of India and the revenue of England were thrown together, and applied to the joint ex-

penses of the two countries, the two Governments would be financially one, but until that is the case they are financially two. Whether the Government of India should or should not be distinct from the Imperial Government is a question which has been much discussed, and on which we have often expressed our opinion; but, so long as the two are separate, it is clear that those who derive a benefit from both should pay more than those who derive a benefit only from one. It is not in the least necessary to depart from the just and usual maxims of fiscal policy in order to give an exceptional advantage to Indian securities. Recent experience shows that such securities at this very moment are remarkably popular, if they are presented to the public in a convenient and acceptable form. Great numbers of persons are willing to encounter the risks attendant on Indian securities for the sake of the difference of interest between them and Consols; and upon such a point their opinion is absolutely conclusive.

LORD PALMERSTON'S POLITICAL ETHICS.

Lord Palmerston has twice within the week had to reply to an attack upon his political ethics; in neither case has he been wholly successful, and in one case very much the reverse. With all his high qualities, his political morality is not of the most scrupulous kind. He is a utilitarian, and like most statesmen who have been acclimatised to the atmosphere of the joint responsibilities of a rather miscellaneous Cabinet, his treatment of all questions hinging on individual responsibility is, to say the least, free.

For the mutilation of the Affghan despatches of Sir Alexander Burnes, discussed on Tuesday night, there is no evidence that he was personally responsible. But he at all events assumes the duty of defending the course taken. The charges which have been made in the matter appear to us highly extravagant. It would be absurd to maintain that the Ministers are bound to produce to Parliament evidence of all the controversies which may have taken place between the Government and its subordinates, whenever it produces papers on any particular subject. The object being simply to show to Parliament the grounds on which the Government have acted, no doubt it must often be necessary to omit largely. But the omissions from the published despatches of Sir Alexander Burnes appear to be something more than omissions. Important omissions are made often without any notice of a hiatus, and it is admitted on all sides that the context is frequently so much changed as to convey the distinct impression that Sir A. Burnes had strongly recommended the policy against which he was strongly protesting. This cannot be justifiable. When passages of moment are omitted, some indication that there are such omissions ought always to be given. If this had been done in the case of Sir Alexander Burnes, and it had been evident on the face of the documents published that they did not profess to represent the drift of the despatches, no fault could be found. But there is no excuse for publishing extracts which really *reverse* the impression that the originals would produce, without any intimation of their true character.

Lord Palmerston treats the whole thing as a matter of expediency. He says it was only necessary to know the grounds on which the Government of India acted, and that Sir A. Burnes's views were unimportant. Grant it; still, however unimportant, it was not justifiable to give Parliament the impression that the agent on the spot held views strongly supporting the Government when he held strongly opposed views. It was not the bounden duty of the Government to give his view at all. But it was their duty not to misgive it. It was not fair to Parliament, because, rightly or wrongly, the members would be practically misled, and more or less be biassed by the views of the agent resident at Cabul. It was not fair to Sir A. Burnes, because, however unnecessary to represent his view at all, it was a duty to avoid misrepresenting him. And it would have been exceedingly easy to effect this, by giving confessedly as mere fragments, passages which when placed in close context carry the false effect of a continuous argument. However little the Government may have wished to misrepresent Sir A. Burnes, that they must have *foreseen* this result from the frequent omission (without any notice given) of considerable passages, every one seems to admit.

The other question to which we referred is a matter of the day, and affects Lord Palmerston individually, and we think seriously. Those who really wish to see the character of the Ministry of this country raised above all suspicion of subserviency to unavowed side-influences, ought not to rest satisfied with Lord Palmerston's explanation on Friday week of his course in the matter of Mr Turnbull's appointment. We should not revert to the subject had it turned out that Mr Turnbull put himself out of Court by a spontaneous resignation. It was in that case open to Lord Palmerston to say, what he did say to Professor Pearson and the deputation, that the appointment was one the responsibitity of which lay with Sir John Romilly and not with himself,—that viewing it in in that light, he had felt that no interference on his part was justifiable unless specific proof of Mr Turnbull's incompetence for his duties could be produced,—that only after his resignation had been tendered and accepted by Sir John Romilly did it become him to consider the question of the fitness or unfitness of *reappointing* the same man, and that then first he had determined that a reappointment of one whose fanatical temper had aroused distrust in an important body of men, did not seem to him advisable. This was tenable ground, though we should prefer to see a Prime Minister defer less to public opinion in such a matter, and be guided more by his own conscientious judgment on the question whether or not a more competent public servant could really be found. But still if Lord Palmerston chooses to say that to command the confidence of the Protestant Alliance and its constituents is one of the most important of the positive qualifications of any officer who has to deal with public documents, we can only express our dissent from such a conclusion with sincere respect to those who hold it. It is one of these points on which, as Dr Johnson said of a still more disputable matter, "perhaps no man shall ever know" the correct view, or whether there be a correct view.

But Lord Palmerston, after defining this ground in the clearest manner in his interview with Professor Pearson and the other supporters of Mr Turnbull, has since entirely changed it; and the change unfortunately appears to be due to the appearance of a new element in the discussion. It was stated in the House of Lords that Lord Palmerston had *not* left everything to the responsibility of Sir John Romilly until, by the resignation of Mr Turnbull, the question of a virtual reappointment came before the Treasury. On the contrary, it was said that he had distinctly intimated to Sir John Romilly not only his own private regret that the appointment had been made, but his intention not to defend it, if it should be attacked in the House of Commons. Lord Grey, in a very temperate speech, said that if this were true, he could not acquit Lord Palmerston of fault in the matter. And Lord Palmerston confessed in the House Commons on Friday week that this was true. How, then, does the matter now stand? Was Mr Turnbull's resignation in any true sense voluntary? Was it not in fact brought about, *not* by the outcry of public opinion, but by the act of the Prime Minister? Lord Palmerston says that Mr Turnbull acted like an honourable man in resigning directly he found that he did not command the confidence of an important part of the opinion of the kingdom. But that was *not* Mr Turnbull's reason for resigning. He would have thought it his duty to challenge that public opinion,—and to prove his own strict honour in dealing with public documents, had not a different consideration been presented to him. He found that Sir John Romilly was to bear the brunt of all the opposition raised against him, and that Lord Palmerston had distinctly warned Sir John Romilly that, differing from him in judgment as he did, he could not defend the appointment in the House.

Now this was quite a new phase of the matter for Mr Turnbull as "an honourable man;" and had Lord Palmerston acted in the spirit of his reply to the deputation, he would clearly have taken a very different course. He would have declined to enter into the merits of the appointment at all, either with the Protestant Alliance or the House of Commons. He would have said, 'The matter rests not with me, but with 'the Master of the Rolls. I have perfect confidence in Sir 'John Romilly's conscientiousness and integrity, and I am 'not called upon to investigate his appointments. Unless 'you can produce proofs of Mr Turnbull's neglect of his 'duties, I must decline to enter further into the matter.' Had he done this, every one knows that the opposition would have been crushed in an evening's parliamentary conversation.

That the real line pursued by Lord Palmerston was not perfectly fair and candid, no impartial mind can dispute. He admits that there was no just reason for *removing* Mr Turnbull; but at the same time asserts that as he had *of his own free will resigned*, the question of a virtual reappointment should be governed by a totally different class of considerations. It then appears that he had, in fact, himself led to that resignation,—not directly indeed,—but by a course that in the case of any sensitively honourable man could not but result in a resignation;—namely, by privately intimating to Sir John Romilly that he must defend his own appointee without any aid from him. Lord Palmerston asked the House if it was fair to expect him to defend an appointment which he honestly thought injudicious. We reply in his own words, that he was not responsible for the appointment, and had no occasion to consider and still less to avow his opinion, as to its judiciousness, or injudiciousness, unless proof were brought of injury to the public service. His duty was to have confidence in Sir John Romilly, and to leave Sir John Romilly to continue or withdraw his confidence in Mr Turnbull as he saw fit.

As we condemned Mr Turnbull for resigning under the pressure of the Protestant Alliance, we must now distinctly express our conviction that he was not guilty of that cowardice,—and that he does not therefore merit Lord Palmerston's praise for acting so promptly on the hint of a hostile public opinion. He resigned out of personal deference to his patron when that patron was virtually disowned by the Prime Minister. In so doing he acted well. But we cannot but think Lord Palmerston's conduct worthy of serious blame in giving Mr Turnbull such a reason for resigning.

THE WORKING OF THE AMERICAN TARIFF.

Mr Buchanan, either from friendship for his Pennsylvanian friends, or from the grudge he bears to his Republican enemies, declined to veto the obnoxious tariff on which we commented last week, and it has now become law. How will it work upon our exports to America? Our remarks last week on this subject have been somewhat misunderstood. We stated that if America would not admit English manufactures, it would be impossible for us to go on buying her exports. But, of course, we did not mean to say that this would result from any childish feeling of pique on the part of England. So long as the United States is the cheapest market for grain or cotton, so long we shall certainly buy it there. But if all our imports are to be really excluded from the Northern Union, how long will it be the cheapest market for grain? Prohibition, if it is practically enforced to any great extent, will prevent us from paying for American products with English products. But the grain being cheaper than we can get it elsewhere, we shall be obliged to send bullion to purchase it with. The result of this course would be that the United States markets would in time be flooded with bullion, and, as a result, all prices would rise. Whenever the price of grain had so far risen that the United States were no longer the cheapest market, we should, of course, cease to buy it.

But it may be said that the facilities for producing grain, in the North-Western States especially, are so infinitely superior to any facilities for manufacture or other industry, that the great Prairie States would go on producing grain even after the prices had risen, and would lower their prices to the level at which England would again become a buyer. No doubt that might be the case; and so far the only working of the tariff would be that the Western farmers would lose the difference in diminished profits. The grain would not be dearer than before, but all other commodities in the Union would be dearer in consequence of the general rise of prices, and consequently the farmer would be poorer than before. But even so, a time must come when by the constant influx of gold other prices would be too high to allow the farmer to sell his grain to us at the rate at which alone England could afford to take it, and then our custom must cease. Of course, long before this, the North-West would, we hope, rebel against a tariff so foolish and iniquitous. But it is strictly and scientifically certain, that by prohibiting the import of manufactured goods, the United States must in the end deprive their own agricultural population of the magnificent facilities for a grain-exporting country which they now possess. The natural facilities would remain, but the prices of all commodities would rise so high, that the farmer could not afford to sell at prices that would tempt an external buyer, and so he would be limited to producing for the consumption of the tariff-bound States alone.

THE IRREMOVEABLE POOR.

Mr Villiers has prepared and brought in a Bill "to amend "the laws regarding the removal of the poor and the contribu-"tions of parishes to the Common Fund of Unions," which in its main outline at least is a very important step in the right direction. The great obstacle in the way of the discussion of these somewhat technical subjects by the public journals, is this, that of the millions who pay poor rates, so very small a proportion in the least understand or care to understand the principle on which they are assessed, and its actual operation on the interests of the poorer classes. Yet not only do the Poor Laws affect very materially the interests of all paupers and all who are in any danger of becoming paupers, but in their present form they are amongst the most formidable obstacles to the general improvement in the condition of the working classes,—more especially of agricultural labourers. We refer mainly to the inducement which the present law holds out to large landed proprietors to resist the building of residences suitable for the labouring classes within their own parishes,—to keep at arm's length those who are ever likely to become chargeable to the country, in order that the burden may fall on other backs. The present law gives the most direct encouragement to this selfish instinct of the landed proprietor in what are called "close parishes," since it saddles the parish in which there are many "settled" poor with a double burden,—(1) the maintenance of its own settled poor,—(2) a contribution to the "common fund" of the Union that is large in proportion not to the size or wealth of the parish, but to the relative number of its "settled" poor; and this latter burden is often much heavier than the first.

The present state of the law is as follows. A poor man can obtain a "settlement" on a parish in various ways,—through his parents, by paying poor's rates himself, by marriage, and in other ways. Once "settled" on a parish, he is chargeable on that parish and nowhere else, unless he gets a new settlement. But as this law gave rise to a very oppressive system of removing paupers from parishes where they had long resided and were well known, to parishes they might never have visited since their childhood, a new law was passed in 1847, making a poor man "irremoveable" who had resided for five years in any one parish. He does not gain a *settlement* there, but unless he change his residence to another parish, he cannot be removed to the last parish where he had acquired a settlement, but must be relieved in the Union in which he has thus resided for five years. But the cost of the relief of these "irremoveable" poor is charged not on the parish, but on the Union of which it forms a part; while the cost of relieving the "settled" poor is charged on the individual parish. But then comes the anomaly that each parish in any Union contributes to the common fund of the Union out of which these "irremoveable poor" are supported, *not* in proportion to its own wealth and resources, *nor* in proportion to the number of resident irremoveable poor in it, but in proportion to the average number of settled poor it has had for the previous three years; so that if parish No. 1 (say, very small and poor) has had 100 poor "settled" in it for three years, but no "irremoveable poor" resident in it, and parish No. 2 (say, large and wealthy) has also had 100 poor "settled" in it for the last three years, but 1,000 irremoveable poor resident in it besides, the two parishes will contribute equally to the "common fund" of the Union, and will give equal sums towards the support of these 1,000 irremoveable poor. Hence it is obvious that every parish has a *double* motive for evading, so far as it can by excluding the houses of the labouring classes altogether, the present poor law; since it not only becomes liable to maintain its own "settled" poor by admitting them, but to contribute large and disproportionate shares towards maintaining

the "irremoveable" resident paupers of other parishes in the same Union. It escapes both liabilities alike, at present, by keeping the residences of the poor out of its limits altogether. The consequence is that there are numbers of close parishes where the landlords will not allow cottages for labourers to be built at all,—or in no kind of proportion to their wants,—so that they may have to walk five or six miles a day to their work, and even then frequently be obliged to pay exorbitant rents to some speculative builder who has obtained a small piece of ground at the nearest point to any such exclusive parish, and covered it with unhealthy and inconvenient cottages. It is, we need not say, a disgraceful and pitiable condition of things, when great landed proprietors, instead of devoting their energies to the due discharge of their trust as the natural protectors and friends of their own labourers, are scheming how, at the expense of the comfort and even health of their labourers, they may secure the exemption of their estates from the onerous taxes by which the poor are supported in time of want. We say it is a disgraceful and pitiable condition of things; but not the less are we bound to remedy any injustice which gives a real excuse to such landlords for their selfish and heartless proceedings.

Mr Villiers' Bill proposes a considerable improvement on the present system. In the first place, it shortens the time within which residence secures a poor man from "removal" from five to three years. In the second place, it permits a man to gain the status of "irremoveability" by residence anywhere within the Union, instead of in a given parish,—so that, though he may have changed his parish, if he has not moved out of the Union within the last three years, he is "irremoveable." These measures, of course, simply tend to increase the number of "irremoveable poor" by rendering it easier to satisfy the conditions,—to increase the number of "irremoveable poor" chargeable on *Unions*, and diminish the number of "settled poor" chargeable on parishes.

But this would barely diminish—nay, it might increase the injustice, did not the Bill go one step further. It proposes to change the system by which the contributions to the "common fund" of the Union is fixed. Instead of making each parish contribute to the Union fund in proportion to its own average number of "settled poor," it proposes to enact that each parish shall contribute in proportion to the "rateable value of the lands, tenements, &c., "in such parishes respectively, assessable by the laws in "force for the time being to the relief of the poor, whether "the lands, tenements, &c., be actually rated or not." In other words, the parish is to contribute for the future to the common Union fund out of which the "irremoveable poor" are to be maintained in proportion to its annual wealth, whether it have settled poor of its own or not. This provision, if carried, must clearly do away in great measure with the selfish inducement to the landowner to exclude poor people from his parish. At least he will no longer escape in that way his liability to contribute to the maintenance of those poor who have acquired a right to be supported by length of residence. And, under the proposed Bill, this will be probably the most important class of paupers. All that landlords could evade, after the passing of this Act, will be the cost of supporting any "settled poor" in their own parish,—and this is frequently far the least formidable element in a poor's rate.

We trust the Bill will pass. We know it is not by merely diminishing the motive to selfishness that a great reform can be introduced into the habits of a class like that of the landed proprietors in "close" parishes. But it is something to take away from them the excuse of an obvious injustice. For the rest, we must trust to their own feeling of the grave responsibility entailed on the landowner by virtue of his position. If he cannot see that it is his duty to lighten the burden of life as far as he can to labourers who labour on his estate,—to do what in him lies to provide them wholesome and decent dwellings within easy reach of their work, even though he may lose something in rents in consequence through the burden of the poor's rate,—it is hopeless to convince him by argument. If this Bill, which will remove or lessen his *right* to complain, should pass,—we must trust the rest to the daily increasing pressure of social opinion on those in high station who neglect, for selfish ends, the palpable duties of their posts.

Agriculture.

AGRICULTURAL SOCIETIES.

For some time past the questions relating to the management and conduct, the advantages and abuses of agricultural societies, have received at the hands of the farming classes very practical treatment. The general tendency has been to recommend the amalgamation of small local societies into county societies, or into societies embracing even wider areas. Thus, at the Oxford Farmers' Club, which is itself the result of the amalgamation of several societies, Mr Cother proposed that still further junctions should be sought, so as to form a great Midland Counties' Agricultural Association. That such large associations can alone be permanently sustained as effective exhibitions for live stock we have always asserted, and experience completely verifies that view. Mr Cother, therefore, as an eminent breeder of Cotswold sheep, as well as a Shorthorn breeder, very naturally advocates large areas for associations formed to promote agricultural enterprise. Small societies either produce only very inferior live stock at their shows, or, if some first-rate breeders happen to live in the localities, the shows consist of little more than selections from the great breeders' stocks, against which ordinary farmers are reluctant to compete. For stock show, therefore, the point seems to be virtually decided in favour of county or still larger agricultural societies. But there seems to be still an opinion amongst farmers that for ploughing matches, for showing farms, or root or green crops, and for exciting emulation amongst various classes of farming labourers in the performance of their duties, local societies, comprising only small areas, are most likely to be useful. We throw out of the matter all consideration for such local societies as, under the disguise of agricultural associations, form only local rallying points for political squires and party influence. Such so-called agricultural societies have almost died off, and no farmer thinks of them otherwise than as nuisances. Such local societies as yet subsist are turned *bona fide* to the purposes of practical agriculture. The great difficulty is to keep up a small agricultural society, for even where they have monthly meetings and discussions, the interest excited scarcely suffices to attract a large attendance, and without a full attendance —to say nothing of the scanty pecuniary resources it implies—no such society can flourish.

We have not seen this subject better handled than it was lately at the *Over* (Cheshire) *Agricultural Society*, where Mr Richard Dutton read a paper on "Agricultural Societies; their Advantages and Abuses, with some Suggestions as to their Improvement." The lecturer, evidently a farmer, regarded his subject from a farmer's point of view, and applied himself to an earnest and practical review of the circumstances affecting agricultural associations as engines to improve English husbandry. He recognised the period of 1836 or 1837 as the time since which the genuine agricultural associations (with a few exceptions) have been formed, and that "when the corn laws were abolished, every intelligent farmer said that the only chance of successful competition with the foreign producer was an improved cultivation of the soil, so as to extract from it a larger amount of produce; and hence greater attention was directed to societies having for their object the promotion of agricultural enterprise, the improvement of our breeds of cattle, and the general elevation of our agricultural labourers and farm servants." And he laid great stress on agricultural enterprise, as meaning "the bringing a larger amount of intelligence and capital to bear upon the cultivation of the soil." The best farmer is not the man who lays out most money on his land, "but he who combines so much intelligence with his outlay that his capital yields him a fair remunerative return." He believes that the Royal Agricultural Society and other associations, large and small, have occasioned a great and wholesome stimulus on the minds of farmers, and have put before them implements and machinery for the cheaper and more effective performance of farming operations which the events of our time are rendering essential to success. Mr Dutton said, "If there is one thing more apparent than another in the times in which we live, it is this—that labour is becoming scarcer and dearer every year, and what with the education of the labouring classes fostering a desire for other employments, the constantly increasing demand for labour, and the inducements to emigrate to our colonies, a very much larger amount of farm work must be done by machinery than has been done hitherto; or a price will have to be paid for its performance which will be inconsistent with profitable cultivation." Such is the present aspect of the agricultural labour question in our manufacturing districts, and in a minor degree in nearly all, if not all, our agricultural districts. This is far more efficient for the elevation of our farm working classes, than any system of stimulus by prizes, or local trials of rural skill. But it is quite true that the rise of wages *must seriously affect* the farmer who does not avail himself of the aid to be derived from enterprise and capital.

In regard to societies which offer such prizes, Mr Dutton would not discontinue them; "but," he says, "I freely confess to you that I know no locality in which as the result of our premiums I could honestly say that very much had been done.....I am less sanguine of good results from agricultural societies in this department of their labour than any other; and this arises from so large a proportion of our young people in agricultural districts

preferring other and more profitable employments, causing such a diminished supply of good agricultural servants that the supply is by no means equal to the demand, more especially for that class of male and female servants in agriculture that reside in the house. A gradual rise in wages has been going on for some years, but it seems to me highly probable that a very much higher scale of wages must be paid before the tide can be turned so as to draw into our employment a larger number of the sons and daughters of the working portion of the community." Here, again, we must bear in mind that the speaker is in a manufacturing district, where the opportunities offered to farm workmen of improving their condition are greater than in the purely agricultural districts. But the course indicated is going on everywhere. We must make farm work as beneficial to the workmen, all things considered, as other employments. Manual labour will gradually become more costly, but at the same time it will become more valuable, for a well-paid labourer, or class of labourers, is ever more useful to the employer, if he knows how to direct labour advantageously, than an ill-paid labourer or class.

On the subject of stock shows, Mr Dutton enlarged, and strongly protested against the high condition in which most of the animals are exhibited. This is a point which cannot be summarily dealt with. And here perhaps the wants of his locality gave a bias to his views. The great object of the Cheshire farmer is dairy stock, and he admitted that the dairy cows of that county had been greatly improved of late years, mainly through the use of well-bred bulls. Now have not these well-bred bulls become what they are through the much deprecated high feeding? And although it has been said the character of the cheese has not improved with the improvement of the Cheshire cattle, yet "the money value of the article in the gross is immensely greater than it was" fifty years ago. The prizes offered in the county for green crops had certainly led to an increased cultivation of such crops, and to a consequent improvement in the condition of the cattle.

Another advantage claimed by Mr Dutton for agricultural societies was, that they "produced a good feeling between landlord and tenant," and that the meeting of men of different ranks at agricultural dinners is beneficial. But he did not look for mere compliments or political speechifying as the useful result of such meetings. On the contrary, he looked for a practical gain to agriculture from the better knowledge landowners and their agents might obtain of the feelings and requirements of farmers. Thus, says Mr Dutton, "very much has been said and written in connection with our annual gatherings upon the subject of farm agreements. On many estates great improvements in the covenants have been the result, but still there is great room for improvement; and *if we can* induce owners of large estates and their agents to mix freely with us in our annual gatherings, greater confidence will be felt, and more liberal covenants follow." We apprehend there are too many causes, social as well as economical, which will prevent any very useful personal intercourse between the great body of the landowners and the farmers from taking place; but there would undoubtedly be much good on both sides if the wants and wishes, the difficulties and obstacles, of the farmers could be constantly or frequently brought under the personal attention of the landowners. But this is just what our English landowners most carefully avoid. Their land agents mix with the farmers pretty regularly at farmers' clubs and elsewhere, but for the most part the agent only acts as a buffer to diminish the direct pressure on the landlord of the tenant-farmers.

The suggestions offered as to the arrangements at the annual dinners are very just. The proceedings ought to be made more interesting to farmers generally by omitting all the formal and irrelevant toasts, such as the Army and Navy, the Bishop and the Clergy, the Members for the County, the Volunteers, the Magistrates, the Press, and so forth, which really occupy, at least uselessly, the greater part of the time during which the company can be kept together, and drive off all really agricultural toasts to a late period in the evening when there are few left to discuss them. The agricultural toasts should come at once, and then useful and practical remarks would frequently be made and elicited.

Without rating the value of agricultural societies nearly so high as Mr Dutton does, we regard the temper and spirit in which he has dealt with them, and the suggestions he has made about them, as indicating the steady and practical progress which the best classes of our agriculturists are making.

Literature.

COMMERCIAL LITERATURE.

THE AMERICAN ALMANACK FOR 1861. Crosby and Nichols, Boston. Trübner, Paternoster row.

THE appearance of this valuable almanack has never been so eagerly wished for as at the present crisis. Every one has been anxious to get the latest and most authentic information about the American States, especially since it was known that the Census had been completed. The results of the Census of 1860 are given approximately in this number, but we are told that some of the details are liable to revision, as there had not been time to wait for its revision and publication in its final and authentic form. The following information as to the Seceded States may not be unwelcome:—

	Free Population. 1860.	Slave Population. 1860.	Total. 1860.	Area. Square miles.	Debt. 1859. dols	Income. 1858. dols
South Carolina	308,186...	437,185...	715,371...	34,000...	6,192,743...	1,059,280
Mississippi	407,551...	479,607...	887,158...	47,151...	7,271,707...	624,020
Louisiana	354,245...	312,186...	666,431...	41,346...	10,023,303...	3,544,450
Alabama	520,444...	435,473...	955,917...	50,722...	5,098,000...	912,722
Florida	81,885...	63,809...	145,694...	59,268...	158,000...	91,924
Georgia	615,336...	467,461...	1,082,797...	58,000...	8,170,750...	1,453,930
Texas	415,999...	184,956...	600,955...	274,356...	none ...	424,770
	2,703,646...	2,350,677...	5,054,323...		31,915,103...	8,111,096

The debt, therefore, of these States is at present rather less than four years' income. The total debt of the United States is 264,921,272 dols,—of course much larger in proportion, as all the older and wealthier and more settled States belong to the North. Pennsylvania alone has a larger debt than all these States taken together.

In the *popular* vote for the Presidential election of last year

	Votes.
Mr Lincoln got	1,857,610
Mr Douglas	1,365,976
Mr Breckinridge	847,953
Mr Bell	590,631

that is, less than half the whole. But Mr Lincoln polled a very few more votes than Mr Buchanan in 1856, about 6,000 more, while Mr Douglas polled as nearly as possible the same number as Colonel Fremont in 1856.

NOTES ON DIRECT COMMUNICATION BETWEEN IRELAND AND FRANCE. By P. J. SMYTH. Fowler, Crow street, Dublin.

THE object of this pamphlet is the establishment of a direct line of steamers from the ports of either Cork or Waterford, to Havre, Bordeaux, or perhaps Cherbourg. The author attributes the apparent absence of commerce between Ireland and France to the want of steam communication, which, in his view, operates as a prohibition upon Irish external trade. He also contends that facilities of intercourse will, as in all other cases, largely develop the mutual interchange of the commodities of the two countries, and will consequently contribute in an important degree to the material welfare of Ireland. The indirect trade with France through England is stated to be large, and therefore it is not proposed to create a traffic, but simply to divert that which already exists into its more legitimate channel. Mr Smyth points out a grievance which, strange to say, is not attributable to English mismanagement. Owing chiefly to the want of direct communication with the Continent, in foreign official journals imports from Ireland are lumped under the total of England, whereas Scotland, on the other hand, having a separate trade of her own, appears under a distinct head. "Justice to Ireland" may be obtained in this instance, Mr Smyth thinks, through his contemplated line of steamers. It is stated that a proposition for a mail service between France and Ireland has been approved by the French Government.

THE BUSY HIVES AROUND US. James Hogg and Son.

THE author of this work has aimed at giving a popular and interesting sketch of a few of the processes of commercial and manufacturing industry constantly going on around us. Starting with a sketch of a London warehouse, we are taken first to cotton factories, then to coal mines, the manufacture of cloth, Her Majesty's printers, the Falcon Glass-works, the railway colony of Locoville, Spitalfields weaving, and, finally, the office of the *Daily Telegraph* newspaper. The style of the work is that which has been made so attractive in Mr Dicken's "Household Words," but in some places is a little overdone. Taking it as a whole, however, the book is decidedly amusing, and some of the articles are written with much spirit, especially those on Mr Apsley Pellatt's glass factory and the colony of Locoville. The concluding notice will excite surprise, more than any other feeling, the writer appearing to have been completely overawed by the successful progress of the penny press.

GENERAL LITERATURE.

BERMUDA: its History, Geology, Climate, Products, Agriculture, and Government. By THEODORE L. GODET, M.D. Smith, Elder, and Co., 65 Cornhill.

THIS is rather a large volume on a small subject. Shakespeare's "Fairy Isles" make more show upon our table than the whole of the Canadas. Yet, at a time when each of our colonies is putting forth its claims to the notice and patronage of emigrants from the mother country, there is no reason why the Bermudas should not be represented; nor should we feel disposed to quarrel with the size of Dr Godet's book, if he had sufficient genuine materials to fill it with. When, however, we find its pages fully half-occupied with instructions to us, or the people of Bermuda, we know not which, how to plant cabbages and beans; with long lists of the scientific names of shells, insects, and corals, some of which are to be found in the Bermudas; with painfully minute descriptions of the symptoms and progress of diseases not peculiar to, not indeed especially virulent in, those islands; or with the remarkably fresh and interesting theme of the metamorphosis of caterpillars; we are forced to conclude that he has not found enough to fill his volume without having recourse to some favourite hobbies in the

way of medicine and natural history, which, however innocent or laudable in themselves, he was not called upon to inflict upon his readers. His book, as it is, would have gained by losing, if he had reduced it to half its bulk. Yet we cannot but think that he might have filled its present space with many things worthy of attention. For instance, he professes in his preface that his "views of the character and genius of the coloured inhabitants differ very essentially from the representations that have lately been given in a variety of publications." From this we might hope for some new and perhaps valuable light upon the future prospects of a race on which the permanent welfare of the West India Islands must in a great measure depend; yet nothing can be more bald and unsatisfactory than the information on this point contained in Dr Godet's book. It is the same with regard to the advantages of Bermuda as a place of emigration. No intending emigrant could draw any reliable conclusions from it beyond the facts, already pretty well known, of the fertility and general salubrity of the islands; except, indeed, that the people are backward in agriculture, and much given to political and party strife. Absolutely nothing is told us of the value and tenure of land; the price of labour and of living; the respective advantages of different situations, &c. In fact, we cannot think Dr Godet's "Bermuda" is intended so much to enlighten the English public with respect to that colony, as to induce the Home and Colonial Government to institute certain reforms which in his opinion are necessary for its welfare, but which he despairs of seeing accomplished by his refractory countrymen themselves. We will briefly mention what these are.

The first reform asked for may be lightly passed over here, being the better regulation of the medical profession, which at present swarms with pretenders from American colleges. The next is a larger matter, and one of more serious importance. That the free and popular form of government which the English people take with them into colonial life is not so conducive to political quiet and social unanimity as the more coercive system, the "hand of iron in a velvet glove" of despotic nations, may be readily granted; and the evils of party strife and political rancour of course are greatly aggravated by the diminution of the area within which they are generated. If the state of public warfare between opposite parties in the settlements of Australia is such as is at present unknown in England, it is easy to conceive that in a set of tiny islands like the Bermudas it wears no very amiable aspect; and that "it is utterly impossible for any one unacquainted with Bermuda to form an idea of the length to which party spirit is carried. It enters into the most private relations of life." Disagreeable as this undoubtedly is, and often obstructive of useful legislation, we can hardly agree with Dr Godet in laying to the charge of too free institutions the want of progress in the Bermudas. The examples of Australia or of the newer States of America, whose growth is rapid in spite of greater political licence, would seem to show that the cause is to be found in the want of energy of the inhabitants themselves. And this is borne out by the elaborate statement given by Dr Godet of their educational provisions. Their schools are deficient in number, and still more deficient in the quality of the instruction given. Dr Godet's book may do much good in drawing attention to this deficiency. His plan of inviting certified schoolmasters over from England, and founding normal schools under their inspection, is a good one; but even so, the people of Bermuda must exert themselves, if they desire to rise above their present condition. The state of agriculture is even worse than that of education. "Until the arrival of Governor Reid in 1839, the plough, the harrow, or other common implements of husbandry, were hardly known; and although he accomplished a great deal, yet he only partially succeeded in removing the absurd dislike entertained to an occupation which had for a long series of years been superseded by maritime pursuits. The descendants of the early settlers appear to have gradually lost much of the agricultural knowledge of their forefathers." The cause of this is easily to be found in slavery. Where this exists, tilling the soil will always be looked upon as a degrading occupation. The West Indies are only now beginning to recover from this curse. We are pleased to have Dr Godet's testimony as a medical man to the fact that white men are capable of out-of-door labours in tropical regions without necessary injury to health:—

> It will doubtless appear strange to the general reader, that by observing strict temperance in eating and drinking with regular habits, the European can with safety enjoy his customary exercises in Bermuda, and far excel the native white or black in laborious exercise, even under a burning sun. We have a remarkable instance of that superiority in the case of European convict labour on the public works in Ireland Island, which is pretty well tested; strict temperance being one of the standing rules.

Dr Godet's remedy for the depressed condition of agriculture is the founding of an Agricultural Society, which should devote itself to the promotion of good farming, the introduction of new plants, the giving of prizes for cattle, &c.

The final measure of reform suggested by our author is of so bold a nature that it must be given in his own words. Our readers shall be left to form their own judgments of its wisdom and practicability. Agriculture and science are not Dr Godet's only hobbies:—

> It was a lamentable act of the Home Government, when, with the view to perform a laudable deed in favour of free trade, it so seriously compromised the character of great and free England, by inflicting untold miseries on our sugar colonies, which were then just emerging from a state of bondage into liberty.....The present Government appears disposed to do something for our colonies; and if our colonists would only put their shoulders to the wheel, forgetting their old grievances and local differences, and looking upon their interests as identical, they might excite the favourable attention of the British Parliament. Were the *vox populi* universally heard, no Government could resist it. There is wisdom, benevolence, courage, public spirit enough in England to wipe out the foul blot of free trade, as affecting her colonies, from British legislation.

As Dr Godet concludes his book with this suggestion, we will also close our notice with this extract; only adding that all he does relate to us of the scenery and natural history of the Bermudas gives us a most pleasant impression of those islands.

THE NEWSPAPER PRESS DIRECTORY: containing full Particulars relative to each Journal published in the United Kingdom and the British Isles. A Complete Guide to the Newspaper Press of each County, with the Newspaper Map of the United Kingdom, and a Directory of Magazines, Reviews, and Periodicals. 1861. By C. MITCHELL AND CO. C. Mitchell and Co., Town and Country Advertising Offices, 12 and 13 Red Lion court, Fleet street, London, E.C.

THIS is the annual issue of what has long and deservedly been regarded as the standard publication concerning newspaper statistics, especially in all particulars that are useful to intending advertisers, literary or commercial. The only recent features of the work which call for notice are thus described in the "Publishers' Address."

"In the Edition for 1860, the Proprietors introduced two new features which, having been received with every mark of approbation, are now permanent and useful additions. These are the Newspaper Map of the United Kingdom, showing the Newspaper Representation of the country; and a Directory of Reviews, Magazines, and Periodicals, which, although not Newspapers, are of much importance to advertisers. The Map is so coloured as to distinguish the Agricultural, Manufacturing, and Mining Districts. Every town where a newspaper is published is laid down; and each has a distinguishing mark to show whether it possesses one or more newspapers or a daily paper. An inspection of the map will at once show the connection of the town with others, the character of the district in which it is situated, and the consequent advantage which advertisers may derive from circulating their announcements among the population."

We should add that the map is not incorporated with the book, but is handsomely mounted on canvas and roller. The colouring is only open to one objection,—viz., that there is no perceptible difference between the light blue, which indicates the "manufacturing districts," and the dark blue, which indicates the "manufacturing and mining districts." To the map of the United Kingdom is added a small map of London, in which the districts possessing newspapers are marked in a special type. This map is not quite so complete in its arrangements as it might be; for instance, St Pancras, although possessing three newspapers, is not marked at all; and the system on which the names of the districts are selected is by no means clear. But these few errors are only the exceptional blemishes on an excellent work, from which they may be easily removed in a future edition.

DANISH FAIRY LEGENDS AND TALES. By HANS CHRISTIAN ANDERSEN. Translated by CAROLINE PEACHEY. With a Memoir of the Author. Third Edition, enlarged, with 120 Illustrations, chiefly by foreign Artists. London: Bohn. 1861.

THIS little volume ought to be very popular. The stories of Andersen have already acquired a celebrity which renders every addition to them, and every fresh edition of them, certain of a large circulation; but this is by far the fullest and most complete collection we have yet seen. It does not, indeed, embody the charming little work recently noticed in these columns, "The Sandhills of Jutland," but it embodies, so far as we know, all Andersen's other shorter tales. And it embellishes them by a series of most charming engravings, chiefly German, conceived with all the humour and simplicity and grace of the subjects which they illustrate. We have seldom seen in any book illustrations that fit the subject so closely. We are not, indeed, usually fond of illustrations of authors whose works have delighted us first in an unillustrated form. The conceptions of the author take a shape in our minds that the artist is almost sure not only not to hit, but to contradict, and this is very painful. Even George Cruikshank, the greatest of all illustrators of childish tales, has sometimes given us pain, as in his far too artistic conception of Jack in "Jack and the Beanstalk." But Andersen's tales evidently required Danish or German illustrators. There is a childishness as well as a childish gravity of fun about them which no English artist could have reproduced. These German gentlemen have performed their task with wonderful skill and insight. Who, for example, could have drawn that foppish, lackadaisical "false collar" in the story of that name, so as to give the essence of it, so well as it is here done? No English artist would have made so much of the tin soldier and the little paper opera dancer with whom he fell in love; still less of that little man with the umbrella who comes to Danish children at nights and conducts them through the oddest adventures in their dreams. The tenderness and simplicity too in the picture of the little maiden in the tale called the "Snow Queen,"

who floats down the river in search of her lost playfellow, is seldom seen in any English engraving.

There may be one or two subjects which Cruikshank would have attempted and succeeded in, before which the German artists have quailed. There certainly should have been a picture of the three dogs,—the one with eyes as large as tea cups, the second with eyes as large as mill wheels, and the third with eyes as large as the round towers. Cruikshank could not have resisted these three dogs, but the German artists felt they could not do it, and modestly abstained. But what they could do they have done in very exquisite style. The old witch in the story of "The Tinder Box" would do credit to Cruikshank himself. "This is a book which ought to lie on every" child's "library table."

BURROWDALE; A Tale. London: Hamilton, Adams, and Co. Reading: T. Barcham, Broad street. 1861.

THIS tale is devoted to the exposure of drunkenness, and to the advocacy of teetotalism. It was no doubt written with excellent intentions, but unhappily they are the only excellent elements which it contains. Not only is it chargeable with the narrowness and unreality which so often characterise didactic fiction, but it is pervaded by a species of fine writing which is too exquisitely absurd for serious criticism. The following extract will sufficiently illustrate this:—

No ordinary powers of description could possibly relate, at all adequately, the history of our hero's wedding. The reader has probably seen many, and read of many weddings, which to his mind combined and included everything essential to their glory and completeness; and were I to make the effort to furnish details of the one which concludes this volume, and which I believe to be the most perfect which ever took place between beings of mortal mould, I could only succeed in bringing it into comparison with those before seen, or read of. I prefer, therefore, to draw upon each reader's imagination, at the same time assuring him, that when he shall have reached the utmost heights his fancy can attain, he will even then be far below the transcendent scene referred to.

THE ART-JOURNAL. February. Arthur Hall, Virtue, and Co.

THE February number of the "Art-Journal" contains engravings of a charming picture of Newton's, "The Duenna," now in Buckingham Palace,—of Turner's "Calais Pier," which was exhibited in 1803, and is a fine composition in his early style,—and of a statue of Mrs Thornycroft's, entitled "Industry." "An Examination into the Antiquity of the Likeness of our Blessed Lord" is continued, and much research is shown in the treatment of it, which is also full of interest. "Rome, and her Works of Art," and a chapter on National Flags,—both fully illustrated,—are very deserving of attention. Several specimens are given of J. D. Watson's illustrations of "Pilgrim's Progress" lately published by Routledge, and "The Hudson" completes the list of illustated papers in the February number of the Journal.

Foreign Correspondence.

(FROM OUR CORRESPONDENTS.)

PARIS, Thursday.

The Bank of France has only just published the report on the operations of the year 1860, which was presented by Count de Germiny, Governor, in the name of the Directors, at the annual meeting of the shareholders held on the 31st January last. I extract the principal facts set forth in this document:—The total of the operations of the Bank and the branches amounted to the large figure of 6,340,567,000f, but it was 312,010,000f less than in 1859. The rate of discount was only once changed in the course of the year, and that was on the 12th November, when it was increased from 3½ to 4½ per cent. The bills discounted amounted to 5,083,356,500f, which was 135,820,000f more than in 1859. Of this sum, 1,646,244,635f were at Paris,—the rest in the branches: the number of bills in the capital was 1,749,915, in the provinces 1,978,103; and the average per bill was 1,680f in the country and only 960f in Paris. The advances on public securities were 651,551,800f, which were 32,675,900f less than in 1859; and of the amount 214,528,000f were on public securities, 431,455,300f on railway shares and bonds, and 5,568,500f on Credit Foncier bonds. The metallic reserves were 573,039,800f at the beginning of the year, and they fell before the end to 411,370,900f. The circulation of notes began at 749,408,800f, fell to 704,288,900f, and rose as high as 801,184,500f. The accounts current rose to a maximum of 255,977,700f, and fell to a minimum of 174,452,500f. The amount of dishonoured bills at the end of the year was only 189,052f, and since then part of them have been paid. The securities deposited in the Bank for safety were at the end of the year 1,427,700, and the value of them was 801,000,000f. The capital employed in the branches in discounts, advances, &c., &c., was 3,931,856,000f, and was 80,810,000f more than in 1859. The branches were 49 in number, and those which did the largest business were Marseilles, the amount of its operations being 535,387,000f; Bordeaux, 290,452,000f; Lyons, 282,243,000f; Lille, 232,519,000f; Havre, 220,205,000f; Nantes, 151,984,000f; Rouen, 141,594,000f. Lille, Lyons, and Rouen present a decline compared with 1859; the others an increase. In only five of the branches were there losses—Agen, Bastia, Brest, Carcassonne and Laval—and the total of them was only 31,362f. In addition to its ordinary business, the Bank placed out for the Railway Companies bonds amounting to 300,000,000f, making the total raised by it for them in the course of the last three years 800,000,000f. The ordinary expenses of the Bank and its branches were (excluding the expense of conveying specie and the said railway bond affair, which last was paid by the Companies) 5,747,237f, and the profits were 10,018,738f for the branches, 7,960,024f for Paris, and 7,652,358f from *rente* possessed by the Bank. These last three items enabled a dividend of 140f to be paid to each of the 182,500 shares of the establishment. On the subject of the rate of discount, and on the arrangement with the Bank of England, the report makes these observations:—"When on the 12th of November we raised the discount from 3½ to 4½ per cent., it was more than probable that a more decisive increase would soon be indispensable. Fifty days after, hesitation on the point was no longer permitted. On the 2d of January, 1851, the Directors decided on a new increase of 1 per cent., and on the 8th of another of 1½, making 3½ in five days. The energy of these measures has no need to be justified, when in all the markets of Europe, and particularly in the most important, that of London, the price of money had risen. To have maintained the rate unchanged would have led to the immediate exportation of our specie. It was for such cases that the watchful and intelligent latitude given by the public powers to the Bank should be exercised: its effect is never doubtful, and it was not delayed on this occasion. We could not aid our metallic situation otherwise than by negotiating an exchange with the Bank of England. The silver which we sent to London has been replaced by gold, the presence and the distribution of which in discounts, or in the payment of our notes, enabled us not to employ a portion of our reserve in silver without obtaining the premium which that metal at present bears. In reflecting on the perfect accord of the measures which we combined with the Bank of England, and on the direct and safe action which they enabled us to exercise, we cannot do otherwise than congratulate ourselves on having been able so cordially to concert them." The report adds:—"A similar negotiation was entered into with the Bank of St Petersburg, but it has encountered difficulties which now render the success of it problematical. Moreover, the amelioration which has taken place in our metallic reserve renders the realisation of this operation of only secondary interest." Let me remind you that the day on which this language was used was the 31st January.

The treaty of commerce with England and the financial situation of France have been made the subject of discussion in the Legislative Body. M. Auguste Chevalier, brother of the great economist, in order to soothe the disquietude of the manufacturing interests, laboured to show that the treaty will be far more advantageous to France than to England, and that it has thus far not produced any increase in imports, and that as regards flax and cotton fabrics it will be null. As this speech was delivered for a political object, we need not stop to question its assertions, which assuredly are open to contradiction. M. Randouing, M. Brame, and M. Pouyer-Quertier insisted that the stipulation in the treaty that flax and hemp yarns and fabrics shall be admitted under the new tariff "not later than the 1st June," and "all other articles" (in this phrase cotton yarn and fabrics are included) "not later than the 1st October," ought to be interpreted to mean "not sooner" than these dates. The latter named gentleman, who is great among the Prohibitionist fraternity, delivered in support of his view a long speech, in which he drew a lamentable picture of the distressed state in which French manufacturers have been ever since the English treaty was on the *tapis*, and he affirmed that they would be still more distressed if the said dates were to be anticipated, inasmuch as England has vast quantities of goods ready for the "inundation" of France, and that she will be able to sell them all the cheaper from the fact that the crisis in the United States and the famine in India will diminish, if not close altogether, her markets in those countries. M. Baroche, one of the "speaking ministers," declined at first in the name of the Government to take an engagement not to anticipate the dates, observing very justly that circumstances may arise which may render anticipation desirable in the interest of manufacturers themselves; but eventually he made a promise that if earlier dates should hereafter be thought necessary, the Government would not fix them of its own authority by decree, but would demand a law from the Legislative Body. This is tantamount to a promise that the dates for the operation of the new tariff shall certainly *not* be sooner than the 1st June and the 1st October; for the great majority of the Legislative Body is bitterly opposed to commercial reform, and would never on any account have consented to the changes in the French Customs system which the Emperor has effected by the treaty,

with England. In the course of the discussion, shipowners brought forward their grievances, which have been already set forth in the ECONOMIST, and which are to the effect that they are by law subjected to vexatious and expensive regulations from which English merchant shipowners are exempt,—that they pay in England local dues on their vessels, the like of which are not imposed on English vessels in France, &c., &c. But beyond a general assurance that the Government takes interest in French shipping, and that a bill calculated to enable it to support competition with foreigners is about to be presented to the Chamber, these gentlemen obtained nothing. Manufacturers, however, were told that, although the Government has effected large reductions in the duties on raw materials, it is ready to listen to any complaints that may be made of those retained, and that it is now contemplating the abolition of the duty on salt used in manufactures, a measure which will cost the Treasury between 5,000,000f and 6,000,000f.

The discussion on the financial situation was very long, but it added little to what is known, and did but little honour to the Chamber. It showed in what an alarming manner the budgets have increased under the Imperial *regime* (352,000,000f in the eight years from 1852 to 1859), and the enormous figure at which that for next year has been put down (1,929,000,000f, including what are called the expenses *d'ordre*). It showed that the drawing up of budgets is a somewhat farcical operation in this country, inasmuch as by "supplementary and extraordinary credits," which the Government takes as it pleases, they are strangely modified. From 1852 to 1859, for example, the "supplementary credits" alone which the Government awarded itself amounted to the gigantic sum of nearly 2,000,000,000f. It showed that the budgets have for years past been virtually in a deficit, and it led to the admission from the ex-Minister of Finance himself, M. Magne, that the deficit of last year will be 100,000,000f. It showed that the famous declaration in the Emperor's speech that the budget of 1862 will be presented in equilibrium, "without any increase of taxes or any recourse being had to credit," is gravely erroneous, inasmuch as the duty on alcohols and the selling price of tobacco are largely increased, and the *second decime* on certain taxes is maintained, the obligations entered into with the railway companies are postponed, or are to be executed by what is virtually a loan, &c. It showed that up to 1860 the accumulated deficits, or as they are called here *decouverts* or arrears, amount to the huge figure of 985,000,000f, and that they can only be reduced by 231,000,000f, so that 654,000,000f remain. Lastly, it showed how enormously the public debt has increased under Imperialism, and how largely the deficit of the present year is likely to be.* I have said that the debate did little honour to the Chamber, and these are the reasons for that assertion:—Several members earnestly pressed the Chamber, in order that it may exercise something like control over the public money, to insist on voting the estimates not by ministries, but by chapters or divisions, and to prevent the Government from transferring to one purpose grants made to another; but by a large majority the Chamber would not consent to make such a reasonable requirement, contenting itself with promising that it should be taken into consideration. In the second place, the address drawn up by some very servile personages assures the Emperor that the "resources of France are inexhaustible," and though several deputies pointed out that such a phrase is absurd and inexact and constituted a sort of invitation to the Government to squander money more recklessly than it has yet done, the Chamber maintained the words. Lastly, it listened with patience to a foolish argument to the effect that the Emperor was justified in saying that "no increase of taxes" will be made next year, inasmuch as the increase has already been carried into effect, and will, therefore, not be new.

According to the *Avenir Commercial*, a good authority, the duty on French wines to be imported into Belgium under the treaty now being negociated is to be 27f 50c the hectolitre (rather more than 22 gallons) from the 1st July next year. It adds, however, that these dates will perhaps be modified, and that one of them may be altogether done away with. At 22f the hectolitre, the Belgians would obtain wine almost at the same price as the Parisians, that being about the amount of the octroi duty in this city.

The statement in my last as to the arrangement come to for the payment of the bills accepted by M. Mirès was substantially correct. A sum in his *Caisse* was taken; another deposited by him in specie or securities with the Turkish Commissioner was given up; and the Sous-Comptoir du Commerce and the Credit Industriel advanced the remainder. The Turkish Government abandons the Mires loan, but accepts as definitive the subscription made to 101,800 bonds in it. The balance due on these bonds, amounting altogether to 6,800,000f, is to be paid by the subscribers to the said two companies as a guarantee for their advances; and after this payment definitive bonds are to be given, which are to be quoted on the Bourse.

The monthly Customs returns have been published to-day. They show that the import duties in February last were 8,500,100f, and that in the same month of last year they were 13,237,248f, and of the year before 13,823,832f; and that in the first two months of this year they were 16,635,000f, and of the same periods of 1860 and 1859, 26,848,485f and 26,412,979f. This decline arises, of course, from the reductions which have been in the duties in various important articles of consumption, but the quantities of those articles brought in have considerably increased. Of sugar, for example, the quantity in the two months of the present year were 98,005 quintals (the quintal is 2 cwts) more than in the same period of last year, coffee 28,264 more, cotton 138,433 more, wool 13,517 more, pig iron 36,611, copper 13,506. In the imports, too, it is to be noticed (and this, by the way, contradicts what M. A. Chevalier said) that of pig iron England sent in the two months 108,421 quintals; whereas last year only 48,884 were received from her; of coal, too, she supplied 1,952,339 quintals instead of 1,677,069. As to exports, they are not, on the whole, very favourable. I reserve for a future letter the detail of the imports and exports.

The Bank of France has this day made another reduction of 1 per cent. in its rate of discount—that is from 6 to 5. It has done so in consequence of the reduction of the rate at London.

The Orleans Railway Company intends at the next meeting of shareholders to propose 100f as the dividend per share for 1860; the Western Railway 37f 50c. Portions of these sums have been already paid.

The Bourse has not been very active during the week; to-day, however, the reductions of discount at Paris and London caused signs of revival. The following are the quotations:—

	Thursday, March 14. f c		Thursday, March 21. f c
Threes	68 10		68 20
Bank of France	2885 0		2890 0

Do. do. 500f, 3 —	463 75		463 75

M. Mires' Caisse Generale is to-day at 87f 50c.

Annexed is an account of the markets:—

FLOUR.—A marked advance has taken place at *Paris*, the quotations yesterday having been 72f to 75f the sack of 159 kilogs. In four marks active business was done at 72f 50c to 73f 50c, according to the epochs: a large lot for June was taken at 73f, and one for June and July at 73f 50c.

WHEAT.—The quotation at *Paris*, yesterday, was 39f to 41f the sack of 120 kilogs—an advance on last week's prices. In the country, 76 markets present a rise of from 6c to 1f 33c the hectolitre; 27 a fall of from 11c to 81c; 47 have remained unchanged, and 18 are reported firm.

COTTON.—At *Havre*, in the week ending Friday, the sales were 9,625 bales, and the importations 20,629. Prices remained unchanged, low New Orleans being 95f the 50 kilogs, and very ordinary ditto 101f. This week, business has been very active, and prices have risen: yesterday, low New Orleans was firm at 98f.

COFFEE.—At *Havre*, in the week ending Friday, business was rather active, and prices were firm. 800 Hayti Port-au-Prince went at 78f 50c the 50 kilogs in bond; 700 sacks Gonaives, 82f 50c; 3,275 Rio not washed, disposable or in the port, 69f to 73f; 1,000 ditto for delivery, 70f; 2,570 sacks and some smaller lots of Pernambuco at prices kept secret; and 273 sacks Java at 114f 50c to 119f duty paid. A small quantity of damaged Bahia and a large one of damaged Java were also sold. The arrivals (including the 2,570 sacks Pernambuco above mentioned) were about 15,400 sacks and some lots of French West India. This week, there have been numerous sales: Rio, 67f 50c to 70f 50c; Hayti Jeremie, 78f to 78f 50c; Gonaives, 79f to 83f; Cape, 81f 50c; Cayes, 72f; Jacmel, 78f: French West India (habitant) 132f 50c duty paid; and a lot of Pernambuco at prices kept secret. At *Nantes*, last week, a small lot of Reunion *feve pointue* was sold at 130f; 737 sacks Java, at 116f to 118f; a lot of damaged Port-au-Prince was also disposed of. This week, Ceylon plantation has been at 103f to 110f. At *Bordeaux*, last week, various lots of La Guayra went at from 90f to 94f, and a small lot of Rio not washed at 76f. Some damaged Mysore was also disposed of. This week, a small lot of Guayra has been taken at 91f. At *Marseilles*, last week, 3,400 sacks Port-au-Prince went at 80f; 1,600 Gonaives, 82f; 1,500 St Domingo, 86f. Nothing done in Brazil.

SUGAR.—Business at *Havre*, in the week ending Friday, was rather active: 264 casks French West India went at 46f 50c to 46f 75c the 50 kilogs, duty paid; 120 ditto for delivery, 46f 75c and 47f; 10 ditto choice, 48f; a small lot of ditto "usine," 49f 50c; 10,000 bales Reunion, 51f; 4,230 casks Havana disposable, 34f 50c to 35f in bond; 700 ditto for delivery, 34f 50c, and 2,000 sacks Pernambuco, 31f 50c. The arrivals were about 800 casks French West India, 7,000 sacks Mauritius, and 950 Pernambuco. This week, French West India has been 48f and 48f 50c; Reunion, 51f and 52f; Havana, 35f 50c and 36f. At *Nantes*, last week, 12,630 sacks Reunion and 3,513 Mayotte went at 49f 75c, and 1,600 other sacks Reunion at 50f. A small lot of French West India "usine" went at 60f; a large quantity of Reunion has been sold this week at 48f 50c to 50f; Mayotte, 46f 25c; French West India, 44f 25c. At *Bordeaux*, last week, a small lot of French West India went at 46f and 46f 50c; 1,500 bales Reunion at 50f; 800 ditto, at 45f 50c; 1,322 bales Mauritius, 50f 50c. This week, Mauritius has

* On the subject of the budget, the pamphlet of M. Casimir Perier, "Les Finances de l'Empire," may consulted with advantage: some account of it was given in the ECONOMIST of Feb. 16.

been done at 51f; Reunion, 50f 50c, and for gros grain, 57f 25c. At *Marseilles*, last week, a lot of Reunion went at 51f, and one of Havanas at 37f.

INDIGO.—At *Havre*, in the week ending Friday, only about 15 cases Bengal were disposed of, but prices were firm. This week, only a small lot of Bengal has been sold, at prices kept secret. At *Bordeaux*, last week, there were no sales. Two small lots of Kurpah have been sold this week: prices not given.

HIDES.—The sales at *Havre*, in the week ending Friday, were 1,910 La Plata dry, at 122f 50c the 50 kilogs; 1,825 ditto salted, 73f 50c to 76f; 15,800 Monte Video salted, for delivery, 82f 50c; 1,900 Tampico dry, 100f; 4,300 New Orleans and Texas salted, 46f to 49f; a small lot of La Plata calf skins dry, 105f the 50 kilogs; and 503 La Plata horse hides, salted, 90f the 100 kilogs. The arrivals were about 15,000 and various bales. This week, sales have not been numerous: Buenos Ayres, 73f to 73f 50c; ditto cow, 70f; Valparaiso cow, 63f.

WOOL.—At *Havre*, in the week ending Friday, the demand was regular: 110 bales and 42 sacks La Plata unwashed went at 1f 5c to 3f 20c the kilogramme, and 37 bales lambskins' ditto, 1f 20c to 3f 30c. The arrivals were between 4,500 and 5,000 bales. This week, some Buenos Ayres unwashed has been sold at 295f the 100 kilogs.

TALLOW.—In the week ending Friday, at *Havre*, a quantity of Buenos Ayres mixed with grease went at 55f to 57f 50c the 50 kilogrammes, and another lot of ditto at 65f 50c. The arrivals were upwards of 500 casks and 14 tierces. This week, no sales have been made. At *Paris*, yesterday, the 100 kilogs were 131f 50c.

SPIRITS.—At *Paris*, yesterday, 3-6 of 90 deg. first quality was 102f the hectolitre; Montpellier, of 89 deg., 125f. At *Bordeaux*, the day before yesterday, 3-6 Languedoc was 127f 50c the hectolitre, and beetroot, first quality, 104f.

ROTTERDAM, March 20.

It will perhaps interest some of your readers to learn that the great spring sale of coffee of the Netherlands Commercial Society has been fixed to take place in this town on the 17th of next month, and that the quantity to be offered is 462,327 sacks.

COMMERCIAL AND MISCELLANEOUS NEWS.

The *Moniteur* has published the following monthly debtor and creditor account of the Bank of France, made up to Thursday se'nnight. The corresponding figures of last month and of the corresponding period in 1860 are added :—

The following commercial intelligence is dated Calcutta, February 7:—Imports.—Great inactivity prevails in this market, and prices are looking down. Well known 6-lb shirtings have been closed for at 3-10 rs; 7-lb at 4-8 rs, and one of the favourite up-country 8¼-lb shirtings at 5-10 rs. Exports.—Sugars—The refiners have been at last successful in placing their yellows to the extent of 700 to 800 tons, but they meet some difficulty in extending their contracts; in other kinds no change; the new Gurpattas are arriving in driblets, and are taken for local consumption and for Bombay at fancy prices. Linseed—Stocks remain much reduced, and with the exception of a few purchases for America, the demand has been extremely limited during the fortnight; in fact prices are hardly sustained, and if the present inactivity continues they must decline. We have no available tonnage for seeds, and for a considerable time to come shipments will be small and inconsiderable. Saltpetre—Prices nominal, and no transactions since the paralysing advices of the 10th. Our refiners, speculators, and exporters are at last alive to the fact that with the new substitute for saltpetre, and its increasing introduction into general consumption, shipments hence at present prices and present high duties are ruinous and impossible. Silk—Both native and some considerable parcels of European have been placed.

A letter from Melbourne, dated Jan. 25, says:—The gold produced during the year is 2,011,951 oz, against 2,205,194 last year, the difference being 193,243 oz. The persons engaged in mining are, however, fewer in number, and all other branches of industry have increased. The shipments of gold in 1859 were 2,269,049 oz; last year they were only 2,071,826 oz. The advices from South Australia by the present mail are dated Adelaide, January 26th. The revenue for the quarter ending December 31, 1860, amounted to 129,316*l*, and the expenditure to 115,955*l*. The declared value of the imports was 425,611*l*, and of exports 755,770*l*. The pastoral and mining interests continued prosperous. The Burra Burra Company had declared a dividend of 5*l* per share. The price of these shares was 137*l*. Copper was quoted at 95*l* per ton. The banks issued draughts on London, at 60 days' sight, at 1 per cent. premium, and bought bills at 1 per cent. discount.

Statement of the deposits and coinage at the United States Mint in Philadelphia, for the month of February, 1861:—

DEPOSITS.	dols c
Gold from all sources	5,244,816 71
Deposits and purchases of silver	153,361 28
Copper cents (o.s.) received in exchange for new cents	16,795 0
Total deposits	5,414,972 99

Advices from Jamaica to the 25th ult. state that sales of coffee had been effected at 38s to 40s per 100 lbs for very good quality. Very little pimento at market, and sold at 1½d to 2d per lb.

The following return shows the state of the note circulation of the United Kingdom during the four weeks ending February 9, 1861, compared with the previous month:—

	Jan. 12, 1861.	Feb. 9, 1861.	Increase.	Decrease.
	£	£	£	£
Bank of England	20076998	20074511	...	2487
Private Banks	3320794	3350959	30165	...
Joint Stock Banks	2939985	2940755	770	...
Total in England	26337777	26366225	28448	...
Scotland	4303285	4094767	...	208518
Ireland	6912819	6918944	6125	...
United Kingdom	37553881	37379936	...	173945

And, as compared with the month ending the 11th of February, 1860, the above return shows a decrease of 1,850,455*l* in the circulation of notes in England, and a decrease of 2,315,094*l* in the circulation of the United Kingdom. On comparing the above with the fixed issues of the several banks, the following is the state of the circulation:—The English private banks are below their fixed issue 1,053,976*l*, the English joint stock banks are below their fixed issue 361,602*l*,—total below fixed issue in England 1,415,578*l*; the Scotch banks are above their fixed issue 1,345,496*l*, the Irish banks are above their fixed issue 564,450*l*. The average stock of bullion held by the Bank of England in both departments during the month ending the 6th of February was 11,686,849*l*, being a decrease of 1,052,555*l* as compared with the previous month, and a decrease of 3,654,004*l* when compared with the same period last year. The following are the amounts of specie held by the Scotch and Irish banks during the month ending the 9th of Feb.:—Gold and silver held by the Scotch banks, 2,583,232*l*; gold and silver held by the Irish banks, 2,639,177*l*; total, 5,222,409*l*; being an increase of 69,206*l* as compared with the previous return, and a decrease of 219,194*l* when compared with the corresponding period last year.

An Account, pursuant to the Act 8 and 9 Vict., cap. 38, of the amount of bank notes authorised by law to be issued by the several banks of issue in Scotland, and the average amount of bank notes in circulation, and of coin held, during the four weeks ending Saturday, the 9th day of March, 1861:—

Name and Title.	Authorised Circulation.	Average Circulation.	Average Amount of Coin held.
	£	£	£
Bank of Scotland	300485	430978	286988
Royal Bank of Scotland	183000	433235	370610

COTTON.

NEW YORK, March 5.

The following is a statement of the week's sales here and at the chief Southern ports, at latest telegraphic dates, with the closing prices f.o.b., with freight in sterling at current exchange:—

		Sales.	Closing.		Middling.		Freight		F.o.b
New Orleans...Mar.	4	59000	⅛c lower	...	11¼c	...	⅛d equal to		6.32d
Mobile	2	10000	⅛c —	...	10⅝c	...	⅛d	—	6.50d
Charleston	1	13000	unchanged	...	10¾c	...	⅛d	—	6.43d
Savannah	1	7000	—	...	10⅝c	...	⅛d	—	6.41d
New York	5	5000	⅛c lower	...Upl.	11⅛c	...	⅛d	—	6.50d
Total		129000 bales					Average		6.53d

There is now a decrease in receipts of 654,000 bales from last year, when the crop reached 4,675,000, and of 29,000 bales from 1858-9 (crop 3,851,000).

New York Market.—Business has been very quiet in this market during the week; the dull advices from Liverpool having checked all disposition to operate at current rates. There has been no desire, however, to press cotton for sale, holders preferring to see further political developments before accepting lower rates. Transit cottons have been quiet and little done. The week's sales have therefore been confined chiefly to the immediate wants of the home trade and reach about 5,000 bales. The market closes quietly at a partial decline of ⅛ to ¼c, middling Upland being quoted 11½ to 11¾c.

The following is a statement of the movements of cotton for the last week, and since 1st September last, compared with the five preceding years:—

	Receipts. Week's Receipts. bales	Receipts. Since 1st Sept. bales	Exports for the Week. To Great Britain. bales	To France. bales	To other For. Pts. bales
1860-61	122000	2915000	111000	24060	20000
1859-60	129000	3569000	101000	18000	18000
1858-59	79000	2944000	56000	8000	19000
1857-58	119000	1998000	49000	9000	14000
1856-57	88000	2385000	68000	15000	26000
1855-56	131000	2497000	59000	4000	28000

	Exports since First September. To Great Britain. bales	To France. bales	To other For. Pts. bales	Total. bales	Stock. bales
1860-61	1409000	376000	210000	1996000	758000
1859-60	1539000	418000	250000	2207000	1111000
1858-59	956000	328000	292000	1576000	970000
1857-58	748000	242000	165000	1155000	748000
1856-57	785000	282000	292000	1296000	660000
1855-56	979000	323000	304000	1606000	650000

Thus the receipts show a decrease of 654,000 bales from those of last year, and a decrease or 29,000 from 1858-9, and the exports exhibit the following results—

	To G. Britain.	To France.	To other F.P.	Total.	Stock.
Compared with last year	Dec. 130000	Dec. 42000	Dec. 40000	Dec. 211000	Dec. 353000
Compared with 1858-9	Inc. 453000	Inc. 48000	Dec. 82000	Inc. 420000	Dec. 212000

Southern Markets by Telegraph.—Business at the South has been on a moderate scale this week, and rather lower rates have been accepted at the Gulf ports. The medium and upper grades with staple have been affected least, owing to their scarcity, and the fine qualities are as dear as at any time this season. At New Orleans the sales have amounted to 59,000 bales for the week, and middling at the close is worth 11¼c, while mixed lists are relatively lower. At Mobile only 10,000 bales have been sold, and prices have receded ¼c, middling being quoted 10⅝c. The Charleston market has been rather more active, owing to an increase of tonnage, and prices have been maintained, while at Savannah there is little change to note. Freights are a shade easier in British ships at New Orleans, but higher at Mobile. Sterling exchange has further improved, being now quoted 3 to 4 per cent. premium at New Orleans and Mobile.

Receipts.—The receipts by mail dates this week amount to 122,000 bales, against 129,000 in the same week last year, and 79,000 the year before. The total receipts at the seaboard is now 2,915,000 bales, and the deficiency is 654,000 bales compared with last year, and 29,000 compared with 1858-9. The receipts at Memphis (not yet included in our tables) reach about 118,000 bales, against 78,000 last year. By telegraph the deliveries at New Orleans show a considerable falling off this week, being 50,000 bales against 79,000 last year. Exports.—The exports for some time past have been on a par with the receipts, and this week the clearances amount to 155,000 bales to all ports. The usual proportion of this is taken by Great Britain—111,000 bales—and the total thither now reaches 1,409,000 bales, against 1,539,000 last year—a deficiency of 130,000 bales. To France the total amounts to 376,000 bales, against, 418,000 last year, being a deficiency of 42,000 bales; and to other foreign markets the total is 210,000 bales, against 250,000 last year. The home trade have taken 389,000 bales from the seaboard markets, and most of the excess overland from Memphis (40,000 bales), showing an increase over last year's purchases to this date of about 50,000 bales.—*From Messrs Neill Bros. and Co.'s Circular, forwarded by Mr Ollerenshaw, of Manchester.*

NEW YORK, March 9.—The market for this staple has assumed a somewhat more buoyant tone since our last, and the transactions have been effected at improved prices. The sales for the three days foot up 3,200 bales. We quote:—

The demand for cotton has been animated throughout the week, and a large amount of business has been transacted with all classes of buyers. The trade have increased their stock, and exporters have bought above the average weekly supply. Prices of American have advanced fully ¼d per lb, excepting in the better qualities, for which the demand has been less active. Egyptian, though attracting more attention, have been sold below our last quotation, which however we do not alter. Brazil are ½d per lb dearer. East India are in fair demand, at an advance of ⅛d to ¼d per lb. The sales to-day are 12,000 bales. The market is steady, but more quiet. The reported export amounts to 26,280 bales, consisting of 16,730 American, 180 Brazil, and 9,370 East India.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, March 5.—Flour—State and Western declined 5c; superfine State, 5 dols to 5.10 dols; extra ditto, 5.15 dols to 5.25 dols; round-hoop Ohio, 5.40 dols to 5.50 dols; extra Western, 5.20 dols to 5.40 dols; Southern mixed to good, 5.30 dols to 5.60 dols; fancy and extra, 5.65 dols to 7.50 dols; Canada extra, 5.20 dols to 7.25 dols. Wheat steady: Chicago spring, 1.16 dol to 1.18 dol; Milwaukee Club, 1.22 dol to 1.23 dol; red winter Western, 1.30 dol delivered; white ditto, 1.50 dol to 1.56 dol. Corn easier: old mixed Western, 65½c to 67c; new ditto at depôt, 55c to 59c; fair white Southern, 68c.

NEW YORK, March 9.—FLOUR.—The market for State and Western flour has been a little less buoyant since our last. Transactions have, nevertheless, been light, and confined chiefly to the requirements of the local and Eastern trade. The sales during the three days comprise 26,000 bbls, including 8,800 yesterday, the market closing quiet. Canada flour has met with a fair inquiry, and fully previous rates have been realised. The market for Southern flour has been somewhat depressed, and prices are rather lower on all kinds, closing with a tendency to a further reduction.

EXPORT from 1st to 5th March.

	1861 barrels	1860 barrels
Wheat Flour	46,490	7,948

GRAIN.—There has prevailed a moderate demand for wheat, both for local milling and shipment. The sales aggregate 215,000 bushels, including about 100,000 yesterday, as follows:—65,000 bushels common to choice Milwaukee Club at 1 dol 20c to 1 dol 23c, in store and delivered; 6,500 common Chicago Spring, 1 dol 16c, delivered; 6,000 North-Western Club, 1 dol 19¾c, delivered; 4,000 Racine Spring, 1 dol 21c, delivered; 18,000 winter red Western, 1 dol 29c to 1 dol 31c, delivered; 1,500 white Michigan, 1 dol 45c; and 500 amber Jersey, 1 dol 35c. The demand for corn was fair on Wednesday and Thursday, but the market opened dull yesterday, and transactions were small. The sales for the three days aggregate 175,000 bushels, including 31,000 yesterday.

EXPORT from 1st to 5th March.

	1861 bushels	1860 bushels

Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	8 224,094	Notes	7,453,425
		Gold and Silver Coin	871,805
Other Deposits	11,452,254		
Seven Day and other Bills	576,812		
	38,631,601		38,631,601

Dated the 21st March, 1861. M. MARSHALL, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	19,428,007	Securities	30,228,371
Public Deposits	8,224,094	Coin and Bullion	12,701,425
Private Deposits	11,452,254		
	39,104,355		42 929,796

The balance of Assets above Liabilities being 3,825,441l, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£176,529
An INCREASE of Public Deposits of	1,585,210
A DECREASE of Other Deposits of	239,430
An INCREASE of Government Securities of	1,119,343
A DECREASE of Other Securities of	313,718
An INCREASE of Bullion of	372,283
An INCREASE of Rest of	8,657
An INCREASE of Reserve of	556,418

The above return is again very favourable, a considerable increase having taken place both in the reserve and bullion. The large augmentation in the public deposits arises chiefly from payments on account of revenue. The Government securities show a large increase, while the other securities exhibit a further diminution.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1851:—

At corresponding dates with the present week	1851.	1858.	1859.	1860.	1861.
Circulation, including bank post bills	£ 19,510,405	£ 20,202 004	£ 21,136,390	£ 21,059,771	£ 19,428,007
Public deposits	8,792,245	7,693,272	8,998,757	10,362 543	8,224,094
Other deposits	8,977,263	15 574,781	13,601,339	12,932,920	11,452,254
Government securities	14,145,250	9,501 993	10,696,147	10,221,190	10,599,072
Other securities	12,907.809	16,805 904	16,908,094	22.575,833	19,707,299
Reserve of notes & coin	9,904,740	13,901,790	14,007,350	9,508,644	8,325,230

— Hamburg (3months)	13 6¾ 7	13 6 6¼	13 4¼ 4⅜	13 5 5⅛	13 8⅜ 9¼

In the corresponding week of 1851 the Ecclesiastical Titles Bill was being actively debated in the House of Commons. On the Continent the reactionary policy of Austria and other Governments was being steadily carried out, although in Saxony the Liberals were believed to have gained a slight advantage. The export of silver to the East was attracting attention, but exercised little effect on the money market, the Bank rate of discount remaining at 3 per cent. only.

In 1858, money was easy, and the rate of discount in Lombard street had fallen to 2½ per cent. Subscriptions had just been invited for the first issue of 5,000,000l of Indian 4 per Cent. Debentures having five years to run.

In 1859, a loan for 7,000,000l for India was under discussion in Parliament, and the Premier, Lord Derby, had announced that 3,000,000l more would be wanted. The apprehension of war in Italy had been somewhat allayed by the announcement that Russia had proposed a Congress of the European Powers, and that the suggestion had been acquiesced in by France, Austria, England, and Prussia. The preliminary announcement of a new Russian loan of 12,000,000l had been made.

In 1860, the Reform Bill was the subject of long discussion in Parliament. Later news had arrived from Calcutta respecting the financial proposals of Mr Wilson, which in India were receiving general approval. Another Austrian loan of 200,000,000 florins had been announced. The London bankers had just resolved on closing at 3 o'clock on Saturdays, but the arrangement was not to come into force until the 19th of May.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1851, a deficiency of 3,930,546l; in 1858, a deficiency of 1,231,123l; in 1859, a deficiency of 3,306,755l; and in 1860, a deficiency of 9,642,913l. In 1861, the deficiency is 8,255,045l.

DISCOUNT AND MONEY MARKET.—Yesterday the Bank of England reduced their rate of discount from 8 per cent., at which it was fixed on the 14th of last month, to 7 per cent.

The Bank of France have also lowered their rate from 6 per cent to 5.

The step adopted by the Bank of England was fully anticipated in the early part of the week, and consequently exercised no effect on the Stock Exchange. It had been seen that the demand for money was diminishing, and that, contrary to what had been previously expected, the shipments of gold to America had almost ceased for the present. The position of the Bank was also believed to be stronger, notwithstanding a partial falling off in the remittances of bullion from the Continent, which had latterly been on so large a scale. In the general discount market the rate was still kept at 7½ per cent., but these terms were demanded less from the scarcity of money than the uncertainty of the future course of business. After the announcement of the reduction in the Bank rate yesterday, the inquiry for money was rather active, many persons having waited to take advantage of the lower charge, but occasional transactions took place below 7 per cent. To-day the demand has rather increased, as generally happens on a Friday, and 7 per cent. was required in all cases.

At this period of the year, when large sums are being absorbed for the quarterly revenue payments, the absence of pressure in the money market is remarkable. It is, however probably due to the unfavourable feature of a general contraction of trade.

On the Stock Exchange money was comparatively easy in the early part of the week, loans being offered at 5½ per cent. for a few days, and 6½ for longer periods. Both yesterday and this afternoon, however, owing to some large sales of Exchequer bills, there has been more pressure, and high rates have been paid.

The discount houses and joint stock banks have made no alteration in their allowance on deposits. At the former the interest is 5 per cent. for money at call, and 5½ per cent. with seven days' notice. The joint stock banks give an uniform rate of 5 per cent., except the London and Westminster, which allows 4 only on sums below 500l.

The Bank of St Petersburg have fixed their rate at 6 per cent. both for six months' and three months' bills.

The following are the rates of discount in the principal cities of the Continent. They continue to be generally below the terms current here:—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	5	4½
Vienna	6	5½
Berlin	4	2
Frankfort	3	1½
Amsterdam	3	3
Turin	7	6
Brussels	4	4
Hamburg	...	2½
St Petersburg	6	...

ENGLISH FUNDS.—The funds have experienced scarcely any change during the week, and the general transactions have been much more limited than usual. The unsatisfactory advices from America and the inclemency of the weather, which is already beginning to excite uneasiness respecting the future harvest, have, however, exercised an adverse effect, and the present quotations are hardly equal to those of last Friday. Consols closed this evening at 91⅞ to 92 for money, and 92⅛ to ¼ for the account, showing in the

latter case a decline on the week of an eighth. Exchequer bills have been pressed for sale, and are nominally quoted 15s to 10s discount for the issue due in June, and 7s to 2s discount for those maturing next March, but even at these prices no material amount could be disposed of. India loan scrip has not maintained the late advance, a relapse having taken place to 100¼ to ½. There have been some extensive sales of India bonds, apparently on banking account, and the price has receded to 30s to 20s to 30s discount.

FOREIGN STOCKS.—Business in this department has been very limited, and the only stocks which have fluctuated to any extent have again been Mexican and Turkish. The former has been rather flat, but closed better than at one period of the week. Compared with last Friday, however, there is a decline of ½ per cent. It is believed that the reorganisation of affairs in Mexico will take longer than had been previously calculated upon, and that some time must necessarily elapse before the Juarez Government will be in a position to replace the 660,000 dols of which the bondholders were robbed by Miramon. Turkish Six per Cents. have again improved, both the old and new loan, but the full rise has not been maintained. The principal purchases appear to have been on foreign account. New Granadian bonds are firm on the ratification of the agreement for readjusting the debt. Buenos Ayres descriptions continue dull. There have been a few inquiries for Spanish certificates, but the price remains flat at 5⅜ to ⅞.

French rentes closed this evening on the Paris Bourse at 68f 15c, being a decline of more than ⅛ since last Friday.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and today:—

	CONSOLS Money Account. Lowest.	Highest.	Lowest.	Highest	Exchequer Bills.

RAILWAYS AND OTHER SHARES.—British railway stocks have been very inactive and heavy. The tendency in this department continues downward, notwithstanding that the good traffic returns have checked operations for the fall. It is understood, however, that as regards the manufacturing districts the receipts are increased by the hurrying forward of goods for America in anticipation of the new tariff coming into operation early next month. The last traffic return of the Midland showing a moderate augmentation only, led to some speculative sales yesterday, and an immediate decline tsok place, which was followed by another slight reduction this afternoon. The other leading stocks are also flat, except Great Northern, the final price of which is 1 per cent. higher than last Friday. The appearance of the market at the close this evening was unfavourable.

Colonial descriptions have experienced little change, although East Indian guaranteed stocks have been rather more in demand. In the foreign market, Great Luxembourg shares relapsed. Illinois Central and New York and Erie showed a considerable decline yesterday, but today are a trifle firmer.

London General Omnibus shares have fallen on the publication of the Directors' report. Ottoman Bank have relapsed to 17½ to 18.

Subjoined is our usual list of the closing prices of the principal railway shares last Friday and this day:—

RAILWAYS.	Closing prices last Friday.	Closing prices this day

FOREIGN EXCHANGES.—On Tuesday the quotations for Hamburg and Amsterdam were slightly lower. To-day, notwithstanding the alteration in the Bank rate of discount, there was no further variation.

BULLION.—Annexed is the weekly circular of Messrs Haggard and Co., giving an account of the movements in bullion to last evening:—

Since the date of our last, few alterations have taken place in the bullion market, though the tendency is still towards flatness; and a further decline of ¼d is expected in the bar silver brought by the La Plata. The imports are small, and comprise 255,000*l* by the La Plata, from the West Indies, of which 237,000*l* is silver, and 18,000*l* gold; and some moderate amounts of gold and silver from the Continent. The exports comprise 83,845*l* by the Africa, 2,400*l* by the Kangaroo, and 10,000*l* (bar silver) by the Borussia, to New York; and 124,189*l* by the Massilia, to India and China, of which 105,600*l* is silver, and 18,500*l* gold. Gold still continues to be taken in considerable quantities to the Bank of England. The total purchased by that establishment during the past week amounts to 136,000*l*, while none has been withdrawn for exportation. The silver market is extremely depressed, and there is little demand for the Bombay mail of the 27th. There is no inquiry at all for Mexican dollars, and the price remains nominally the same. The following gold ships are known to be at sea:—Monarch, with 90,748*l*; Result, with 118,000*l*; Calliance, with 128,000*l*; Lightning, with 116,000*l*; and Southampton, with 87,000*l*.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; bar gold, refinable, 77s 10½d per oz std; French gold coin, 76s 1½d per oz; South American doubloons, 73s 6d to 74s, dull; Spanish doubloons, 76s 6d; Brazilian new gold coin, 77s 7d. Silver—Fine or cake silver, 5s 5⅜-½d per oz std; Bar silver, 5s 0⅝-¾d per oz std; bar silver, with gold above 5 grs per lb, 5s 0⅞-1d per oz std; Spanish pillar dollars (Carolus), 6s 6d per oz; Spanish pillar dollars (Ferdinand), 5s 1¼d per oz nominal; Crusades, 4s 11⅜d per oz, dull.

About 20,000*l* in bar gold has been taken to the Bank to-day.

PUBLIC COMPANIES.—A special meeting of the Commercial Bank was held on Tuesday, and excited great interest, a numerous body of proprietors being present. The chair was occupied by Mr Mark Hunter, who read the following report, which he stated to represent the collective sentiments of the Board:—

It is unnecessary to detain you by any lengthened expression of the extreme regret which your Directors feel for the disaster which has forced them to call you together, and for the report to which they now wish to call your attention.

REPORT.

Information having been received at a late hour on the evening of Friday, 15th February, that the bank had been robbed by a ledger-keeper at Henrietta street (named Durdin), to the amount of 67,000*l*, steps were at once taken to summon all the Directors in or near London for the following morning. At this meeting, after consultation with the Solicitor and Manager of the bank, it was determined that, as the first duty of the Directors was to protect their customers against the run which was inevitable, it was desirable to seek assistance in some shape from one of the joint stock banks. The London and Westminster being the largest bank, negotiations were at once opened with that establishment, and they engaged to advance any sum, not exceeding a million, which might be required to meet your liabilities; your Directors undertaking, as far as lay in their power, to influence their customers to transfer their accounts to the London and Westminster Bank. The details of this arrangement, which you are now asked

to confirm, will be read at the conclusion of this report. The arrangement was confirmed by a Board especially summoned for the purpose at 8 o'clock in the morning, on Monday the 18th ult.

In adopting the course they did, the Directors were influenced by the following considerations:—Three courses were open to them:—to close the doors of the bank—to stand a run which was certain—or to make some such arrangement as is now submitted to you. To close the bank's doors would have been an unnecessary and unjustifiable cruelty to its customers, and would have exposed the commercial world to a panic, the extent of which, at the present moment, it is impossible to measure. To the shareholders the result would have been a winding-up under bankruptcy, with its attendant vexation and expense. This course, therefore, was discarded at once. The bank was in a position to risk the second course, and stand any run which could be reasonably anticipated; but with money at 8 per cent. as the minimum rate, and an inevitable sacrifice on securities not instantly convertible, the price of fighting the battle must have most seriously affected the property of the shareholders.

The Directors believed, looking to the result of the run on them in 1856, when the deposits were reduced from 1,500,000*l* to 800,000*l*, a reduction from which they had not, up to the present time, recovered to any appreciable extent, that a second run would leave them at its termination no business worth preserving. The winding-up of the bank must have followed, and that would, practically, have placed you in the same position in which you now stand; but with this material difference, that you would then have paid a heavy price for that which now costs you nothing.

It may be said, that the bank, forced, for these reasons, into an arrangement of some kind, might have made a better one. Your Directors think otherwise. With a week—with forty-eight hours before them—they might possibly have done it; but Monday would have found the bank with a run upon it; and the London and Westminster positively refused to deal with us in any shape after a run had once commenced. There can be little doubt that other banks, influenced by the same considerations, would have followed the same course. Be that as it may, the want of time, the necessity for secrecy, so long as secrecy was possible, prevented negotiations with other establishments.

The present arrangement, by which the great majority of your customers have transferred their accounts to the London and Westminster Bank, may be looked on as the price paid to that Company for having saved you from the anxiety and loss of a run. Doubtless it is a most painful price to pay; it was not agreed to until other proposals had been made and rejected; but if your Directors are right in their belief that remunerative business was at an end, this price becomes nothing, as your accounts would have left you of themselves, as they did in 1856. The profits, if any, of the small business which might have been left to you (looking at the necessity of recreating a reserve fund), would have afforded little or no dividend for a series of years, during which your shares must have remained at a nominal price.

As it is intended to ask you to appoint some of your own body to advise and co-operate with the Directors in the present position of the bank's affairs, it has not been thought necessary, nor was it possible within the time, to give you more than an approximate statement of the liabilities and assets on the evening of last Saturday, the 16th inst. The figures, however, are given, which show the state of the accounts on the day of the transfer of the business and at the present time.

Whilst, on the one hand, the Directors would regret to state anything calculated to create an unfavourable impression of the value of the shareholders' property, they must (having regard to the notorious uncertainty attending the realisation of assets under the circumstances in which the bank is now placed) guard themselves against making any statement that may create expectations which the result may not realise:—they confine themselves to the expression of their hope that the shareholders' capital will be returned to them in full.

By legal advice, the formal agreement with the London and Westminster Bank was also read. Mr Jay, of the firm of Quilter, Ball, Jay, and Co., accountants, who had been called upon to investigate the books, has not had time to prepare a detailed report, his examination having been protracted by the lengthened period during which the late frauds have been carried on, and the necessity of separating a number of false entries from real. It appears, however, that the loss through these defalcations cannot exceed 66,992*l*, while no other irregularity has been discovered. The winding-up of the affairs of the bank has proceeded thus far with success, the liabilities on balances due to customers which on the 15th February were 1,052,563*l*, having been reduced last Saturday to 239,404*l*, exclusive however of 233,278*l* advanced under their agreement by the London and Westminster Bank. Against this there are assets and cash in hand of 780,690*l*. The whole of the remaining liabilities will be cleared off in about two months. A long discussion took place, but the general feeling was evidently favourable to the Board, who were considered to have acted in the best manner to protect the interests of all concerned, and to have saved the proprietors much loss, trouble, and anxiety. It was also hoped that the London and Westminster would deal liberally with the shareholders of the Commercial, and in return for the advantages received pay them their dividend for the current half-year.. A series of questions on some past transactions of the bank were put by a shareholder, and from the Chairman's answers it appeared that the Rolt suit is still unsettled, but is expected to be decided in favour of the bank. The dispute with the Acadian Charcoal Iron Company has been arranged on the bank's own terms. Some Westminster Improvement bonds are still held, but they are considered of no value, and a mortgage has been taken instead. Durdin many years ago gave security for 1,000*l*, and his sureties are still alive, but it is not known whether they are in a position to pay. The Directors of the Commercial will receive no special remuneration whatever in the transfer of their business to the London and Westminster. About 5,000*l* is expected to be recovered from Durdin's property. No consideration is stipulated for the goodwill. With reference to the non-discovery of the frauds for so long a time, it was stated that the Directors were accustomed in their usual examinations at Henrietta street to see that no improper bills were discounted, and that the cash and securities standing in the books were actually in existence. The duty of ascertaining that the books were properly kept rested with the manager of the branch. The discussion then turned upon the possibility of obtaining better terms in arranging the transfer of their business, but it was pointed out that there was no time to open negotiations. The fact of the bank having been defrauded to a large extent had already oozed out, and had magnified by report, and a run at any moment might have commenced when it would have been impossible to obtain assistance anywhere. A final resolution was then carried, approving the transfer of the business to the London and Westminster. The Directors had proposed a committee of co-operation, but the shareholders, having full confidence in the Board, decided that it was unnecessary. Special votes of thanks to the Directors and Manager were carried by acclamation.

A meeting of the Bank of Australasia has also taken place this week, when a dividend and bonus were declared at the rate together of 10 per cent. per annum. The general business and position of the establishment were stated to be satisfactory, with the exception of the profits realised, which have been diminished in the past year by the objectionable system of allowing interest on current balances and deposits. As much as 63,000*l* was paid on this account in the twelve months ending Oct. 15th, 1860, being exactly equal to a 7 per cent. dividend. From the commencement the Directors have been greatly averse to the practice, and opposed its introduction by all the means in their power, and after its adoption have strennously endeavoured to obtain its discontinuance or modification. It is satisfactory that by joint agreement the banks in Australia abandoned the system last autumn, and the change has already proved advantageous. Arrangements have been effected for materially reducing the present high expenditure. During the late depression in trade in the colony, the bank have experienced only trifling losses. With regard to Australia generally, it was mentioned that all classes excepting the mercantile are prosperous, and that the more recent colonies are making surprising progress. In Qucensland especially, attention is being seriously directed to the cultivation of cotton. The following is an abstract of the report presented:—

The Directors regret that they have again to exhibit a return of diminished profit, but the accounts represent the operations of a year which has proved the least favourable for banking pursuits in the Australian colonies since the time of the gold discoveries. The whole period has been one of great commercial depression; in addition to which the amount paid for interest on deposits has considerably exceeded that of the year 1859. The present year has commenced under more hopeful auspices, indications of a revival of trade, and of a gradual but steady return to confidence being apparent; and from the latest advices received from the acting superintendent, the Directors are led to expect that the next annual accounts will prove of a more satisfactory character. Although the mercantile community has been labouring under depression, other Australian interests have advanced in prosperity. The exports of wool, copper, and other produce have increased. The yield of gold also continues large, though not quite equal to of thatformer years, but hopes are entertained that it will be

augmented by the extended application of machinery and the discovery of new fields. The Directors take an encouraging view of the Australian Colonies, and of the future success of the operations of the bank, although the extraordinary results of former years may not be attainable. Mr J. J. Falconer sailed in December to resume his duties as colonial superintendent. The Directors derived much satisfaction from their intercourse with Mr Falconer during his stay in England, and they have reason to believe that the interchange of views which have taken place will prove beneficial to the future interests of the bank. On Mr Falconer's arrival, Mr D. C. M'Arthur, after upwards of twenty-five years' service, will probably avail himself of the permission granted to him to visit Europe. The Directors take this opportunity of expressing their high sense of the energy and ability shown by Mr M'Arthur during the period he has filled the office of acting superintendent.

At the annual meeting of the Commercial Bank of Liverpool, on Saturday, the profits for the year were stated to be 44,020*l*, out of which two half-yearly dividends of 4 per cent. and a bonus of 5s per 20*l* share have been distributed, leaving 10,018*l* to be carried to the reserve, which will then be raised to 135,018*l*. The bank has now been for more than a year under limited liability, and not only has there been no falling off in the business, but it has, on the contrary, experienced a good increase.

The annual meeting of the Atlantic Telegraph Company was adjourned from the non-attendance of shareholders to form a quorum.

The annual meeting of the Canada Company was held yesterday, when the usual business took place of the election of four directors and an auditor; and the report, which had been previously circulated among the proprietors, was received. The operations of the Company during the past year have been attended with much success, the receipts having been 85,243*l* currency, or 25,004*l* more than in 1859; while the quantity of land disposed of is also larger by 7,742 acres. In 1854 the property was surveyed, and its average value was reckoned at 22s 9d per acre, since when 166,671 acres have been sold and leased at an average of 51s 11d, being an increase of 125 per cent. The business of the current year continues very favourable, the receipts in January and February having been 50,506*l* against 45,457*l* in the same months of 1860. The movement of produce has been in some degree checked by the political disturbances in America; but the latest advices report a revival of activity. It is, however, considered probable that the crisis in the United States will have the favourable effect of diverting to Canada a considerable portion of the emigrants from Europe, and especially at the present time, from the very prosperous condition of the farming interest in the colony. It was mentioned that a large body of Germans now settled in the States have determined on removing, and are now in communication with the Commissioners of the Company for a location on their land in Canada. The third instalment due from the Buffalo and Lake Huron Railway for the harbour and land at Goderich has been paid, and the works there are being rapidly pushed forward. Some samples of wheat, produced upon the Company's estate, have been exhibited and proved to be of the most excellent quality. The general prospects of the colony were stated to be very good, especially from the abundant harvest of last year. In 1860, the exports exceeded the imports for the first time, and, compared with 1859, the former have increased 10,000,000 dols. The last census shows a rapid growth of population, especially in the agricultural districts.

The report of the London General Omnibus Company, issued preparatory to their meeting on Wednesday next, states that the unseasonable weather in 1860 has increased the expenditure and seriously affected the revenue. The receipts were 588,954*l*, being rather less than in 1859, while the cost of working was 591,861*l*, being an augmentation of nearly 31,000*l*. Fifty-five new omnibuses have been put to work in the course of the year.

Spanish American Bonds.—The holders of New Granadian bonds have ratified the agreement with slight modifications concluded between the Committee and the Government of that republic for the arrangement of the foreign debt. The terms proposed were the capitalisation of the arrears of interest into bonds bearing 2 per cent. interest until December, 1866, and 3 per cent. afterwards; the appropriation of 25 per cent., to be subsequently increased to 37½, of the import duties of the Confederation for interest and redemption of the debt, with a guaranteed *minimum* of 40,000*l* in the former case, and 60,000*l* in the latter, and an assignment of a portion of the waste land. The sum derived from the import duties is to be applied, one-tenth to the sinking fund, then towards the payment on the capitalised interest, and the remainder to be distributed as dividend proportionally between the Active and Deferred Debt. In the event of the funds for the latter exceeding 3 and 1½ per cent. respectively, the surplus is to be devoted to the redemption fund, which will also be increased by a moiety of the profit realised by New Granada from the Panama Railway. Authority was given to deduct 2½ per cent. of the bonds issued for the arrears of interest, to provide for the expenses of the Committee and their remuneration. A Committee was also nominated to consider the best mode of utilising the lands assigned to the bondholders by the Granadian Government.

It appears that a remittance of 5,000*l* has recently been transmitted here on account of Equador bonds, and the fact not having been made known has created much dissatisfaction.

Failures.—A meeting of creditors of Messrs Scarlato M. Mavrogordato and Co., Manchester merchants, in the Levant trade, has just been held, by which it appeared that the liabilities expected to rank on the estate were 35,797*l*; while the assets, exclusive of private property abroad, represent 105,797*l*. A resolution was passed unanimously, acceding to a proposition on the part of Messrs Mavrogordato to liquidate in full.

The creditors of Mr G. P. Zolas, Greek merchant, also of Manchester, have held a meeting, and agreed to accept payment in full, in instalments extending over fifteen months, with 5 per cent. interest. The liabilities in this country and at Constantinople were reckoned at 32,078*l*, with assets valued at 58,001*l*.

The creditors of Messrs E. Benyon and Co., flax spinners, of Leeds, have agreed to accept an offer by the family of 10,000*l*, in addition to the assets of 17,071*l*, which will admit of a dividend of 10s in the pound on the liabilities of 52,265*l*. The estate is to be liquidated under inspection.

The suspension was announced to-day of Mr Henry Lemare, of the Stock Exchange, with liabilities variously estimated from 12,500*l* to 18,000*l*. It is said that there are discreditable features in the case.

Miscellaneous.—At Lloyd's, the underwriters have not yet altered their premiums for outward risks to the Northern American ports; but for homeward risks from the Southern ports the policies are generally done "free from capture, hostilities, and popular commotion." In some cases an additional premium of 30s has been paid to cover this contingency.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 3 per mille premium, and the short exchange on London is 25.40 per 1*l* sterling. On comparing these rates with the English mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 6-10ths per cent. dearer in London than in Paris.

By advices from Hamburg the price of gold is 427 per mark, and the short exchange on London is 13.7½ per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 7-10ths per cent. dearer in London than in Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is about 105½ to 106 per cent. for first-class bills. Although this shows the exchange to be against England, the high rate of interest and the loss of time before the gold is received back from the American mints render it doubtful if any profit can be made at the present rates by sending gold to the United States.

Imports of the week ..... 193,526 qrs.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

There was a very poor show of English wheat at Mark lane to-day, and most kinds were taken off steadily at Monday's improvement in the quotations to, in some instances, a further advance of 1s per quarter. Foreign wheat moved off freely, at full prices. In the value of spring corn very little change took place. Flour, both English and foreign, commanded extreme rates. This week's imports from abroad are 6,150 quarters of wheat, 1,670 barley, 7,290 oats, 300 sacks and 6,900 barrels of flour.

At Liverpool, this morning, produce, generally, sold at Tuesday's quotations.

Advices from Alexandria to the 6th inst. state that grain was in request at full prices, viz.:—Wheat, 34s to 35s 6d; beans, 27s to 30s 6d; maize, 26s to 26s 6d; barley, 21s to 22s; lentils, 26s to 27s per quarter.

The latest American advices, received on Monday, caused great excitement in the Liverpool cotton market, which has continued throughout the week with an advance of ⅜d per lb in some American descriptions, and ⅛d to ¼d in others. Surats are also about ⅛d dearer. The inauguration speech of President Lincoln has been interpreted by most parties as indicating the approach of an early civil war, and as the receipts in America for the week were considerably below last year, there has been a large and general demand for all descriptions. The total sales of the week amount to the hitherto unprecedentedly large cipher of 133,000 bales, and include 81,000 bales to spinners, 26,000 bales on speculation, and 26,000 bales for export. The reduced Bank rate will inspire confidence. Market closes to-day stiff: sales about 10,000 bales.

Writing in reference to the cotton crop, Messrs Neill and Co., of New York, observe:—"We remarked last week that any change in the course of receipts at this period would affect crop views. Such has already been the case. The predicted falling off at New Orleans being partly realised this week by telegraph has again favoured the lower estimates. Advices from various points South also show that, with the exception of the Atlantic ports, the falling off is general, and attribute it chiefly to the late unsual exertions to market the crop. The quantity of cotton remaining in the country is smaller than usual at this date, and the stocks in the interior markets show a serious deficiency compared with last year. For the past two years the deliveries to this date have comprised three-fourths of the crop. This year we have received at all points up to 1st March 3,100,000 bales, and the general impression now prevailing is that the receipts from this out will fall largely short of last year. The delivery of the balance of the crop will undoubtedly be influenced by the course of politics."

The public sales of tea held this week have gone off slowly; nevertheless, prices have ruled steady. Fair blackish leaf congou realised 1s 4d to 1s 4¼d; common scented orange pekoes, 1s 2d to 1s 2½d; ordinary Taysham congous, 8d to 9½d per lb.

The annexed report shows the state of the tea and silk markets in China to the latest dates:—Hong Kong, Feb. 1.—Tea—The market during the fortnight has been very dull, owing to all offers having been withdrawn. The small settlements of congou show a decline of about 1 tael, and scented kinds are also easier. Some inquiry has existed for Canton-made greens, principally for the United States, and prices are unaltered. No further supplies of country green have come to hand. Sales and stocks are as follows:—Congou—4 chops; Oonahens, 21½ to 24 taels; Oopacks, 26 to

28½ taels; stock, 61 chops. Souchong—No sales; stock, 4 chops. Scented Orange Pekoe—2,000 boxes, at 24 to 28 taels. Scented Caper—5,000 boxes, at 14 to 23 taels. Canton-packed Pouchong —500 half-chests and 1,000 boxes for America, at 18 to 20 taels. Canton Greens—Gunpowder, 6,000 boxes, at 16 to 20 taels; imperial, 250 half-chests and 500 boxes, at 20 taels; young hyson, 1,000 half-chests, at 18 to 22 taels; hyson skin, 500 half-chests, at 16 taels. Country Green—No stock. Foochow advices are to the 22nd ult. Tea—Settlements during the fortnight have been limited, and prices are more in favour of buyers. On comparing prices with those current on the 7th inst. there is a decline of 1 tael on congou. Other descriptions are slightly lower. Shanghai advices are to the 26th ult. Silk — Settlements during the fortnight are estimated at 3,500 bales, making a total for the season of 67,000 bales. About 3,000 to 4,000 bales further expected to arrive before China new year, Quotations are:— Tsatlee, No. 1-3, none; ditto, No. 4, 390 taels, firm; ditto, inferior, 340-380 taels; Taysaam, No. 1, 360 taels; ditto, No. 2, 340 taels; ditto, No. 3, 300-310 taels; ditto, No. 4, 280 taels; ditto, inferior, 240-270 taels. Total export of silk from China to Europe is 62,891 bales, against 46,509 bales last year, or an increase for this season of 16,382 bales. Tea—There has been a little more inquiry, and a few chops of Ningchow have been settled at previous rates. Total export of tea from China to Great Britain is 62,378,900 lbs, against 57,576,400 lbs last year, or an increase for this season of 4,802,500 lbs. To the United States the export is 20,685,300 lbs, against the same time last year of 24,514,900 lbs, showing a decrease for this season of 3,829,600 lbs.

We have very little change to notice in the value of any kind of sugar, for which, however, the demand has continued restricted. Importers show no disposition to accept lower rates.

Full quotations have been realised for most kinds of coffee. Buyers have, for the most part, operated for immediate wants only.

Messrs Volkart Brothers, of Ceylon, writing on the 15th ult., thus report the state of the coffee trade:—

Shippers of produce have availed themselves of the favourable weather to the utmost: the exports of the present season's crop to date are, however, small:—

PLANTATION COFFEE.

To Great Britain	cwts 141,333	against last year,	cwts	131,546
Foreign Ports	12,151	—	—	10,522

	159,418			146,486

NATIVE COFFEE

To Great Britain.....	cwts 32,762	against last year,	cwts	53,208
Foreign Ports.....	12,542	—	—	20,537
Australia and India.....	3,441	—	—	493
	48,745			74,238

The receipts of plantation coffee from estates have been large, and fine weather has enabled curers to prepare their parcels as rapidly as they reached Colombo, where stocks are very light. Native coffee continues to be offered of varied quality; contractors have had to give way within the last few days to the extent of 2s per cwt, at which there are buyers. Plantation coffee, low, nominal; ditto, mountain, 11s 3d to 11s 6d per bhl; native coffee, unpicked, 40s 6d to 41s 6d per cwt; ditto, picked and dried, nominal. Cinnamon, plantation, 9½d to 10d; ditto, inferior, 6d to 7d per lb.

Several floating cargoes of rice have changed hands at full quotations. The demand, generally, has shown more firmness, at 6d per cwt advance.

A large business has been transacted in the fruit market, and prices have had an upward tendency. Saltpetre has moved off slowly at the late decline in value.

Hemp and flax rule about stationary. The public sales of colonial wool continue to be well attended by buyers. All good and fine qualities have commanded the opening rates; but other kinds have changed hands heavily, at barely previous quotations—the decline in them being fully 2d per lb, when compared with the previous auctions. Letters from Sydney to the 21st inst. state that wool had advanced ½d to ¾d per lb, with a brisk market. The latest quotations paid were:—Superior clips, 1s 10d; fair to good, 1s 7d to 1s 9d; low to middling, 1s 2d to 1s 6d; grease, 11d to 1s 1d; locks, pieces, broken wool, &c., 8d to 1s 2d; handwashed, 1s 6d to 1s 9d; scoured, 2s to 2s 2d per lb.

We have received the following indigo report from Messrs Moran and Co., of Calcutta, under date the 8th ult.:—

Since last mail left this, about 12,500 maunds of indigo have changed hands, which makes the quantity now out of the market about 87,500 maunds. The business done would have been larger but for the delay which has occurred in the arrival of the steamers from the upper provinces, occasioned by the extremely low state of the river. The public sales have gone off unevenly; medium qualities suitable for France, and which have also been in favour for England, have sold briskly, whilst fine lots and inferior consuming kinds have gone off with less spirit, but without any material change in value. The purchases for the French market we find will fall short of our expectations, and will apparently be little over 6,000 chests. For America, under the existing state of affairs in that country, there is little demand. Of the quantity remaining for sale we estimate 600 maunds to be the produce of Lower Bengal, 2,700 maunds of Tirhoot and Chupra, and the rest Benares and Oudes; of the two latter divisions many invoices have yet to arrive. Exports of indigo from the 1st November, 1860, to the evening of the 8th February, 1861:—To England, 15,462; France, 5,727; for Europe, 69; American, 350; Gulf, 966—total, 22,574 chests.

The market for rum may be considered steady. Proof Demerara has realised 1s 11d to 2s; and proof Leeward, 1s 9d to 1s 10d per lb.

The metal market, generally, has continued very inactive. Scotch pig iron is selling at 47s 3d to 47s 6d per cwt.

Linseed oil has changed hands at 28s 3d to 28s 6d per cwt on the spot. In the value of other oils, very little change has taken place.

Tallow has sold slowly. To-day, P.Y.C., on the spot, is quoted at 59s 6d; all the month, 59s 6d; April to June, 58s; October to December, 55s 6d per cwt. Town tallow is 56s 6d net cash.

"The week closes," observes the New York *Shipping List* of the 9th inst., "upon a very quiet market. The leading features are an abundant supply, and a continued dearth of first-class paper. At the leading banks the offerings from day to day are materially less than their daily receipts. Rates are without variation. We quote:—

	Per cent. per annum.
Loans on call, stock securities	6 to 6½
Do. other good securities	7 0

Names less known	18 24

Trade in general is rather slow, considering that the season is now so far advanced. The dry goods jobbers and commission houses report rather more doing. There are a good many country merchants in town, but these, for the most part, are looking on, and waiting to see the drift of things before buying. The purchases that are making from day to day in most cases are to supply immediate wants. The stock market continues unsteady, and to vary with every new movement of the political barometer. The unsatisfactory character of the financial and mercantile advices from Europe had some influence in inspiring caution. Yesterday the market opened buoyantly, with an improvement of ¾ to 1 per cent. on nearly the whole list, with sales to a fair extent. The activity was principally in railway shares. The Federal securities and most descriptions of State bonds were held with firmness. At the Second Board prices were less regular, with symptoms of returning weakness at the close."

MARKETS IN THE MANUFACTURING DISTRICTS.

Notwithstanding that the business transacted, both for home use and export, has not been to say extensive, there has been an improved feeling in the manufacturing markets generally. The reduction in the rate of discount by the Bank of England has given greater confidence both to buyers and sellers. Iron has continued very dull, and coals have given way considerably in price.

MANCHESTER, March 21.—Since this day week a large business has been done in this market. Rates for most articles have so far only hardened, but sellers have been enabled to quit some portions of the considerable stocks now held. On shirtings from 6 lb to 8 lb, which chiefly were affected by the accounts from Calcutta, an advance of 1¼d to 3d per piece has been established, and quotations now range 4¼d to 6d per piece over the low sales of last week. Manufacturers have accordingly sought to cover sales by purchases of yarn, and have paid freely ¼d to ⅜d per lb higher. Export yarns have been proportionately affected. Calcutta telegrams to 26th February being to hand to-day reporting that large sales had caused that market to lose most of its late improvement, and accounts to same date from Bombay being also worse, at the same time that our other channels are as they were, well supplied, we remain wholly supported by the prospects of cheaper money and the other agencies affecting cotton and much difference of opinion exists as to whether these agencies are sufficient to support us.

BRADFORD.—The lowering of the Bank rate of discount has imparted a little confidence to our wool market, and there is rather more disposition to buy. It is very generally stated that wool is rather stiffer in price, and that bright-haired sorts, especially, cannot be bought so favourably by 5s to 10s a pack as a fortnight ago. Staplers know they cannot replace their stocks advantageously, and are therefore not anxious to sell as prices harden. There is a shade more business doing in spool yarns, and the inquiries for ex-

port continue, though the prices offered are altogether unremunerative. The market is, on the whole, very quiet. There is no real market price for yarns, the market having been over-influenced by forced sales, at prices far below the present cost of production. Pieces are in limited request, at late rates.

HUDDERSFIELD.—The attendance of buyers in our market has been limited, probably owing to the unsettled state of the trade, caused by the state of affairs in America. The purchases in the general market have again also been very limited, and stock in the cloth hall and manufacturers' shops continues to increase. During the week business has been quiet in the warehouse; but there has been considerably more doing in unions and low-priced wools suitable for the shipping trade.

LEEDS.—The markets in both cloth halls have been of a quiet character. A few parcels of summer goods changed hands, but there was scarcely any sale for ordinary broadcloths.

ROCHDALE.—There is no material change to report in the wool or flannel trade here. Wools are a little easier to buy, and merchants are offering lower terms for flannels, but manufacturers in general decline to enter into contracts at less than last month's rates.

LEICESTER.—The hosiery trade is still quiet in most departments, and there has not been much business done this week in the warehouses. Cotton goods are being produced, but in trade generally there is far short of an average business doing. At Loughborough and other hosiery districts there is no improvement to notice, and many of the town and country workpeople are unemployed. Yarns are dull and spinners are not fully engaged. There is no important change in wool.

NOTTINGHAM.—The cotton branch of the lace trade is more quiet than it has been for some weeks past; nearly every department is dull. The stiff plain net trade has not been known to be so inactive for a considerable time. There are a few orders for muslins and stiff fancy laces, but business generally is extremely quiet. As respects silk there is more doing in broad laces, and the fashions are becoming decidedly more favourable to the manufacturers of this article. There are only a few buyers in the town, and their operations are but limited. Manufacturers finish only to order and keep stocks as low as possible. In hosiery there is very little change to report. Business generally is quiet, with no immediate prospect of a revival. There are many hands totally unemployed. Yarns keep up in price.

BELFAST.—Demand for light bleaching linens has been pretty well sustained. Damasks of all ranges sell at regular prices. In the older establishments, and where the finer qualities of goods are brought out, the hands are actively employed, chiefly on contracts. Lawns sell slowly. There is no improvement in demand for power-loom goods. Yarns—A regular, but not active inquiry exists for medium and high counts of warp; prices are unsteady, except for the superior class of spinnings; these sell at the extreme rates of the past month. Low wefts have sold at less money.

WOLVERHAMPTON.—Current prices of pig iron:—Staffordshire cold blast, 4*l* 5*s*; Old Windmill End Mine Nos. 1, 2, and 3 melters, made with Lord Ward's thick coal warm air, 4*l*; Old Windmill End Mine forge pig iron, made with Lord Ward's thick coal, 3*l* 12s 6d; best native hydrate pigs, 3*l* 10s to 4*l*; first-class All Mine grey forge pigs, 3*l* 5*s* to 3*l* 10s; good mine pigs, with a modicum of flue cinder, 2*l* 10s to 2*l* 15s; mine pigs, deteriorated by cinder, 2*l* 7s 6d to 2*l* 12s 6d; Cleator Moor hæmatites, 3*l* 7*s* 6d to 3*l* 10s; Barrow hæmatites, 3*l* 7*s* 6d to 3*l* 10s; Workington hæmatites, 3*l* 7*s* 6d to 3*l* 10*s*; Kirkless Hall hæmatites, 3*l* 6*s* 3d to 3*l* 8*s* 9d; grey forge cinder pig iron, 2*l* 5*s* to 2*l* 10s; white forge cinder pigs, 2*l* 2s to 2*l* 7*s* 6d; ordinary melters, Nos. 1, 2, and 3, 2*l* 12s 6d to 2*l* 17s 6d; superior makes of mine melting iron, 3*l* 2s 6d to 3*l* 15s, according to make and quality. Favourite Shropshire and Forest of Dean brands, 4*l* 5*s* delivered; Northern hæmatites from 3*l* 5*s* to 3*l* 10*s*, according to brand or quality.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The whole of the leading markets held this week have been very scantily supplied with home-grown wheat, which continues to make its appearance in very poor condition. For most kinds there has been an active demand, at a further advance in the quotations of from 1s to 2s per quarter, and at which clearances have been readily effected. There has been an improved feeling in the sale for foreign wheat, at 1s per quarter more money. The transactions in all descriptions of barley have continued limited, and, in some instances, the quotations have had a drooping tendency. No change has taken place in the value of malt. Good sound oats have realised quite as much money as of late; but low and damp parcels have changed hands on rather easier terms. Both beans and peas have commanded full prices, and there has been a good consumptive inquiry for both English and foreign flour on rather higher terms.

Rather more animation has been observed in the demand for wheat in the continental markets, in which prices have somewhat advanced. All kinds of spring corn have changed hands freely, at late rates. In the United States, the export demand for breadstuffs has fallen off. For the time of year, the stocks continue very large.

In Scotland, wheat has produced rather more money; but the demand for barley and most other articles has fallen off.

The Irish markets have been firm for wheat, on higher terms. In other produce, the transactions have been on a very moderate scale.

The supply of wheat at Mark lane, to-day, was very limited. For all descriptions the trade ruled firm in the extreme, at fully Monday's improvement in the quotations to a further advance of 1s per quarter. For foreign wheat there was a good demand; but most kinds being held for higher prices, only a moderate business was transacted at quite previous rates. The barley trade was very dull, at irregular currencies for all medium and inferior parcels. The transactions in malt were by no means extensive, on former terms. Oats, beans, and peas realised late quotations. All kinds of flour were held at very full prices.

Mr Ed. Rainford thus reports the state of the floating trade:—There have been only 19 arrivals off coast reported since the 14th inst. They consist of 11 cargoes of wheat, 6 maize, and 2 beans, viz.:—Wheat, 1 from Galatz, 1 San Antonio, 2 New York, 1 Kertch, 1 Venice, 1 Taganrog, 1 Boston, 1 Limpias, 2 Odessa; maize, 6 New York; beans, 2 Alexandria. Of these 7 or 8 were previously disposed of. The sales of cargoes afloat since this day week are very few, the following only being reported up to the close of this day's market:—Wheat, arrived, per 492 lbs, Marianople at 56s; Berdianski, delivered sound, 56s 9d; Taganrog Ghirka, 53s; Venetian and Mantua (1 cargo), 56s 6d; per 480 lbs, Polish Odessa 57s, ditto, lower quality, 53s; Galatz, 47s; to be shipped at first open water, per 492 lbs, Taganrog Ghirka at 43s, free on board; to be shipped in June, Berdianski at 54s 6d. Maize, arrived, per 480 lbs, Danube, wevilled and partly damaged, at 37s, mixed American at 38s 3d, and 2 cargoes at 38s; shipping or to be shipped, per 492 lbs, Odessa at 40s.

The London averages announced this week are:—

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS, SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—Owing to the comparatively small supplies brought forward at the commencement of the week, extreme prices were obtained; and the market has been firm although not very active since then, general quotations shewing no change to yesterday (Thursday) afternoon. The quantity of West India sold was 1,736 hhds, including the few parcels by auction. Jamaica partly sold at 35s to 38s 6d; grainy Berbice, 37s to 40s. There is rather an improved demand for exportation, several floating cargoes of various descriptions finding buyers, and the refiners here make moderate purchases. There was a great improvement in the deliveries last week, which amounted to 5,115 tons. The landings reached 7,110 tons; consequently the stock has increased to 53,460 tons, or 4,120 tons above that of last year at the corresponding period. The Netherland Trading Company's sale, held yesterday, went off rather under the valuations for brown, but slightly dearer for white Java.

Mauritius.—2,655 bags sold with more spirit on Tuesday, and some business has been done by private contract, the latest quotations being as follows: brown, 30s to 35s; crystallised, 41s to 44s; grainy, 36s 6d to 41s 6d. Two floating, Nos. 14 to 14½, sold at 29s 9d to 30s for France.

Madras.—3,000 bags native have changed hands by private contract at 31s per cwt.

Bengal.—551 bags sold at 41s 6d to 42s 6d; soft brown, 33s 6d to 34s 6d per cwt.

Siam.—2,581 bags sold steadily: brown, 31s to 35s; low grey to good yellow, 35s 6d to 39s 6d; fine yellow to white, 40s to 43s per cwt.

Manilla.—2,400 bags washed clayed, bought in last week, have been placed at 32s 6d. By auction during the present one, 6,200 bags sound of common quality were sold at 33s 3d per cwt.

Java.—484 baskets sold as follows: brown, 33s 6d to 35s 6d; soft yellow and grey, 36s 6d to 37s 6d; good yellow, 39s to 40s; grainy yellow and white, 41s to 43s.

Other Foreign.—By auction, 227 casks Cuba sold at 34s 6d to 38s for grainy brown and yellow. 450 boxes Havana: brown to low middling yellow, 33s 6d to 36s 6d. 844 casks foreign muscovado, of indirect import, were all disposed of from 34s 6d to 38s. Of 672 casks sugar and melado, a portion sold at 27s 6d to 33s. Two floating cargoes of Havans, Nos. 10½ to 11, have been sold at 24s 3d to 24s 6d for near ports, and one of white at 33s for St Petersburg.

Refined.—The market is firmer, with buyers at the recent decline to 6d recovery for dry goods. Fine pieces and wet crushed are in demand, the latter being rather scarce. For export, some orders have been executed in bonded crushed, at or about the quotations, and prices in Holland are firmer.

RUM.—The stock held by importers is now exceedingly small; common kinds remain firm, with a steady demand. Proof Mauritius has sold at 1s 8½d; fair to good Demerara, 1s 11d to 2s; Leewards, 1s 9d per proof gallon; and some of the latter in second hands last week. Jamaica is quiet, excepting the finest marks. Mauritius proof has realised 1s 9d per gallon. The total stock of rum is nearly 4,000 puns less than at the same time last year, and the deliveries are still large.

COCOA.—110 bags Grenada were bought in at 58s per cwt. With continued good deliveries the stock of West India is now reduced to 3,530 bags. The stock of foreign keeps very large, viz., 9,700 bags.

COFFEE.—The relatively small quantity brought to public sale this week has sold at full prices, and the market is steady. 229 casks 98 barrels and bags plantation Ceylon realised 67s 6d to 71s 6d for fine fine ordinary small berry to middling palish; a few lots, 72s to 73s 6d. 10 barrels 197 bags native, 62s 6d to 64s 6d. 97 cases Neilgherry: pale, 63s 6d to 64s 6d. 225 bags Tellicherry, 65s; and 253 bags Singapore, chiefly sea-damaged, at 50s 6d to 62s. 2,000 Rio partly found buyers at 54s 6d to 55s 6d for good ordinary quality. A floating cargo of St Domingo has been sold for the Mediterranean, at 61s 6d per cwt.

TEA.—The sales on Wednesday comprised 16,897 packages, various descriptions. Of the above quantity, 5,230 packages (including 3,553 boxes) found buyers; 3,483 being offered "without reserve," and previous prices were in most cases realised. Scented orange pekoe, "without reserve," sold at 1s 2½d to 1s 2¾d per lb the full value. 2,172 packages Assam tea of the Company's growth are advertised for next Wednesday. By private contract the general demand has partially improved.

RICE.—The market is much firmer, and a speculative inquiry has prevailed for floating cargoes of soft grain at 6d advance. Seven or eight were sold yesterday, viz.: six or seven at 10s 6d to 10s 9d for new Necrancie, one at the latter price being for the Continent; also one at 11s, *open charter.* Transactions on the spot have not been extensive by the unwillingness of holders to realise. White Bengal has sold at 11s 4½d to 12s 6d; Ballam, 10s 6d; pinky Madras, 11s 3d; soft grain sorts, 9s 9d to 10s 9d per cwt.

IMPORTS and DELIVERIES of RICE to March 16, with STOCKS on hand.

	1861.	1860.	1859.	1857.
	tons	tons	tons	tons
Imports	12400	6060	5360	22600
Deliveries for home use	13800	11200	4420	6570
Exported	*	5810	4400	3300
Stock	31800	61800	81800	75900

* The deliveries of duty-free goods for export are not given now, and the total will be shown under the head of home consumption.

SPICES.—The sales have been rather larger than usual, but prices exhibit slight changes. 1,089 bags pimento chiefly sold at 2¾d to 3d for common to good quality. Of 65 cases nutmegs, a few lots were bought in; the remainder sold at 1s to 1s 4d for small and middling brown, and 4d to 8d for wormy and defective. 6 cases mace, ordinary to middling, sold at 10d to 1s. 4,970 bags black pepper chiefly sold, at and afterwards: Penang, 3⅞d to 3⅞d; good Siam, 3⅝d to 3¾d; Alleppy, 4⅛d to 4¼d; and a small portion of Singapore black at 3¼d to 4d. 269 bags Penang white part sold at 6d to 6¼d; very good to fine, 7d to 8¼d. 326 bags Ceylon cinnamon found buyers at a reduction of 1d per lb on last quarterly sale's rates: 1st sort, 1s 6d to 1s 7d; 4th to 2nd sort, 7d to 1s 1d. 33 cases 38 bags cassia vera were bought in at 20s to 25s per cwt.

SAGO FLOUR.—1,034 bags partly sold at 16s per cwt.

SAGO.—1,335 boxes, chiefly Borneo grain, nearly all sold at reduced rates for the better sorts: good to fine bold, 18s 6d to 19s 6d; medium, 16s to 16s 6d; small medium, 16s 6d to 18s per cwt.

SALTPETRE.—Partial inquiries have prevailed for Bengal, and the better grades are rather firmer. Several parcels are reported sold by private contract; low to fine, 33s 9d to 38s per cwt.

IMPORTS and DELIVERIES of SALTPETRE to March 16, with STOCKS on hand.

	1861.	1860.	1859.	1858.
	tons	tons	tons	tons
Imported	3500	3370	5500	1700
Delivered	2430	3030	3860	3120
Stock	4880	4200	3600	4960

Deliveries last week 260 tons.

COCHINEAL.—260 bags partly sold: Honduras silvers, 2s 8d to 3s 2d; Teneriffe, 2s 7d to 2s 9d: blacks of both descriptions were bought in at 3s 6d to 4s 6d and 2s 11d to 3s 2d per lb respectively.

DYESTUFFS.—Gambier is in moderate demand at 16s 9d to 17s 3d. Cutch sells slowly, the quotation for good being 24s 6d; heated sold by auction at 23s to 23s 6d. Safflower remains firm: 95 bales Bengal partly sold at 3*l* 10s to 6*l* 15s for low ordinary to fair quality. Bombay madder roots were taken in at 28s per cwt.

SHELLAC continues to be offered sparingly, and the nearest value of DC orange is 10*l* 10s to 10*l* 12s 6d per cwt. Little can be obtained even at that price.

DRUGS.—Camphor is nominal at 11*l* to 12*l*, holders being unwilling to sell.

METALS.—The market is still quiet, and several descriptions have sold upon rather lower terms, nor did the reduction in the Bank rate yesterday lead to any material improvement. Latest transactions in Scotch pig iron were at 47s to 47s 3d for mixed Nos. Most kinds of British manufactured are depressed. The spelter market has been less depressed: 18*l* paid on the spot; 18*l* 7s 6d for June shipment. Small sales of foreign tin have been effected at 117s for Straits, and 122s per cwt for Bancs. The smelters have not reduced the prices of English.

HEMP.—Russian has been firmer since the declaration of the Government contract. Clean Petersburg by auction, yesterday, realised 30*l* 15s to 31*l* per ton. Manilla is unaltered.

JUTE.—The public sales on Wednesday, comprising 1,800 bales, passed off with great heaviness, and the portion sold was at 5s to 10s decline: common to fine, 13*l* 7s 6d to 19*l* 15s per ton.

LINSEED is steady at last week's quotations for East India.

OILS.—Olive has been very dull: Gallipoli, 60*l*; other sorts 51*l* to 58*l* per tun. No change has occurred in fish oils. Linseed is in good supply and demand. Buyers at 28s and 28s 3d now required. Rape shows a tendency to improvement: foreign refined, 39s 6d to 40s; brown, 37s per cwt. Palm has declined to 44s 6d for fine. Cocoa-nut it steady: Ceylon, 49s; Cochin, 50s to 51s per cwt.

TURPENTINE.—American spirits, 31s 6d. No sales are reported in rough.

TALLOW.—On Monday the market was firm, but it has since been very quiet, and foreign occasionally receded 6d. 1st sort Petersburg Y. C., 59s 3d to 59s 6d; for delivery in April to June, 58s; in October to December, 55s 6d to 56s per cwt.

PARTICULARS OF TALLOW.—Monday, March 18.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The refiners bought freely to-day, and in some instances prices were 6d higher. 2,500 casks West India have sold for the week. The public sales, comprising 20,730 bags Mauritius, 201 casks West India, 1,784 bags Madras and 203 bags Natal, went off with spirit. Fine crystallised Mauritius was higher. A floating cargo of Mauritius sold for the United Kingdom: No. 11 to 11½, at 25s 6d per cwt.

COFFEE.—315 casks 790 barrels and bags native Ceylon realised 63s to 65s. 2,070 bags Rio part sold at 55s 6d to 58s 6d per cwt.

RICE.—1,833 bags Bengal were taken in: white, 11s 6d; cargo kind at 11s. A floating cargo of Madras sold at 11s 3d per cwt.

SPICES.—61 cases nutmegs and 18 cases mace went off at about the previous value. 320 barrels Jamaica ginger, 59s to 70s per cwt.

SALTPETRE is 6d to 1s higher for Bengal, refraction 8¼ to 2¾; selling at 35s 6d to 38s per cwt.

COCHINEAL partly sold at previous rates.

SAFFLOWER.—69 bales sold at full prices.

SHELLAC was dearer.

OILS.—444 casks palm by auction part sold at 43s 6d to 44s 3d. 475 casks cocoa-nut bought in: Cochin, 51s; Ceylon, 49s per cwt. 1,871 tuns Japan seed were bought in at 30s to 32s per cwt.

TALLOW.—Town, 58s. By auction, 286 casks Australian sold at 48s to 52s 9d; 474 casks Odessa part sold at 54s 3d to 57s per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—In the home market refined sugar has been in more demand this week, and is about 6d higher for most descriptions of goods. Treacle in moderate demand. 34s has been paid for small quantities of crushed in barrels for export. The Dutch market is rather firmer; some large sales have been made for forward delivery for Italy.

GREEN FRUIT.—Market improved, with a reduced stock of oranges, Some parcels of St Michael, Valencia, and Palermo, sold by Keeling and Hunt at public sale, went at an advance of 2s to 3s per package. Lemons without alteration. More inquiry for nuts of all kinds, the approaching Easter holidays having an influence favourable to the sale of fruit generally. No improvement in the prices of Seville and Sicily sours.

DRY FRUIT.—The fruit trade has considerably revived, and a large trade has been done at full rates both in currants and Smyrna raisins.

ENGLISH WOOL.—No alteration either in demand or price.

COLONIAL WOOL.—The sales during the past week have gone off at rather firmer prices.

FLAX unaltered.

HEMP.—Market firmer, and more business doing. Annexed are particulars of the Navy contract this year:—

Navy Office, 15th March 1861.

Hemp Contract, to be bid for the 9th April, 1861, to be delivered by the 31 Oct. 1861.

	Petersburg.	Riga.
Chatham	1,100	600
Portsmouth	800	500
Devonport	600	400
	2,500	1,500

Total 4,000 tons

COTTON.—Sales of cotton from Friday, 15th of March, to Thursday, 21st, inclusive :—4,900 bales Surat at 5⅜d to 5⅝d for fair to good fair sawginned, 5¾d for good Broach, 5¼d to 5⅜d for middling fair to fully fair Dhollera, 4¾d to 5d for ordinary to middling Oomrawatty, 4¼d to 5d for very middling to fair Mangarole; 1,300 bales Tinnevelly at 5⅛d to 5⅞d for middling fair to fully good fair; and 600 bales Western Madras at 4⅝d, 4¾d to 5d for fully fair to good. An active demand has prevailed throughout the week, and an extensive business has been transacted, chiefly on speculation, prices gradually hardening, and the market closes with great firmness, and with an upward tendency; the advance during the week on all descriptions being ⅛d to ¼d per lb. 1,794 bales Tinnevelly are advertised for public sale on Thursday, 28th inst.

SILK.—Little or no alteration in the silk market this week. A fair business doing in China silk, other sorts dull; prices of good silk very firm, other sorts less so, but more firm than last week generally.

TOBACCO.—There has been more demand for good and fine descriptions of Western strips, and the sales made have been at full quotations. Market steady and firm.

LEATHER AND HIDES.—There is again no change to report in the leather market; the demand is still limited to the immediate wants of buyers, and prices are nearly unaltered. At Leadenhall, on Tuesday, there was a good supply of fresh leather; the articles for which there was the most inquiry were good English butts, prime dressing hides, calf skins, and horse butts.

TIMBER.—The trade in wood has been heavy and depressed. Prices are lower and consumption slack. Yet a very extensive delivery of Baltic deals and timber has been made from the public docks since the year began, and it may be assumed that there is no check upon consumption in consequence of high prices; but, on the contrary, the present prices are below the import cost, past and prospective. The delivery of pine and spruce deals is not equal to the delivery of Baltic deals. The prices of such are felt to be high for the extent of the stock.

METALS.—Some little relief to business has been experienced this week in the reduction of the rate of discount, but still there is an absence of activity. Copper is without change either in price or demand. Iron continues to be extremely depressed, and the new American tariff having passed, no present revival can be expected in this metal. Tin keeps steady at last week's prices. Lead is about 5s per ton lower. Tin plates in slightly improved demand.

TALLOW.—Official market letter issued this evening :—

	s	d
Town tallow	58	0
Fat by ditto	3	0
Yellow Russian	61	0
Melted stuff	39	0
Rough ditto	23	6
Greaves	18	0
Good dregs	7	0

PROVISIONS.

There is very little bacon selling this week at our last quotations. Butter market brisk: Friesland, 120s to 124s, arrivals increasing. Jersey, quality inferior, has fallen 6s to 8s.

METROPOLITAN CATTLE MARKET.

MONDAY, March 18.—The total imports of foreign stock into London, last week, amounted to 2,494 head. In the corresponding period in 1860, we received 2,025; in 1859, 2,524; in 1858, 537; in 1857, 1,218; in 1856, 503; and in 1855, 1,330 head.

From our grazing districts the receipts of beasts fresh up exhibited a falling off, when compared with Monday last; but their quality was prime. Notwithstanding that the demand for all breeds was inactive, in some instances the quotations advanced 2d per 8 lbs. The general top figure for Scots was 4s 10d, but very superior stock realised 5s per 8 lbs. The arrivals from Norfolk, Suffolk, Essex, and Cambridgeshire, amounted to 1,960 Scots, Shorthorns, and crosses; from other parts of England, 600 various breeds; and from Scotland, 160 Scots and crosses. There was about an average time-of-year supply of sheep in the pens, and the general quality of most breeds was inferior. The mutton trade was slow at the late decline in value. A few very superior old Downs sold at 6s in the wool; but the general top figure was 5s 10d per 8 lbs. There were about 3,500 shorn sheep on offer at about 1s per 8 lbs beneath those in the wool. Lambs, the supply of which was limited, moved off steadily at from 7s to 8s per 8 lbs. From the Isle of Wight 40 lambs came to hand. We have to report a steady sale for calves at very full prices. The supply was limited.

SUPPLIES

	March 19, 1860.	March 18, 1861.
Beasts	3840	3360
Sheep	21070	18450
Calves	96	46
Pigs	370	230

THURSDAY, March 21.—To-day's market was scantily supplied with beasts; nevertheless, all breeds moved off heavily, at Monday's quotations. Although the supply of sheep was small, the mutton trade was very inactive. In prices, however, no change took place. The show of lambs was on the increase, and the lamb trade was much less active, at from 7s to 8s per 8 lbs. We have to report a steady sale for calves, at full currencies. Pigs commanded previous rates, but milch cows were very dull.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	4	3	8	Prime Southdown sheep	5	8	5	10
Second quality ditto	3	10	4	2	Large coarse calves	5	0	5	6
Prime large oxen	4	4	4	8	Prime small ditto	5	8	6	0
Prime Scots, &c.	4	8	4	10	Large hogs	4	0	4	6
Coarse and inferior sheep	3	6	3	10	Small porkers	4	8	4	10
Second quality ditto	4	0	4	4	Suckling calves.....each	18	0	22	0
Prime coarse-woolled do.	4	8	5	6	Quarter old store pigs	22	0	29	0

Total supply—Beasts, 750; sheep and lambs, 3,200; calves, 60; pigs, 300.
Foreign supply—Beasts, 220; sheep, 700; calves, 40.

HOP MARKET.

LONDON, Monday, March 18.—Rather more business has been transacted of late, and though the demand is far from large, it has been sufficient to give a healthier tone to our market, and a firmer character to our currency, which is as follows:—Mid and East Kents, 80s, 140s, 200s; Weald of Kents, 60s, 120s, 168s; Sussex, 60s, 80s, 126s; Yearlings, 80s, 120s, 170s.

FRIDAY, March 22.—All good and fine hops are in steady request, at full quotations; but inferior qualities command very little attention. The market, generally, is firm.

POTATO MARKET.

SOUTHWARK WATERSIDE, Monday, March 18.—During the past week the arrivals both coastwise and by rail have been large. The trade still continues in a very dull state, with very little alteration in prices. The following are this day's quotations :—Yorkshire Flukes, 140s to 150s; Lincolnshire Regents, 100s to 110s; Dundar red soil ditto, 140s to 160s; Ditto, ditto, reds, 105s to 110s; North Berwick Regents, 120s to 125s; Perth, Forfar, and Fife ditto, 90s to 105s; ditto, ditto, ditto Rocks, 80s to 90s; ditto, ditto, ditto reds, 75s to 80s; French whites, 60s to 90s; Belgian ditto, 60s to 80s; Dutch ditto, 60s to 80s per ton.

THURSDAY, March 21.—The arrivals of home-grown potatoes coastwise and by rail have been more limited since our last report, and the supplies now on hand are shorter in consequence, and trade is better at the annexed rates:—York Flukes, from 130s to 150s; Scotch Regents, 110s to 130s; ditto Cups, 75s to 90s; ditto Rocks, 90s to 100s; Dunbar Regents, 160s to 180s per ton.

HAY MARKETS.—THURSDAY,

SMITHFIELD.—Meadow hay, 2*l* 0s to 5*l* 5s; clover, 3*l* 0s to 5*l* 15s; and straw, 1*l* 10s to 1*l* 18s per load. A slow trade.

CUMBERLAND.—Meadow hay, 2*l* 0s to 5*l* 8s; clover, 3*l* 0s to 5*l* 15s; and straw, 1*l* 10s to 1*l* 12s per load. Trade dull.

WHITECHAPEL.—Meadow hay, 2*l* 0s to 5*l* 5s; clover, 3*l* 0s to 5*l* 18s; and straw, 1*l* 10s to 1*l* 18s per load. Trade heavy.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, March 22.—We have had rather more inquiry this week, though the transactions have not been extensive, as consumers continue to provide merely for their most urgent wants. Prices have undergone no material change, but the tendency is in favour of buyers,

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, March 22.—Market has been very quiet, and the transactions in wheat, flour, and Indian corn have only been moderate at the retail rates of Tuesday.

METALS.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, March 22.—The market for manufactured iron has been dull throughout the past week, but previous rates generally have been pretty well maintained. For Scotch pig iron there has been more speculative inquiry this week, and slightly higher prices have been demanded. Copper and lead are both comparatively neglected. Tinplates are also dull of sale. For most other metals there is only a limited inquiry.

The Gazette.

TUESDAY, March 19.

BANKRUPTS.

R. Barrie, York street, Covent garden, builder.
A. Mordaunt, Southampton, chemist.
T. Gray, Garrett mills, Wandsworth, manufacturer of materials for making paper.
A. W. Laidlaw, Bury court, St Mary axe, wine merchant.
J. Measor, Brighton, upholsterer.
G. Groom, Aldermanbury, lithographic printer.
W. Riley, Ilkeston, Derbyshire, butcher.
W. Parry, Brecon, carpenter.
P. Scott, Liverpool and Newcastle, Downshire, Ireland, timber merchant.
S. P. Pennell, Liverpool, commission merchant.
J. B. Robertson, South Shields, draper.

SCOTCH SEQUESTRATIONS.

G. Bruhns, Glasgow, cotton agent.
J. Stormonth, Edinburgh, teacher.
J. Fortune, Edinburgh, watchmaker.
W. Mackersy, Edinburgh, writer.
R. Davidson, Dundee, wright.

GAZETTE OF LAST NIGHT.

BANKRUPTS.

A. Wilson, Kensington, draper.
W. Bowen, Swansea, Glamorganshire, victualler.
W. Simpson, now or late of Newsham Mill, near Pickering, Yorkshire, corn miller.
S. Salomonson, Abchurch lane, City, bill broker and scrivener.
G. Griffin, Walsall, Staffordshire, grocer and provision dealer.
A. W. Voigt, Cheltenham, dealer in pianofortes.
G. Stevens, Great St Helen's, City, merchant.

T. D. Hunt, Bootle, near Liverpool, innkeeper.
E. Kirby, Liverpool, and S. Bracegirdle, Northwich, Cheshire, salt proprietors and timber merchants.
W. Scotson, Liverpool, cab proprietor.
J. Fielding, Macclesfield, Cheshire, cotton spinner and manufacturer.
W. West, Bristol, bookseller and stationer.
W. H. Thomas, Dawlish, Devonshire, builder.

CRYSTAL PALACE.—The Palace is likely to present a scene of considerable activity during the coming fortnight. During Passion Week, commencing on Monday next, the entire chorus of the Royal English Opera, combined with the fine band of the Company, will give a series of Oratorio performances in the Concert Hall. A Scared Concert will take place in the Centre Transept at three o'clock on Good Friday. For Easter a variety of amusements are provided of a totally different character.

COMMERCIAL TIMES

Weekly Price Current.

☞ the prices in the following list are carefully revised every Friday afternoon, by an eminent house in each department.

EPITOME OF RAILWAY NEWS.

TRAFFIC RETURNS.—The traffic returns of railways in the United Kingdom for the week ending the 9th of March amounted to 480,450*l*, and for the corresponding week of last year to 458,610*l*, showing an increase of 21,840*l*. The gross receipts of the eight railways having their termini in the metropolis amounted to 205,482*l*, and for the corresponding week of 1860 to 197,258*l*, showing an increase of 8,224*l*.

SCOTTISH CENTRAL.—The report of the directors states that during the past half-year 9,737*l* had been expended on capital account. The revenue account for the half-year ending the 31st of January showed that 88,365*l* had been received, against 86,579*l* for the corresponding period of the preceding year, showing an increase of 1,786*l*.

NORTH BRITISH.—The report of the directors states that the total gross revenue for the half-year amounted to 169,642*l*, against 157,516*l* for the corresponding half of the preceding year, showing an incerase of 12,135*l*. The average rate of interest on loans was diminished from 4*l* 3s 7d to 3*l* 19s 7d per cent., and the net surplus enabled the directors to recommend a dividend at the rate of 3½ per cent. per annum, and to carry over a balance of 1,005*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, March 18.—The railway market declined in the morning, but slightly rallied towards the close. Several of the leading stocks, however, left off ¼ to ⅜ per cent. lower, especially London and North-Western, which was more supplied. No change of importance occurred in colonial descriptions. Grand Trunk of Canada stock was quoted 21¼ to ⅜, and Great Western shares, 11¼ to ⅜. Foreign shares were inactive at former prices. Victor Emmanuel obligations, however, were higher. Cape Government debentures also improved. In American railway securities the New York and Erie and Illinois Central declined. There was not much doing in mines, but prices were in most cases firmly maintained.

TUESDAY, March 19.—The railway market to-day experienced little change. In some stocks a slight improvement took place, especially Great Northern, Great Western, and Lancashire and Yorkshire. Berwick, South-Eastern, and Sheffield, on the other hand, were a fraction lower. The general business was limited. In the colonial market, Grand Trunk of Canada stock receded to 21 to ¼. East Indian was also dull, while Buffalo and Lake Huron shares improved. No material alteration occurred in foreign descriptions. South Austrian and Lombardo-Venetian were last quoted 1¼ to 1⅜ dis. Cape Government debentures relapsed. American railway securities continued depressed. Mines closed about the same as yesterday. Joint stock banks and miscellaneous descriptions also left off without important change.

WEDNESDAY, March 20.—The railway market showed a stronger tendency to-day in anticipation of the Bank rate being reduced. Lancashire and Yorkshire and Great Western were especially firm, being in demand for transfer. The former advanced ¼ per cent., and the latter ⅜. Other stocks were generally the same as last evening, but in some instances an improvement of ⅛ occurred. In the colonial market, Grand Trunk stock rallied to 21¼ to ⅜. Ceylon shares were also a fraction higher. Foreign descriptions were dull, especially Great Luxembourg. South Austrian and Lombardo-Venetian remained at 1⅜ to ⅛ dis. American railway securities closed the same as yesterday. Mines were quiet, but in some cases showed an advance. In joint stock banks there was a recovery in Australasia shares; Oriental were also firmer. In miscellaneous securities an improvement took place in Canada Land, and a decline in London General Omnibus.

THURSDAY, March 21.—The railway market to-day was dull, the lowering of the Bank rate having been fully anticipated, and in most of the leading stocks a decline of ⅛ to ⅜ per cent. took place. Midland was especially heavy, at a reduction of ⅝ per cent., the traffic return this week being less favourable. The general transactions continued on a moderate scale. In the colonial market, East Indian improved to 99 to ½, while Grand Trunk of Canada receded to 21 to ¼. Indian shares generally were rather better. Foreign descriptions were inactive. Mines were dull, and in several cases the final quotations were lower. United Mexican, however, improved.

FRIDAY, March 22.—The railway share market continued flat. A reduction of ¼ to ⅜ per cent. took place in most of the principal stocks. Little business was done. Lombardo-Venetian railway shares were quiet, at 1¼ to 1⅛ dis. Great Western of Canada ruled steady; scarcely any business was done in Indian railway stocks. The mining share market exhibited very little activity.

AND

Just published, second edition, price 1s 6d,

CASES and OBSERVATIONS illustrative of the beneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings. By SAMUEL HARE, F.R.C.S., &c.

"We unhesitatingly commend this work as a truthful and trustworthy statement of the power of scientific surgery and medicine over some of the most grievous hindrances to human activity and industry."—MEDICAL GAZETTE.

"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.

"Mr Hare may take credit to himself for having effected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.

"Mr Hare is, we think, a sound and successful practitioner.' —MEDICAL CIRCULAR.

London: John Churchill; and may be had of al booksellers

DR ROBERT ROWE ON INDIGESTION.

This day is published, price 2s 6d, the fifteenth edition,

NERVOUS DISEASES, Liver and Stomach Complaints, Low Spirits, General Debility, and Diseases of Warm Climates; the Result of Thirty Years' Practice.

By G. ROBERT ROWE, M.D.

"Dr Rowe claims with justice a priority of authorship, while he yields to none in his treatment. The value of this work is enhanced by its practical nature."—LANCET.

"We have no hesitation in placing this work among the first ranks. We entertain a high opinion of its value."—MEDICAL TIMES.

"This is a clever and useful work; contains much that is worthy of attention, and should be read by all martyrs to indigestion and other ills"—TIMES.

Also by the same Author, 2nd edition, price 4s 6d, On some of the Important Diseases of Women and Children.

London: J. Churchill. and to be had of all booksellers.

MEDICAL CONSULTATIONS.— Dr LA'MERT, Honorary Member of the London Hospital Medical Society, L.S.A., &c., may be confidentially consulted, either personally or by letter, on the various forms of NERVOUS and PHYSICAL DEBILITY, at his residence,

37 BEDFORD SQUARE, LONDON.

Dr LA'MERT is the only qualified practitioner on the Medical Register who, for 20 years, has exclusively studied the treatment of those physical infirmities which militate against the happiness of married life, or prevent the contraction of engagements which constitute the most cherished objects of existence.

These affections, usually the consequences of personal indiscretion in early life, or residence in tropical climates, are seriously aggravated by the perusal of pretended medical works by unqualified persons, which are intended only to excite unnecessary alarm; whereas, in most cases, a simple and easy mode of treatment will restore health and vigour and all the dignified prerogatives of manhood. Important information on these interesting subjects will be found in Dr La'Mert's work on SELF-PRESERVATION, which may be had, price 1s, free by post for 13, or sealed ends for 20 stamps, from Mann, bookseller, 39 Cornhill; or from the Author. At home from 11 till 2, and 6 till 8.

Dr L. La'Mert may be consulted in Glasgow until the 31st March, at 56 Rosebank terrace, St George's road.

DR CURTIS'S MEDICAL WORK, "MANHOOD."

An Essay on Nervous and Generative Diseases.

The 140th thousand, with numerous plates, in a sealed envelope, price 1s, or post paid, by the Author, for twelve stamps.

MANHOOD: THE CAUSE AND CURE of PREMATURE DECLINE in MAN, with Plain Directions for Perfect Restoration to Health and Vigour, being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, the result of twenty-five years' successful practice. By Dr J. L. CURTIS, 15 Albemarle street, Piccadilly, London. Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a parent, preceptor, or clergyman."—SUN, evening paper.

"Dr Curtis has conferred a great boon by publishing this little work, in which is described the sources of these diseases which produce decline in youth, or more frequently premature old age."—DAILY TELEGRAPH, March 27, 1858.

N.B. The Author of the above Medical Treatise may be consulted as usual, either by letter or personally, at his residence. The efficacy and harmless nature of the remedies employed by Dr Curtis, having been demonstrated by the most complete success during a practice extending over a period of 20 years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

Published by Allen, 20 Warwick lane, Paternoster row; Mann, 39 Cornhill; and free from the Author for 12 stamps.

A BOON TO NERVOUS SUFFERERS.—Twenty Thousand Copies of a Medical Book for gratuitous circulation. HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., who has devoted fifteen years to the study and treatment of Nervous Debility, Loss of Memory, Dimness of Sight, Lassitude, and Indigestion, will send free, for the benefit of Nervous Sufferers, a copy of the New Medical Guide, containing his highly successful mode of treatment, with necessary instructions, by which sufferers may obtain a cure. Post free on receipt of a stamped directed envelope. Address Dr Henry Smith, 8 Burton crescent, Tavistock square, London, W.C.

AIR CIRCULATING AND ANTI-GREASE HATS—Patented and Manufactured by MAYHEW and CO., 89 New Bond street, W.—These Hats are waterproof, grease proof, and ventilating; they are peculiarly soft and easy in wear, ensuring a comfortable and complete fit to any formation of head, being light, yet durable. First quality, 21s; second ditto, 17s, cash. To be had wholesale at the manufactory, Union street, Southwark, S.E.

KEATING'S COD LIVER OIL. Just Imported. The Pale from Newfoundland, and he Light Brown from Norway. The supplies of the present season have never been surpassed, the fish being unusually fine, and the oil nearly tasteless. Professors Taylor and Thompson, of Guy's and St Thomas's Hospitals, have analysed, and pronounced the PALE NEWFOUNDLAND OIL the best and most desirable for invalids of very delicate constitution. The Light Brown being more economical in price, is brought within he reach of all classes. NO HIGHER PRICE NEED BE PAID than the following:—Light Brown, 1s 8d per pint, or 3s per quart. Pale, 1s 6d half-pints, 2s 6d pints, 4s 6d quarts, or in five-pint bottles, 10s 6d, imperial measure, at 79 St Paul's Churchyard.

DR DE JONGH'S

(Knight of the Order of Leopold of Belgium)

LIGHT-BROWN COD LIVER OIL, Prescribed by the most Eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for

CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,

Is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.

Sir HENRY MARSH, Bart, M.D., Physician in Ordinary to the Queen in Ireland—"I consider Dr de Jongh's Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

Dr LANCASTER, F.R.S.—"I deem the Cod Liver Oil sold under Dr de Jongh's guarantee to be preferable to any other kind as regards genuineness and medicinal efficacy."

Dr GRANVILLE, F.R.S.—"Dr Granville has found that Dr de Jongh's Light-Brown Cod Liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."

Dr LAWRANCE, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr de Jongh's Light-Brown Cod Liver Oil in prefegence to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound in which the efficacy of this invaluable medicine is destroyed."

Dr de Jongh's Light Brown Cod Liver Oil is sold only in IMPERIAL Half-Pints, 2s 6d; Pints, 4s 9d; Quarts, 9s; capsuled, and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists.

SOLE AGENTS,

ANSAR, HARFORD, and CO., 77, STRAND, London, W.C.

CAUTION.—Beware of Proposed Substitutions.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light of texture, and inexpensive, and are drawn on like an ordinary stocking. Price from 7s 6d to 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

VALUABLE INFORMATION.— GRATUITOUS EDITIONS of the following LECTURES, delivered at the Royal Institute of Anatomy, Science, and Medicine, 369 Oxford street, London, by W. B. MARSTON, the Principal, are being issued, with plain directions for SELF-TREATMENT and CURE in each of them.

No. I.—NERVOUS DEBILITY (the result of youthful error), loss of memory, shortness of breath, dimness of sight, exhaustion, and general incapacity. Addressed specially to Young Men.

No II.—MARRIAGE: Its Obligations and Impediments. Addressed to those who contemplate Marriage, and to the Married who desire Children.

No. III.—THE BRAHMIN'S ELIXIR OF LIFE: Its History—Secret Remedies of the Hindoos no Fable—Full Particulars of this Extraordinary Specific—Its Amazing Powers as a Reinvigorator of the Impaired Functions, and in all Cases of Nervous Debility.

Each Lecture, neatly printed and bound, will be sent GRATIS, on receipt of two stamps to prepay postage, or THE WHOLE FOUR, BOUND TOGETHER, with numerous additions, and full directions for SELF-TREATMENT and CURE, 160 pages, 8vo, post free, for Six Stamps. Address, Treasurer, Royal Institute, 369 Oxford street, London.

MR LEWIS AND SON, 113 Strand.—The Royal Lewisian Systems of Writing, Arithmetic, Bookkeeping, and Shorthand, as taught for upwards of fifty years by Mr Lewis, the real inventor and first teacher of these world-renowned and only infallible systems, insures perfection in any of the above branches after a few easy and interesting lessons Persons unable to take the lessons may obtain the inventor's works for self-instruction at his only institution, 113 Strand

NOTICE.—"BEWARE OF IMITATIONS."

LEA AND PERRINS' "WORCESTERSHIRE SAUCE" Is pronounced by Connoisseurs to be a most agreeable addition to every variety of dish.

*** See the names of Lea and Perrins upon every label, bottle, and stopper.

Sold by Messrs Crosse and Blackwell, London; and by dealers in sauces generally.

Sole Manufacturers—

LEA and PERRINS, WORCESTER.

DEANE'S TWO-HOLE BLACK PENS which are unequalled for their durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped

"G. and J. Deane, London bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

ALLSOPP'S PALE OR BITTER ALE.—Messrs S. ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the March Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent; and at the undermentioned Branch Establishments:—

Messrs SAMUEL ALLSOPP & SONS.

LONDON	61 King William st., City
LIVERPOOL	Cook street.
MANCHESTER	Ducie place.
BIRMINGHAM	Upper Temple street.
DERBY	London road.
WOLVERHAMPTON	Exchange street.
CHESTERFIELD	Low Pavement.
STOKE-UPON-TRENT	Wharf street.
DUDLEY	Burnt Tree.
WORCESTER	The Cross
SOUTH WALES	King street, Bristol.
DUBLIN	Crampton quay.
CORK	Cook street.
EDINBURGH	Union street lane.
GLASGOW	St Vincent street.
PARIS	279 Rue St Honoré.

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Bottles and Casks, and on Draught, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

When in bottle, the genuineness of the lable can be ascertained by its having "ALLSOPP and SONS" written across it upon red and white ground striped.

The Brewery, Burton-on-Trent, April 30, 1860.

KEATING'S COUGH LOZENGES.— Statistics show that 50,000 persons annually fall victims to Pulmonary Disorders, including Consumption, Diseases of the Chest, and the Respiratory Organs. Prevention is at all times better than cure; be, therefore, prepared, during the wet and wintry season, with a supply of KEATING'S COUGH LOZENGES, which possess the virtue of averting, as well as of curing, a Cough or Cold; they are good alike for the young or for the aged

RESTORATION OF VOICE BY KEATING'S COUGH LOZENGES. Glasgow.

SIR,—I have great pleasure in informing you of the great good your excellent COUGH LOZENGES have done me. In December, 1845, I caught a severe cold from riding two or three miles, one very wet night, which settled in my lungs, and quite took away my voice, so that I could not speak above a whisper from that time until December last. I tried all kinds of medicines, but they were of no avail. I was then advised to try your Lozenges, which I did only to please my friends, but before I had finished a 2s 9d tin, my voice, to my great joy, came back as strong as ever.—I am, Sir, yours respectfully, JAMES MARTIN.

THOMAS KEATING, Esq.

Prepared and Sold in Boxes, 1s 1½d; and Tins, 2s 9d, 4s 6d, and 10s 6d each, by Thomas Keating, chemist, &c., 76 St Paul's churchyard, London. Retail by all Druggists, &c.

CURE OF ASTHMATIC COUGHS by Dr LOCOCK'S PULMONIC WAFERS.—From Mr Ince Gamis, Medicine Warehouse, Yeovil:—"A lady purchased a 2s 9d box, and observed that she had suffered for years from an asthmatic cough, and spent many pounds on other medicines to no purpose. Weeks after the same lady called again, when 'she had been completely cured by them,' merely one 2s 9d box. Other instances are from time to time occurring, which prove the value of these Wafers above other medicines for pulmonary diseases, coughs, colds, &c.—Ince Gamis." To Singers and Public Speakers they are invaluable for clearing and strengthening the voice. They have a pleasant taste. Price 1s 1½d, 2s 9d, and 11s per box. Sold by all druggists. Beware of counterfeits.

HUBBUCK'S PATENT WHITE ZINC PAINT.

By their process, which is patented, Pure White Zinc Paint is cheaper than White Lead. It is the most durable and beautiful paint known, and does not stain or discolour with the London atmosphere.

ADULTERATIONS.—Several Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, some even to the extent of thirty per cent. Another White Zinc has been now introduced containing impurities from the mode of manufacture which retard the drying. Whether these are sold under the name of "Improved Zinc Paint," or as the Number Two or Three qualities, no workman can produce good work with such material. Workmen who have once used the Patent Zinc Paint will never willingly use any other Paint for their best work.

To prevent the prejudice which the inferior article must produce, each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"Among other tests to which it has been subjected, has been that of painting the hold of a sugar vessel, which after a voyage to St Kitt's and back, was found, after washing, to be as white as the first day the paint was applied."—JOHN BULL, September 14, 1850.

FINE TEA CHEAPER.

STRACHAN & CO.'S justly celebrated DRAWING ROOM TEA is now reduced to 4s per lb. Guaranteed the finest and Cheapest Tea in the United Kingdom.
26 Cornhill, London, E.C.

---

66 Queen street, London, 23rd August, 1860.

MESSRS R. WOTHERSPOON and CO., 46 Dunlop street, Glasgow,

DEAR SIRS,—I have, as requested, to-day visited the Royal Laundry, with reference to the advertisement of the Nottingham firm, who state that their starch has been used for many years in the Royal Laundry, and have been assured by Mr Thompson, the superintendent, that none but yourselves have any right to state that they supply starch to Her Majesty's Laundry, as no other starch is there used, nor has been used for some years, but the Glenfield Patent Starch. I have been further assured that your starch continues to give complete satisfaction, and that though trial has been made of samples of various starches, none of these have been found nearly equal in quality to the Glenfield.—I am, dear Sirs, your obedient servant. WM. BLACK.

THE BEST INVESTMENT is a purchase at the far-famed establishments of E. MOSES and SON,

IMPORTANT NOTICE.

GLENFIELD PATENT STARCH is the only STARCH used in HER MAJESTY'S LAUNDRY.

And as some unprincipal Parties are now making and offering for Sale an Imitation of the

GLENFIELD STARCH,

we hereby caution all our Customers to be careful, when purchasing, to see that the word GLENFIELD is on each Packet, to copy which is Felony.

WOTHERSPOON and CO., Glasgow and London.

TRADE 6/P MARK.

BROWN AND POLSON'S PATENT CORN FLOUR.

The LANCET states,

"This is superior to anything of the kind known."

FIRST OF THE KIND Manufactured and Patented in the United Kingdom and France, as explained with Engravings in THE ILLUSTRATED LONDON NEWS, of May 26th, 1860. Prepared without fermentation, it is warranted to keep sweet for years. It is respectfully suggested that the Trade Mark and name in full should be observed on each Package, as similar articles are sometimes substituted or recommended as "*the same*" or "*as good* as Brown and Polson's." BROWN and POLSON, Manufacturers and Purveyors to Her Majesty: Paisley, Manchester, Dublin, and London.

DINNEFORD'S PURE FLUID MAGNESIA has been, during twenty-five years, emphatically sanctioned by the Medical Profession, and universally accepted by the Public, as the Best Remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a Mild Aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescing Draught, in which its aperient qualities are much increased. During hot seasons and in hot climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD and CO., 172 New Bond street, London; and sold by all respectable chemists throughout the Empire.

HOLLOWAY'S PILLS AND OINTMENT.—Certain Curatives.—In the country, and under circumstances where physicians cannot always be obtained, what a comfort it is to know that with Holloway's medicaments all ailments can be conducted to a favourable issue without anxiety or responsibility. In all cases of sickness these wonderful curatives purify, renovate, and restore before the malady has had time to undermine the constitution or shatter the nervous system. The weakest and most timid may fearlessly use both pills and ointment, guided by the directions accompanying the medicines. This is no experimental treatment: no mistake can be made in choosing from a variety of drugs. Holloway's preparations are all-sufficient for either sex, any climate, and every human temperament.

FREE ISSUE.

Notice.—The following invaluable works have just been published, and are now being issued gratis to all who enclose two stamps for postage, to No. 27 Alfred place, Bedford square, London.

DR WATSON'S NEW MEDICAL ESSAYS on Nervous and Physical Debility, with their easy Detection and Self Cure. Lately discovered and now made public by the author, with cases and diagrams, showing the connection between the brain and other organs. Also prescriptions and other appropriate remedies for the self-treatment and cure of those special diseases, and whether acquired in youth, manhood, or old age. By Dr Watson, F.R.A.S., London, Member of the Medical Society of Rouen, the National Academy of Sciences, Paris, and Fellow of the Imperial Institute of France, &c., &c. (vide Diplomas and Medical Directory).

THE EAST INDIAN RAILWAY

COMPANY require Stores of the following kinds—namely, COPPER, BRASS, TIN, and LEAD.

Particulars may be obtained upon application at the Company's offices, Alderman's walk, New Broad street, London. Tenders, which must include all charges for packing and delivery free alongside, in any Dock or on any Wharf, or in any part of the stream in the ports of London or Liverpool, are to be made on or before 12 o'clock at noon on Tuesday, the 9th of April next. The tenders must state the date the parties will undertake to deliver the stores, and must be endorsed "Tenders for Stores."—By order of the Board,

D. I. NOAD, Secretary.
East Indian Railway House, Alderman's Walk,
New Broad street, London, 21st March, 1861.

THE EAST INDIAN RAILWAY

COMPANY is prepared to receive Tenders for the supply of
100 COMPLETE SETS of APPARATUS for WATER CLOSETS and URINALS.

The Tenders must be accompanied with a Specification and Drawing of the Apparatus proposed to be supplied, and must state the date the contract will be completed. The price must include all charges for packing and for delivery at London or Liverpool. Tenders, endorsed "Tender for Apparatus for Water Closets and Urinals" must be delivered to the Secretary on or before 12 o'clock at noon on Tuesday, the 26th day of March instant. The Company is not bound to accept the lowest or any tender.—By order of the Board,

D. I. NOAD, Secretary.
East Indian Railway House, Alderman's Walk,
New Broad street, London, March 12, 1861.

EAST INDIAN RAILWAY COMPANY.

The Directors of the East Indian Railway Company are prepared to receive applications for Debentures at par for the remainder of the sum of £1,500,000 required to complete the total amount which the Company has the power to borrow on Debentures not convertible into shares.

The payment of the principal and interest in the meantime, at the rate of 5 per cent. per annum, is guaranteed by the Secretary of State for India in Council.

The bonds will be for five years from the 15th December, 1860, transferable by endorsement under the provisions of the 16 and 17 Victoria, cap. 59, without stamp, and the holders may renew them for a second term of five years, upon giving one year's notice to that effect. Failing such notice, the bonds will be paid off at the expiration of the first five years on presentation at the Bank of England.

Payments may be made in full or by instalments, as may be agreed upon.

Interest will accrue on the respective payments from the dates fixed for the same.

No scrip receipt or bond will be issued for a less sum than £50.—By order of the Board,

D. I. NOAD, Secretary.
East Indian Railway House, Alderman's walk,
New Broad street, London, Jan. 22, 1861.

MADRAS RAILWAY COMPANY.

—Her Majesty's Secretary of State for India having authorised the Directors of this Company to raise the sum of £1,000,000 on Debentures not convertible into Stock, the Directors are prepared to comply with applications to that extent for Debentures at par, bearing interest at 5 per cent. per annum, payable by coupon, half-yearly, at the Union Bank of London.

The payment of the principal and interest is guaranteed by the Secretary of State for India in Council. The Debentures will be for five years, from the 1st of January, 1861, transferable by endorsement without stamp, and renewable at the option of the holder for a second term of five years, at the same rate of interest.

Debentures will not be issued for any less amount than £50.

The Directors will also receive applications for the amount which remains to be allotted of the previous Debenture Loan of £1,000,000 convertible into Stock of the Company. These Debentures are for five years, or four years, at 5 per cent. per annum, payable by coupon, half-yearly, at the Union Bank of London.

The payment of the principal and interest is guaranteed in like manner by the Secretary of State for India, and the holders of these Debentures have the option at the end of twelve months from their date, and thenceforward, of converting them into Capital Stock of the Company, bearing 5 per cent. interest, guaranteed under the contract entered into with the East India Company.

Forms of application for either or both descriptions of Debentures may be obtained at the Offices of the Company.—By order of the Board,

JAMES WALKER, Managing Director.
No. 33 New Broad street, London,
1st January, 1861.

THE SOUTH DARREN MINING

COMPANY Limited, in 6,000 shares of £3 10s each; £2 5s paid.

This mine is situate in the well-known rich mineral district of Cardiganshire, and adjoins East Darren and Cwm Erfin, two dividend-paying mines. Others in the immediate neighbourhood have also yielded large profits.

Upwards of £6,000 was given for the mine, and in the last four years about £6,000 of capital has been expended, and about 500 tons of silver lead ore have been sold for £10,000, or an average of £20 per ton, besides about £300 worth of copper ore. A new 60-ft pumping wheel and a second crusher have been erected, and the whole plant and machinery have been thoroughly repaired, and are now in excellent order and condition.

There are monthly sales of ore, which already meet a large proportion of the costs, and the former are almost certain to gradually increase till profits are made. The rich and profitable mines of the Cardiganshire district are well known, while two of them adjoin South Darren.

For further particulars, a section of the workings, and the price of shares, apply to Messrs Webb and Geach, 8 Finch lane, E. C., and Stock Exchange, London.

Henry Davidson, Esq.	Newman Smith, Esq.

Profits.—Four-fifths, or 80 per cent. of the profits are assigned to policies every fifth year. The assured are entitled to participate after payment of one premium.

Bonus.—The decennial additions made to policies issued before the 4th of January, 1842, vary from £18 to £16 15s per cent. on the sums insured, according to their respective dates.

The quinquennial additions made to policies issued after the 4th of January, 1842, vary in like manner from £28 17s to £1 5s per cent. on the sums insured.

Purchase of Policies.—A liberal allowance is made on the surrender of a policy, either by a cash payment or the issue of a policy free of premium.

Loans.—The Directors will lend sums of £50 and upwards on the security of policies effected with this Company for the whole term of life, when they have acquired an adequate value.

Insurances without participation in profits may be effected at reduced rates.

Prospectuses and further information may be had at the chief office as above; at the branch office, 16 Pall Mall; or of the agents in town and country.

SAMUEL INGALL, Actuary.

THE LANDS IMPROVEMENT

COMPANY (incorporated by Special Act of Parliament in 1853), 2 Old Palace yard, Westminster, S.W.—To Landowners, the Clergy, Estate Agents, Surveyors, &c., in England and Wales, and in Scotland.—The Company advances money, unlimited in amount, for the following works of agricultural improvement, the whole outlay and expense in all cases being liquidated by a rent-charge for 25 years:—

1. Drainage, irrigation, and warping, embanking, enclosing, clearing, reclamation, planting for any beneficial purpose, engines or machinery for drainage or irrigation.

2. Farm roads, tramways, and railroads for agricultural or farming purposes.

3. Jetties or landing places on the sea-coast or on the banks of navigable rivers or lakes.

4. The erection of farmhouses, labourers' cottages, and other buildings required for farm purposes, and the improvement of and additions to farmhouses and other buildings for farm purposes.

Landowners assessed under the provisions of any Act of Parliament, Royal Charter, or Commission, in respect of any publicor general works of drainage or other improvements, may borrow their proportionate share of the cost, and charge the same with the expenses of the lands improved.

No investigation of title is required, and the Company, being of a strictly financial character, do not interfere with the plans and execution of the works, which are controlled only by the Government Enclosure Commissioners.

For farther information and for forms of application apply to the Hon. William Napier, Managing Director, 2 Old Palace yard, Westminster, S.W.

CANADA LANDED CREDIT COMPANY.

Incorporated by Act of the Parliament of Canada.
Capital, £200,000.

PRESIDENT—Lewis Moffatt, Esq.
VICE-PRESIDENT—W. P. Howland, Esq., M.P.P.

DIRECTORS.

The Hon. G. W. Allan, M.L.C.
R. D. Chatterton, Esq.
The Hon. Malcolm Cameron, M.L.C.
Richard L. Denison, Esq.
Charles Donaldson, Esq.
W. P. Howland, Esq., M.P.P., President of Board of Trade.
Thomas D. Harris, Esq., Vice-President Board of Trade.
Lewis Moffat, Esq., Director Bank British North America.
William McMaster, Esq., (McMaster and Nephews.)
Samuel Spreull, Esq.
Mr Sheriff Smith, Collingwood.
E. W. Thomson, Esq, President of the Board of Agriculture.

BANKERS—Messrs Smith, Payne, and Smiths, London.

The Company are prepared to receive loans against their debentures of £50, £100, £500, and £1,000 sterling, for periods of five, seven, or ten years, bearing interest at 6 per cent. per annum, both principal and interest being made payable in London.

The amount received is invested in and secured by mortgages of freehold land in Canada West of ample value.

The Company by its charter is always first mortgagee.

The evils, uncertainties, and delays of the old mortgage system are avoided by the lender.

He has no care or anxiety as to the character of the borrower, or the value of the land mortgaged.

The Company assumes all responsibilities, and guarantees the payment of interest to the day, viz., 1st January and 1st July; at their bankers in London, and the same can be received through any of the country banks.

Investors incur no risk as in a railway or similar undertaking; the Company's profits beforehand being well ascertained and sure.

The half-yearly returns of business done, made to the Government of Canada, prospectuses, annual report, and further information, may be had of the Company's stockbrokers and agents,

BRUNTON and SON,
Auction Mart chambers, Bartholomew lane, London.

JAMES STRACHAN, Secretary.

COMMERCIAL BANKING COMPANY of SYDNEY, NEW SOUTH WALES.

Incorporated by Act of the Colonial Legislature.
London Office, No. 33 Cornhill.

LONDON BOARD.

John Gilchrist, Esq. | Frederick Parbury, Esq.
Edwin Brett, Esq.

The London Board of Directors grant Letters of Credit payable on demand, and Bills of Exchange at thirty days' sight, on the Sydney office, and on the following branches of the Bank in the Colony of New South Wales, viz.:—

Albury	Goulburn	Maryborough	Shoalhaven
Cooma	Kiama	Morpeth	Wollongong
Eden	Maitland	Queanbeyan	Yass

They also negotiate approved Drafts on the Australian Colonies, forward Bills for Collection, and transact every description of banking business with Australia, on the most favourable terms, through the above-named establishments of the Bank in New South Wales, and its agents in Victoria, South Australia, and Tasmania.

EDWIN BRETT, Manager.

No. 33 Cornhill, London, E.C., July, 1860.

CHARTERED MERCANTILE BANK of INDIA, LONDON, and CHINA.

Capital £500,000, of 20,000 shares of £25 each paid up in full. Reserve fund £50,000.

HEAD OFFICE, 52 Threadneedle street.

Agencies and Branches at Bombay, Calcutta, Madras, Colombo, Singapore, Penang, Hong Kong, Shanghai, and Mauritius.

The Bank, at its Head office in London, grants Drafts on its various Agencies and Branches; issues Letters of Credit; purchases approved Bills on India, China, Ceylon, and Mauritius; undertakes the purchase and sale of Indian Government and other Securities, and the collection of Private and Mercantile Bills, at the ports and places at which its Agencies are established; receives Deposits at Interest for Fixed Periods, the terms of which may be ascertained on application; and transacts generally all Indian Banking business, including the receipt of Pay, Pensions, and Dividends on Stock of all kinds.

Office hours, 10 to 3; Saturdays, 10 to 2.

ORIENTAL BANK CORPORATION.

Incorporated by Royal Charter, 30th Aug., 1851.
Paid-up capital, £1,260,000; reserved fund, £252,000.

The Corporation grant Drafts, and negotiate or collect Bills payable at Bombay, Calcutta, Madras, Ceylon, Hongkong, Singapore, Mauritius, Melbourne, Sydney, Auckland, and Wellington, on terms which may be ascertained at their office. They also issue Circular Notes and Letters of Credit for the use of Travellers by the Overland Route. They undertake the agency of parties connected with India, the purchase and sale of Indian Securities, the safe custody of Indian Government Paper, the receipt of Interest, Dividends, Pay, Pensions, &c., and the effecting of remittances between the above-named dependencies.

They also receive deposits of £100 and upwards, repayable on a notice of 10 days, and allow interest thereon at 1 per cent. below the Bank of England minimum rate of discount, not falling below 2 per cent. nor rising above 5 per cent. Deposits subject to longer notices of repayment bear highor rates which may be ascertained at their office.

Office hours 10 to 3. Saturdays, 10 to 2.
Threadneedle street, London, March 23, 1860.

KEITH JOHNSTON'S GENERAL GAZETTEER.
In One large Volume, 8vo, of 1,360 pages, comprising about 50,000 Names of Places, price 30s, cloth; or half-russia, 35s,
DICTIONARY OF GEOGRAPHY,
Descriptive, Physical, Statistical, and Historical; forming a complete General Gazetteer of the World.
By ALEXANDER KEITH JOHNSTON, F.R.S.E., F.R.G.S., F.G.S., &c., Geographer at Edinburgh in Ordinary to Her Majesty.
New Edition, revised to April, 1860.
In the present edition of Johnston's "General Gazetteer," while the whole body of the work has been carefully rectified by the Author to the present date, special attention has been paid to the late territorial arrangements, and to the Colonial possessions of Great Britain. A very recent and accurate series of articles on the Australian Colonies has also been contributed by the Author's friend, Mr WESTGARTH.
London: Longman, Green, Longman, and Roberts.

The CANADIAN RED RIVER; and ASSINNIBOINE and SASKATCHEWAN EXPLORING EXPEDITIONS.
Just published, in 2 Vols., 8vo, with 20 Chromo-xylographs, 76 Woodcuts, 3 Maps, 4 Plans, and a Sheet of Profiles of the Country explored, price 42s,
NARRATIVE OF THE CANADIAN RED RIVER EXPLORING EXPEDITION of 1857, and of the ASSINNIBOINE and SASKATCHEWAN EXPLORING EXPEDITION of 1858.
By HENRY YOULE HIND, M.A., F.R.G.S., Professor of Chemistry and Geology in the University of Trinity College, Toronto; in charge of the Assiniboine and Saskatchewan Expedition.
"Mr Hind's manner of telling his story stands before all the other recommendations of his work. His sense of the rich beauty or wild grandeur of the scenes which he describes, and his happy adaption of words to impressions, the serious and reflective tone of his mind, make these volumes as delightful to read as they are instructive. —GLOBE.
London: Longman, Green Longman, and Roberts.

diture. How have these different duties this year been re- immense, power. The cry now is that Parliament should

spectively performed? have done something—that the Ministry should have pro-

The legislative function of Parliament, is that which has posed something. But only a few weeks back, when Mr

of late years assumed the greatest prominence, is that which Gladstone, the most eager and ardent of all our statesmen,

we just now regard as of the greatest importance, is that did propose several things, the universal murmur was why

which we are apt to assume as the readiest means of measuring wont he let us alone; 'we were going on very well; we

the utility of any particular Session. But though it certainly 'don't understand how he is going to improve us, and it is

is the readiest means, it is by no means the justest. As we 'not worth our while to understand; we feel no evil, and

have often taken occasion to observe, even at tedious length, 'we wish no remedy.' If this Session of Parliament should

the great prominence which law-making has assumed in the pass, in addition to the Budget, the Appropriation of Seats

national business is an exceptional result of a peculiar state Bill, and a Bankruptcy Bill which gives creditors their

of [illegible]ings. Thirty years ago we had outgrown our institu- true rights and fitting powers, we think that it has done as

[illegible]tion[illegible] we were living under a policy unsuited in many most much as could be expected from it—as much as it could have

[illegible]im[illegible] our society; we were living in the letters done in the existing state of public opinion—more than most

[illegible]of [illegible] had always been useless, or had out- Sessions of Parliament will find that they are able to accom-

[illegible]live[illegible]ey could be of use. For the last plish in such times as these.

[illegible]epealing those laws; we have

[illegible]which hampered our present The appearance, what we have called the expressive function

[illegible]But this is an occasional, of Parliament,—the talking function, as it is more graphically

[illegible]ly politic. The crop of but less respectfully termed,—has this year been peculiarly

ill performed. Last year we had discussions on Continental

affairs, especially on the political regeneration of Italy,

…eeling as to … American
…here is no one in England who sym-
…s much wit… the South; and there are very few who
…thise unconditionally with the North. We, with our
feelings and our philanthropic history, cannot but
an inchoate community which is trying to form itself
the "fundamental institution" of unmitigated, un-
…oveable, eternal slavery. On the other hand, we can
no sympathy with the ambitious and revengeful desire
…ilitary conquest which is animating the North; which
…fluencing those in the North who have always sustained
supported slavery, as well as those who have always
countenanced and denounced it; which seems a simple
…pouring of bad passion like so many in the old world;
…ich is driving them madly forward to try to re-form that
…nnection with the Slave States from which a merciful
…rovidence offered them an unanticipated opportunity of
…etting themselves free.

How is this to be said so as not to offend the delicate quarrelsomeness (there is no other adequate word) of the Northern American. It could never be said. It has been effectually intimated by our silence; for if we had sympathised with them, the voice of Parliament would have been clear and incessant; but no words could have expressed it without raising feelings which could not have been allayed for years,—which we should not have been justified in arousing when the required end could, as we now know, be obtained by a dignified reticence and a careful self-command.

There is not much to be said on the third function of Parliament. It has maintained in *office* the best Ministry which the country can for the moment obtain, but it has not maintained them in *power*, at least not in very much power. Perhaps it will be said that a Parliament so equally divided between the two parties has not really much power to bestow; its power is in some sort a constitutional fiction, for nearly one-half will be ready to refuse what only a little more than one-half are ready to confer. But the effect has not been fortunate. The yearly necessary routine work of Parliament has suffered in consequence. Something may be allowed perhaps for the difference between the two statesmen, but the contrast is considerable between the state of public business as regulated by Sir R. Peel with a majority

…f this …

for gold in the market. The Legislature had *fixed* …
ratio between the two metals, but the facts of the …
did not recognise that ratio. Silver was dearer …
legal estimate of it, and therefore the Bank of France …
not venture to pay it away at its legal value.

We pointed out at the time that though the tempo…
difficulty of the Bank might be in some degree embarrassi…
yet that they had their remedy in their own hands. T…
could have sold their silver in the open market, and t…
should have done so. To an ordinary man of business …
case would have seemed a very clear one. They had a sto…
of two metals, the greater part of which they could not use,
because it was in a metal of too high a proportionate value.
They should have taken advantage of that value. They
should have sold the *appreciated* metal, received the quoted
premium, and obtained in exchange the metal of inferior
value which they could use.

The Bank of France, however, took the reverse course. They adopted several expedients; they bought gold at a premium; they made an exchange with the Bank of England; they tried, though unsuccessfully, to negotiate a similar exchange with the Bank of St Petersburg. *They held on their silver till now.*

It so happens that silver has recently fallen in price. At the time to which we have referred in November last i… as quoted at 5s1¼d; a few days since it was quo… 5s 0… d it is now 5s 0⅛d. INTERNATIONAL EXHIBITION of 1862.—The Council of the Society of Arts give Notice, that the Guarantee Deed lies for signature at the Society's house, Adelphi, W.C.

The Council have much pleasure in announcing that the Guarantee has been already signed for sums amounting to £343,000, and they desire that the number of signatures should be still further increased, in order that the interest of the public in this great national undertaking may be more extensively shown.

Gentlemen desirous of joining in the Guarantee are requested to communicate with the Secretary of the Society of Arts, who will arrange for the deed being taken for signature to those who cannot make it convenient to sign at the Society's house.

The list will be closed on the 1st May.

By order of the Council,
PH. NEVE FOSTER, Secretary.
Society house, John street, Adelphi, March 28, 1861.

MERCANTILE SHIPPING AGENCY. Established upwards of 80 years.

The mercantile community is respectfully informed that Merchandise of every description is received, forwarded, and insured, agreeably with instructions, to and from all parts of the world, by steam or sailing vessels.

W. J. HALL and CO., Sworn Brokers,
(Successors of Holmes, Hall, and Sons,)
Wharfingers and Bonded Warehouse Keepers, under special security, Custom House and Wool Quays, Lower Thames street, E.C., London.

MERCHANTS HAVING commissions for Furniture or Carpets of a superior class, are respectfully invited to visit the manufactory and show rooms of Messrs JACKSON and GRAHAM. By the introduction of machinery worked by steam power in various processes, J. and G. have effected a considerable improvement and economy in the manufacture of furniture, and their spacious show rooms afford to purchasers unrivalled facilities for the selection of all requisites, useful and ornamental, in the best taste. Four show rooms, each 120 feet long, are exclusively devoted to the display of Bedsteads and Chamber Furniture. J. and G. are also large importers of Silks, Tapestries, and other Fabrics for Curtains, and their Gallery of Bronzes d'Art is the sole depot for the celebrated productions of F. Barbedienne and Co., of Paris, which they sell at the prices of the Paris catalogue, with 5 per cent. added for expenses of importation.

CLARET ONE SHILLING PER BOTTLE, 12s per Dozen.
HENRY BRETT and CO., Importers, Holborn Bars, E. C.

EAU-DE-VIE.—THIS PURE PALE BRANDY, though only 18s per gallon, is demonstrated, upon analysis, to be peculiarly free from acidity, and very superior to recent importations of veritable Cognac. In French bottles, 38s per dozen; or securely packed in a case for the country, 39s.
HENRY BRETT and CO.,
Old Furnival's Distillery, Holborn.
To be obtained only at their Distillery,

TO BILL-BROKERS, BANKERS, and OTHERS.—Lost, on its way by post from Liverpool to London, a Bill for £1,000, drawn by Messrs Wm. Puston and Co., Hong Kong, on Messrs Graham, Kelly, and Co., Liverpool, and accepted by them, payable at Mr William Deacon and Co.'s, London, in favour of the Nord-Deutsche Bank in Hamburg, six months' sight from 14th January. The bill was forwarded from Liverpool to Messrs R. Heine and Co., 1 Angel court, Throgmorton street. Payment is stopped at the bankers, and the bill is of no use except to the rightful owner. A Reward will be given to the party taking it to Messrs R. Heine and Co., as above.

A GENTLEMAN, aged 26, who has been for ten years in a first-class English House in Brazil, is desirous of a re-engagement either at home or abroad; has a thorough knowledge of bookkeeping and the Portuguese language.—Address, W. N., Messrs Pike, Leake, and Co., 6 Wellington street, Borough.

WANTED, BY AN ACTIVE intelligent Young Man, a situation as Clerk or Messenger, latterly been employed in House and Estate Agents Offices, good references from former employers.—Beta, 83 Balsour street, Regent's park, N.W.

PARTNERSHIP.—WANTED, A Partner, with from £15,000 to £20,000 at command, in a well-established and first-class Warehouse in the City. The present annual returns are about £150,000, but with the required additional capital, in a few years may be doubled. To a gentleman competent to take the entire or partial charge of the counting-house department, this presents an undeniable opportunity for a safe and profitable investment, with position. Principals only treated with.—For further particulars, apply to Geo. Laurence, Esq., Solicitor, 12 Bread street, City, London.

WANTED, THE ECONOMIST for Aug. 25, 1860, Sept. 22, 1860, Oct. 6, 1860. A liberal price will be given for the same, or other numbers in exchange if desired. The advertiser has many duplicate numbers of the ECONOMIST which he will be glad to dispose of or exchange.—Apply to W. G., care of Barker, news agent, Throgmorton street, E.C.

CHINA OR INDIA.—A Gentleman, who is an experienced bookkeeper, and would be able to take the Management of the Counting-house Department in a Mercantile office, is desirous of meeting with an engagement for China or India. Unexceptionable references.—Address, Mr Jamesen, 2 Crescent, Minories.

EXPORTATION OF TEXTILE GOODS to FRANCE.—A French Gentleman, 38 years of age, well connected and conversant with the English language, is desirous of travelling in France for a first-class English export house in Woollen, Cotton, Worsted, and Silk Goods. He possesses an attached connection of long standing; and can produce excellent testimonials.—Applications to be made to Mr Edward Margetson, No. 4 Gresham street, E.C.

A NATURALISED BRITISH SUBJECT, who had eight years' experience in a first-class Manchester Shipping house, subsequently joined an English firm abroad, whose branch establishment he manages now, wishes to make a new engagement; he possesses good connections, writes and speaks English, German, French, and Spanish fluently, is an experienced accountant, and can give excellent references.—Address E. H., care of H. Greenwood, Advertising Agent, Liverpool.

UNITED STATES, CANADAS, &c.

Commissions, one-eighth per cent.

American Stocks and Bonds bought and sold in New York, Philadelphia, Boston, &c. Commissions, one-eighth per cent.

Interest allowed on current accounts.

THE CITY TURKISH BATHS,
5 SOUTH STREET, FINSBURY.
Open daily, Sundays excepted.

The bath, in addition to being a great curative agent is the greatest physical luxury in the world.

Government Officials.—Reduction in Scale of Premiums.

THE EUROPEAN ASSURANCE

SOCIETY ISSUES POLICIES of GUARANTEE, at reduced rates, for officials in or under the Treasury, Customs, Inland Revenue, Board of Trade, Poor Law Board, Admiralty, and other public departments, and for bank and railway clerks and persons in commercial employments.

Further reductions on the combination of life assurance with guarantee. Annuities granted on favourable terms.

Forms and every information may be obtained at the Chief office, No. 2 Waterloo place, Pall Mall, London.

Instituted in the Reign of Queen Anne, A.D. 1714.

UNION ASSURANCE SOCIETY,

FIRE and LIFE.

OFFICES—81 Cornhill, and 70 Baker street, London; and in Bristol, Liverpool, Edinburgh, Dublin, Hamburg, Berlin, and Berne.

Fire Insurances due at Lady-day should be paid on the 25th March, or within 15 days after.

The next Septennial calculation of Life Profits will be made in the year 1862, and all policies effected prior to 31st December, in this year, will participate in the Bonus subsequently to be declared.

This Company combine the advantage of a large accumulated capital, every modern system of insurance, and the experience of 150 years.

WM. B. LEWIS, Secretary.

NORWICH UNION FIRE

INSURANCE SOCIETY.

NOTICE.—LADY-DAY RENEWALS.—Losses by fire occurring during the fifteen days of grace are made good to the assured.

The business of the Company exceeds £68,000,000.

The duty paid to Government for the year 1860 was £81,332 9s 9d, and the amount insured on farming stock £9,988,368.

A bonus of three-fifths of the profits periodically made to parties insuring, who have thus from time to time received sums amounting in the aggregate to £400,000.

A further sum is applicable for a bonus upon policies renewed in 1861.

The rates of premium are in no case higher than those charged by other principal offices making no returns to their insurers.

For prospectuses apply at the Society's offices, Surrey street, Norwich, and 6 Crescent, New Bridge street, Blackfriars, E.C.

PLAN OF THE GREAT BRITAIN MUTUAL LIFE ASSURANCE SOCIETY.

This Society is established on the tried and approved principle of mutual assurance. The funds are accumulated for the exclusive benefit of the members under their own immediate superintendence and control. The profits are divided annually, and applied in reduction of the current premiums.

The members of this Society consist of two Classes; one class comprising policy-holders who pay the full amount of premium during the first five years, and then become entitled to participate in the profits during the remainder of their respective lives; the other class comprising policy-holders who pay half the amount of premium, only, during the first five years, and thenceforth pay the whole amount during the ensuing five years; after which period they become entitled to participate in the profits equally with other members.

Every member assured for £500 is entitled, after payment of one whole annual premium, to attend and vote at all general meetings. Members assured for larger amounts are entitled to one vote for every £500 assured.

No claim can be litigated or disputed except with the concurrence of the members present at a general meeting, specially convened on the occasion.

The Directors and Auditors consist of members assured to the extent of £1,000. The Auditors and three of the Directors vacate their offices annually, but are eligible for re-election by the members.

Extensive tables of non-participation rates have been constructed for the accommodation of different classes of policy-holders.

Application for agencies may be made, and every requisite information relative to this Society, and the mode of effecting assurances, obtained on application to

C. L. LAWSON, Secretary, London.

ARGUS LIFE ASSURANCE

COMPANY, 39 Throgmorton street, Bank.

CHAIRMAN—William Leaf, Esq.

DEPUTY CHAIRMAN—John Humphery, Esq., Alderman.

Accumulated Fund, £500,000. Income, £85,000 per annum. Subscribed capital, £300,000.

Age.	Premium to Assure £100. One Year.	Seven Years.	Whole Term. With Profits.	Without Profits.
	£ s d	£ s d	£ s d	£ s d
20	0 17 8	0 19 1	1 15 10	1 11 10
30	1 1 8	1 2 7	2 5 5	2 0 7
35	1 3 3	1 4 2	2 12 1	2 6 8

50	1 14 1	1 19 10	4 6 8	4 0 11

Advances on policies when their value exceeds £50.

Half or one-third credit allowed on whole life policies.

Residence in time of peace in any part of Europe. No extra charge for the Militia, Volunteer Rifle, or Artillery Corps, on home service.

Claims paid one month after proof of death has been admitted.

Medical attendants remunerated for their reports.

The medical officers attend every day at a quarter before 2 o'clock. E. BATES, Resident Director.

THE STANDARD LIFE

ASSURANCE COMPANY.

Established 1825.

LONDON—82 King William street.
EDINBURGH—3 George street (Head office).
DUBLIN—66 Upper Sackville street.

ANNUAL REPORT, 1861.

The Thirty-fifth Annual General Meeting of the STANDARD LIFE ASSURANCE COMPANY was held at Edinburgh, on Monday, the 25th of February. The following results were communicated in the Report by the Directors, showing the operations of the Company during the year 1860:—

	£	s	d
Amount proposed for assurance during the year, contained in 1,384 proposals	807,747	0	0
Amount of assurances accepted, and for which policies were issued, contained in 1,207 policies	705,897	0	0
Annual premiums on new policies	22,565	4	6
Claims by death during the year, exclusive of bonus additions	104,326	14	8
Annual revenue at 15th November, 1860	304,161	13	7
Arising from premiums.. £227,595 4 1			
From interest on the invested *funds* 76,568 9 6			
	304,161	13	7
Accumulated fund, invested in Government securities, in land, mortgages, &c.	1,805,982	13	6

Average amount of new assurances annually for the last 14 years, Half a Million sterling, being the largest amount of business transacted in that period by any Insurance Company.

WILL. THOS. THOMSON, Manager.
H. JONES WILLIAMS, Resident Secretary.

NOTE.—An Adjourned Meeting will be held early in May, to receive the Report on the Division of Profits for the past Quinquennial period.

NATIONAL PROVIDENT

INSTITUTION, 48 Gracechurch street, London, for Mutual Assurance on Lives, Annuities, &c. Established December, 1835.

DIRECTORS.

CHAIRMAN—Samuel Hayhurst Lucas, Esq.

John Bradbury, Esq.
Thomas Castle, Esq.
Richard Fall, Esq.
John Feltham, Esq.
Charles Gilpin, Esq., M.P.
Charles Good, Esq.
Robert Ingham, Esq., M.P.
Charles Reed, Esq., F.S.A.
Robert Sheppard, Esq.
Jonathan Thorp, Esq.
Charles Whetham, Esq.

PHYSICIANS.

J. T. Conquest, M.D., F.L.S. | *Thomas Hodgkin*, M.D.

BANKERS—Messrs Brown, Janson, and Co., and Bank of England.

SOLICITOR—Septimus Davidson, Esq.

CONSULTING ACTUARY—Charles Ansell, Esq., F.R.S.

MUTUAL ASSURANCE WITHOUT INDIVIDUAL LIABILITY.

Extracts from the Report of the Directors for the year 1860:—

	£	s	d
Number of new policies issued during the year 988			
Assuring the sum of	481,231	1	10
Producing an annual income of	16,053	15	7
Making the total annual income, after deducting £50,112 annual abatement in premium	298,251	10	4
Total number of policies issued 28,573			
Amount paid in claims by the decease of members, from the commencement of the institution in December, 1835	1,034,368	5	4
Amount of accumulated fund	1,898,895	14	11

The effect of the successful operation of the society during the whole period of its existence may be best exhibited by recapitulating the declared surpluses at the four investigations made up to this time.

	£	s	d
For the 7 years ending 1842 the surplus was	32,074	11	5
— 5 — 1847 —	86,122	8	3
— 5 — 1852 —	232,061	18	4
— 5 — 1857 —	345,034	3	11

The next division of profit will be made up to the 20th November, 1862. Policies effected prior to that date, if subsisting at the time of division, will participate in such profit for the time they may have been in force.

The Prospectus, with the last report of the Directors, and with illustrations of the profits for the five years ending the 20th November, 1857, may be had on application, by which it will be seen that the reductions on the premiums range from 11 per cent. to 98½ per cent., and that in one instance the premium is extinct. Instances of the bonuses are also shown.

Members whose premiums fall due on the 1st of April are reminded that the same must be paid within 30 days from that date.

March, 1861. JOSEPH MARSH, Secretary.

THE LIVERPOOL AND LONDON

FIRE and LIFE INSURANCE COMPANY.

Offices, No. 1 Dale street, Liverpool; 20 and 21 Poultry, London; Sheffield, Manchester, Glasgow; Sydney, Melbourne, and New York.

The Political Economist.

On Saturday, April 6, will be published a Special Supplement to the ECONOMIST, *price 6d, giving,* IN A COMPACT FORM, *the Balance Sheets and Directors' Reports of* ALL *the Joint Stock Banks in the United Kingdom, as far as the same are made public, with a short account of some of the more important meetings of shareholders.*

MR LAING'S PROPOSAL FOR *NOT* ECONOMISING THE METALLIC MONEY OF BRITISH INDIA.

Most of the comparatively few persons who understand the politics of the currency soon saw reason to fear that the death of Mr Wilson would ensure the abandonment, or at least the vital alteration, of his scheme for the introduction of paper money into British India. Before that lamentable event, Sir Charles Wood had suggested a stringent limitation of the plan originally proposed. Under other and happier circumstances, Mr Wilson's *prestige* and influence might have secured to it an effectual trial. But under the practical despotism of Sir Charles Wood—'a Peelite before Peel,' the Chairman of the Committee on which the Act of 1844 was founded—it was not reasonable to expect that a plan so wholly opposed to Sir Charles Wood's fixed and favourite tenets would be retained after the death of its author. It has, we now hear, been abandoned. Mr Laing has proposed a plan strictly modelled on the Act of 1844, and it becomes our duty to inquire whether it is better or worse fitted for the purpose in hand than that of his predecessor.

The most striking circumstance in the whole subject and that which still most attract the attention of every mind, is the marked contrast between the situation of Sir R. Peel in this country in 1844, and the situation in which those who are legislating on the currency of India stand now. Sir R. Peel was about to legislate for a country in which paper money had been long in use—in which it had been issued by many persons—in which, as he firmly believed, it had been depreciated *by excess*. Accordingly, his aim, whether wisely or unwisely, was to limit the extension of the Bank note circulation. He said in reality, if not in words, 'Paper 'money has now been sufficiently used in England; we 'have derived enough advantage from it, and we should 'not further incur its risks and dangers; in future for every 'note issued beyond a sum now once for all to be fixed 'and specified, there shall be actual bullion previously 'deposited in the vaults of the Bank.' In this manner he accomplished his object of limiting and confining the paper currency of this country.

Now, on the other hand, the object of the present legislation for India is not to confine or limit, but to introduce and augment a paper currency throughout that part of our Empire. It is argued, 'That the circulation of the whole of 'our vast territory is, with a trifling exception, exclusively 'metallic—that countless sums are at present hoarded 'there—that since the beginning of recorded trade bullion has 'been continually sent thither—that of late years more bullion than ever before has been sent thither—that the *national* 'economy to be obtained by the substitution of paper for any 'part of this vast aggregate would be immense.' It is also said, 'That the operations of the Government are much impeded 'by the cumbrous medium in which the taxes are paid—that 'the guards necessary to secure its safe transit and its 'safe keeping are very expensive, and that, in consequence, 'the *financial* economy of the suggested institution would be 'considerable.' For these reasons it is justly believed to be of the first importance to introduce a paper money into India; and, accordingly, the avowed object of our present legislation for India is not the same as that which Sir R. Peel proposed to himself in England in 1844, but is precisely the reverse. We are wishing to foster and develop that which he desired to limit and restrict. If we remember this, we shall not be surprised to find that the machinery of the Act of 1844 is inapplicable to the aim and to the circumstances to which in British India it is now proposed to twist it. That machinery having been selected here because it was a preventive check—because it was the most stringent preventive check which theorists could devise, it is not likely to operate anywhere as an efficient cause of easy development and rapid augmentation.

An examination of Mr Laing's scheme will fully confirm these preliminary anticipations. He proposes that there shall be a fixed limit of 4,000,000*l*, after which no issues of paper currency, *except on bullion*, shall be made in India, just as there is a limit of 14,000,000*l* fixed by the Act of 1844 to that part of the note circulation of the Bank of England which is issued upon securities and is not represented by bullion. He says:—"The Banks of Bengal, Madras, and Calcutta "are entitled under their charters to issue in the whole "5,000,000*l* of notes, against which they are, however, com-"pelled to keep one-fourth, or 1,250,000*l* in bullion. It "may, therefore, be said that there is already in India an "authorised issue of paper unrepresented by bullion of "nearly four millions, and it may be assumed that the "paper circulation will never hereafter fall below this *mini-*"*mum*. At this point, therefore, I propose to stop." For the present, no further substitution of paper for coin is, he thinks, safe and expedient. If at any future time the Legislative Council think differently, a new law can be enacted, and the paper money of India augmented.

It is evident on the face of it that this is expressly and avowedly a scheme for *not* introducing a paper currency into India. At present, the circulation of the three banks of the Presidency towns is almost wholly confined to those towns and to small districts very near them. Mr Laing enacts

that they shall transfer this circulation to the Government, and he has doubtless arranged with them to that effect; but he proposes no expedient for setting free the metallic money of the whole of India,—for giving the whole of that vast area the economy of a paper circulation,—for aiding the operations of the Government, now impeded by the costly hoards they have to guard and the bulky sums they have to transmit; in a word, for relieving our great dependency from the barbarous burden by which it is hampered, and for giving to it the civilised expedient by which it shall be aided.

Mr Wilson's scheme aimed at these great objects. He specified no arbitrary *maximum* beyond which the economy of a paper circulation of India should not be permitted to advance, but he was at the same time careful to take the most ample precautions which the circumstances permitted against possible dangers and inevitable risks. He proposed to keep *at least* one-third of the amount issued in bullion, and the remainder in the most convertible securities which could be obtained. As, therefore, the paper circulation of the country extended, he would have been able, gradually and constantly, to make use of the coin for which it would have been substituted. He hoped—and we believe he hoped for the most convincing reasons—to be able to extend the use of Government paper money through the whole of India in a few years: he did not anticipate that he should in so short a time reach the absorbed hoards, but he trusted that he should be able to introduce much paper into the current money of common operations. During those years, by the use of a flexible and elastic principle, he would have economised much of the metallic money for which the circulating paper had been substituted. If the paper money of India had been 21 millions—no extravagant supposition—he would have been *legally* able to have employed productively 14 millions, and practically able to use some great amount —say 10 millions or 11 millions.

Why, then, has this great scheme been relinquished? We believe for two reasons. *First*, it is said that when any fixed proportion of the issue is by law represented by bullion, there may in certain circumstances of discredit be considerable danger. It is feared that you will not be able to keep it. If, for example, the circulation were twenty-one millions, of which only seven were retained in specie, if there were a considerable run—if payment were required of one million,—the reserve would be reduced to six millions, which is *not* a third of the twenty millions which would by that time be the circulation. Mr Wilson was not a man to be blind to so evident an objection, and we have the best means of knowing how he intended to meet it. He had resolved to keep very much more than one-third, something like a half of the paper circulation in his specie reserve, and so to be prepared to meet any discredit which was rational or probable. Of course against a national panic no system of paper currency can be secure. If there should be an intense and diffused apprehension as to the stability of our Indian Empire, even Mr Laing's minute scheme would not be safe for a day; and against everything else, by judicious watchfulness and steady prudence, Mr Wilson's might have been made safe.

Secondly, it is said that Mr Wilson's plan would have depreciated the currency of India. And in this objection there is a certain correctness. *Every* substitution of a paper currency for a metallic currency is attended by a depreciation; in fact, a monetary depreciation is the precise process by which this substitution is effected. By no writer has this primary truth been better elucidated than by Ricardo. "If," he says, "a mine of gold were discovered in France or Eng-
"land, the currency of that country would be lowered in
"value in consequence of the increased quantity of the pre-
"cious metals brought into circulation, and would therefore
"no longer be of the same value as that of other countries.
"Gold and silver, whether in coin or in bullion, obeying the
"law which regulates all other commodities, would imme-
"diately become articles of exportation; they would leave
"the country where they were cheap for those countries
"where they were dear, and would continue to do so, as long
"as the mine should prove productive, and till the proportion
"existing between capital and money in each country before
"the discovery of the mine, were again established, and gold
"and silver restored everywhere to one value. In return
"for the gold exported, commodities would be imported;
"and though what is usually termed the balance of trade
"would be against the country exporting money or bullion,
"it would be evident that she was carrying on a most ad-
"vantageous trade, exporting that which was no way useful
"to her, for commodities which might be employed in the
"extension of her manufactures, and the increase of her
"wealth. If, instead of a mine being discovered in any coun-
"try, a bank were established, such as the Bank of England,
"with the power of issuing its notes for a circulating
"medium; after a large amount had been issued, either by
"way of loan to merchants, or by advances to Government,
"thereby adding considerably to the sum of the currency,
"the same effect would follow as in the case of the mine.
"The circulating medium would be lowered in value, and
"goods would experience a proportionate rise. The equili-
"brium between that and other nations would only be re-
"stored by the exportation of part of the coin. The esta-
"blishment of the bank, and the consequent issue of its
"notes, therefore, as well as the discovery of the mine,
"operate as an inducement to the exportation either of
"bullion, or of coin, and are beneficial only in as far as
"that object may be accomplished."

That the momentary depreciation of the currency is to some extent an evil is certain. But it is equally certain that it is the inevitable purchase money which we must pay for the advantage we wish to obtain. Gold and silver cannot be expelled from a country except by being made cheap there. A transitory variation in the value of the precious metals is the necessary price at which a country which has already a large metallic circulation can alone obtain the great and permanent economy of a paper one. There is no individual peculiarity in Mr Wilson's scheme which has ever been indicated as specially exposing it to the objection of producing depreciation. It is only open to that objection in the same degree and in the same manner as all other schemes which effect the coveted object are and must be open to it. It is painful to us to think that, on grounds which seem so feeble, so great a scheme as Mr Wilson's should have been relinquished, and with it the whole idea of economising the metallic currency of British India. Perhaps an equally great attempt has rarely been abandoned from doubts equally unfounded.

It *may*, however, be said that it has not been abandoned, —that the great object of obtaining the desired economy will be obtained by Mr Laing by another expedient. In England it has been frequently proposed that the limit of 14,000,000*l*, placed by the Act of 1844 on the issue of Bank of England notes, should be extended to 16,000,000*l*, or some higher sum; and it may be suggested that by an analogous act of legislation the 4,000,000*l* now fixed as the limit to the corresponding portion of the Indian paper currency may be extended to 8,000,000*l*, or some other sum. But though this may be theoretically said, we scarcely think it will practically be thought. In this country the framers of the Act of 1844, as well as its principal advocate, have ever been rigidly and consistently opposed to any extension of the limit of 14,000,000*l*. And so it will be in India. On the principle of the new measure there is no alternative. The sudden extension of the fixed limit is attended by the anticipated danger of depreciating the currency, and attended by it in an aggravated form. Under such a process as Mr Wilson proposed, the substitution of paper for coin would have been insensible and gradual; and, as he would never have used more than half the coin so set free, the variation in the value of silver would have been also gradual and insensible, —probably it would have been almost imperceptible in the common prices of ordinary commodities, and only felt in the refined operations of the foreign exchanges. Any way it would have been a slow and unalarming process. But the fixed limit is suddenly extended, if the limit which may be issued on securities is on a sudden raised from 4,000,000*l* to 8,000,000*l*. On a single day 4,000,000*l* of new money would be thrown *en masse* upon the money market, and the instantaneous effect would be serious and important. As we believe that even Mr Wilson's scheme has been abandoned from conscientious scruples of needless caution, we are sure that a sudden step so much more daring than anything which he proposed is not now contemplated, and will never be proposed. The express consent of the Legislative Council will be required for any extension of the limit, and even the fair discussion of its expediency might be at times dangerous in

the sensitive money market of Asiatic cities. As has been the case in this country, so it will be in India, the legislative limit first fixed for the issues unrepresented by bullion will probably be adhered to in perpetuity:—in other words, by the present plan nothing which is truly valuable will be really done.

Perhaps it may be said that the conductors of this journal are hardly impartial judges of the expediency or inexpediency of any plan of Mr Wilson's—least of all of this, to which it is known that he attached great value. Nevertheless, we believe that we can distinguish between our feelings and our judgment. For the foregoing reasons, we are sure that a great error has been committed, that a great task has been relinquished, that a high and statesmanlike duty will be left unperformed: we believe that the original scheme for introducing a paper currency into India would have been effectual, and would not have been dangerous: we believe that the substituted scheme will be entirely ineffectual; that if an unfortunate attempt is ever made to make it effective, it will be dangerous: we believe that, being a measure designed to augment and develop a paper currency, it has been assuredly modelled upon an Act designed to limit and restrict—and that most stringently—another currency of identically the same nature.

If the plan of Mr Laing be scrutinised with scientific accuracy, it is not exactly in conformity even with the principles of Sir R. Peel. It has the defects of Sir R. Peel's plan without the advantages. Sir R. Peel based his limit on the actual circulation of the Bank of England. Mr Laing bases his upon the legal and theoretical circulation of the Banks of India. By the last return the notes in circulation reach the following amounts:—

	Notes in Circulation. £
The Bank of Bengal	1,851,627
— Bombay	1,006,460
— Madras	223,512
	3,081,599

Yet Mr Laing's limit is 4,000,000*l.* Sir R. Peel took less than the real circulation; Mr Laing more, to the extent of the difference between the limit prescribed and the amount of the actual circulation. Mr Laing's plan is exposed to all the dangers which Sir R. Peel apprehended, and has none of the safeguards which Mr Wilson had provided.

RUPTURE BETWEEN THE EMPEROR AND THE CHURCH.

The rupture, more or less decided, which has taken place or is in progress between the Emperor of the French and the Gallican clergy is beyond question one of the hopeful symptoms of the day. It will serve the cause alike of pure religion, of civil freedom, and of a liberal policy abroad. There has been one feature observable in the relations between the Catholic Church in France and the various Governments which have succeeded one another, which has been as constant as it is significant. Our attention was called to it personally by M. Guizot some years ago, and it is commented upon with singular lucidity in the recently published correspondence of M. de Tocqueville. It is that any close connection or avowed friendship with the Administration has always been unfavourable to the religious influence of the clergy among their flocks; while on the other hand open or suspected antagonism has always placed that influence again in the ascendant. The explanation is simple enough, but should be carefully borne in mind by all who wish to understand the operation of social causes on the mass of the French nation. Broken in as the people have been for years to the ubiquitous interference and incessant control of a centralised administrative system, and trained as they are to being governed and ordered about in every action of their lives and at every moment of their time, the people are still profoundly penetrated with what it is customary to call "the ideas of 1789," or "the principles of the Revolution." Now, foremost among these ideas is the sentiment of *distrust*, in reference both to their temporal Government and to their Spiritual Rulers. Under the old *Régime*, which their cherished Revolution swept away, The Church and The Throne were, or or were believed to be, the combined enemies and oppressors of the people; mutual accomplices and tools; powers which conspired together to fleece them, to deceive them, to crush them. Hence the fact that whenever the clergy are in good odour and in close alliance with the powers that be, the French peasant mistrusts his *Curé* and shuts his heart against him:—whenever that *Curé* is at issue with the Government or persecuted by it, on the contrary, the peasant welcomes him with open arms, begins to believe in his sincerity, listens to his teaching with docility, seeks his religious ministrations with eagerness, and accepts them with real gratitude. Catholicism flourishes when Church and State quarrel; Voltairianism raises its head when they are reconciled and fraternise.

Thus it has always been. When the Revolution of 1789 had deprived the clergy of the power which they had so often abused and the wealth which they had so scandalously wasted, when the first reaction of fury against them had passed by, and still more when, under the Reign of Terror and the Reign of Licence which succeeded it, the priests became objects of aversion and of savage persecution to the men who had seized the powers of the State, these poor ministers of religion began to be sheltered and defended and honoured by the people. They bore persecution well—as they nearly always do: and by their patience, their zeal, their sufferings, their sincerity, and the simplicity and purity of their lives, they gradually and even rapidly won back their way to the hearts of men, who in those hard and dark times needed at once their guidance and their consolations. So that even before Bonaparte removed the proscription and permitted their return, priests were to be found in secret in nearly every commune, and religious sentiment and faith had begun to reassert their sway over a weary and disgusted generation.

But with the Concordat came another phase. The restored clergy, becoming the salaried servants of the State and the *authorised* expounders of the Christian creed, began to be looked upon with coolness and suspicion. Being the friends of the Government, they were believed to be its tools; being less independent, they were suspected of being less pure and honest; and their influence over the hearts of the people declined in proportion as their worldly position became more recognised and more comfortable. So that when the Government grew unpopular, they shared in its discredit; and instead of bringing it power by their alliance, that very alliance served only to weaken themselves and to alienate their flocks. Louis XVIII. was a wit and a freethinker, and though surrounded by, and compelled in a great degree to support the old *noblesse*, he entirely refused to place his Administration under the influence of the old Church, and by that very fact he aided its cause among the mass of the people: it became endeared to the cottage just because it was neither loved nor flattered in the palace. Charles X., on the contrary, placed himself entirely in the hands of the priests, and became their zealous and foolish tool; and from that moment scepticism and scoffing once more rose into ascendancy. The three years of his reign did the work almost of generations in discrediting genuine religion throughout France; they disgusted the educated classes, and sowed mistrust in the hearts of the ignorant. The priestly connection was one of the principal causes of his downfall; and his successor was well inclined, both by temper and by policy, to avoid the obvious pitfall. Louis Philippe's Government was essentially *secular*; the clergy took up a position of hostility from the very first day of his reign, and contributed greatly to their own influence and to the re-establishment of faith in the hearts of the nation by doing so. The long struggle between the Church and the State for the management of education, which continued nearly to the abdication of that Monarch, will be in the memory of all. The result of all this was that when the Revolution of 1848 surprised the world, France was fast becoming a genuinely Catholic and sincerely believing nation. The churches were filled as they had rarely been filled before, and they were filled by men as well as by women. Even in the army Christianity made some progress.

The influence of the clergy over the masses of the people having been thus re-established, Louis Napoleon prepared to use it for his own advancement; and the Church, which gives nothing for nothing, but at the same time scruples at no tool and refuses no step, was willing enough to lend itself to the installation of a power which it saw might be useful, and

which it fancied might be made dependent. But the crafty corporation met its match. The Emperor saw, perhaps more clearly than the priesthood, that the very clerical assistance and alliance which was employed to consolidate his throne, would be impaired and undermined by that very occupation, and that by making it useful he would thereby deprive it of the power of becoming dangerous. And this accordingly has been the result. Tho old story has been once more repeated. The clergy, becoming the allies and instruments of the Government, lost their hold over the confidence and the affections of the people, and Louis Napoleon, when they desired to thwart him, found that he could safely do without them. The quarrel will be of vast service to religion: Voltairianism will receive a check once more, and the Church, thrown back upon its innate resources and its spiritual vigour, will grow pure and strong once more.

But civil liberty will probably be as great a gainer as true Catholicism. The Emperor, having discarded one ally, will want another; having broken with Priestcraft, he must perforce, to some extent at least, cultivate Intelligence: the popularity which he has lost with the bigots, he must try to win with the progressive and the liberal. The clergy, too, having gone into opposition, will be disposed to join their forces with the other malcontents; and by the exigencies of political warfare may find themselves really aiding in the struggle for free speech and individual rights—in defiance alike of traditional practice and hereditary instincts.

By this rupture, too, the Emperor is set free to complete his inchoate policy in Italy. It was difficult for him, while at all dependent on the clerical party in France or obliged to keep terms and appearances with them, to carry out his plans for the de-secularisation of the Pope. *Now*, he is at liberty to remove the chief obstacle to the consolidation of the new Italian Kingdom, by the withdrawal of his troops from Rome. By doing so, he will still further confirm and stimulate the enthusiastic gratitude of the Italian People; he will greatly strengthen the hands and simplify the work of that monarch to whom he looks for an ally in a contest which, if not imminent, is certainly "looming";—and he will liberate and call home 20,000 troops who may be wanted elsewhere, and who have long felt themselves misplaced and humiliated at Rome. Truly, whatever we may think of the motives, the designs, or the talent of Napoleon, no one can deny that Providence has made him an instrument of much good, abroad if not in France.

THE COMMISSIONERS FROM MONTGOMERY AND THEIR MISSION.

The veil is not yet removed from Mr Lincoln's policy,—and eminent senators of the United States were engaged at the last advices in exchanging those dignified personalities on the subject, for which their debates are so remarkable. It seems to be generally believed that the President intends to abandon Fort Sumter to the South Carolinians, but to use all the force at his command to retain other United States' forts and property that he may think more tenable. But while Mr Lincoln deliberates, Mr Jefferson Davis acts. Besides pushing on with unusual promptitude the organisation of the Southern Army and the reinforcement of the Southern forts, he has imposed the agreeable task on Lord John Russell and M. de Thouvenel of explaining to three Southern Commissioners that, for the present at least, they must be regarded by foreign States as private persons,—able, doubtless, to communicate much that is interesting concerning the progress of events in the Southern States, but representatives of nothing that a Government can yet recognise. The Hon. W. L. Yancey and his friends are coming, we hear, in the expectation of a cordial reception and of an immediate success. But in England, at least, they will be disappointed. We cannot, of course, go on for ever on the diplomatic fiction that the Southern States are included in the Union, if they become independent. It has been our rule in all cases, after the lapse of a sufficient period to test the issue, to recognise *de facto* independence. But such time has not yet elapsed. It would be, in fact, an adhesion to the South for us to acknowledge its revolt before the United States' Government have even explained their policy, or shown in a single instance how they intend to deal with the contumacious States,—and a step not in us the more respectable, but the more thoroughly ignominious, on account of the selfish tariff policy of the North. Nor is there any danger of such a false step with our present rulers. The American fanatics who wish to persuade themselves that in England the coarsest self-interest overrules every other consideration, are crying out that we shall grasp at the bribe offered us by the more rational tariff of the South. But, in fact, it would be the insanest as well as the most immoral policy to permit this consideration to influence us at all. For what would it amount to? To this,—that it is better for English interests to establish an independent nation round the Gulf of Mexico adopting the double policy of Slavery and Free Trade,—than that the States round the Gulf should be incorporated in a Union hostile to the extension of Slavery, but more or less ruled by the foolish cry of Protection. Of course this alternative does not really rest with England,—but if it did, no sensible man can doubt how she would decide, even as a matter of pure interest. The deeper delusions of Protection can only be short-lived in an intelligent country. More or less they refute themselves. But the policy of slavery is insatiate:—give it what it asks, and it asks more. Let the Southern States be independent and active for another seven years, and they will be planning descents on Jamaica.

It is not for us, then, to deviate a hair's breadth from our usual course. Nay, even when it is generally acknowledged,—as no doubt sooner or later it will be,—that disunion is a *fait accompli*,—even then our acknowledgment of the Southern Confederation should be cautious and conditional. At present they have declared themselves against the Slave Trade. But never let it be forgotten that the very men who planned secession, planned it with the avowed purpose of reopening the Slave Trade. The Hon. W. L. Yancey, who is now delegated by Mr Jefferson Davis to negotiate a recognition with us, was the zealous, the shameless, the consistent advocate of its revival. He it was who contended against the injustice of a law which he described as saying:—"*You of the South shall not import Negroes from Africa, though you of the North may import Jackasses from Malta*,"—and doubtless it is his own and many of his colleagues' intention to agitate for the repeal of the restriction, so soon as they shall have consolidated in one Confederation as many States as they are able to tempt out of the old Union. At present they are consulting the scruples of the feeble-minded, deferring to the weaker consciences of Virginia and Kentucky. The ordinance against the Slave Trade is "milk for babes:" the meat will come later. Once let them see their way clear to independence and a Mexican extension, and then old-world scruples, as Mr Yancey calls them, will be cast to the winds. Therefore, we think that in recognising whenever we are compelled by common sense to recognise, the accomplished fact of their independence, we ought to give them fair warning that in case they ever repeal that ordinance, either actually or virtually, it will become a ground of serious difference with us:—that we are prepared to enter into a close compact with the Northern Union to put an end to this shameful traffic for ever,—and that their attempt to renew it, should they ever venture on it, would not be allowed to stand in our way.

THE PROSPECTS OF TAXATION.

It is not unnatural that there should be many speculations as to this year's Budget. The week or so before the Budget there are always many such. And this year there are peculiar reasons for an unusual number. The last Budget was a great and adventurous experiment; many unforeseen causes have interfered with the anticipated progress of that experiment: our taxation is to some extent in suspense, till we know how far that experiment has succeeded; till then we cannot know what new changes will be necessary. These are all reasons which make us inquisitive as to the future, and there is another which is quite as active. In the present state of the money market it is certainly not desirable to have a new disturbing cause, and some persons fear that this year's Budget may be such a cause.

We have no wish to incur the ridicule which Sir R. Peel used to cast so freely and so happily on American Chancellors of the Exchequer. We well know that the data for forming an elaborate Budget are not at this time of the year before the public; and even if they were, they would rather aid us in saying what ought, upon principle and theory, to

be done, than in predicting what Mr Gladstone or any other particular Chancellor of the Exchequer will really do. All we propose is to set down a very few facts in a very few sentences.

First, what was last year's Budget? It had, in the course of its progress, besides several minute changes, one great element eliminated and another great element added. Mr Gladstone was compelled by the House of Lords to retain the paper duty, and induced by the force of circumstances to propose a spirit duty.

The account of the year, so far as regards the taxes imposed and repealed by the last Budget, stands thus, taking Mr Gladstone's estimates, and for the present confining our attention to indirect taxation :—

	£	£
Indirect taxes repealed by original Budget at once	2,931,000	
Ditto prospectively	700,000	
		3,631,000
Sundry taxes imposed by the first Budget, allowing for £180,000, which were abandoned	802,000	
Spirit duty, Excise imposed by second Budget	1,000,000	
Customs	400,000	
		2,202,000
Showing a balance of		1,429,000

that being the calculated excess of taxes repealed over taxes imposed.

We are far, however, from saying that these figures represent the real state of the case. There are many circumstances which modify them, some favourable and some unfavourable.

In the first place, these figures give the entire duties relinquished, not deducting anything for the increased revenue consequent on increased consumption of the particular articles affected, or on the general and ordinary increase in the consumption of the country. As to the stimulus given by the late changes we must leave Mr Gladstone to speak in detail, but any one who examines the Customs returns will find out (as we have before pointed out) that notwithstanding many unfavourable circumstances the 'elasticity' of the Customs revenue is still very apparent. It has long been increasing at the rate, speaking roughly, of 4 per cent. a year, and it seems to be still increasing at that rate. We may be sure that there will be 800,000*l* or 900,000*l* to the *credit* of the above account in consequence of this augmentation.

There will be a great deal else to the debit. The bad barley harvest has unfavourably affected the trades dependent on it; and the revenue has suffered in consequence. The increase of the duty would seem (though on this point it is very difficult to give an opinion without more data than are at present known to the public) to have diminished the consumption of spirits to a greater extent than was expected, and the high price of provisions must have made itself felt here as everywhere; consequently the 1,400,000*l* which was expected from the new spirit duty must, we should fear, be much diminished.
